PURPOSE AND VISION

This section sets out the purpose of this planning scheme, and the vision and strategic direction for the municipality.
PURPOSES OF THIS PLANNING SCHEME

- To provide a clear and consistent framework within which decisions about the use and development of land can be made.
- To express state, regional, local and community expectations for areas and land uses.
- To provide for the implementation of State, regional and local policies affecting land use and development.
SETTLEMENT

Planning is to anticipate and respond to the needs of existing and future communities through provision of zoned and serviced land for housing, employment, recreation and open space, commercial and community facilities and infrastructure.

Planning is to recognise the need for, and as far as practicable contribute towards:

- Health, wellbeing and safety.
- Diversity of choice.
- Adaptation in response to changing technology.
- Economic viability.
- A high standard of urban design and amenity.
- Energy efficiency.
- Prevention of pollution to land, water and air.
- Protection of environmentally sensitive areas and natural resources.
- Accessibility.
- Land use and transport integration.

Planning is to prevent environmental and amenity problems created by siting incompatible land uses close together.

Planning is to facilitate sustainable development that takes full advantage of existing settlement patterns and investment in transport, utility, social, community and commercial infrastructure and services.
Settlement

Objective

To promote the sustainable growth and development of Victoria and deliver choice and opportunity for all Victorians through a network of settlements.

Strategies

Develop sustainable communities through a settlement framework offering convenient access to jobs, services, infrastructure and community facilities.

Focus investment and growth in places of state significance in Metropolitan Melbourne and the major regional cities of Ballarat, Bendigo, Geelong, Horsham, Latrobe City, Mildura, Shepparton, Wangaratta, Warrnambool and Wodonga.

Ensure regions and their settlements are planned in accordance with their relevant regional growth plan.

Guide the structure, functioning and character of each settlement taking into account municipal and regional contexts and frameworks.

Create and reinforce settlement boundaries.

Provide for growth in population and development of facilities and services across a regional or sub-regional network.

Plan for development and investment opportunities along existing and planned transport infrastructure.

Promote transport, communications and economic linkages between settlements through the identification of servicing priorities in regional land use plans.

Strengthen transport links on national networks for the movement of commodities.

Deliver networks of high-quality integrated settlements that have a strong identity and sense of place, are prosperous and are sustainable by:

- Building on strengths and capabilities of each region across Victoria to respond sustainably to population growth and changing environments.
- Developing settlements that will support resilient communities and their ability to adapt and change.
- Balancing strategic objectives to achieve improved land use and development outcomes at a regional, catchment and local level.
- Preserving and protecting features of rural land and natural resources and features to enhance their contribution to settlements and landscapes.
- Encouraging an integrated planning response between settlements in regions and in adjoining regions and states in accordance with the relevant regional growth plan.
- Providing for appropriately located supplies of residential, commercial, and industrial land across a region, sufficient to meet community needs in accordance with the relevant regional growth plan.
- Improving transport network connections in and between regional cities, towns and Melbourne.

Encourage a form and density of settlements that supports sustainable transport to reduce greenhouse gas emissions.

Limit urban sprawl and direct growth into existing settlements.
Promote and capitalise on opportunities for urban renewal and infill redevelopment.
Develop compact urban areas that are based around existing or planned activity centres to maximise accessibility to facilities and services.
Ensure retail, office-based employment, community facilities and services are concentrated in central locations.
Ensure land that may be required for future urban expansion is not compromised.

Policy documents
Consider as relevant:
- Central Highlands Regional Growth Plan (Victorian Government, 2014)
- G21 Regional Growth Plan (Geelong Region Alliance, 2013)
- Gippsland Regional Growth Plan (Victorian Government, 2014)
- Great South Coast Regional Growth Plan (Victorian Government, 2014)
- Hume Regional Growth Plan (Victorian Government, 2014)
- Loddon Mallee North Regional Growth Plan (Victorian Government, 2014)
- Loddon Mallee South Regional Growth Plan (Victorian Government, 2014)
- Wimmera Southern Mallee Regional Growth Plan (Victorian Government, 2014)
11.01-1R Settlement - Loddon Mallee North

Strategies

Facilitate growth of Mildura as the regional city, through planned development incorporating the nearby settlements of Red Cliffs, Irymple and Merbein, and encourage urban consolidation, particularly in the Central Business District.

Plan for and facilitate growth of Echuca and Swan Hill as regional centres and important tourism destinations while considering population change and settlement planning in New South Wales.

Support stronger relationships between the region and communities of interest in southern New South Wales, South Australia and adjoining Victorian regions.

Support the continued development of commuter towns to provide affordable housing for commuters to Bendigo, Echuca and Shepparton.

Provide a suitable range of commercial and industrial precincts in the regional city, regional centres and towns recognising each settlement’s role in their community of interest, including cross-border and inter-regional access for economic development.

Avoid growth and development in Mildura that may compromise the future operation or potential for expansion of Mildura Airport.

Support incremental expansion of Swan Hill and the provision of infrastructure to facilitate growth, including improvements to transport infrastructure to service regional industries.
Loddon Mallee North Regional Growth Plan

SETTLEMENT NETWORK

- Regional city
- Regional centre
- Town

ECONOMIC

- Significant tourist area - includes some significant cultural heritage places and landscapes
- Solar generation facility
- Irrigation district
- Cropping, grazing and mixed farming

CONNECTIVITY

- Highway
- Active railway line
- Airport

ENVIRONMENT

- Areas containing high value terrestrial habitat
- Public land
- Lakes
- Rivers

- Urban flood considerations
- Urban bushfire considerations
- Urban salinity considerations

Notes:
1. Urban flood and salinity considerations are based on existing overlays.
2. Bushfire considerations may be based on one or more of the following existing overlays, subject to the CBA or Regional Bushfire Planning Assessments. Does not include Bushfire prone Areas.
Supply of urban land

Objective
To ensure a sufficient supply of land is available for residential, commercial, retail, industrial, recreational, institutional and other community uses.

Strategies
Ensure the ongoing provision of land and supporting infrastructure to support sustainable urban development.

Ensure that sufficient land is available to meet forecast demand.

Plan to accommodate projected population growth over at least a 15 year period and provide clear direction on locations where growth should occur. Residential land supply will be considered on a municipal basis, rather than a town-by-town basis.

Planning for urban growth should consider:

- Opportunities for the consolidation, redevelopment and intensification of existing urban areas.
- Neighbourhood character and landscape considerations.
- The limits of land capability and natural hazards and environmental quality.
- Service limitations and the costs of providing infrastructure.

Monitor development trends and land supply and demand for housing and industry.

Maintain access to productive natural resources and an adequate supply of well-located land for energy generation, infrastructure and industry.

Restrict rural residential development that would compromise future development at higher densities.

Policy guidelines
Consider as relevant:

- Victorian Government population projections and land supply estimates.
11.02-2S

Structure planning

Objective
To facilitate the orderly development of urban areas.

Strategies
Ensure effective planning and management of the land use and development of an area through the preparation of relevant plans.

Undertake comprehensive planning for new areas as sustainable communities that offer high-quality, frequent and safe local and regional public transport and a range of local activities for living, working and recreation.

Facilitate the preparation of a hierarchy of structure plans or precinct structure plans that:

- Take into account the strategic and physical context of the location.
- Provide the broad planning framework for an area as well as the more detailed planning requirements for neighbourhoods and precincts, where appropriate.
- Provide for the development of sustainable and liveable urban areas in an integrated manner.
- Assist the development of walkable neighbourhoods.
- Facilitate the logical and efficient provision of infrastructure.
- Facilitate the use of existing infrastructure and services.
Sequencing of development

Objective
To manage the sequence of development in areas of growth so that services are available from early in the life of new communities.

Strategies
Define preferred development sequences in areas of growth to better coordinate infrastructure planning and funding.

Ensure that new land is released in areas of growth in a timely fashion to facilitate coordinated and cost-efficient provision of local and regional infrastructure.

Require new development to make a financial contribution to the provision of infrastructure such as community facilities, public transport and roads.

Improve the coordination and timing of infrastructure and service delivery in areas of growth.

Support opportunities to co-locate facilities.

Ensure that planning for water supply, sewerage and drainage works receives high priority in early planning for areas of growth.

Policy documents
Consider as relevant:

- Any applicable Growth Area Framework Plans (Department of Sustainability and Environment, 2006)
- Precinct Structure Planning Guidelines (Growth Areas Authority, 2009)
- Ministerial Direction No. 12 – Urban Growth Areas
- The Victorian Transport Plan (Victorian Government, 2008)
Activity centres

Objective
To encourage the concentration of major retail, residential, commercial, administrative, entertainment and cultural developments into activity centres that are highly accessible to the community.

Strategies
Build up activity centres as a focus for high-quality development, activity and living by developing a network of activity centres that:

- Comprises a range of centres that differ in size and function.
- Is a focus for business, shopping, working, leisure and community facilities.
- Provides different types of housing, including forms of higher density housing.
- Is connected by transport.
- Maximises choices in services, employment and social interaction.

Support the role and function of each centre in the context of its classification, the policies for housing intensification, and development of the public transport network.

Undertake strategic planning for the use and development of land in and around activity centres.

Give clear direction on preferred locations for investment.

Encourage a diversity of housing types at higher densities in and around activity centres.

Reduce the number of private motorised trips by concentrating activities that generate high numbers of (non-freight) trips in highly accessible activity centres.

Improve access by walking, cycling and public transport to services and facilities.

Support the continued growth and diversification of activity centres to give communities access to a wide range of goods and services, provide local employment and support local economies.

Encourage economic activity and business synergies.

Improve the social, economic and environmental performance and amenity of activity centres.

Policy documents
Consider as relevant:

- *Precinct Structure Planning Guidelines* (Growth Areas Authority, 2009)
Growth areas

Objective
To locate urban growth close to transport corridors and services and provide efficient and effective infrastructure to create sustainability benefits while protecting primary production, major sources of raw materials and valued environmental areas.

Strategies
Concentrate urban expansion into growth areas that are served by high-capacity public transport. Implement the strategic directions in the Growth Area Framework Plans.
Encourage average overall residential densities in the growth areas of a minimum of 15 dwellings per net developable hectare, and over time, seek an overall increase in residential densities to more than 20 dwellings per net developable hectare.
Deliver timely and adequate provision of public transport and local and regional infrastructure and services, in line with a preferred sequence of land release.
Provide for significant amounts of local employment opportunities and in some areas, provide large scale industrial or other more regional employment generators.
Create a network of mixed-use activity centres that are high quality, well designed and create a sense of place.
Provide a diversity of housing type and distribution.
Retain unique characteristics of established areas impacted by growth.
Protect and manage natural resources and areas of heritage, cultural and environmental significance.
Create well planned, easy to maintain and safe streets and neighbourhoods that reduce opportunities for crime, improve perceptions of safety and increase levels of community participation.
Develop Growth Area Framework Plans that will:
- Include objectives for each growth area.
- Identify the long term pattern of urban growth.
- Identify the location of broad urban development types, for example activity centre, residential, employment, freight centres and mixed use employment.
- Identify the boundaries of individual communities, landscape values and, as appropriate, the need for discrete urban breaks and how land uses in these breaks will be managed.
- Identify transport networks and options for investigation, such as future railway lines and stations, freight activity centres, freeways and arterial roads.
- Identify the location of open space to be retained for recreation, and/or biodiversity protection and/or flood risk reduction purposes guided and directed by regional biodiversity conservation strategies.
- Show significant waterways as opportunities for creating linear trails, along with areas required to be retained for biodiversity protection and/or flood risk reduction purposes.
- Identify appropriate uses for constrained areas, including quarry buffers.
Develop precinct structure plans consistent with the Precinct Structure Planning Guidelines (Growth Areas Authority, 2009) approved by the Minister for Planning to:
- Establish a sense of place and community.
- Create greater housing choice, diversity and affordable places to live.
- Create highly accessible and vibrant activity centres.
- Provide for local employment and business activity.
- Provide better transport choices.
- Respond to climate change and increase environmental sustainability.
- Deliver accessible, integrated and adaptable community infrastructure.

**Policy documents**

Consider as relevant:

- Any applicable Growth Area Framework Plans (Department of Sustainability and Environment, 2006)
- *Precinct Structure Planning Guidelines* (Growth Areas Authority, 2009)
- *Ministerial Direction No. 12 – Urban Growth Areas*
Peri-urban areas

Objective

To manage growth in peri-urban areas to protect and enhance their identified valued attributes.

Strategies

Identify and protect areas that are strategically important for the environment, biodiversity, landscape, open space, water, agriculture, energy, recreation, tourism, environment, cultural heritage, infrastructure, extractive and other natural resources.

Provide for development in established settlements that have capacity for growth having regard to complex ecosystems, landscapes, agricultural and recreational activities including in Warragul-Drouin, Bacchus Marsh, Torquay-Jan Juc, Gisborne, Kyneton, Wonthaggi, Kilmore, Broadford, Seymour and Ballan and other towns identified by Regional Growth Plans as having potential for growth.

Establish growth boundaries for peri-urban towns to avoid urban sprawl and protect agricultural land and environmental assets.

Enhance the character, identity, attractiveness and amenity of peri-urban towns.

Prevent dispersed settlement and provide for non-urban breaks between urban areas.

Ensure development is linked to the timely and viable provision of physical and social infrastructure.

Improve connections to regional and metropolitan transport services.
Coastal settlement

Objective
To plan for sustainable coastal development.

Strategies
Plan and manage coastal population growth and increased visitation so that impacts do not cause unsustainable use of coastal resources.
Support a network of diverse coastal settlements that provide for a broad range of housing types, economic opportunities and services.
Encourage urban renewal and redevelopment opportunities in existing settlements to reduce the demand for urban sprawl.
Identify a clear settlement boundary around coastal settlements to ensure that growth in coastal areas is planned and coastal values are protected. Where no settlement boundary is identified, the extent of a settlement is defined by the extent of existing urban zoned land and any land identified on a plan in the planning scheme for future urban settlement.
Direct new residential and other urban development and infrastructure to locations within defined settlement boundaries of existing settlements that are capable of accommodating growth.
Support the sustainable management of growth around coastal, estuary and marine assets to protect environmental values, and to achieve regional economic and community benefits.
Avoid linear urban sprawl along the coastal edge and ribbon development in rural landscapes.
Protect areas between settlements for non-urban use.
Avoid development on ridgelines, primary coastal dune systems and low lying coastal areas.
Encourage the restructure of old and inappropriate subdivisions to reduce development impacts on the environment.
Ensure a sustainable water supply, stormwater and sewerage treatment for all development.
Minimise the quantity and enhance the quality of stormwater discharge from new development into the ocean, bays and estuaries.

Policy documents
Consider as relevant:

- Victorian Coastal Strategy (Victorian Coastal Council, 2014)
- G21 Regional Growth Plan (Geelong Region Alliance, 2013)
- Gippsland Regional Growth Plan (Victorian Government, 2014)
- Great South Coast Regional Growth Plan (Victorian Government, 2014)
Distinctive areas and landscapes

Objective
To protect and enhance the valued attributes of identified distinctive areas and landscapes.

Strategies
Recognise the significant geographic and physical features of these areas.
Recognise the important role these areas play in the state as tourist destinations.
Protect the identified key values and activities of these areas.
Support use and development where it enhances the valued characteristics of these areas.
Avoid use and development that could undermine the long-term natural or non-urban use of land in these areas.
Protect areas that are important for food production.
Develop Localised Planning Statements for the Bellarine Peninsula, Macedon Ranges, Mornington Peninsula and the Yarra Valley and Dandenong Ranges.

Policy documents
Consider as relevant:
Regional and local places

Objective
To facilitate integrated place-based planning.

Strategies
Integrate relevant planning considerations to provide specific direction for the planning of sites, places, neighbourhoods and towns.
Consider the distinctive characteristics and needs of regional and local places in planning for future land use and development.
ENVIRONMENTAL AND LANDSCAPE VALUES

Planning should help to protect the health of ecological systems and the biodiversity they support (including ecosystems, habitats, species and genetic diversity) and conserve areas with identified environmental and landscape values.

Planning must implement environmental principles for ecologically sustainable development that have been established by international and national agreements. Foremost amongst the national agreements is the Intergovernmental Agreement on the Environment, which sets out key principles for environmental policy in Australia. Other agreements include the National Strategy for Ecologically Sustainable Development, National Greenhouse Strategy, the National Water Quality Management Strategy, the National Strategy for the Conservation of Australia’s Biological Diversity, the National Forest Policy Statement and National Environment Protection Measures.

Planning should protect, restore and enhance sites and features of nature conservation, biodiversity, geological or landscape value.
Protection of biodiversity

Objective
To assist the protection and conservation of Victoria’s biodiversity.

Strategies
Use biodiversity information to identify important areas of biodiversity, including key habitat for rare or threatened species and communities, and strategically valuable biodiversity sites.
Strategically plan for the protection and conservation of Victoria’s important areas of biodiversity.
Ensure that decision making takes into account the impacts of land use and development on Victoria’s biodiversity, including consideration of:

- Cumulative impacts.
- Fragmentation of habitat.
- The spread of pest plants, animals and pathogens into natural ecosystems.

Avoid impacts of land use and development on important areas of biodiversity.
Consider impacts of any change in land use or development that may affect the biodiversity value of national parks and conservation reserves or nationally and internationally significant sites; including wetlands and wetland wildlife habitat designated under the Convention on Wetlands of International Importance (the Ramsar Convention) and sites utilised by species listed under the Japan-Australia Migratory Birds Agreement (JAMBA), the China-Australia Migratory Birds Agreement (CAMBA), or the Republic of Korea-Australia Migratory Bird Agreement (ROKAMBA).

Assist in the identification, protection and management of important areas of biodiversity.
Assist in the establishment, protection and re-establishment of links between important areas of biodiversity, including through a network of green spaces and large-scale native vegetation corridor projects.

Policy guidelines
Consider as relevant:
- State biodiversity information maintained by the Department of Environment, Land, Water and Planning.

Policy documents
Consider as relevant:
- Protecting Victoria’s Environment – Biodiversity 2037 (Department of Environment, Land, Water and Planning, 2017)
- Guidelines for the removal, destruction or lopping of native vegetation (Department of Environment, Land, Water and Planning, 2017)
- Any applicable biodiversity strategies, including the relevant Regional Catchment Strategy (prepared under Part 4 of the Catchment and Land Protection Act 1994)
Native vegetation management

Objective
To ensure that there is no net loss to biodiversity as a result of the removal, destruction or lopping of native vegetation.

Strategies
Ensure decisions that involve, or will lead to, the removal, destruction or lopping of native vegetation, apply the three-step approach in accordance with the Guidelines for the removal, destruction or lopping of native vegetation (Department of Environment, Land, Water and Planning, 2017):

- Avoid the removal, destruction or lopping of native vegetation.
- Minimise impacts from the removal, destruction or lopping of native vegetation that cannot be avoided.
- Provide an offset to compensate for the biodiversity impact from the removal, destruction or lopping of native vegetation.

Policy guidelines
Consider as relevant:

- State biodiversity information maintained by the Department of Environment, Land, Water and Planning.

Policy documents
Consider as relevant:

- Guidelines for the removal, destruction or lopping of native vegetation (Department of Environment, Land, Water and Planning, 2017)
- Assessor’s handbook – applications to remove, destroy or lop native vegetation (Department of Environment, Land, Water and Planning, 2017)
Protection of coastal areas

Objective
To recognise the value of coastal areas to the community, conserve and enhance coastal areas and ensure sustainable use of natural coastal resources.

Strategies
Coordinate land use and planning with the requirements of the Coastal Management Act 1995 to:

- Provide clear direction for the future sustainable use of the coast, including the marine environment, for recreation, conservation, tourism, commerce and similar uses in appropriate areas.
- Protect and maintain areas of environmental significance.
- Identify suitable areas and opportunities for improved facilities.

Apply the hierarchy of principles for coastal planning and management:

- Principle 1: Ensure the protection of significant environmental and cultural values.
- Principle 2: Undertake integrated planning and provide clear direction for the future.
- Principle 3: Ensure the sustainable use of natural coastal resources.
- Principle 4: Ensure development on the coast is located in existing modified and resilient environments where the demand for development is evident and any impacts can be managed sustainably.

Plan for marine development and infrastructure that is sensitive to marine national parks and environmental assets.

Ensure development protects and seeks to enhance coastal biodiversity and ecological values.

Ensure development is sensitively sited and designed and respects the character of coastal settlements.

Encourage revegetation of cleared land abutting coastal reserves.

Maintain the natural drainage patterns, water quality and biodiversity in and adjacent to coastal estuaries, wetlands and waterways.

Avoid disturbance of coastal acid sulfate soils.

Protect cultural heritage places, including Aboriginal places, archaeological sites and historic shipwrecks.

Policy guidelines
Consider as relevant:

- Any applicable coastal action plan or management plan approved under the Coastal Management Act 1995 or National Parks Act 1975.

Policy documents
Consider as relevant:

- Victorian Coastal Strategy (Victorian Coastal Council, 2014)
- Coastal Spaces Landscape Assessment Study (Department of Sustainability and Environment, 2006)
Coastal Crown land

Objective
To achieve coastal crown land development that provides an environmental, social and economic balance.

Strategies
Ensure that use and development on or adjacent to coastal foreshore Crown land:

- Maintains safe, equitable public access and improves public benefit.
- Protects local environmental and social values.
- Demonstrates need and coastal dependency.
- Minimises impact on the coast by locating within a defined activity or recreation node.

Policy guidelines
Consider as relevant:

- The purpose for which land is reserved under the Crown Land (Reserves) Act 1978.
- Any relevant coastal action plan or management plan approved under the Coastal Management Act 1995 or National Parks Act 1975.

Policy documents
Consider as relevant:

- Victorian Coastal Strategy (Victorian Coastal Council, 2014)
Bays

Objective
To improve the environmental health of Port Phillip Bay and Western Port and their catchments.

Strategies
Reduce major environmental pressures associated with urban growth and development in Port Phillip Bay and Western Port catchments by:

- Requiring growth area planning to protect significant natural assets.
- Improving the quality of stormwater entering waterways, particularly from construction sites and road development.

Improve waterway management arrangements for Port Phillip Bay and Western Port catchments.

Protect coastal and foreshore environments and improve public access and recreation facilities around Port Phillip Bay and Western Port by:

- Focussing development in areas already developed or in areas that can tolerate more intensive use.
- Requiring coastal planning and management to be consistent with the *Victorian Coastal Strategy* (Victorian Coastal Council, 2014).
- Managing privately owned foreshore consistently with the adjoining public land.

Policy documents
Consider as relevant:

- *Victorian Coastal Strategy* (Victorian Coastal Council, 2014)
River corridors, waterways, lakes and wetlands

Objective
To protect and enhance river corridors, waterways, lakes and wetlands.

Strategies
Protect the environmental, cultural and landscape values of all water bodies and wetlands.

Ensure development responds to and respects the significant environmental, conservation, cultural, aesthetic, open space, recreation and tourism assets of water bodies and wetlands.

Ensure development is sensitively designed and sited to maintain and enhance environmental assets, significant views and landscapes along river corridors and waterways and adjacent to lakes and wetlands.

Ensure development does not compromise bank stability, increase erosion or impact on a water body or wetland’s natural capacity to manage flood flow.

Protect the Yarra, Maribyrnong and Murray River corridors as significant economic, environmental and cultural assets.

Facilitate growth in established settlements where water and wastewater can be managed.

Policy documents
Consider as relevant:

- Maribyrnong River Valley Design Guidelines (Department of Planning and Community Development, 2010)
- Melbourne Water’s Guidelines for Approval of Jetties (Melbourne Water, 2011)
- Healthy Waterways Strategy (Melbourne Water, 2013)
Sustainable development in alpine areas

Objective
To facilitate sustainable use and development of Alpine areas for year-round use and activity.

Strategies
Protect and manage significant environmental features and ecosystems, taking into account the sensitive and fragile nature of the alpine environment.

Ensure that the use and development of land is managed to minimise the disturbance of indigenous flora and fauna and sensitive landscapes.

Ensure that there is a mixture of use and development to cater for users of alpine areas in all seasons.

Recognise the distinct environments, infrastructure needs and capabilities to support different activities of each alpine resort and other alpine areas.

Provide for the development of consolidated alpine villages, including a diverse range of employment, social and economic opportunities.

Promote development for active recreation solely at Falls Creek, Lake Mountain, Mt Buffalo, Mt Baw Baw, Mt Buller and Mt Hotham.

Promote intensive residential and commercial development at Falls Creek, Mt Baw Baw, Mt Buller and Mt Hotham.

Maintain Mt Stirling as an all-season nature based tourist, recreational and educational resource.

Ensure that the sustainable long term planning and management of Victoria’s six alpine resorts is consistent with the strategic directions contained in the Alpine Resorts Strategic Plan (Victorian Government, Alpine Resorts Co-ordinating Council, 2012).

Develop, monitor and regularly review the Alpine Resort Environmental Management Plans and Comprehensive Development Plans for each alpine resort, recognising their unique characteristics, constraints and opportunities.

Encourage best practice in design that responds to the alpine character of the area.

Ensure heritage places are protected and conserved, including Aboriginal cultural heritage and post contact heritage places.

Ensure that increases in skier, pedestrian and vehicular activity in the resorts do not compromise public safety or the accessibility and capacity of ski fields, services, commercial activity and development of trailheads.

Implement approved plans, manage development and work with Alpine Resort Management Boards to effectively operate alpine resorts and protect alpine resources.

Policy guidelines
Consider as relevant:
- Any applicable approved Victorian Environmental Assessment Council recommendations.
- Any relevant State Environment Protection Policy.
- Any approved management plan or guideline endorsed by the Minister for Energy, Environment and Climate Change or Minister for Water.

Policy documents
Consider as relevant:
- Alpine Resorts Strategic Plan (Victorian Government, Alpine Resorts Co-ordinating Council, 2012)
- The Memorandum of Understanding in relation to the Co-operative Management of the Australian Alps National Parks, agreed to by the member states and territories of Victoria, Australian Capital Territory and New South Wales
Environmentally sensitive areas

Objective

To protect and conserve environmentally sensitive areas.

Strategies

Protect environmentally sensitive areas with significant recreational value from development that would diminish their environmental conservation or recreational values. These areas include the Dandenong and Macedon Ranges, the Upper Yarra Valley, Western Port and Port Phillip Bay and their foreshores, the Mornington Peninsula, the Yarra and Maribyrnong Rivers and the Merri Creek, the Grampians, the Gippsland Lakes and its foreshore, the coastal areas and their foreshores, Alpine areas and nominated urban conservation areas, historic buildings and precincts.
**Landscapes**

**Objective**

To protect and enhance significant landscapes and open spaces that contribute to character, identity and sustainable environments.

**Strategies**

Ensure significant landscape areas such as forests, the bays and coastlines are protected.

Ensure development does not detract from the natural qualities of significant landscape areas.

Improve the landscape qualities, open space linkages and environmental performance in significant landscapes and open spaces, including green wedges, conservation areas and non-urban areas.

Recognise the natural landscape for its aesthetic value and as a fully functioning system.

Ensure important natural features are protected and enhanced.
ENVIRONMENTAL RISKS AND AMENITY

Planning should strengthen the resilience and safety of communities by adopting a best practice environmental management and risk management approach.

Planning should aim to avoid or minimise natural and human-made environmental hazards, environmental degradation and amenity conflicts.

Planning should identify and manage the potential for the environment and environmental changes to impact on the economic, environmental or social wellbeing of society.

Planning should ensure development and risk mitigation does not detrimentally interfere with important natural processes.

Planning should prepare for and respond to the impacts of climate change.
Natural hazards and climate change

Objective
To minimise the impacts of natural hazards and adapt to the impacts of climate change through risk-based planning.

Strategies
Consider the risks associated with climate change in planning and management decision making processes.
Identify at risk areas using the best available data and climate change science.
Integrate strategic land use planning with emergency management decision making.
Direct population growth and development to low risk locations.
Develop adaptation response strategies for existing settlements in risk areas to accommodate change over time.
Ensure planning controls allow for risk mitigation or risk adaptation strategies to be implemented.
Site and design development to minimise risk to life, property, the natural environment and community infrastructure from natural hazards.
Coastal inundation and erosion

Objective

To plan for and manage the potential coastal impacts of climate change.

Strategies

Plan for sea level rise of not less than 0.8 metres by 2100 and allow for the combined effects of tides, storm surges, coastal processes and local conditions such as topography and geology when assessing risks and coastal impacts associated with climate change.

In planning for sea level rise, an increase of 0.2 metres over current 1 in 100 year flood levels by 2040 may be used for new development in close proximity to existing development (urban infill).

Ensure that land subject to coastal hazards is identified and appropriately managed to ensure that future development is not at risk.

Ensure that development or protective works that seek to respond to coastal hazard risks avoid detrimental impacts on coastal processes.

Avoid development in identified coastal hazard areas susceptible to inundation (both river and coastal), erosion, landslip/landslide, acid sulfate soils, bushfire and geotechnical risk.

Policy guidelines

Consider as relevant:

- Any applicable Land Conservation Council recommendations.
- Any applicable coastal action plan or management plan approved under the Coastal Management Act 1995 or National Parks Act 1975.

Policy documents

Consider as relevant:

- Victorian Coastal Strategy (Victorian Coastal Council, 2014)
Bushfire planning

Policy application

This policy must be applied to all planning and decision making under the Planning and Environment Act 1987 relating to land that is:

- Within a designated bushfire prone area;
- Subject to a Bushfire Management Overlay; or
- Proposed to be used or developed in a way that may create a bushfire hazard.

Objective

To strengthen the resilience of settlements and communities to bushfire through risk-based planning that prioritises the protection of human life.

Strategies

Protection of human life

Give priority to the protection of human life by:

- Prioritising the protection of human life over all other policy considerations.
- Directing population growth and development to low risk locations and ensuring the availability of, and safe access to, areas where human life can be better protected from the effects of bushfire.
- Reducing the vulnerability of communities to bushfire through the consideration of bushfire risk in decision making at all stages of the planning process.

Bushfire hazard identification and assessment

Identify bushfire hazard and undertake appropriate risk assessment by:

- Applying the best available science to identify vegetation, topographic and climatic conditions that create a bushfire hazard.
- Considering the best available information about bushfire hazard including the map of designated bushfire prone areas prepared under the Building Act 1993 or regulations made under that Act.
- Applying the Bushfire Management Overlay to areas where the extent of vegetation can create an extreme bushfire hazard.
- Considering and assessing the bushfire hazard on the basis of:
  - Landscape conditions - meaning conditions in the landscape within 20 kilometres (and potentially up to 75 kilometres) of a site;
  - Local conditions - meaning conditions in the area within approximately 1 kilometre of a site;
  - Neighbourhood conditions - meaning conditions in the area within 400 metres of a site; and
  - The site for the development.
- Consulting with emergency management agencies and the relevant fire authority early in the process to receive their recommendations and implement appropriate bushfire protection measures.
- Ensuring that strategic planning documents, planning scheme amendments, planning permit applications and development plan approvals properly assess bushfire risk and include appropriate bushfire protection measures.
- Not approving development where a landowner or proponent has not satisfactorily demonstrated that the relevant policies have been addressed, performance measures satisfied or bushfire protection measures can be adequately implemented.
**Settlement planning**

Plan to strengthen the resilience of settlements and communities and prioritise protection of human life by:

- Directing population growth and development to low risk locations, being those locations assessed as having a radiant heat flux of less than 12.5 kilowatts/square metre under *AS 3959-2009 Construction of Buildings in Bushfire-prone Areas* (Standards Australia, 2009).

- Ensuring the availability of, and safe access to, areas assessed as a BAL-LOW rating under *AS 3959-2009 Construction of Buildings in Bushfire-prone Areas* (Standards Australia, 2009) where human life can be better protected from the effects of bushfire.

- Ensuring the bushfire risk to existing and future residents, property and community infrastructure will not increase as a result of future land use and development.

- Achieving no net increase in risk to existing and future residents, property and community infrastructure, through the implementation of bushfire protection measures and where possible reducing bushfire risk overall.

- Assessing and addressing the bushfire hazard posed to the settlement and the likely bushfire behaviour it will produce at a landscape, settlement, local, neighbourhood and site scale, including the potential for neighbourhood-scale destruction.

- Assessing alternative low risk locations for settlement growth on a regional, municipal, settlement, local and neighbourhood basis.

- Not approving any strategic planning document, local planning policy, or planning scheme amendment that will result in the introduction or intensification of development in an area that has, or will on completion have, more than a BAL-12.5 rating under *AS 3959-2009 Construction of Buildings in Bushfire-prone Areas* (Standards Australia, 2009).

**Areas of biodiversity conservation value**

Ensure settlement growth and development approvals can implement bushfire protection measures without unacceptable biodiversity impacts by discouraging settlement growth and development in bushfire affected areas that are important areas of biodiversity.

**Use and development control in a Bushfire Prone Area**

In a bushfire prone area designated in accordance with regulations made under the *Building Act 1993*, bushfire risk should be considered when assessing planning applications for the following uses and development:

- Subdivisions of more than 10 lots.

- Accommodation.

- Child care centre.

- Education centre.

- Emergency services facility.

- Hospital.

- Indoor recreation facility.

- Major sports and recreation facility.

- Place of assembly.

- Any application for development that will result in people congregating in large numbers.

When assessing a planning permit application for the above uses and development:

- Consider the risk of bushfire to people, property and community infrastructure.
Require the implementation of appropriate bushfire protection measures to address the identified bushfire risk.

Ensure new development can implement bushfire protection measures without unacceptable biodiversity impacts.

Policy guidelines
Consider as relevant:

- Any applicable approved state, regional and municipal fire prevention plan.

Policy documents
Consider as relevant:

- *AS 3959-2009 Construction of Buildings in Bushfire-prone Areas* (Standards Australia, 2009)
- *Building in bushfire-prone areas - CSIRO & Standards Australia* (SAA HB36-1993, 1993)
- Any bushfire prone area map prepared under the *Building Act 1993* or regulations made under that Act
Floodplain management

Objective
To assist the protection of:

- Life, property and community infrastructure from flood hazard.
- The natural flood carrying capacity of rivers, streams and floodways.
- The flood storage function of floodplains and waterways.
- Floodplain areas of environmental significance or of importance to river health.

Strategies
Identify land affected by flooding, including land inundated by the 1 in 100 year flood event or as determined by the floodplain management authority in planning schemes.

Avoid intensifying the impact of flooding through inappropriately located use and development.

Locate emergency and community facilities (including hospitals, ambulance stations, police stations, fire stations, residential aged care facilities, communication facilities, transport facilities, community shelters and schools) outside the 1 in 100 year floodplain and, where possible, at levels above the height of the probable maximum flood.

Locate use and development that involve the storage or disposal of environmentally hazardous industrial and agricultural chemicals or wastes and other dangerous goods (including intensive animal industries and sewage treatment plants) outside floodplains unless site design and management is such that potential contact between such substances and floodwaters is prevented, without affecting the flood carrying and flood storage functions of the floodplain.

Policy guidelines
Consider as relevant:

- Regional catchment strategies and special area plans approved by the Minister for Energy, Environment and Climate Change or Minister for Water.
- Any floodplain management manual of policy and practice, or catchment management, river health, wetland or floodplain management strategy adopted by the relevant responsible floodplain management authority.

Policy documents
Consider as relevant:

- *State Environment Protection Policy (Waters of Victoria)*
SOIL DEGRADATION
Contaminated and potentially contaminated land

Objective
To ensure that potentially contaminated land is suitable for its intended future use and development, and that contaminated land is used safely.

Strategies
Require applicants to provide adequate information on the potential for contamination to have adverse effects on future land use if the subject land is known to have been used for industry, mining or the storage of chemicals, gas, wastes or liquid fuel.

Facilitate the remediation of contaminated land, particularly on sites in developed areas with potential for residential development.

Policy documents
Consider as relevant:

- State Environment Protection Policy (Prevention and Management of Contamination of Land)
- Ministerial Direction No. 1 - Potentially Contaminated Land
Erosion and landslip

Objective
To protect areas prone to erosion, landslip or other land degradation processes.

Strategies
Identify areas subject to erosion or instability in planning schemes and when considering the use and development of land.

Prevent inappropriate development in unstable areas or areas prone to erosion.

Promote vegetation retention, planting and rehabilitation in areas prone to erosion and land instability.

Policy guidelines
Consider as relevant:

- Any applicable regional catchment strategy.
- Any special area plan approved under the *Catchment and Land Protection Act 1994*. 
Salinity

Objective
To minimise the impact of salinity and rising water tables on land uses, buildings and infrastructure in rural and urban areas and areas of environmental significance and reduce salt load in rivers.

Strategies
Identify areas subject to salinity in the preparation of planning schemes and land use planning decisions.
Promote vegetation retention and replanting in aquifer recharge areas contributing to groundwater salinity problems.
Prevent inappropriate development in areas affected by groundwater salinity.

Policy guidelines
Consider as relevant:
- Any applicable regional catchment strategy and any associated implementation plan or strategy (particularly salinity management plans and regional vegetation plans).
- Any special area plan approved under the Catchment and Land Protection Act 1994.

Policy documents
Consider as relevant:
Noise abatement

Objective
To assist the control of noise effects on sensitive land uses.

Strategy
Ensure that development is not prejudiced and community amenity is not reduced by noise emissions, using a range of building design, urban design and land use separation techniques as appropriate to the land use functions and character of the area.

Policy documents
Consider as relevant:

- State Environment Protection Policy (Control of Music Noise from Public Premises) No. N-2
- State Environment Protection Policy (Control of Noise from Commerce, Industry and Trade) No. N-1 in metropolitan Melbourne
- Interim Guidelines for Control of Noise from Industry in Country Victoria (Environment Protection Authority, 1989)
Air quality management

Objective
To assist the protection and improvement of air quality.

Strategies
Ensure that land use planning and transport infrastructure provision contribute to improved air quality by:

- Integrating transport and land use planning to improve transport accessibility and connections.
- Locating key developments that generate high volumes of trips in the Central City, Metropolitan Activity Centres and Major Activity Centres.
- Providing infrastructure for public transport, walking and cycling.

Ensure, wherever possible, that there is suitable separation between land uses that reduce air amenity and sensitive land uses.

Policy documents
Consider as relevant:

- State Environment Protection Policy (Air Quality Management)
- Recommended Buffer Distances for Industrial Residual Air Emissions (Environment Protection Authority, 1990)
Land use compatibility

Objective
To safeguard community amenity while facilitating appropriate commercial, industrial or other uses with potential off-site effects.

Strategies
Ensure the compatibility of a use or development as appropriate to the land use functions and character of the area by:

- Directing land uses to appropriate locations.
- Using a range of building design, urban design, operational and land use separation measures.
Major hazard facilities

Objective

To minimise the potential for human and property exposure to risk from incidents that may occur at a major hazard facility and to ensure the ongoing viability of major hazard facilities.

Strategies

Ensure major hazard facilities are sited, designed and operated to minimise risk to surrounding communities and the environment.

Consider the risks associated with increasing the intensity of use and development within the threshold distance of an existing major hazard facility.

Apply appropriate threshold distances from sensitive land uses for new major hazard facilities and between major hazard facilities.

Protect registered or licenced major hazard facilities as defined under Regulation 5 of the Occupational Health and Safety Regulations 2017 from encroachment of sensitive land uses.
NATURAL RESOURCE MANAGEMENT

Planning is to assist in the conservation and wise use of natural resources including energy, water, land, stone and minerals to support both environmental quality and sustainable development.

Planning should ensure agricultural land is managed sustainably, while acknowledging the economic importance of agricultural production.
Protection of agricultural land

Objective
To protect the state’s agricultural base by preserving productive farmland.

Strategies
Identify areas of productive agricultural land, including land for primary production and intensive agriculture.

Consider state, regional and local, issues and characteristics when assessing agricultural quality and productivity.

Avoid permanent removal of productive agricultural land from the state's agricultural base without consideration of the economic importance of the land for the agricultural production and processing sectors.

Protect productive farmland that is of strategic significance in the local or regional context.

Protect productive agricultural land from unplanned loss due to permanent changes in land use.

Prevent inappropriately dispersed urban activities in rural areas.

Protect strategically important agricultural and primary production land from incompatible uses.

Limit new housing development in rural areas by:
- Directing housing growth into existing settlements.
- Discouraging development of isolated small lots in the rural zones from use for dwellings or other incompatible uses.
- Encouraging consolidation of existing isolated small lots in rural zones.

Identify areas of productive agricultural land by consulting with the Department of Economic Development, Jobs, Transport and Resources and using available information.

In considering a proposal to use, subdivide or develop agricultural land, consider the:
- Desirability and impacts of removing the land from primary production, given its agricultural productivity.
- Impacts on the continuation of primary production on adjacent land, with particular regard to land values and the viability of infrastructure for such production.
- Compatibility between the proposed or likely development and the existing use of the surrounding land.
- The potential impacts of land use and development on the spread of plant and animal pests from areas of known infestation into agricultural areas.
- Land capability.

Avoid the subdivision of productive agricultural land from diminishing the long-term productive capacity of the land.

Give priority to the re-structure of inappropriate subdivisions where they exist on productive agricultural land.

Balance the potential off-site effects of a use or development proposal (such as degradation of soil or water quality and land salinisation) against the benefits of the proposal.
Sustainable agricultural land use

Objective
To encourage sustainable agricultural land use.

Strategies
Ensure agricultural and productive rural land use activities are managed to maintain the long-term sustainable use and management of existing natural resources.
Support the development of innovative and sustainable approaches to agricultural and associated rural land use practices.
Support adaptation of the agricultural sector to respond to the potential risks arising from climate change.
Encourage diversification and value-adding of agriculture through effective agricultural production and processing, rural industry and farm-related retailing.
Assist genuine farming enterprises to embrace opportunities and adjust flexibly to market changes.
Support agricultural investment through the protection and enhancement of appropriate infrastructure.
Facilitate ongoing productivity and investment in high value agriculture.
Facilitate the establishment and expansion of cattle feedlots, pig farms, poultry farms and other intensive animal industries in a manner consistent with orderly and proper planning and protection of the environment.
Ensure that the use and development of land for animal keeping or training is appropriately located and does not detrimentally impact the environment, the operation of surrounding land uses and the amenity of the surrounding area.

Policy documents
Consider as relevant:

- Victorian Code for Cattle Feedlots (Department of Agriculture, Energy and Minerals, 1995)
- Victorian Code for Broiler Farms (Department of Primary Industries, 2009, plus 2018 amendments)
- Apiary Code of Practice (Department of Planning and Community Development, 2011)
- Planning Guidelines for Land Based Aquaculture in Victoria (Department of Primary Industries, No. 21, 2005)
- Victorian Low Density Mobile Outdoor Poultry Farm Planning Permit Guidelines (Department of Economic Development, Jobs, Transport and Resources, June 2018)
- Victorian Low Density Mobile Outdoor Pig Farm Planning Permit Guidelines (Department of Economic Development, Jobs, Transport and Resources, June 2018)
Agricultural productivity - Loddon Mallee North

Strategies

Support emerging agribusinesses and location clusters, including intensive animal industries.

Protect and maintain productive irrigation assets necessary to help grow the region as an important food bowl for domestic and international exports.
Forestry and timber production

Objective
To facilitate the establishment, management and harvesting of plantations and the harvesting of timber from native forests.

Strategies
Identify areas that may be suitably used and developed for plantation timber production.
Promote the establishment of softwood and hardwood plantations on predominantly cleared land, as well as other areas that are subject to or contributing to land and water degradation.
Ensure protection of water quality and soil.
Ensure timber production in native forests is conducted in a sustainable manner.
Conduct timber production (except agroforestry, windbreaks and commercial plantations of 5 hectares or less) in accordance with the Code of Practice for Timber Production (Department of Environment and Primary Industries, 2014).
Ensure Victoria’s greenhouse sinks are protected and enhanced by controlling land clearing, containing the growth of urban areas and supporting revegetation programs.

Policy documents
Consider as relevant:

- Code of Practice for Timber Production (Department of Environment and Primary Industries, 2014)
Catchment planning and management

Objective

To assist the protection and restoration of catchments, water bodies, groundwater, and the marine environment.

Strategies

Ensure the continued availability of clean, high-quality drinking water by protecting water catchments and water supply facilities.

Consider the impacts of catchment management on downstream water quality and freshwater, coastal and marine environments.

Retain natural drainage corridors with vegetated buffer zones at least 30 metres wide along each side of a waterway to:

- Maintain the natural drainage function, stream habitat and wildlife corridors and landscape values,
- Minimise erosion of stream banks and verges, and
- Reduce polluted surface runoff from adjacent land uses.

 Undertake measures to minimise the quantity and retard the flow of stormwater from developed areas.

Require appropriate measures to filter sediment and wastes from stormwater prior to its discharge into waterways, including the preservation of floodplain or other land for wetlands and retention basins.

Ensure that development at or near waterways provide for the protection and enhancement of the environmental qualities of waterways and their instream uses.

Ensure land use and development minimises nutrient contributions to water bodies and the potential for the development of algal blooms.

Require appropriate measures to restrict sediment discharges from construction sites.

Ensure planning is coordinated with the activities of catchment management authorities.

Policy documents

Consider as relevant:

- Any regional catchment strategy and related plans approved under the *Catchment and Land Protection Act 1994*
- *State Environment Protection Policy (Waters of Victoria)*
- *Murray River Regional Environmental Plan No 2 (REP2) of New South Wales*
- *Planning permit applications in open, potable water supply catchment areas* (Department of Sustainability and Environment, 2012)
- Any applicable implementation strategy approved by a catchment management authority or waterway management authority
- Any special area or management plan under the *Heritage Rivers Act 1992*
- Any action statement or management plan prepared under the *Flora and Fauna Guarantee Act 1988*
Water quality

Objective
To protect water quality.

Strategies

Protect reservoirs, water mains and local storage facilities from potential contamination.

Ensure that land use activities potentially discharging contaminated runoff or wastes to waterways are sited and managed to minimise such discharges and to protect the quality of surface water and groundwater resources, rivers, streams, wetlands, estuaries and marine environments.

Discourage incompatible land use activities in areas subject to flooding, severe soil degradation, groundwater salinity or geotechnical hazards where the land cannot be sustainably managed to ensure minimum impact on downstream water quality or flow volumes.

Prevent the establishment of incompatible land uses in aquifer recharge or saline discharge areas and in potable water catchments.

Encourage the siting, design, operation and rehabilitation of landfills to reduce impact on groundwater and surface water.

Use the mapped information available from the Department of Environment, Land, Water and Planning to identify the beneficial uses of groundwater resources and have regard to potential impacts on these resources from proposed land use or development.

Policy documents

Consider as relevant:

- Construction Techniques for Sediment Pollution Control (Environment Protection Authority, 1991)
- Environmental Guidelines for Major Construction Sites (Environment Protection Authority, 1996 - Publication 480)
- Doing it Right on Subdivisions: Temporary Environmental Protection Measures for Subdivision Construction Sites (Environment Protection Authority, 2004 - Publication 960)
- Planning permit applications in open, potable water supply catchments (Department of Sustainability and Environment, 2012)
Resource exploration and extraction

Objective
To encourage exploration and extraction of natural resources in accordance with acceptable environmental standards.

Strategies
Provide for the long-term protection of natural resources in Victoria.

Protect the opportunity for exploration and extraction of natural resources where this is consistent with overall planning considerations and acceptable environmental practice.

Recognise the possible need to provide infrastructure for the exploration and extraction of natural resources.

Ensure planning schemes do not impose conditions on the use or development of land that are inconsistent with the Mineral Resources (Sustainable Development) Act 1990, the Greenhouse Gas Geological Sequestration Act 2008, the Geothermal Energy Resources Act 2005, or the Petroleum Act 1998.

Develop and maintain buffers around mining and quarrying activities.

Ensure planning permit applications clearly define buffer areas appropriate to the nature of the proposed extractive uses, which are to be owned or controlled by the proponent of an extractive industry.

Determine buffer areas between extractive activities and sensitive land uses on the following considerations:

- Appropriate limits on effects can be met at the sensitive locations using practical and available technology.
- Whether a change of land use in the vicinity of the extractive industry is proposed.
- Use of land within the buffer areas is not limited by adverse effects created by the extractive activities.
- Performance standards identified under the relevant legislation.
- Types of activities within land zoned for public use.

Protect the brown coal resource in Central Gippsland by ensuring that:

- Changes in use and development of land overlying coal resources, as generally defined in Framework for the Future (Minister for Industry, Technology and Resources and Minister for Planning and Environment, 1987) and the Land Over Coal and Buffer Area Study (Ministry for Planning and Environment, 1988), do not compromise the winning or processing of coal.

- Coal-related development is adequately separated from residential or other sensitive uses and main transport corridors by buffer areas to minimise adverse effects such as noise, dust, fire, earth subsidence and visual intrusion.

- Use and development within the buffer areas are compatible with use and development adjacent to these areas.

Policy guidelines
Consider as relevant:

- Any applicable State Environment Protection Policy.

Policy documents
Consider as relevant:

- Mineral Resources (Sustainable Development) Act 1990
- Greenhouse Gas Geological Sequestration Act 2008
- Geothermal Energy Resources Act 2005
- Petroleum Act 1998
- Melbourne Supply Area - Extractive Industry Interest Areas Review (Geological Survey of Victoria Technical Record, 2003/2)
- Ballarat Supply Area - Extractive Industry Interest Areas (Geological Survey of Victoria Technical Record, 1997/3)
- Bendigo Supply Area - Extractive Industry Interest Areas (Geological Survey of Victoria Technical Record, 1998/6)
- Geelong Supply Area - Extractive Industry Interest Areas (Geological Survey of Victoria Technical Record, 1999/2)
- La Trobe Supply Area - Extractive Industry Interest Areas (Geological Survey of Victoria Technical Record, 1999/4)
BUILT ENVIRONMENT AND HERITAGE

Planning is to recognise the role of urban design, building design, heritage and energy and resource efficiency in delivering liveable and sustainable cities, towns and neighbourhoods.

Planning should ensure all land use and development appropriately responds to its surrounding landscape and character, valued built form and cultural context.

Planning should protect places and sites with significant heritage, architectural, aesthetic, scientific and cultural value.

Planning must support the establishment and maintenance of communities by delivering functional, accessible, safe and diverse physical and social environments, through the appropriate location of use and development and through high quality buildings and urban design.

Planning should promote development that is environmentally sustainable and should minimise detrimental impacts on the built and natural environment.

Planning should promote excellence in the built environment and create places that:

- Are enjoyable, engaging and comfortable to be in.
- Accommodate people of all abilities, ages and cultures.
- Contribute positively to local character and sense of place.
- Reflect the particular characteristics and cultural identity of the community.
- Enhance the function, amenity and safety of the public realm.
Urban design

Objective

To create urban environments that are safe, healthy, functional and enjoyable and that contribute to a sense of place and cultural identity.

Strategies

Require development to respond to its context in terms of character, cultural identity, natural features, surrounding landscape and climate.

Ensure development contributes to community and cultural life by improving the quality of living and working environments, facilitating accessibility and providing for inclusiveness.

Ensure the interface between the private and public realm protects and enhances personal safety.

Ensure development supports public realm amenity and safe access to walking and cycling environments and public transport.

Ensure that the design and location of publicly accessible private spaces, including car parking areas, forecourts and walkways, is of a high standard, creates a safe environment for users and enables easy and efficient use.

Ensure that development provides landscaping that supports the amenity, attractiveness and safety of the public realm.

Ensure that development, including signs, minimises detrimental impacts on amenity, on the natural and built environment and on the safety and efficiency of roads.

Promote good urban design along and abutting transport corridors.

Policy documents

Consider as relevant:

Building design

Objective
To achieve building design outcomes that contribute positively to the local context and enhance the public realm.

Strategies
Require a comprehensive site analysis as the starting point of the design process.
Ensure the site analysis provides the basis for the consideration of height, scale and massing of new development.
Ensure development responds and contributes to the strategic and cultural context of its location.
Minimise the detrimental impact of development on neighbouring properties, the public realm and the natural environment.
Ensure the form, scale, and appearance of development enhances the function and amenity of the public realm.
Ensure buildings and their interface with the public realm support personal safety, perceptions of safety and property security.
Ensure development is designed to protect and enhance valued landmarks, views and vistas.
Ensure development provides safe access and egress for pedestrians, cyclists and vehicles.
Ensure development provides landscaping that responds to its site context, enhances the built form and creates safe and attractive spaces.
Encourage development to retain existing vegetation.

Policy documents
Consider as relevant:
Subdivision design

Objective
To ensure the design of subdivisions achieves attractive, safe, accessible, diverse and sustainable neighbourhoods.

Strategies
In the development of new residential areas and in the redevelopment of existing areas, subdivision should be designed to create liveable and sustainable communities by:

- Creating compact neighbourhoods that have walkable distances between activities.
- Developing activity centres in appropriate locations with a mix of uses and services and access to public transport.
- Creating neighbourhood centres that include services to meet day to day needs.
- Creating urban places with a strong sense of place that are functional, safe and attractive.
- Providing a range of lot sizes to suit a variety of dwelling and household types to meet the needs and aspirations of different groups of people.
- Creating landscaped streets and a network of open spaces to meet a variety of needs with links to regional parks where possible.
- Protecting and enhancing native habitat.
- Facilitating an urban structure where neighbourhoods are clustered to support larger activity centres served by high quality public transport.
- Reduce car dependency by allowing for:
  - Convenient and safe public transport.
  - Safe and attractive spaces and networks for walking and cycling.
  - Subdivision layouts that allow easy movement within and between neighbourhoods.
  - A convenient and safe road network.
- Being accessible to people with disabilities.
- Creating an urban structure and providing utilities and services that enable energy efficiency, resource conservation, integrated water management and minimisation of waste and air pollution.

Policy documents
Consider as relevant:

Healthy neighbourhoods

Objective
To achieve neighbourhoods that foster healthy and active living and community wellbeing.

Strategies
Design neighbourhoods that foster community interaction and make it easy for people of all ages and abilities to live healthy lifestyles and engage in regular physical activity by providing:

- Connected, safe, pleasant and attractive walking and cycling networks that enable and promote walking and cycling as a part of daily life.
- Streets with direct, safe and convenient access to destinations.
- Conveniently located public spaces for active recreation and leisure.
- Accessibly located public transport stops.
- Amenities and protection to support physical activity in all weather conditions.

Policy documents
Consider as relevant:

Healthy neighbourhoods - Metropolitan Melbourne

Strategy

Create a city of 20 minute neighbourhoods, that give people the ability to meet most of their everyday needs within a 20 minute walk, cycle or local public transport trip from their home.
Neighbourhood character

Objective
To recognise, support and protect neighbourhood character, cultural identity, and sense of place.

Strategies
Ensure development responds to cultural identity and contributes to existing or preferred neighbourhood character.

Ensure development responds to its context and reinforces a sense of place and the valued features and characteristics of the local environment and place by emphasising the:

- Pattern of local urban structure and subdivision.
- Underlying natural landscape character and significant vegetation.
- Heritage values and built form that reflect community identity.
Design for rural areas

Objective

To ensure development respects valued areas of rural character.

Strategies

Ensure that the siting, scale and appearance of development protects and enhances rural character.

Protect the visual amenity of valued rural landscapes and character areas along township approaches and sensitive tourist routes by ensuring new development is sympathetically located.

Site and design development to minimise visual impacts on surrounding natural scenery and landscape features including ridgelines, hill tops, waterways, lakes and wetlands.
Energy and resource efficiency

Objective
To encourage land use and development that is energy and resource efficient, supports a cooler environment and minimises greenhouse gas emissions.

Strategies
Improve the energy, water and waste performance of buildings and subdivisions through environmentally sustainable development.

Promote consolidation of urban development and integration of land use and transport.

Improve efficiency in energy use through greater use of renewable energy technologies and other energy efficiency upgrades.

Support low energy forms of transport such as walking and cycling.

Reduce the urban heat island effect by greening urban areas, buildings, transport corridors and open spaces with vegetation.

Encourage retention of existing vegetation and planting of new vegetation as part of development and subdivision proposals.
Heritage conservation

Objective
To ensure the conservation of places of heritage significance.

Strategies
Identify, assess and document places of natural and cultural heritage significance as a basis for their inclusion in the planning scheme.
Provide for the protection of natural heritage sites and man-made resources.
Provide for the conservation and enhancement of those places that are of aesthetic, archaeological, architectural, cultural, scientific or social significance.
Encourage appropriate development that respects places with identified heritage values.
Retain those elements that contribute to the importance of the heritage place.
Encourage the conservation and restoration of contributory elements of a heritage place.
Ensure an appropriate setting and context for heritage places is maintained or enhanced.
Support adaptive reuse of heritage buildings where their use has become redundant.
Consider whether it is appropriate to require the restoration or reconstruction of a heritage building in a Heritage Overlay that has been unlawfully or unintentionally demolished in order to retain or interpret the cultural heritage significance of the building, streetscape or area.

Policy guidelines
Consider as relevant:
- The findings and recommendations of the Victorian Heritage Council.
Aboriginal cultural heritage

Objective
To ensure the protection and conservation of places of Aboriginal cultural heritage significance.

Strategies
Identify, assess and document places of Aboriginal cultural heritage significance, in consultation with relevant Registered Aboriginal Parties, as a basis for their inclusion in the planning scheme.

Provide for the protection and conservation of pre-contact and post-contact Aboriginal cultural heritage places.

Ensure that permit approvals align with the recommendations of any relevant Cultural Heritage Management Plan approved under the Aboriginal Heritage Act 2006.

Policy guidelines
Consider as relevant:

- The findings and recommendations of the Aboriginal Heritage Council.
- The findings and recommendations of the Victorian Heritage Council for post-contact Aboriginal heritage places.

Policy documents
Consider as relevant:

- *Aboriginal Heritage Act 2006*
HOUSING

Planning should provide for housing diversity, and ensure the efficient provision of supporting infrastructure.

Planning should ensure the long term sustainability of new housing, including access to services, walkability to activity centres, public transport, schools and open space.

Planning for housing should include the provision of land for affordable housing.
Integrated housing

Objective
To promote a housing market that meets community needs.

Strategies
Increase the supply of housing in existing urban areas by facilitating increased housing yield in appropriate locations, including under-utilised urban land.

Ensure that an appropriate quantity, quality and type of housing is provided, including aged care facilities and other housing suitable for older people, supported accommodation for people with disability, rooming houses, student accommodation and social housing.

Ensure housing developments are integrated with infrastructure and services, whether they are located in existing suburbs, growth areas or regional towns.

Facilitate the delivery of high quality social housing.

Policy documents
Consider as relevant:

**Integrated housing - Metropolitan Melbourne**

**Strategies**

Provide certainty about the scale of growth by prescribing appropriate height and site coverage provisions for different areas.

Allow for a range of minimal, incremental and high change residential areas that balance the need to protect valued areas with the need to ensure choice and growth in housing.
Location of residential development

Objective
To locate new housing in designated locations that offer good access to jobs, services and transport.

Strategies
Increase the proportion of new housing in designated locations within established urban areas and reduce the share of new dwellings in greenfield and dispersed development areas.
Encourage higher density housing development on sites that are well located in relation to jobs, services and public transport.
Ensure an adequate supply of redevelopment opportunities within established urban areas to reduce the pressure for fringe development.
Facilitate residential development that is cost effective in infrastructure provision and use, energy efficient, water efficient and encourages public transport use.
Identify opportunities for increased residential densities to help consolidate urban areas.
Housing opportunity areas - Metropolitan Melbourne

Strategies

Identify areas that offer opportunities for more medium and high density housing near employment and transport in Metropolitan Melbourne.

Manage the supply of new housing to meet population growth and create a sustainable city by developing housing and mixed use development opportunities in locations that are:

- In and around the Central City.
- Urban-renewal precincts and sites.
- Areas for residential growth.
- Areas for greyfield renewal, particularly through opportunities for land consolidation.
- Areas designated as National Employment and Innovation Clusters.
- Metropolitan activity centres and major activity centres.
- Neighbourhood activity centres - especially those with good public transport connections.
- Areas near existing and proposed railway stations that can support transit-oriented development.

Facilitate increased housing in established areas to create a city of 20 minute neighbourhoods close to existing services, jobs and public transport.

Direct new housing to areas with appropriate infrastructure.
Housing diversity

Objective
To provide for a range of housing types to meet diverse needs.

Strategies
Ensure housing stock matches changing demand by widening housing choice.
Facilitate diverse housing that offers choice and meets changing household needs through:

- A mix of housing types.
- Adaptable internal dwelling design.
- Universal design.
Encourage the development of well-designed medium-density housing that:

- Respects the neighbourhood character.
- Improves housing choice.
- Makes better use of existing infrastructure.
- Improves energy efficiency of housing.
Support opportunities for a range of income groups to choose housing in well-serviced locations.
Ensure planning for growth areas provides for a mix of housing types through a variety of lot sizes, including higher housing densities in and around activity centres.
Housing affordability

Objective

To deliver more affordable housing closer to jobs, transport and services.

Strategies

Improve housing affordability by:

- Ensuring land supply continues to be sufficient to meet demand.
- Increasing choice in housing type, tenure and cost to meet the needs of households as they move through life cycle changes and to support diverse communities.
- Promoting good housing and urban design to minimise negative environmental impacts and keep costs down for residents and the wider community.
- Encouraging a significant proportion of new development to be affordable for households on very low to moderate incomes.

Increase the supply of well-located affordable housing by:

- Facilitating a mix of private, affordable and social housing in suburbs, activity centres and urban renewal precincts.
- Ensuring the redevelopment and renewal of public housing stock better meets community needs.

Facilitate the delivery of social housing by identifying surplus government land suitable for housing.

Policy documents

Consider as relevant:

Rural residential development

Objective
To identify land suitable for rural residential development.

Strategies
Manage development in rural areas to protect agriculture and avoid inappropriate rural residential development.

Encourage the consolidation of new housing in existing settlements where investment in physical and community infrastructure and services has already been made.

Demonstrate need and identify locations for rural residential development through a housing and settlement strategy.

Ensure planning for rural residential development avoids or significantly reduces adverse economic, social and environmental impacts by:

- Maintaining the long-term sustainable use and management of existing natural resource attributes in activities including agricultural production, water, mineral and energy resources.
- Protecting existing landscape values and environmental qualities such as water quality, native vegetation, biodiversity and habitat.
- Minimising or avoiding property servicing costs carried by local and state governments.
- Maintaining an adequate buffer distance between rural residential development and animal production.

Ensure land is not zoned for rural residential development if it will encroach on high quality productive agricultural land or adversely impact on waterways or other natural resources.

Discourage development of small lots in rural zones for residential use or other incompatible uses.

Encourage consolidation of existing isolated small lots in rural zones.

Ensure land is only zoned for rural residential development where it:

- Is located close to existing towns and urban centres, but not in areas that will be required for fully serviced urban development.
- Can be supplied with electricity, water and good quality road access.
Rural residential development - Loddon Mallee North

Strategy

Plan strategically for the most appropriate locations for rural residential growth in the hinterland areas of Mildura, Swan Hill and Echuca.
Community care accommodation

Objective
To facilitate the establishment of community care accommodation and support their location being kept confidential.

Strategies
Planning schemes should not require a planning permit for or prohibit the use of land in a residential area for community care accommodation that accommodates no more than 20 clients and that is funded by, or conducted by or on behalf of, a government department or public authority, including a public authority established for a public purpose under a Commonwealth Act.

Facilitate the confidential establishment of community care accommodation through appropriate permit, notice and review exemptions.
Residential aged care facilities

Objective
To facilitate the development of well-designed and appropriately located residential aged care facilities.

Strategies
Recognise that residential aged care facilities contribute to housing diversity and choice, and are an appropriate use in a residential area.

Recognise that residential aged care facilities are different to dwellings in their purpose and function, and will have a different built form (including height, scale and mass).

Ensure local housing strategies, precinct structure plans and activity centre structure plans provide for residential aged care facilities.

Ensure that residential aged care facilities are located in residential areas, activity centres and urban renewal precincts, close to services and public transport.

Encourage planning for housing that:

- Delivers an adequate supply of land or redevelopment opportunities for residential aged care facilities.
- Enables older people to live in appropriate housing in their local community.

Provide for a mix of housing for older people with appropriate access to care and support services.

Ensure that proposals to establish residential aged care facilities early in the life of a growth area are in locations that will have early access to services and public transport.

Ensure that residential aged care facilities are designed to respond to the site and its context.

Promote a high standard of urban design and architecture in residential aged care facilities.

Policy guidelines
Consider as relevant:

- The Commonwealth Government’s Responsible ratios for the provision of aged care places under the Aged Care Act 1997.
ECONOMIC DEVELOPMENT

Planning is to provide for a strong and innovative economy, where all sectors are critical to economic prosperity.

Planning is to contribute to the economic wellbeing of the state and foster economic growth by providing land, facilitating decisions and resolving land use conflicts, so that each region may build on its strengths and achieve its economic potential.
Diversified economy

Objective
To strengthen and diversify the economy.

Strategies
Protect and strengthen existing and planned employment areas and plan for new employment areas.
Facilitate regional, cross-border and inter-regional relationships to harness emerging economic opportunities.
Facilitate growth in a range of employment sectors, including health, education, retail, tourism, knowledge industries and professional and technical services based on the emerging and existing strengths of each region.
Improve access to jobs closer to where people live.
Support rural economies to grow and diversify.
Diversified economy - Loddon Mallee North

Strategies

Support further diversification of the primary production, service, manufacturing and tourism industries.

Support emerging and potential growth sectors such as nature-based tourism, mining and renewable energy generation and protect these activities from urban encroachment.

Support production and processing that adds value to local agricultural and other primary products.

Provide opportunities for economic growth in Ouyen by supporting infrastructure improvements for the expansion of mineral sands mining, agriculture, tourism and other economic diversification opportunities.

Support investment in infrastructure, freight and logistics and increased access to natural gas.
Innovation and research

Objective
To create opportunities for innovation and the knowledge economy within existing and emerging industries, research and education.

Strategies
Encourage the expansion and development of logistics and communications infrastructure.
Support the development of business clusters.
Support the development of enterprise precincts that build the critical mass of employment in an area, leverage the area’s public and private sector economic competitive strengths and assets, and cater to a diversity of employment types and scales.
Promote an accessible, well-connected, high-amenity and collaborative physical environment that is conducive to innovation and to creative activities.
Encourage the provision of infrastructure that helps people to be innovative and creative, learn new skills and start new businesses in locations identified to accommodate employment and economic growth.
Support well-located, appropriate and low-cost premises for not-for-profit or start-up enterprises.
Improve access to community-based information and training through further developing libraries as community learning centres.
Business

Objective
To encourage development that meets the community’s needs for retail, entertainment, office and other commercial services.

Strategies
Plan for an adequate supply of commercial land in appropriate locations.

Ensure commercial facilities are aggregated and provide net community benefit in relation to their viability, accessibility and efficient use of infrastructure.

Locate commercial facilities in existing or planned activity centres.

Provide new convenience shopping facilities to provide for the needs of the local population in new residential areas and within, or immediately adjacent to, existing commercial centres.

Provide small scale shopping opportunities that meet the needs of local residents and workers in convenient locations.

Provide outlets of trade-related goods or services directly serving or ancillary to industry that have adequate on-site car parking.

Locate cinema based entertainment facilities within or on the periphery of existing or planned activity centres.

Apply a five year time limit for commencement to any planning permit for a shopping centre or shopping centre expansion of more than 1000 square metres leasable floor area.
17.02-2S

Out-of-centre development

Objective
To manage out-of-centre development.

Strategies
Discourage proposals for expansion of single use retail, commercial and recreational facilities outside activity centres.
Give preference to locations in or on the border of an activity centre for expansion of single use retail, commercial and recreational facilities.
Discourage large sports and entertainment facilities of metropolitan, state or national significance in out-of-centre locations unless they are on the Principal Public Transport Network and in locations that are highly accessible to their catchment of users.
Ensure that out-of-centre proposals are only considered where the proposed use or development is of net benefit to the community in the region served by the proposal or provides small scale shopping opportunities that meet the needs of local residents and workers in convenient locations.
Industrial land supply

Objective
To ensure availability of land for industry.

Strategies
Provide an adequate supply of industrial land in appropriate locations including sufficient stocks of large sites for strategic investment.

Identify land for industrial development in urban growth areas where:

- Good access for employees, freight and road transport is available.
- Appropriate buffer areas can be provided between the proposed industrial land and nearby sensitive land uses.

Protect and carefully plan existing industrial areas to, where possible, facilitate further industrial development.

Avoid approving non-industrial land uses that will prejudice the availability of land in identified industrial areas for future industrial use.

Policy documents
Consider as relevant:

- Recommended Buffer Distances for Industrial Residual Air Emissions (Environment Protection Authority, 1990)
Industrial development siting

Objective
To facilitate the sustainable development and operation of industry.

Strategies
Ensure that industrial activities requiring substantial threshold distances are located in the core of industrial areas.
Encourage activities with minimal threshold requirements to locate towards the perimeter of the industrial area.
Minimise inter-industry conflict and encourage like industries to locate within the same area.
Protect industrial activity in industrial zones from the encroachment of commercial, residential and other sensitive uses that would adversely affect industry viability.
Encourage industrial uses that meet appropriate standards of safety and amenity to locate within activity centres.
Provide adequate separation and buffer areas between sensitive uses and offensive or dangerous industries and quarries to ensure that residents are not affected by adverse environmental effects, nuisance or exposure to hazards.
Encourage manufacturing and storage industries that generate significant volumes of freight to locate close to air, rail and road freight terminals.

Policy documents
Consider as relevant:

- *Recommended Buffer Distances for Industrial Residual Air Emissions* (Environment Protection Authority, 1990)
State significant industrial land

Objective

To protect industrial land of state significance.

Strategies

Protect state significant industrial precincts from incompatible land uses to allow for future growth.

State significant industrial precincts include but are not limited to:

- Southern Industrial Precinct - Dandenong South.
- Northern Industrial Precinct - Campbellfield, Somerton and Thomastown.
- Western Industrial Precinct - Laverton North and Derrimut.
- Officer / Pakenham Industrial Precinct.
- Port of Hastings Industrial Precinct.

Ensure sufficient availability of strategically located land for major industrial development, particularly for industries and storage facilities that require significant threshold distances from sensitive or incompatible uses.

Protect heavy industrial areas from inappropriate development and maintain adequate buffer distances from sensitive or incompatible uses.
Facilitating tourism

Objective
To encourage tourism development to maximise the economic, social and cultural benefits of developing the state as a competitive domestic and international tourist destination.

Strategies
Encourage the development of a range of well-designed and sited tourist facilities, including integrated resorts, accommodation, host farm, bed and breakfast and retail opportunities.

Seek to ensure that tourism facilities have access to suitable transport.

Promote tourism facilities that preserve, are compatible with and build on the assets and qualities of surrounding activities and attractions.

Create innovative tourism experiences.

Encourage investment that meets demand and supports growth in tourism.

Policy guidelines
Consider as relevant:

- Any applicable regional tourism development strategy.

Policy documents
Consider as relevant:

Tourism - Loddon Mallee North

Strategy

Support nature-based tourism and protect these activities from urban encroachment.
Coastal and maritime tourism and recreation

Objective
To encourage suitably located and designed coastal, marine and maritime tourism and recreational opportunities.

Strategies
Support the development of ecotourism, tourism and major maritime events.

Ensure a diverse range of accommodation options and coastal experiences are provided for and maintained.

Ensure sites and facilities are accessible to all.

Ensure tourism development, within non-urban areas, demonstrates a tourist accommodation need and supports a nature-based approach.

Ensure development is of an appropriate scale, use and intensity relative to its location and minimises impacts on the surrounding natural, visual, environmental and coastal character.

Develop a network of maritime precincts around Port Phillip and Western Port that serve both local communities and visitors.

Maintain and expand boating and recreational infrastructure around the bays in maritime precincts at Frankston, Geelong, Hastings, Hobsons Bay, Mordialloc, Mornington, Patterson River, Portarlington, Queenscliff, St Kilda, Stony Point/Cowes and Wyndham.

Provide public access to recreational facilities and activities on land and water.

Encourage high quality urban design that is innovative, sustainable and integrated with surrounding areas.

Support maritime and related industries in appropriate locations.

Policy documents
Consider as relevant:

- Boating Coastal Action Plan (Central Coastal Board, 2007)
- Victorian Coastal Strategy (Victorian Coastal Council, 2014)
- Coastal Spaces Landscape Assessment Study (Department of Sustainability and Environment, 2006)
TRANSPORT

Planning should ensure an integrated and sustainable transport system that provides access to social and economic opportunities, facilitates economic prosperity, contributes to environmental sustainability, coordinates reliable movements of people and goods, and is safe.
Land use and transport planning

Objective
To create a safe and sustainable transport system by integrating land use and transport.

Strategies
Develop integrated and accessible transport networks to connect people to jobs and services and goods to market.

Plan urban development to make jobs and services more accessible by:

- Ensuring equitable access is provided to developments in accordance with forecast demand, taking advantage of all available modes of transport and to minimise adverse impacts on existing transport networks and the amenity of surrounding areas.
- Coordinating improvements to public transport, walking and cycling networks with the ongoing development and redevelopment of urban areas.
- Requiring integrated transport plans to be prepared for all new major residential, commercial and industrial developments.
- Focussing major government and private sector investments in regional cities and centres on major transport corridors, particularly railway lines, in order to maximise the access and mobility of communities.

Integrate public transport services and infrastructure into new development.

Improve transport links that strengthen the connections to Melbourne and adjoining regions.

Policy documents
Consider as relevant:

- The Victorian Transport Plan (Victorian Government, 2008)
- Public Transport Guidelines for Land Use and Development (Victorian Government, 2008)
- Cycling into the Future 2013-23 (Victorian Government, 2012)
Transport system

Objective
To coordinate development of all transport modes to provide a comprehensive transport system.

Strategies
Reserve land for strategic transport infrastructure.

Require transport system management plans for key transport corridors and for major investment proposals.

Incorporate the provision of public transport, cycling and walking infrastructure in all major new state and local government road projects.

Locate transport routes to achieve the greatest overall benefit to the community to making the best use of existing social, cultural and economic infrastructure, minimising impacts on the environment and optimising accessibility, safety, emergency access, service and amenity.

Locate and design new transport routes and adjoining land uses to minimise disruption of residential communities and their amenity.

Plan or regulate new uses or development of land near an existing or proposed transport route to avoid detriment to and where possible enhance, the service, safety and amenity desirable for that transport route in the short and long terms.

Facilitate infrastructure that connects and improves train services between key regional cities and townships and Melbourne.

Ensure that pedestrian and cyclist access to public transport is facilitated and safeguarded.

Ensure the design, construction and management of all transport modes reduces environmental impacts.

Ensure careful selection of sites for freight generating facilities to minimise associated operational and transport impacts to other urban development and transport networks.

Consider all modes of travel, including walking, cycling, public transport, taxis and private vehicles (passenger and freight) in providing for access to new developments.

Policy guidelines
Consider as relevant:

- Any applicable highway strategy published by VicRoads.

Policy documents
Consider as relevant:

Sustainable personal transport

Objective
To promote the use of sustainable personal transport.

Strategies
Ensure development and the planning for new suburbs, urban renewal precincts, greyfield redevelopment areas and transit-oriented development areas (such as railway stations) provide opportunities to promote more walking and cycling.

Encourage the use of walking and cycling by creating environments that are safe and attractive.

Develop high quality pedestrian environments that are accessible to footpath-bound vehicles such as wheelchairs, prams and scooters.

Ensure cycling routes and infrastructure are constructed early in new developments.

Provide direct and connected pedestrian and bicycle infrastructure to and between key destinations including activity centres, public transport interchanges, employment areas, urban renewal precincts and major attractions.

Ensure cycling infrastructure (on-road bicycle lanes and off-road bicycle paths) is planned to provide the most direct route practical and to separate cyclists from other road users, particularly motor vehicles.

Require the provision of adequate bicycle parking and related facilities to meet demand at education, recreation, transport, shopping and community facilities and other major attractions when issuing planning approvals.

Provide improved facilities, particularly storage, for cyclists at public transport interchanges, rail stations and major attractions.

Ensure provision of bicycle end-of-trip facilities in commercial buildings.

Policy documents
Consider as relevant:

Public Transport

Objective
To facilitate greater use of public transport and promote increased development close to high-quality public transport routes.

Strategies
Maintain and strengthen passenger transport networks.
Connect activity centres, job rich areas and outer suburban areas through high-quality public transport.

Improve access to the public transport network by:
- Ensuring integration with walking and cycling networks.
- Providing end-of-trip facilities for pedestrians and cyclists at public transport interchanges.

Plan for bus services to meet the need for local travel.
Ensure development supports the delivery and operation of public transport services.
Plan for and deliver public transport in outer suburban areas that is integrated with land use and development.
Provide for bus routes and stops and public transport interchanges in new development areas.

Policy documents
Consider as relevant:
- Public Transport Guidelines for Land Use and Development (Victorian Government, 2008)
- The Victorian Transport Plan (Victorian Government, 2008)
- Cycling into the Future 2013-23 (Victorian Government, 2012)
Road system

Objective
To manage the road system to achieve integration, choice and balance by developing an efficient and safe network and making the most of existing infrastructure.

Strategies
Plan and regulate the design of transport routes and nearby areas to achieve visual standards appropriate to the importance of the route with particular reference to landscaping, the control of outdoor advertising and, where appropriate, the provision of buffer zones and resting places.

Provide for grade separation at railway crossings except with the approval of the Minister for Transport.

Make better use of roads for all road users through the provision of wider footpaths, bicycle lanes, transit lanes (for buses and taxis) and specific freight routes.

Selectively expand and upgrade the road network to provide for:

- High-quality connections between Metropolitan Melbourne and regional cities, and between regional cities.
- Upgrading of key freight routes.
- Ongoing development in outer suburban areas.
- Higher standards of on-road public transport.
- Improved key cross-town arterial links in the outer suburbs including circumferential and radial movement.

Ensure access to jobs and services in growth areas and outer suburban areas by improving roads for all road users.

Improve the management of key freight routes to make freight operations more efficient while reducing their external impacts.

Ensure that road space complements land use and is managed to meet community and business needs.
Car parking

Objective
To ensure an adequate supply of car parking that is appropriately designed and located.

Strategies
Allocate or require land to be set aside for car parking subject to the existing and potential modes of access including public transport, the demand for off-street car parking, road capacity and the potential for demand management of car parking.

Encourage the efficient provision of car parking by consolidating car parking facilities.

Design and locate local car parking to:
- Protect the role and function of nearby roads.
- Enable easy and efficient use.
- Enable the movement and delivery of goods.
- Achieve a high standard of urban design and protect the amenity of the locality, including the amenity of pedestrians and other road users.
- Create a safe environment, particularly at night.
- Facilitate the use of public transport.

Protect the amenity of residential precincts from the effects of road congestion created by on-street parking.

Make adequate provision for taxi ranks as part of activity centres, transport interchanges and major commercial, retail and community facilities.

Policy documents
Consider as relevant:
Planning for ports

Objective
To support the effective and competitive operation of Victoria’s commercial trading ports at local, national and international levels and to facilitate their ongoing sustainable operation and development.

Strategies
Provide for the ongoing development of ports at Melbourne, Geelong, Hastings and Portland in accordance with approved Port Development Strategies.

Identify and protect key transport corridors linking ports to the broader transport network.

Manage any impacts of a commercial trading port and any related industrial development on nearby sensitive uses to minimise the impact of vibration, light spill, noise and air emissions from port activities.

Policy documents
Consider as relevant:

- *Victorian Ports Strategic Framework* (Department of Infrastructure, 2004)
- *Port Futures* (Victorian Government, 2009)
- *Port of Portland - Port Land Use Strategy* (Port of Portland Pty Limited, 2009)
- *Port of Geelong - Development Strategy* (Victorian Regional Channels Authority, 2013)
- *Port Development Strategy 2035 Vision* (Port of Melbourne Corporation, 2009)
Planning for port environs

Objective
To plan for and manage land near commercial trading ports so that development and use are compatible with port operations and provide reasonable amenity expectations.

Strategies
Protect commercial trading ports from encroachment of sensitive and incompatible land uses in the port environs.

Plan for and manage land in the port environs to accommodate uses that depend upon or gain significant economic advantage from proximity to the port’s operations.

Ensure that industrially zoned land within the environs of a commercial trading port is maintained and continues to support the role of the port as a critical freight and logistics precinct.

Identify and protect key transport corridors linking ports to the broader transport network.

Ensure any new use or development within the environs of a commercial trading port does not prejudice the efficient and curfew free operations of the port.

Ensure that the use and intensity of development does not expose people to unacceptable health or safety risks and consequences associated with an existing major hazard facility.

Ensure that any use or development within port environs:
- Is consistent with policies for the protection of the environment.
- Takes into account planning for the port.

Policy documents
Consider as relevant:
- *Port Futures* (Victorian Government, 2009)
- *Port of Portland - Port Land Use Strategy* (Port of Portland Pty Limited, 2009)
- *Port of Geelong - Development Strategy* (Victorian Regional Channels Authority, 2013)
- *Port Development Strategy 2035 Vision* (Port of Melbourne Corporation, 2009)
Planning for airports and airfields

Objective
To strengthen the role of Victoria’s airports and airfields within the state's economic and transport infrastructure, facilitate their siting and expansion and protect their ongoing operation.

Strategies
Protect airports from incompatible land uses.

Ensure that in the planning of airports, land use decisions are integrated, appropriate land use buffers are in place and provision is made for associated businesses that service airports.

Ensure the planning of airports identifies and encourages activities that complement the role of the airport and enables the operator to effectively develop the airport to be efficient and functional and contribute to the aviation needs of the state.

Ensure the effective and competitive operation of Melbourne Airport at both national and international levels.

Protect the environs of Avalon Airport so it can operate as a full-size jet airport focussing on freight, training and services.

Recognise Essendon Airport's current role in providing specialised functions related to aviation, freight and logistics and its potential future role as a significant employment and residential precinct that builds on the current functions.

Recognise Moorabbin Airport as an important regional and state aviation asset by supporting its continued use as a general aviation airport, ensuring future development at the site encourages uses that support and enhance the state’s aviation industry and supporting opportunities to extend activities at the airport that improve access to regional Victoria.

Maintain Point Cook Airfield as an operating airport complementary to Moorabbin Airport.

Preserve long-term options for a new general aviation airport south-east of Metropolitan Melbourne by ensuring urban development does not infringe on possible sites, buffer zones or flight paths.

Avoid the location of new airfields in areas that have greater long-term value to the community for other purposes.

Plan the location of airfields, nearby existing and potential development, and the land-based transport system required to serve them as an integrated operation.

Plan the visual amenity and impact of any use or development of land on the approaches to an airfield to be consistent with the status of the airfield.

Plan for areas around all airfields such that:

- Any new use or development that could prejudice the safety or efficiency of an airfield is precluded.
- The detrimental effects of aircraft operations (such as noise) are taken into account in regulating and restricting the use and development of affected land.
- Any new use or development that could prejudice future extensions to an existing airfield or aeronautical operations in accordance with an approved strategy or master plan for that airfield is precluded.

Policy documents
Consider as relevant:

- National Airports Safeguarding Framework (as agreed by Commonwealth, State and Territory Ministers at the meeting of the Standing Council on Transport and Infrastructure on 18 May 2012)
- *Avalon Airport Master Plan* (Avalon Airport Australia Pty Ltd, 2015)
- *Avalon Airport Strategy* (Department of Business and Employment/AeroSpace Technologies of Australia, 1993) and its associated Aircraft Noise Exposure Concepts
Freight links

Objective
To develop the key Transport Gateways and freight links and maintain Victoria’s position as the nation’s premier logistics centre.

Strategies
Support major Transport Gateways as important locations for employment and economic activity by:

- Protecting designated ports, airports, freight terminals and their environs from incompatible land uses.
- Encouraging adjacent complementary uses and employment generating activities.

Improve the freight and logistics network to optimise freight handling and maintain the efficiency and effectiveness of the network.

Support the development of freight and logistics precincts in strategic locations along key regional freight corridors.

Plan for improved freight connections that are adaptable to commodity, market and operating changes.

Link areas of production and manufacturing to export markets.

Improve freight efficiency and increase capacity of Transport Gateways while protecting urban amenity.

Facilitate increased capacity of Interstate Freight Terminals, both in regional areas and Metropolitan Melbourne.

Ensure an adequate supply of land is zoned to allow high-volume freight customers to locate adjacent to Interstate Freight Terminals.

Minimise negative impacts of freight movements on urban amenity.

Limit incompatible uses in areas expected to have intense freight activity by identifying and protecting key freight routes on the Principal Freight Network.

Policy documents
Consider as relevant:

INFRASTRUCTURE

Planning for development of social and physical infrastructure should enable it to be provided in a way that is efficient, equitable, accessible and timely.

Planning is to recognise social needs by providing land for a range of accessible community resources, such as education, cultural, health and community support (mental health, aged care, disability, youth and family services) facilities.

Planning should ensure that the growth and redevelopment of settlements is planned in a manner that allows for the logical and efficient provision and maintenance of infrastructure, including the setting aside of land for the construction of future transport routes.

Planning should facilitate efficient use of existing infrastructure and human services. Providers of infrastructure, whether public or private bodies, are to be guided by planning policies and should assist strategic land use planning.

Planning should minimise the impact of use and development on the operation of major infrastructure of national, state and regional significance, including communication networks and energy generation and distribution systems.

Planning authorities should consider the use of development and infrastructure contributions in the funding of infrastructure.
Energy supply

Objective
To facilitate appropriate development of energy supply infrastructure.

Strategies
Support the development of energy facilities in appropriate locations where they take advantage of existing infrastructure and provide benefits to industry and the community.
Support transition to a low-carbon economy with renewable energy and greenhouse emission reductions including geothermal, clean coal processing and carbon capture and storage.
Facilitate local energy generation to help diversify the local economy and improve sustainability outcomes.
Energy supply – Loddon Mallee North

Strategy

Support the supply of natural gas to Mildura and other centres and towns to provide for residents and industry.
Renewable energy

Objective
To promote the provision of renewable energy in a manner that ensures appropriate siting and design considerations are met.

Strategies
Facilitate renewable energy development in appropriate locations.
Protect energy infrastructure against competing and incompatible uses.
Develop appropriate infrastructure to meet community demand for energy services.
Set aside suitable land for future energy infrastructure.
Consider the economic and environmental benefits to the broader community of renewable energy generation while also considering the need to minimise the effects of a proposal on the local community and environment.
Recognise that economically viable wind energy facilities are dependent on locations with consistently strong winds over the year.

Policy documents
Consider as relevant:

- Policy and Planning Guidelines for Development of Wind Energy Facilities in Victoria
  (Department of Environment, Land, Water and Planning, October 2018)
Renewable energy - Loddon Mallee North

Strategy

Support and facilitate renewable energy generation and protect these activities from urban encroachment.
Pipeline infrastructure

Objective

To ensure that gas, oil and other substances are safely delivered to users and to and from port terminals at minimal risk to people, other critical infrastructure and the environment.

Strategies

Plan for the development of pipeline infrastructure subject to the Pipelines Act 2005.

Recognise existing transmission-pressure gas pipelines in planning schemes and protect from further encroachment by residential development or other sensitive land uses, unless suitable additional protection of pipelines is provided.

Plan new pipelines along routes with adequate buffers to residences, zoned residential land and other sensitive land uses and with minimal impacts on waterways, wetlands, flora and fauna, erosion prone areas and other environmentally sensitive sites.

Provide for environmental management during construction and on-going operation of pipeline easements.
19.02 COMMUNITY INFRASTRUCTURE
Health facilities

Objective
To assist the integration of health facilities with local and regional communities.

Strategies
Facilitate the location of health and health-related facilities (including acute health, aged care, disability services and community care facilities) taking into account demographic trends, the existing and future demand requirements and the integration of services into communities.

Plan public and private developments together, where possible, including some degree of flexibility in use.

Locate hospitals and other large health facilities in designated health precincts and areas highly accessible to public and private transport.

Provide adequate car parking for staff and visitors of health facilities.
Health precincts - Metropolitan Melbourne

Strategies

Facilitate health and community wellbeing precincts through the co-location of:

- Hospitals, allied health services and not-for-profit health providers at the regional level.
- General practitioners, community health facilities, allied health services and not-for-profit health providers at the neighbourhood level.

Create health precincts in new suburbs in or close to town centres.

Ensure health precincts are well serviced by community services.
Health facilities - Loddon Mallee North

Strategy

Protect the operation of health facilities from conflicting land uses.
Education facilities

Objective
To assist the integration of education and early childhood facilities with local and regional communities.

Strategies
Consider demographic trends, existing and future demand requirements and the integration of facilities into communities in planning for the location of education and early childhood facilities.
Locate childcare, kindergarten and primary school facilities to maximise access by public transport and safe walking and cycling routes.
Ensure childcare, kindergarten and primary school facilities provide safe vehicular drop-off zones.
Locate secondary school and tertiary education facilities in designated education precincts and areas that are highly accessible to public transport.
Locate tertiary education facilities within or adjacent to activity centres.
Ensure streets and accessways adjoining education and early childhood facilities are designed to encourage safe bicycle and pedestrian access.
Develop libraries as community based learning centres.
Education facilities - Loddon Mallee North

Strategy

Protect the operation of education facilities from conflicting land uses.
Cultural facilities

Objective
To develop a strong cultural environment and increase access to arts, recreation and other cultural facilities.

Strategies
Encourage a wider range of arts, cultural and entertainment facilities including cinemas, restaurants, nightclubs and live theatres in the Central City and at Metropolitan Activity Centres.

Reinforce the existing major precincts for arts, sports and major events of state wide appeal.

Establish new facilities at locations well served by public transport.
Social and cultural infrastructure

Objective
To provide fairer distribution of and access to, social and cultural infrastructure.

Strategies
Identify and address gaps and deficiencies in social and cultural infrastructure, including additional regionally significant cultural and sporting facilities.
Encourage the location of social and cultural infrastructure in activity centres.
Ensure social infrastructure is designed to be accessible.
Ensure social infrastructure in growth areas, is delivered early in the development process and in the right locations.
Plan and design community places and buildings so they can adapt as the population changes and different patterns of work and social life emerge.
Support innovative ways to maintain equitable service delivery to settlements that have limited or no capacity for further growth, or that experience population decline.
Identify and protect land for cemeteries and crematoria.
Emergency services

Objective
To ensure suitable locations for police, fire, ambulance and other emergency services.

Strategies
Ensure police, fire, ambulance and other emergency services are provided for in or near activity centres.
Locate emergency services together in newly developing areas.
Open space

Objective
To establish, manage and improve a diverse and integrated network of public open space that meets the needs of the community.

Strategies
Plan for regional and local open space networks for both recreation and conservation of natural and cultural environments.

Ensure that open space networks:
- Are linked, including through the provision of walking and cycling trails.
- Are integrated with open space from abutting subdivisions.
- Incorporate, where possible, links between major parks and activity areas, along waterways and natural drainage corridors, connecting places of natural and cultural interest.
- Maintain public accessibility on public land immediately adjoining waterways and coasts.

Create opportunities to enhance open space networks within and between settlements.

Ensure that land is set aside and developed in residential areas for local recreational use and to create pedestrian and bicycle links to commercial and community facilities.

Ensure that land use and development adjoining regional open space networks, national parks and conservation reserves complements the open space in terms of visual and noise impacts, preservation of vegetation and treatment of waste water to reduce turbidity and pollution.

Improve the quality and distribution of open space and ensure long-term protection.

Protect large regional parks and significant conservation areas.

Ensure land identified as critical to the completion of open space links is transferred for open space purposes.

Ensure that where there is a reduction of open space due to a change in land use or occupation, additional or replacement parkland of equal or greater size and quality is provided.

Ensure that urban open space provides for nature conservation, recreation and play, formal and informal sport, social interaction, opportunities to connect with nature and peace and solitude.

Accommodate community sports facilities in a way that is not detrimental to other park activities.

Ensure open space provision is fair and equitable with the aim of providing access that meets the needs of all members of the community, regardless of age, gender, ability or a person’s location.

Develop open space to maintain wildlife corridors and greenhouse sinks.

Provide new parkland in growth areas and in areas that have an undersupply of parkland.

Encourage the preparation of management plans or explicit statements of management objectives for urban parks.

Ensure exclusive occupation of parkland by community organisations is restricted to activities consistent with management objectives of the park to maximise broad community access to open space.

Ensure the provision of buildings and infrastructure is consistent with the management objectives of the park.

Ensure public access is not prevented by developments along stream banks and foreshores.

Ensure public land immediately adjoining waterways and coastlines remains in public ownership.

Plan open space areas for multiple uses, such as community gardens, sports and recreation, active transport routes, wildlife corridors and flood storage basins.
Development and infrastructure contributions plans

Objective

To facilitate the timely provision of planned infrastructure to communities through the preparation and implementation of development contributions plans and infrastructure contributions plans.

Strategies

Prepare development contributions plans and infrastructure contributions plans, under the Planning and Environment Act 1987, to manage contributions towards infrastructure.

Collect development contributions on the basis of approved development and infrastructure contributions plans.

Require annual reporting by collecting and development agencies to monitor the collection and expenditure of levies and the delivery of infrastructure.

Policy documents

Consider as relevant:

- Development Contributions Guidelines (Department of Sustainability and Environment, 2003 -as amended 2007)
- Infrastructure Contributions Plan Guidelines (Department of Environment, Land, Water and Planning, 2016)
- Ministerial Direction on the Preparation and Content of Development Contribution Plans and Reporting Requirements for Development Contributions Plans
- Ministerial Direction on the Preparation and Content of Infrastructure Contribution Plans and Reporting Requirements for Infrastructure Contributions Plans
Infrastructure design and provision

**Objective**
To provide timely, efficient and cost-effective development infrastructure that meets the needs of the community.

**Strategies**
Provide an integrated approach to the planning and engineering design of new subdivision and development.
**Integrated water management**

**Objective**

To sustainably manage water supply, water resources, wastewater, drainage and stormwater through an integrated water management approach.

**Strategies**

Plan and coordinate integrated water management, bringing together stormwater, wastewater, drainage, water supply, water treatment and re-use, to:

- Take into account the catchment context.
- Protect downstream environments, waterways and bays.
- Manage and use potable water efficiently.
- Reduce pressure on Victoria's drinking water supplies.
- Minimise drainage, water or wastewater infrastructure and operational costs.
- Minimise flood risks.
- Provide urban environments that are more resilient to the effects of climate change.

Integrate water into the landscape to facilitate cooling, local habitat improvements and provision of attractive and enjoyable spaces for community use.

Facilitate use of alternative water sources such as rainwater, stormwater, recycled water and run-off from irrigated farmland.

Ensure that development protects and improves the health of water bodies including creeks, rivers, wetlands, estuaries and bays by:

- Minimising stormwater quality and quantity related impacts.
- Filtering sediment and waste from stormwater prior to discharge from a site.
- Managing industrial and commercial toxicants in an appropriate way.
- Requiring appropriate measures to mitigate litter, sediment and other discharges from construction sites.

Manage stormwater quality and quantity through a mix of on-site measures and developer contributions at a scale that will provide greatest net community benefit.

Provide for sewerage at the time of subdivision or ensure lots created by the subdivision are capable of adequately treating and retaining all domestic wastewater within the boundaries of each lot.

Ensure land is set aside for water management infrastructure at the subdivision design stage.

Minimise the potential impacts of water, sewerage and drainage assets on the environment.

Prohibit significant water, sewerage and drainage assets from encroaching sensitive and incompatible uses.

Protect areas with potential to recycle water for forestry, agriculture or other uses that can use treated effluent of an appropriate quality.

**Policy documents**

Consider as relevant:

- *State Environment Protection Policy (Waters of Victoria)*
- Guidelines for Environmental Management: Code of Practice - Onsite Wastewater Management (Publication 891.4, Environment Protection Authority, 2016)
- Planning Permit Applications in Open, Potable Water Supply Catchment Areas (Department of Sustainability and Environment, 2012)
Telecommunications

Objective
To facilitate the orderly development, extension and maintenance of telecommunication infrastructure.

Strategies
Facilitate the upgrading and maintenance of telecommunications facilities.
Ensure that modern telecommunications facilities are widely accessible to business, industry and the community.
Ensure the communications technology needs of business, domestic, entertainment and community services are met.
Ensure that the use of land for a telecommunications facility is not prohibited in any zone.
Encourage the continued deployment of broadband telecommunications services that are easily accessible by:
  - Increasing and improving access for all sectors of the community to the broadband telecommunications trunk network.
  - Supporting access to transport and other public corridors for the deployment of broadband networks in order to encourage infrastructure investment and reduce investor risk.
Ensure a balance between the provision of important telecommunications services and the need to protect the environment from adverse impacts arising from telecommunications infrastructure.
Planning should have regard to national implications of a telecommunications network and the need for consistency in infrastructure design and placement.

Policy documents
Consider as relevant:
Waste and resource recovery

Objective
To reduce waste and maximise resource recovery so as to reduce reliance on landfills and minimise environmental, community amenity and public health impacts.

Strategies
Ensure future waste and resource recovery infrastructure needs are identified and planned for to safely and sustainably manage all waste and maximise opportunities for resource recovery.

Protect waste and resource recovery infrastructure against encroachment from incompatible land uses by ensuring buffer areas are defined, protected and maintained.

Ensure waste and resource recovery facilities are sited, designed, built and operated so as to minimise impacts on surrounding communities and the environment.

Encourage technologies that increase recovery and treatment of resources to produce energy and other marketable end products.

Enable waste and resource recovery facilities to locate close together in order to share separation distances, reduce the impacts of waste transportation and improve the economic viability of resource recovery.

Site, design, manage and rehabilitate waste disposal facilities in accordance with the Waste Management Policy (Siting, Design and Management of Landfills) (Environment Protection Authority, 2004).

Integrate waste and resource recovery infrastructure planning with land use and transport planning.

Encourage development that facilitates sustainable waste and resource recovery.

Policy guidelines
Consider as relevant:
- Any applicable Regional Waste and Resource Recovery Implementation Plan.

Policy documents
Consider as relevant:
- Statewide Waste and Resource Recovery Infrastructure Plan (Sustainability Victoria, 2015)
- Metropolitan Waste and Resource Recovery Implementation Plan (Metropolitan Waste and Resource Recovery Group, 2016)
- Waste Management Policy (Siting, Design and Management of Landfills) (Environment Protection Authority, 2004)
- Best Practice Environmental Management Guideline (Siting, Design, Operation and Rehabilitation of Landfills) (Environment Protection Authority, 2001)
- Victorian Organics Resource Recovery Strategy (Sustainability Victoria, 2015)
- Designing, Constructing and Operating Composting Facilities (Environment Protection Authority, 2015)
LOCAL PLANNING POLICY FRAMEWORK

This section sets out the Municipal Strategic Statement and the Local Planning Policies that apply to the area covered by this planning scheme, and includes provisions about their operation.
The municipality has an area of 6,000 square kilometres and is located in the north-west of Victoria. The Murray River borders the municipality. The Murray River corridor accommodates the majority of the population and irrigated agriculture. The municipality is part of a wider region which features an extensive agricultural area and one of the most productive areas of the Murray Darling Basin. Swan Hill’s strategic location and transport advantages enable ready supply to markets in Melbourne, Sydney, Brisbane and Adelaide.

Both Swan Hill and Robinvale play an important regional role and have cross border significance at either end of the municipality that extends into south western New South Wales and areas in Victoria outside of the municipality.

Coordination of strategic and land use planning with the State and local governments in New South Wales is particularly important within the Murray River Corridor, including land within the floodplain. Protecting the Murray River’s water quality and riverine habitat are major issues for all Murray River Corridor municipal councils. Coordinate cross border planning is also important for border towns such as Swan Hill and Robinvale.

The municipality’s distinctive nineteenth and twentieth century character tells an important story about the way of life, rural hardships, taming of the environment, economic and social development within the region. It is important that heritage places are recognised, protected, retained, conserved, interpreted and celebrated and that new development is respectful of and makes a positive contribution to the municipality’s heritage values.

The municipality, like other parts of the region, has seen structural change in the population for several decades. The population is ageing, and there has been significant population loss from rural areas and small centres, specifically in dryland farming areas. A counter trend is also evident, largely resulting from the location of the municipality, and its two largest centres on the River Murray within increasingly important horticultural areas, and areas where lifestyle advantages have drawn new people to settle.

In 2006 the estimated population of Swan Hill Rural City was 21,285 and is forecast to grow by less than 1,000 to 2026. The Council Plan 2009-2013 states that Council is seeking to grow the regional population to 40,000 by 2040.

The municipality’s urban focus is provided by Swan Hill regional centre and Robinvale which serves the northern part of the municipality. Swan Hill is a major regional centre for population, employment, retail, business, industrial, government, educational and health-medical services. Robinvale’s role as a sub-regional centre is growing. Smaller centres such as Lake Boga, Woorinen, Nyah-Nyah West, Boundary Bend, Manangatang, Ultima, and Piangil serve local needs.

The agricultural base of the municipality and adjoining areas is expanding and diversifying, particularly with new irrigation areas supporting expanded vine planting and vegetable growing. Increasingly the prospects for local food processing are being enhanced. Beef cattle and sheep for meat and sheep for wool production are important industries for eastern Mallee. The Murray Darling Basin Authority (MDBA) has released the proposed Basin Plan which has the potential to reduce the amount of water available for agriculture and divert it for environmental purposes within the Basin.

Tourism attractions based on the Murray River, the river towns, recreational opportunities at places like Lake Boga and the Swan Hill Pioneer Settlement are important components of the municipality’s tourism role. Horticultural industries and product and special regional events are becoming important components of local and regional tourism.

The livelihood of the municipality depends upon efficient transport corridors especially the Loddon and Murray Valley Highways which provide regional connections to Bendigo and Mildura and the Mallee Highway link between Adelaide and Sydney. The local road network is an important road infrastructure that needs to be maintained and improved especially for all weather access. New urban development needs to be integrated with land use and road based transport planning, including public transport.
Airports of regional significance are located at Swan Hill and Robinvale. SwanLink and V-Line provide daily connections between Swan Hill, Melbourne and other regional centres and between centres in the municipality.

The provision of a reticulated gas supply to Swan Hill is central to growing the local economy further.
KEY INFLUENCES AND ISSUES

Key influences

The key influences in relation to the municipality are:

- Moderate population growth is expected in Swan Hill and Robinvale.
- The size of households has declined over time and is consistent with general national trends.
- The population is ageing and will require a diversified housing stock.
- Access to irrigation water is critical to the ongoing growth of the horticultural sector. Proposals by the Murray Darling Basin Authority to reduce agricultural water entitlements and divert it to the environment could stifle long term horticultural growth.

Key issues

The key issues facing Swan Hill are focused around six strategic themes:

Settlement and housing

- The maintenance of Swan Hill as the major regional centre which most other towns rely on for services and facilities.
- The role of Robinvale in supporting the smaller settlements in the northern part of the municipality.
- The co-ordination of residential growth in Swan Hill so that infrastructure is provided equitably between the developer and the community.
- The facilitation of residential growth in smaller towns.
- The provision of an alternative to Tower Hill in Swan Hill as a new residential development front.
- The provision of highway commercial development in Swan Hill on the basis that infrastructure and access issues are addressed and it does not compete with the role of the Swan Hill CBD.
- The provision of rural residential development within planned estates.

Environment

- The protection of the environmental values of the Murray River corridor.
- The river and its wetlands provide significant habitat values for flora and fauna.
- Flooding is a significant environmental risk, particularly along the Murray River.

Natural resource management

- The continued growth of the horticulture industry.
- The protection of horticultural land for agriculture.
- The need to support dry land agriculture.
- The significant potential for adding value to agricultural product including horticulture.

Built environment and heritage

- The protection of Aboriginal and European heritage is critical to the growth in tourism and sense of place.

Economic development

- The importance of manufacturing industries as a component of the Swan Hill economy.
- The need to facilitate the growth of the mineral sands and solar industries.
Significant tourism opportunities in Swan Hill with the redevelopment of the riverside precinct and linking it to the CBD, the Pioneer Settlement and the new Murray River bridge crossing.

The significant potential for tourism along the Murray River corridor, including the Riverside precinct in Robinvale.

**Infrastructure and transport**

- The need for a coordinated, efficient and equitable approach to the provision of infrastructure and community facilities.
- The need to ensure that urban development is connected to reticulated services.
- The importance of considering stormwater management for urban development.
- The potential for the Swan Hill airport to cater for growth and provide for passenger and freight services.
- The need for a replacement interstate bridge at Swan Hill.
- The need for inter-modal freight facilities.
- The importance of the provision of reticulated gas for value adding industries and reducing the community’s carbon footprint.
- The uptake of improved irrigation practices via projects such as the Northern Victorian Irrigation Renewal Project (NVIRP).

**Land use themes**

The objectives, strategies and implementation, including policy guidelines, scheme implementation and further strategic work, for the key land use themes identified above are outlined in Clauses 21.04-21.09 as follows:

Clause 21.04: Settlement and housing
Clause 21.05: Environment
Clause 21.06: Natural resource management
Clause 21.07: Built environment and heritage
Clause 21.08: Economic development
Clause 21.09: Infrastructure and transport
VISION AND STRATEGIC FRAMEWORK

21.03

12/07/2012
C39

Vision

The Council Plan 2009-2013 contains the following vision:

* A vibrant community that displays growth and sustainability with a strong identity and confidence in a prosperous future by working together.*

The vision is based on the following values:

**Achievement** - Actively pursue positive outcomes for the community.

**Community Engagement** - Ensuring our communities are engaged, informed and able to contribute to council’s decision-making process.

**Leadership** - Council will lead and develop leadership within our community.

**Fairness** - We will ensure that all members of the community are treated equitably.

**Integrity** - We act with integrity, honesty and in ways that reflect our values.

**Tolerance and Community Cohesion** - Accepting, valuing and embracing the diversity of our community.

**Accountability** - Being transparent in our decision-making, we welcome public scrutiny and community feedback.

Additional references to the Council Plan are provided as an introduction to each key theme in Clauses 21.04-21.09.

21.03-2

12/07/2012
C39

Strategic framework

The strategic planning framework for the municipality comprises the following Strategic Framework Plans:

- Municipal Strategic Framework Plan - Parts (a) and (b).
- Swan Hill Sub-Regional Framework Plan.
- Robinvale Sub Regional Framework Plan

Town based strategic plans are contained in the Local Areas section of the Municipal Strategic Statement at Clause 21.10.
ROBINVALE SUB-REGIONAL FRAMEWORK PLAN

Robinvale Sub-regional Strategy Plan
Prepare strategy addressing important sub-regional and local issues such as
the future role of smaller towns/bastlements along Murray River Corridor,
housing for external workers, infrastructure requirements of a growing
horticultural industry, and Robinvalle's growing importance as a service centre.

Robinvale Township
Prepare Integrated Planning Strategy for Robinvale
township to include assessment of future supply
of land for major land uses e.g. residential and industrial.

Horticultural Areas
Encourage extension of irrigated horticultural areas
where there is minimal environmental impact.

Dryland Agriculture
Continue to promote importance
of dryland agriculture to the
municipality and region.

↓ Swan Hill Sub-regional Plan ↓

This plan is indicative only.
SETTLEMENT AND HOUSING

This Clause provides local content to support Clause 11 (Settlement) and Clause 16 (Housing) of the State Planning Policy Framework.

The Council Plan 2009-2013 is committed to the following in terms of settlement and housing issues:

- Ensuring a sufficient and appropriate supply of land is available for housing development.

Settlement network and hierarchy

Overview

There is a settlement hierarchy in the municipality. Swan Hill is the largest town in the municipality and has a regional service role that extends beyond the municipal and state borders. Robinvale plays a similar role at a smaller scale for those areas in the north of the municipality. The ongoing growth of these towns is critical to support the network of smaller towns.

The municipality is characterised by a network of towns and smaller settlements which support and are supported by agriculture. Smaller urban centres include Lake Boga, Nyah-Nyah West, Manangatang, Ultima, Woorinen South, Boundary Bend, Piangil, Wood Wood and Beverford. With the exception of Lake Boga, population growth in these townships has been limited. Some population growth may occur in the future if strategies are encouraged based on retirement housing, commuting, tourism-leisure based development, or the promotion of alternative lifestyles based on low density and rural residential lots. Smaller towns have become more reliant on larger centres such as Swan Hill. The declining level of services in the municipality’s smaller towns is an impediment to their future growth.

Land use and development planning needs to support township roles based on service provision, townscape qualities, heritage and proximity to the River Murray or retirement.

The Murray River is an asset of National and State significance. The River serves a variety of environmental, economic, social, recreational and tourist functions. In conjunction with all Victorian municipalities along the Murray River, the Department of Planning and Community Development is developing a uniform planning policy to provide a consistent performance based approach to the use and development of land in the Murray River environs. This policy will reflect the principles of the Regional Environment Plan No. 2 that applies along the Murray River Corridor in New South Wales.

Key issues

- Maintaining Swan Hill as the major regional centre which most other towns rely on for services and facilities.
- Recognising that Robinvale supports the smaller settlements in the northern part of the municipality.
- Coordinating residential growth in Swan Hill where infrastructure is provided equitably between the developer and the community.
- Facilitating residential growth in smaller towns.
- Recognising that moderate population growth is expected across Swan Hill and Robinvale.
- Recognising that the size of households has declined over time and is consistent with general national trends.
- Recognising that the population is ageing and will require a diversified housing stock.

Objective 1

To maintain the settlement hierarchy.
Strategies

Strategy 1.1 Encourage use and development that will assist Swan Hill and Robinvale maintaining and enhancing their respective regional roles as significant providers of residential, commercial, business, industrial land and community services and facilities.

Strategy 1.2 Encourage major commercial and industrial uses to locate in Swan Hill and Robinvale.

Objective 2

To maintain and support the network of towns and small settlements.

Strategies

Strategy 2.1 Promote the future role of towns by encouraging the location of rural industries in rural areas at locations where the impact on agricultural land and off site effects are minimised, and where good road access is available or can be provided.

Strategy 2.2 Develop complimentary roles for towns based on strengths and opportunities relating to retirement, tourism, low density residential and rural living, and recreation and commuting.

Encourage developments in towns that support their townscape character.

Ensure new urban development in township and urban areas is connected to reticulated services.

Provide opportunities for low density residential and rural living at the edge of townships at locations where urban services are available.

Objective 3

To provide a diversified housing stock for an ageing population.

Strategies

Strategy 3.1 Encourage residential development at a range of densities with a variety of dwellings to meet the needs of an ageing population.

Strategy 3.2 Encourage well designed accommodation for aged persons in appropriate locations.

Reference documents

Rural City of Swan Hill Integrated Strategy Plan

Orderly growth of towns and settlements

Overview

The settlement pattern in the municipality comprises a range of different sized urban centres. Each of the towns performs a service role for town residents and rural communities and has varying levels of growth. Maintaining the orderly growth of towns is important to provide for developer certainty, ensuring an efficient and equitable distribution of the costs of urban infrastructure and protecting the surrounding agricultural areas from inappropriate development.

Key issues

- Providing an alternative to Tower Hill in Swan Hill as a new residential development front.
- Providing rural residential development within planned estates.

Objective 4

To maintain orderly growth.

Strategies

Strategy 4.1 Ensure the sequential release of land for urban development, especially residential, to maximise the use of existing infrastructure.

Strategy 4.2 Require an overall development plan for residential development fronts in Swan Hill and Robinvale.
Objective 5
To accommodate the majority of population growth within urban centres.

Strategies

**Strategy 5.1** Encourage infill and new development in urban areas within town boundaries.

**Strategy 5.2** Discourage inappropriate development in areas where longer term growth is expected until a framework plan or outline development plan has been approved.

Implementation
The strategies in relation to settlement and housing will be implemented through the planning scheme by:

Application of zones and overlays

- Applying the General Residential Zone to residential areas in Swan Hill, Robinvale, Lake Boga and Nyah and Nyah West to encourage infill and new residential development.

- Applying the Low Density Residential Zone and its schedule to rural residential land in Swan Hill, Robinvale and Lake Boga to provide for rural residential development at the edge of urban areas.

- Applying the Township Zone to facilitate development opportunities in Woorinen South, Ultima, Manangatang, Boundary Bend, Piangil, Wood Wood and Beverford to encourage a range of urban uses.

- Applying the Special Use Zone Schedule 2 to the Swan Hill Clay Target Club to provide for the development associated or related to the activities of the clay target club.

- Applying the Design and Development Overlay Schedule 4 to the Swan Hill Williams Road area to minimise impacts between industrial and low density residential development.

- Applying the Design and Development Overlay Schedule 5 to the former Swan Hill Technical School oval to provide for lower density residential lots and the orderly development of the interface land between the General Residential Zone and Low Density Residential Zone.

- Applying the Development Plan Overlay Schedule 1 to the General Residential zoned land to guide the form and condition of General Residential zoned land.

- Applying the Development Plan Overlay Schedule 2 to land zoned Low Density Residential Zone to guide the form and condition of Low Density Residential land.

Further strategic work

- Conducting a review of the Swan Hill Residential Development Strategy 2006, its forecasts and whether a new residential development front is required.

- Preparing an Outline Development Plan for the Swan Hill South West Development Precinct to facilitate future residential development.

- Preparing a rural residential strategy for the municipality to investigate new low density residential opportunities and consider the use of the Rural Activity Zone and Rural Living Zone in appropriate areas.

- Reviewing the following sites for potential urban uses in Swan Hill:
  - North Park (old croquet club);
  - Former saleyards land fronting the highway;
  - Racecourse land fronting the highway; and
  - Blackwire Reserve west of Tower Hill for solar farm potential.
Identifying longer term land use opportunities for the former aerodrome site adjacent to Anzac Road in Robinvale.

Nyah Land Use Planning Strategy

Table 1 – Infrastructure to be Provided (Swan Hill Rural City Council, 2016)

Table 2 – Existing Infrastructure to be Upgraded (Swan Hill Rural City Council, 2016)
ENVIRONMENT

This Clause provides local content to support Clause 12 (Environmental and Landscape Values) and Clause 13 (Environmental Risk) of the State Planning Policy Framework.

The Council Plan 2009-2013 is committed to the following in terms of the environment:

- Recognising that our economic and community wellbeing are linked to the health of the Murray River and lakes systems. Council seeks to minimise any detrimental impact on the health of the river or the lakes through advocacy, facilitation and direct action.
- Recognising that our economic and community wellbeing are linked to the health of the Mallee and bushland reserves. Council seeks to minimise any detrimental impact on the health of these environs through advocacy, facilitation and direct action.
- Encouraging the adoption of practices that reduce our overall impact on the environment.
- Seeking to protect indigenous flora and fauna, with individual decisions based on sound application of legislation, policies and guidelines.
- Ensuring the appropriate management and protection of our built and natural environment to meet the needs of our community.

Murray River corridor

Overview

The municipality has a major frontage to the Murray River. The Murray River and its environment are a vital and fragile ecosystem. The River Murray Reserve performs an important role in protecting the Murray River from erosion and maintaining flora and fauna habitats. Activities that have altered the quality of its character include clearing of vegetation, irrigation practices, cultivation of adjacent land, access roads, recreation activity, firewood collection, grazing by livestock and water diversion infrastructure.

Consistent and coordinated land use planning and development needs to be promoted along the Murray River Corridor with the major aims of protecting important environmental and cultural values, promoting opportunities for tourism and recreation, and ensuring maintenance of the quality and quantity of water for downstream users. Coordinated approaches to planning and management of the Murray River Corridor are required to prevent conflict arising from urban development, tourism and recreation development along the waterway and on adjoining land.

Key issues

- Protecting the environmental values of the Murray River corridor.
- Recognising that the river and its wetlands provide significant habitat values for flora and fauna.

Objective 1

To manage the Murray River corridor’s environmental values and resource capacity.

Strategies

| Strategy 1.1 | Provide opportunities for better use and physical and visual integration of the River within river towns and promote the establishment of riverside urban precincts. |
| Strategy 1.2 | Ensure that land use activities and development adjacent to the Murray River Reserve protects environmental, visual and landscape values of the river and environs. |
| Strategy 1.3 | Develop the Murray River as a primary recreation, tourism and cultural focus for Swan Hill by implementation of the Swan Hill Riverside Precinct concept. |
| Strategy 1.4 | Prevent conflict arising from agricultural, urban, tourism, recreational, and other uses and developments along the Murray River and on adjoining and nearby land. |
Implementation

The strategies in relation to the Murray River corridor will be implemented through the planning scheme by:

Application of zones and overlays

- Applying the Public Conservation and Resource Zone (PCRZ) along the Murray River Reserve to protect its environmental values.

Further strategic work

- Participating with the Department of Sustainability and Environment, in conjunction with other municipalities bordering the Murray River, to finalise and implement a regional policy to protect the Murray River environs, and introduce this policy into the Planning Scheme.

Reference documents

Murray River Frontage Action Plans - Nyah to Robinvale & Robinvale to Merbein

Catchment and land protection

Overview

The natural resources and catchment of Swan Hill Rural City are significant to the local, regional and State environments. The sustainability of land and water resources in the catchment is integral to the municipality’s environmental, economic and social well-being.

The Rural City of Swan Hill is a unique area of north west Victoria consisting of riverine floodplains and Mallee dunefields. Land use and development reflects the diverse landscapes of the Rural City. The floodplain and adjacent dunefields are extensively utilised for irrigated horticulture and pasture, and urban and rural residential development.

In the dunefields away from the floodplain, cereal cropping, broadacre pasture and smaller rural settlements dominate. Waterway health is an important aspect of catchment health in the municipality. The threats and pressures upon the Murray River and adjacent riparian vegetation from expanding development are a major challenge.

Unlike other areas of the Mallee, Swan Hill Rural City retains only a small number of public reserves with remnant native vegetation. The protection and maintenance of remnant native vegetation on private land is important for catchment health and prevention of wind erosion, particularly in dryland farming areas.

Key issues

- Recognising the regional importance of catchment and land protection.

Objective 2

To ensure the sustainable development of natural resources of land, flora, natural ecosystems and water, including groundwater.

Strategies

<table>
<thead>
<tr>
<th>Strategy number</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.1</td>
<td>Ensure that land use and development provides a net environmental benefit to the catchment.</td>
</tr>
<tr>
<td>2.2</td>
<td>Ensure use and development of land is consistent with and implements regional catchment strategies and associated plans.</td>
</tr>
<tr>
<td>2.3</td>
<td>Ensure protection of the catchment, natural environment and landscape by requiring development to be setback from waterways and water bodies.</td>
</tr>
<tr>
<td>2.4</td>
<td>Encourage the use of a whole-of-farm approach to agricultural development, using a ‘whole farm plan’ prepared in accordance with the Department of Primary Industries guidelines and approved by the responsible authority.</td>
</tr>
</tbody>
</table>
Implementation
The strategies in relation to catchment and land protection will be implemented through the planning scheme by:

Application of zones and overlays
- Applying the Environmental Significance Overlay Schedule 1 to waterways, wetlands and lakes.
- Applying the Environmental Significance Overlay Schedule 2 to areas of poor drainage.
- Considering the application of the Environmental Significance Overlay to significant wetlands and environs on both private and public land, when further strategic work by the Department of Sustainability and Environment and Mallee Catchment Management Authority is complete.

Further strategic work
- Supporting the completion of the Mallee River Health Strategy and its use in informing Schedule 1 to the Environmental Significance Overlay.
- Supporting the completion of salinity mapping by the Mallee Catchment Management Authority and when complete, apply the Salinity Management Overlay to high salinity risk areas.
- Supporting the completion of wetlands inventories on private land by the Department of Sustainability and Environment and the completion of a wetland audit and prioritisation study and subsequent wetland management strategy by the Mallee Catchment Management Authority.

Conservation of native flora and fauna
Overview
The municipality has sites of threatened fauna such as the Regent Parrot, Carpet Python and Plains Wanderer and rare or threatened flora, such as the nationally vulnerable Yellow Swainson pea and the statewide vulnerable Wilga (that only occurs in the municipality). A number of threatened
vegetation communities exist within the Rural City of Swan Hill, including semi-arid herbaceous pine woodland, semi-arid shrubby pine - buloke woodland, semi-arid grassy pine – buloke woodland, Belah woodland and various grassland communities.

Only limited vegetated land in the Rural City of Swan Hill has been retained as protected public land. Much of the remaining vegetation within the municipality exists on roadsides and as freehold remnants. Native vegetation in the municipality is valuable to the natural environment and as a landscape and recreational resource. Roadside vegetation constitutes the major wildlife corridor network across the municipality.

The municipality also encompasses two other major wildlife corridors, the Murray River frontage and Lalbert Creek. Wildlife corridors are essential for the movement, development and survival of flora and fauna in the municipality, providing escape routes from danger and access for recolonisation.

Key issues
- Recognising the value of remnant native vegetation to the natural environment.
- Protecting biodiversity.

Objective 3
To protect remnant native vegetation, including understorey and vegetation constituting significant habitat and facilitate natural revegetation.

Strategies
- Ensure high value remnant native vegetation (assessed through the Victorian Native Vegetation Management Framework or as being in an area of depleted, vulnerable or endangered ecological vegetation class (EVC) identified in ecological vegetation communities mapping) is retained and enhanced.
- Ensure that native vegetation is retained in any land use or development proposal when there is an alternative to native vegetation removal.
- Retain native vegetation in subdivision or development proposals by discouraging location of lot boundaries, access tracks / roads, building sites or other works in areas that would require the removal of native vegetation.
- Protect and enhance native habitat, particularly the critical habitat of Victorian rare and threatened flora and fauna species and culturally significant vegetation.
- Encourage maintenance and development of linkages between existing remnant vegetation.

Objective 4
To protect and maintain biodiversity, including native vegetation and habitats for flora and fauna.

Strategies
Strategy 4.1 Maintain and develop linkages and habitat corridors between existing remnant vegetation.

Implementation
The strategies in relation to conservation of native flora and fauna will be implemented through the planning scheme by:

Application of zones and overlays
- Applying the Vegetation Protection Overlay Schedule 1 to remnant vegetation.
Further strategic work

- Modifying the Vegetation Protection Overlay map when vegetation mapping has been completed by the Department of Primary Industries.

- Applying the Vegetation Protection Overlay Schedule to the Regent Parrot habitat, when the Department of Sustainability and Environment has provided sufficient strategic justification.

Flooding

Overview

Floodplains of the Murray River and its tributaries affect urban and rural areas of the municipality. There is an absence of data to identify floodways from land subject to inundation. Land subject to inundation and floodways are identified by the Land Subject to Inundation Overlay where the division between the two flood plain types is not known.

Key issues

- Obtaining additional data to support further flood mapping.

Objective 5

To protect the floodplain from inappropriate development.

Strategies

Strategy 5.1 Delineate those portions of the River Murray, Avoca River, Little Murray River and Lalbert Creek flood plains which are inundated in a 1% probability flood event.

Strategy 5.2 Discourage development that could adversely inhibit the flow of flood waters.

Strategy 5.3 Maintain the function of the flood plains.

Implementation

The strategies in relation to flooding will be implemented through the planning scheme by:

Policy guidelines

- When deciding on an application in the Land Subject to Inundation Overlay, considering, as appropriate:
  - Clause 22.01 Flooding Policy.

Application of zones and overlays

- Applying flood zoning or overlay controls when all information is prepared in the correct format.

Further strategic work

- Completing local floodplain development plans for the Murray River, Loddon River and Avoca River Precincts by Catchment Management Authorities in consultation with Council.
Preparing an amendment to the planning scheme to implement the local floodplain development plans and revised flood mapping.

Reference documents
Swan Hill-Tyntynder Flats Floodplain Management Strategy
North Central Floodplain Management Strategy
Robinvale Irrigation District Stormwater Flooding Strategy
NATURAL RESOURCE MANAGEMENT

This Clause provides local content to support Clause 14 (Natural Resource Management) of the State Planning Policy Framework.

The Council Plan 2009-2013 is committed to the following in terms of natural resource management:

- Encouraging development and new business establishment based on the region’s comparative and competitive advantages.

Rural areas

Overview

The agricultural sector is a significant source of economic activity in the municipality. Subdivision and rural housing in rural areas that is not associated with dedicated rural and agricultural activities can potentially undermine the viability of the rural sector through land use conflict, loss of productive agricultural land, use of infrastructure and water that could be used for agricultural production, and land values exceeding agricultural value.

Housing for lifestyle purposes in rural areas has the potential to create demand for community and physical infrastructure that may be more appropriately located in dedicated rural living areas.

Key issues

- Recognising the importance of the agricultural sector to the local economy.
- Recognising the potential for subdivision and rural dwellings to undermine agriculture.

Objective 1

To ensure that any subdivision of land is for the rural or agricultural use and development of land, rather than for rural lifestyle lots and developments.

Strategies

Strategy 1.1 Discourage any proposed excision of land to create a separate lot for an existing house in irrigated horticultural areas.
Strategy 1.2 Consider any excision of land in dryland farming areas that is linked to and required for the ongoing rural and agricultural use of land.
Strategy 1.3 Require any proposed dwelling excision of land to occur via the realignment of existing titles.
Strategy 1.4 Discourage any proposed excision of land if the existing dwelling is to be excised is required to maintain the ongoing agricultural production and rural use of the land.
Strategy 1.5 Discourage the subdivision of land at Tyntynder Flats, Pental Island and north west of Lake Boga as shown on Maps 1-6 on pages 8-13 if the subdivision creates a lot of less than 40 hectares.
Strategy 1.6 Discourage the subdivision of land to the east of Lake Boga, Lalbert Creek Floodplain and any other rural land as shown on Maps 6-8 on pages 13-15 if the subdivision creates a lot of less than 100 hectares.

Objective 2

To ensure that new dwellings do not undermine the productive agricultural base of the municipality, particularly in irrigated horticultural areas.

Strategies

Strategy 2.1 Ensure any new dwelling has a relationship with and is required to directly support the continuing operation of an existing rural use conducted on the land.
Strategy 2.2 Ensure any new dwelling is compatible with and will not have an adverse impact on agricultural land and other rural land uses on the land, adjoining land and the general area.
Strategy 2.3 Ensure new dwellings:
  - Are set back from neighbouring farm land and do not reduce the potential for agricultural production or other rural uses on surrounding farm land.
Do not have an adverse effect on existing rural and irrigation infrastructure, and will not reduce the continuing use of this infrastructure for agricultural production.

Strategy 2.4 Encourage the consolidation of land in the same ownership to support applications for new dwellings.

Strategy 2.5 Discourage the construction of a dwelling on land at Tyntynder Flats, Pental Island and north west of Lake Boga as shown on Maps 1-6 on pages 8-13 if the lot is less than 40 hectares.

Strategy 2.6 Discourage the construction of a dwelling on land to the east of Lake Boga and Lalbert Creek Floodplain as shown on Maps 6-8 on pages 13-15 if the lot is less than 100 hectares.

Objective 3
To avoid land use conflicts between agricultural and non agricultural land uses.

Strategies

Strategy 3.1 Ensure there is an appropriate separation between agricultural and non agricultural land uses by using landscape buffers, orientation and siting of buildings.

Strategy 3.2 Ensure that use and development in the municipality is not prejudicial to agricultural industries or the productive capacity of the land.

Strategy 3.3 Discourage use and development of land that is incompatible with the use of land for agriculture.

Implementation

The strategies in relation to rural areas will be implemented through the planning scheme by:

Policy guidelines

- When considering an application for rural subdivisions, require the following information, as appropriate:
  A. A report that outlines and addresses:
    - A full description of the proposal, including details of the proposed subdivision and site.
    - Location of future dwellings and associated buildings and works, either through the use of building envelopes or through nominating ‘exclusion areas’ where these future developments will not be located.
    - Proposed servicing of the land, including all weather road access, potable and stock and domestic water supply, power, telecommunications, effluent disposal, stormwater management and fire safety.
    - An assessment of the proposal in accordance with the Swan Hill Planning Scheme, the Farming Zone and these policy guidelines.
    - The objectives of any relevant land use, agricultural and environmental strategies and policies, including relevant regional catchment strategies, regional vegetation management strategies and salinity management plans.
    - How the proposal considers land capability, including location of existing natural features, environmental constraints, waterway setbacks, native vegetation, and general protection and enhancement of the natural environment.
    - How any proposal for subdivision in irrigated/horticultural areas other than the minor realignment of boundaries between two lots meets the principles of any ‘whole farm plan’ prepared in accordance with the Department of Primary Industries guidelines and approved by the responsible authority.
  B. Plans indicating:
    - Existing site features, natural features and existing buildings/development.
    - Location of proposed lots and any future location of buildings and works, including proposed services.
When considering applications for rural subdivisions, except for land shown hatched on the attached maps on pages 8-15 in Clause 21.06, consider whether the application meets the following criteria or performance measures:

- A maximum area of 2 hectares for the lot with the existing house located on it, or if existing buildings and dwelling infrastructure covers a large area, as near as practicable to this area.
- A minimum area for the residual lot of at least the minimum subdivision size of the zoning that applies to the land.
- A minimum setback of 30 metres from the dwelling on the land to be excised from any agricultural activity or rural industry on any adjoining land.

When considering an application for any subdivision in an irrigated horticultural area, consider the use of a Section 173 agreement that notes:

- The area has intensive agricultural uses operating in it.
- The land and its occupants may experience off site rural activity effects, including noise, sprays and dust that may cause a loss of residential amenity.
- Existing agricultural and rural uses in the area have a ‘right to farm’ or right to legally continue the use.

When considering an application for a small lot excision (less than the minimum subdivision lot size of the zone), consider the use of a Section 173 agreement that notes:

- A dwelling may not be constructed in the future on the residual balance of the land being created by the subdivision.
- The size of the residual balance of the land cannot be reduced through a future realignment of titles to below the minimum subdivision size for the zone that applied to the land when the subdivision took place.
- The residual balance of the land may not be further subdivided.
- The excision is a once only approval that cannot be repeated for a dwelling that may be constructed on the land in the future.

When considering an application for a for a re-subdivision or averaging of lots, consider the use of a Section 173 agreement that notes:

- A dwelling may not be constructed in the future on any lot created by the subdivision that is below the minimum subdivision size of the zone.

When deciding on applications for rural subdivision the following matters will be considered, as appropriate:

- How the land to be subdivided is used for rural activities and agricultural production and the proposal meets the ongoing needs for these uses.
- How the subdivision minimises any potential amenity impact on adjacent or nearby land, and to maintain agricultural production on the subject land or adjoining / nearby land.
- How re-subdivision proposals consider the shape, size and location of the original titles and clearly demonstrate why a new configuration is required to achieve the objectives of the scheme and this policy. Any proposal for a new lot that will have an area below the minimum subdivision size of the zone must clearly demonstrate why this size is required to accommodate the natural features and maintain agricultural production on the land.
- How any proposal for subdivision in irrigated / horticultural areas other than the minor realignment of existing boundaries between two lots can be substantiated by any ‘whole farm plan’ prepared in accordance with Department of Primary Industries guidelines and approved by the responsible authority.
- How the proposal can be adequately serviced for water (potable, stock and domestic and fire fighting supply), effluent disposal, power, telecommunications, drainage and all weather road access.
- The need to consolidate land in the same ownership as part of a subdivision proposal in irrigated/horticultural areas if it is considered that consolidation would protect the existing and future productive use of rural and agricultural land.

- When considering an application for rural dwellings, require the following information as appropriate:
  A. A report that outlines and addresses:
     - A full description of the proposal, including details of the proposed dwelling and site.
     - Proposed servicing of the land, including all weather road access, potable and stock and domestic water supply, power, telecommunications, effluent disposal, stormwater management and fire safety.
     - An assessment of the proposal in accordance with the Swan Hill Planning Scheme, the Farming Zone and these policy guidelines.
     - The objectives of any relevant land use, agricultural and environmental strategies and policies, including relevant regional catchment strategies, regional vegetation management strategies and salinity management plans.
     - How the proposal considers land capability, including location of existing natural features, environmental constraints, waterway setbacks, native vegetation, and general protection and enhancement of the natural environment.
     - For any proposal for a dwelling in irrigated/horticultural areas, how the proposal meets the principles of any ‘whole farm plan’ prepared in accordance with the Department of Primary Industries guidelines and approved by the responsible authority.
  B. Plans indicating:
     - Existing site features, natural features and existing buildings/developments.
     - Location of proposed works, including building layout, access and proposed services.
     - Building elevations, dimensions and materials.

- When considering an application for dwelling in an irrigated horticultural area, consider the use of a Section 173 agreement that notes:
  - The area has intensive agricultural uses operating in it.
  - The land and its occupants may experience off site rural activity effects, including noise, sprays and dust that may cause a loss of residential amenity.
  - Existing agricultural and rural uses in the area have a ‘right to farm’ or right to legally continue the use.

- When deciding on applications for a rural dwelling the following matters will be considered, as appropriate:
  - The relationship between the dwelling and rural activities and agricultural production and whether the proposal meets an ongoing need for a dwelling to support these uses.
  - Protection of existing and future productive potential and use of rural and agricultural land.
  - How the proposal minimises any potential amenity impact on the proposed dwelling of rural activities and agricultural production on adjacent or nearby land.
  - Maintenance and when possible enhancement of existing environmental features and values of the land.
- Whether a proposal for a dwelling in irrigated / horticultural areas can be substantiated by any ‘whole farm plan’ prepared in accordance with Department of Primary Industries guidelines and approved by the responsible authority.

- How the proposal can be adequately serviced for water (potable, stock and domestic and fire fighting supply), effluent disposal, power, telecommunications, drainage and all weather road access.

- The need to consolidate land or in the same ownership as part of a dwelling proposal in irrigated areas if it is considered that consolidation would protect the existing and future productive use of rural and agricultural land.

Agriculture and horticulture

Overview

Agriculture is an important industry in the municipality and its protection and enhancement is linked to the environmental and economic well being of the community.

Agricultural production is the cornerstone of the municipality’s and the Murray Mallee’s regional economy. Swan Hill region has one of the most productive and diverse agricultural sectors in Australia. The total annual value of agricultural production in the municipality is estimated to be at least $344 million. Considerable opportunities have been identified for expansion and growth of the horticultural industry.

The transfer and trading of water has led to the establishment of intensive agricultural industries on land that was not traditionally used for this purpose, such as at Wemen. There are substantial opportunities to diversify the agricultural and horticultural base by optimising the use of water and irrigation infrastructure and finding opportunities to process local product and develop markets including tourism.

Value added industries will predominantly locate in industrial areas within urban centres, however their location within rural areas may be justified where certain environmental and infrastructure criteria can be met (soil type, effluent treatment and disposal, good road access and minimisation of off-site effects).

The significant development potential of the municipality’s rural sector needs to be underpinned by sustainable development and management of the natural resource base especially in those areas which can be supplied with irrigated water, and where higher value products can be grown.

Land capability and land suitability are important determinants for agricultural sustainability in the municipality.

The use of land for horticultural production involves practices that can have off site effects such as spraying, scare guns and the use of machinery at night. It is essential that land use conflicts between agricultural uses and other land uses are avoided and that the productive and economic agricultural resource of the municipality is protected, particularly in the irrigated horticultural areas. Growth in the intensive horticulture developments has given rise to issues such as housing and the future of smaller settlements along the Murray River.

Key issues

- The continued growth of the horticulture industry.
- Protection of horticultural land for agriculture.
- Access to irrigation water is critical to the ongoing growth of the horticultural sector. The proposals by the MDBA to reduce agricultural water entitlements and divert it to the environment could stifle long term horticultural growth.
- Supporting dry land agriculture.
Objective 4
To realise and capitalise on agricultural/horticultural and food industry development opportunities.

Strategies

Strategy 4.1 Support the diversification of agriculture, the development of agroforestry and the processing of agricultural products grown within the municipality.

Strategy 4.2 Encourage development of high value irrigated agriculture and a mix of agricultural enterprises that optimises water use.

Strategy 4.3 Encourage the location of value-added industries in industrial areas within urban centres and where appropriate in rural areas subject to site management and design guidelines.

Strategy 4.4 Continue to develop and market the image of the municipality and the Murray Mallee region as ‘clean and green agriculture’ and producer of fine foods.

Strategy 4.5 Extend efficient irrigation systems to areas which have a demonstrated capacity to be able to manage additional water without lessening the value and long term productive capacity of land.

Strategy 4.6 Protect irrigation and road infrastructure in horticultural areas in the municipality.

Objective 5
To ensure intensive animal husbandry uses and developments are suitably located.

Strategies

Strategy 5.1 Ensure that the site area that is developed with enclosures, yards or buildings used for the holding of animals is suitably located and fenced.

Strategy 5.2 Encourage landscaping of the site that removes any adverse visual impact of the development on the surrounding area.

Strategy 5.3 Ensure that all manure and polluted run-off water from any enclosures, yards or buildings used in conjunction with any intensive animal husbandry, or any water otherwise contaminated as a result of such use, be treated and disposed of either within the boundaries of the site or in an alternative manner to the satisfaction of the responsible authority.

Strategy 5.4 Support measures that ensure that the use and development proposed does not prejudicially affect the amenity of the locality by reason of appearance or emission of noise, smell, fumes, waste water, waste products or otherwise.

Strategy 5.5 Ensure that no enclosures, yards or buildings where animals are intensively raised are located within 200 metres of any river, creek, water course or pondage, within 500 metres of a dwelling on any other property, or within 30 metres of any road (whether or not this road forms the frontage of the land).

Strategy 5.6 Discourage the use of sites that are less than 4 hectares in area and the total area for buildings, yards or enclosures used for the enclosure of animals does not exceed 10 percent of the area of the site.

Implementation
The strategies in relation to agriculture and horticulture will be implemented through the planning scheme by:

Policy guidelines

- When considering an application for intensive animal husbandry, require as appropriate plans and information indicating:
  - Dimensions and locations of all existing and proposed new buildings and works, extensions or alterations on the site and title boundaries at a minimum scale of 1:200.
  - Drainage lines through the land or for run-off water that may be discharged from the site.
  - Location of existing dwellings on the site and adjacent properties, and the existing use of all other lands within 0.5 kilometres of the site.
  - Areas used or to be used for intensive animal raising, grazing or for dry sows, manure disposal and drainage disposal.
- Source and capacity of water supply to the site.
- Clear delineation (pegging) on the site of boundaries of proposed buildings and works to permit inspection by the responsible authority.

- When considering an application for intensive animal husbandry, consider whether the application meets the following criteria or performance measures:
  - Enclosures, yards or buildings where animals are intensively raised located at least 200 metres from any river, creek, water course or pondage, at least 500 metres from a dwelling on any other property, or at least 30 metres from any road (whether or not this road forms the frontage of the land).
  - A minimum site area of 4 hectares.
  - A maximum total area for buildings, yards or enclosures used for the enclosure of animals of 10 percent of the area of the site.

- When deciding on applications for intensive animal husbandry, the following matters will be considered, as appropriate:
  - The effect of the proposed development on the amenity of adjacent land.
  - Whether the ability to use adjacent land for rural activities and production will be compromised by the proposed development.

**Application of zones and overlays**

- Applying the Farming Zone and its Schedule to specify minimum lot sizes for dryland and irrigated horticulture areas to protect agricultural land for agricultural uses.

BUILT ENVIRONMENT AND HERITAGE

This Clause provides local content to support Clause 15 (Built Environment and heritage) of the State Planning Policy Framework.

The Council Plan 2009-2013 is committed to the following in terms of built environment and heritage:

- Recognising, preserving, promoting and celebrating our identity, our history and our future, embracing our diversity while building a cohesive community.
- Recognising the original custodians of all land and waters in the Rural City of Swan Hill.
- Ensuring the appropriate management and protection of our built and natural environment to meet the needs of our community.

High standard of urban design

Overview

The design of buildings, their mass and scale is important in preserving the historical attributes and visual character and appearance of towns. Design of buildings and works should demonstrate that these factors have been considered.

Key issues

- Recognising the importance of the visual character and appearance of towns.
- Preserving the historical attributes of towns.

Objective 1

To ensure the design, layout, height and appearance of new development contributes to the improvement of the character and visual amenity of towns.

Strategies

<table>
<thead>
<tr>
<th>Strategy</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Strategy 1.1</td>
<td>Ensure the consideration of local heritage values and built character of towns when designing and siting development.</td>
</tr>
<tr>
<td>Strategy 1.2</td>
<td>Ensure streetscape character is considered in the design and siting of buildings and works for new uses and developments.</td>
</tr>
<tr>
<td>Strategy 1.3</td>
<td>Require street tree plantings that offer shade and protection from the elements as part of proposals.</td>
</tr>
<tr>
<td>Strategy 1.4</td>
<td>Encourage street tree plantings that are consistent with indigenous flora of the region and Council's Street Roadside and Parkland Vegetation Procedures statement.</td>
</tr>
</tbody>
</table>

Highway development

Overview

Presentation of highway entrances is important to the regional centre image of Swan Hill and to the character of townships. Siting and design of buildings and landscaping along frontages to private and public land need to enhance the visual and streetscape character of city and town entrances.

Highway development at the entries to the municipality’s townships needs to be of an appropriate scale with adequate setbacks and landscaping to maintain township character.

Key issues

- Recognising the importance of highway entrances to the image of Swan Hill.
- Encouraging well designed development at entrances to townships.
Objective 2
To maintain and enhance existing built and landscape character and presentation of town entrances.

Strategies
Strategy 2.1 Ensure that new development enhances the appearance and presentation of highway entrances through siting, design, height, built form, mass, materials and external finishes.
Strategy 2.2 Ensure development located along highways is landscaped to absorb the development into existing streetscapes and urban and rural character and protects existing vegetation.
Strategy 2.3 Discourage industrial and business development proposals with large external storage areas visible from the highway or main road.
Strategy 2.4 Discourage traditional retail uses that could undermine the role of town CBD areas.

Objective 3
To ensure that use and development of land does not lessen the service, safety and role and amenity of highways and major roads.

Strategies
Strategy 3.1 Limit the number of access points to the highway network.
Strategy 3.2 Require service roads, where appropriate.

Implementation
The strategies in relation to urban design and highway development will be implemented through the planning scheme by:

Policy guidelines
- When considering an application for development that fronts the Murray Valley Highway within Swan Hill, require as appropriate information including:
  - An urban design context report addressing:
    - The frontage setbacks of proposed buildings having regard to setbacks of adjacent buildings and the streetscape character.
    - Visual appearance of car parking areas and measures to soften the impact on existing streetscape character.
    - Building height, scale and mass and facade treatments having regard to existing streetscape character.
    - Landscaping and tree planting having regard to existing streetscape, entrance and landscape character.
    - How the proposal responds to existing urban character.
- When considering an application for development that fronts the Murray Valley Highway within Swan Hill, consider whether the application meets the following criteria or performance measures:
  - Buildings and open storage areas should generally not exceed 60 percent of the site.
  - Frontage setback should be equivalent to the setback of neighbouring buildings or, where they vary, the average setback distance.
  - Frontage setback should be a minimum of 10 metres from a property boundary.

Further strategic work
- Preparing a town entry design concept for Murray Valley Highway/Latje Road intersection at Robinvale.
Heritage

Overview
The heritage places within the Rural City of Swan Hill provide tangible links with the past; they demonstrate various important phases in the development of individual towns and the region, and can also provide evidence of now-obsolete aspects of daily life. Heritage places are thus valuable and irreplaceable elements which can contribute to the creation of a sense of place and connectivity to the past for the local community, as well as enrich the experience of tourists and other visitors. The conservation, protection and maintenance of this heritage have community, economic and cultural significance to the municipality.

Aboriginal heritage sites and objects are an important element of the pre-history of the municipality. These should be protected and development should be consistent with a cultural heritage management plan where required.

Key issues
- Recognising the critical importance of the protection of Aboriginal and European heritage to the growth of tourism and a sense of place.

Objective 4
To protect and conserve all heritage buildings, places, trees, streetscapes.

Strategies
- **Strategy 4.1** Encourage the conservation and enhancement of heritage places in the Heritage Overlay.
- **Strategy 4.2** Consider the impact of the proposed use and or development upon the maintenance and conservation of the heritage place.
- **Strategy 4.3** Discourage the demolition or substantial alteration of any heritage place.
- **Strategy 4.4** Consider the character and local heritage values of towns and rural areas with the siting and design of new developments.
- **Strategy 4.5** Encourage owners of significant or contributory buildings within heritage precincts to preserve the streetscape character by:
  - Repainting buildings in heritage colour schemes where this is appropriate to the various periods of construction. Early buildings of face brick should retain original unpainted finish.
  - Removing intrusive accretions, such as modern verandahs and carports, and replacing them with structures of more suitable design.
- **Strategy 4.6** Retain original front fences (timber pickets, woven wire and so on) and maintain heritage gardens, such as they are.

Objective 5
To recognise the significance of local Aboriginal heritage.

Strategies
- **Strategy 5.1** Promote the identification, protection and management of Aboriginal cultural heritage.

Implementation
The strategies in relation to heritage will be implemented through the planning scheme by:

Policy guidelines
- When considering proposals to use or develop land or to change the zoning of an area where there is a known site or the potential for Aboriginal archaeological sites to occur, require the following information, as appropriate:
A report prepared by a suitably qualified archaeologist demonstrating that the impact of the proposed development on Aboriginal cultural heritage values has been addressed.

- When deciding on applications affecting buildings, sites, places and landscapes of cultural heritage significance, including those listed in the schedule to the Heritage Overlay, the following matters will be considered, as appropriate:
  - How the building’s mass and scale contributes to the preservation of the character and historical attributes of towns.
  - How the proposal should be informed by sensitivity to the existing building stock and respect for its original scale, materials and detailing without resorting to ‘mock’ heritage or replication of historic styles.
  - Any current Aboriginal heritage study document for the municipality.
  - The Aboriginal cultural resource management grid map and guidelines provided by Aboriginal Affairs Victoria.

Application of zones and overlays

- Applying the Heritage Overlay and its Schedule to protect heritage buildings, places, trees and streetscapes.

Reference documents

Aboriginal cultural resource management grid map
ECONOMIC DEVELOPMENT

This Clause provides local content to support Clause 17 (Economic Development) of the State Planning Policy Framework.

The Council Plan 2009-2013 is committed to the following in terms of economic development:

- Supporting the development of a prosperous, growing, vibrant and diverse economy.
- Encouraging development and new business establishment based on the region’s comparative and competitive advantages.
- Promoting an economy that consists of a number of diverse sustainable small and medium industries.
- Providing infrastructure and a range of services that makes us a “region of choice”.
- Supporting existing businesses to be sustainable and expand.
- Actively engaging in economic development through council’s own practices.
- Supporting local employment opportunities.

Business

Overview

Business and commerce play an important role at different levels in all towns in providing retailing, services and facilities and reducing escape expenditure. The Swan Hill CBD is the dominant business location and plays an important regional role. Local shops and services provided in small towns play a local convenience role and are an important part of the local community.

Key issues

- Providing for highway commercial development in Swan Hill on the basis infrastructure and access issues is addressed and it does not compete with the role of the Swan Hill CBD.

Objective 1

To provide for the growth of business and commerce.

Strategies

Strategy 1.1 Encourage growth and infill development in business areas.
Strategy 1.2 Provide a broad range of services and facilities that is consistent with the role of the town in the settlement hierarchy.

Implementation

The strategies in relation to business will be implemented through the planning scheme by:

Application of zones and overlays

- Applying the Business 1 Zone to the Swan Hill CBD and smaller shopping centres to support the retail hierarchy.
- Applying the Business 2 Zone to the northern area of the Swan Hill CBD in the Nyah Road-Curlewis Street area and the southern highway entrance to encourage the development of offices and other commercial uses.
- Applying the Business 5 Zone on the west side of Beveridge Street, north of McCallum Street to encourage the development of offices and the conversion of housing stock for commercial purposes.
Further strategic work

- Prepare a highway business strategy for Swan Hill to investigate the potential of further opportunities south and north of the town on the Murray Valley Highway.

Reference documents

Swan Hill Business Zones Review 2005

Industry

Overview

The municipality’s industrial base is supported by food processing and rural services industries. Future prospects for the food processing industry are growing with continued growth of horticulture in the municipality. Land use opportunities need to be made available for value added processing of local product.

There are opportunities for new industrial development within Swan Hill’s major industrial area at Karinie Street. There are substantial opportunities for infill and consolidation within the Moore Street industrial area in Robinvale. Visual amenity issues need to be addressed in the Moore Street industrial area.

Increasing importance is now being placed on well sited and well designed industrial areas as a key component of local economic development strategies. Industrial areas should provide a good level of amenity for workers and visitors, and have minimal visual, acoustic or other off-site effects on surrounding land uses.

The municipality has large deposits of mineral sands and gravel which have economic, social and environmental significance for the region. A large mineral sand mining operation has been established at Wemen. Another emerging industry is solar power generation.

The municipality is well suited to the food processing industry because of its large agricultural base. The food-processing sector has consistently been identified as a growth area, with expanding markets in Asia. Opportunities are available to set up industries which will add value to products. A substantial amount of agricultural products are transported out of the municipality.

Key issues

- Significant potential exists for adding value to agricultural product, including horticulture.
- Manufacturing industries are an important component of the Swan Hill economy.
- Facilitating the growth of the mineral sands and solar industry.

Objective 2

To encourage the consolidation of industrial areas.

Strategies

- Strategy 2.1 Encourage growth and infill industrial development in existing industrial areas.
- Strategy 2.2 Discourage industrial uses from prominent highway locations.

Objective 3

To ensure a supply of industrial land with a range of lot sizes to meet the changing requirements of industry and business.

Strategies

- Strategy 3.1 Provide a continuing supply of well located and appropriately sized serviced industrial land able to meet immediate and longer term needs.
- Strategy 3.2 Strengthen the rural service role of Swan Hill and Robinvale by making land available for industry and business.
Objective 4
To facilitate the establishment of rural service and food processing industries.

Strategies

Strategy 4.1 Ensure that any industry in rural areas is associated with rural industry and production on the land and relates to the handling, treating, processing or packing of agricultural produce, or the servicing or repairing of plant or equipment used in agriculture.

Strategy 4.2 Ensure that rural industrial use and development has access to physical and community infrastructure and services, including roads that are accessible at all times of the year.

Strategy 4.3 Ensure that any rural industry can house or make new provision for the housing of seasonal workers associated with the industry.

Strategy 4.4 Ensure that rural industry protects the amenity of the existing rural and residential use of the land, nearby land and the general area.

Strategy 4.5 Ensure that rural industry is compatible with and maintains agricultural and rural uses and production on adjoining and nearby land.

Strategy 4.6 Assist the establishment of food processing industries with site management and design guidelines that address issues such as nutrient management, road infrastructure and amenity of surrounding area.

Objective 5
To support new and emerging industries such as mineral sands and the solar industry.

Strategies

Strategy 5.1 Encourage environmentally sustainable mining and value adding opportunities for mineral sands and extractive industry in non urban areas.

Strategy 5.2 Encourage small and large scale solar power generating plants and other forms of renewable energy in non urban areas.

Implementation
The strategies in relation to industry will be implemented through the planning scheme by:

Policy guidelines

- When considering an application for industrial development, require a design report as appropriate, demonstrating that:
  - Building mass, scale and form have been considered having regard to the local urban character.
  - Streetscape character has been identified and considered.

- When considering an application for industrial development, consider whether the application meets the following criteria or performance measures:
  - Development should be connected to reticulated water, sewerage, power and storm water facilities.
  - Development should incorporate water sensitive urban design principles and re-use from rainwater tanks for industrial purposes.
  - Setback areas should be used for landscaping, vehicle and pedestrian access and car parking.
  - Landscaping areas should be designed to:
    - Retain existing vegetation where practicable.
    - Use local native vegetation as much as possible.
    - Screen areas where visibility for safety is not essential.
    - Be low maintenance.
    - Achieve high quality and consistent landscape themes with adjoining and nearby properties and the adjacent road reserve.
- Car parking areas consisting of more than ten car spaces should include trees or some other form of landscaping to reduce the visual impact of large hard surface areas and to provide shade.

- All loading and unloading should be carried out within property boundaries.

- Sites should have a minimum frontage of 28 metres to enable loading and unloading to be undertaken within the site boundaries and to enable heavy articulated vehicles to enter and exit the site in a forward direction.

- Driveways, car parking areas and external storage areas should be constructed of an impervious all-weather surface as a minimum standard.

- The façade of all buildings facing an external road should be constructed of brick, glass, or painted/treated concrete, or colorbond steel cladding, to enhance the appearance of the development. Colorbond steel or any other material which will not detract from the appearance of the building may be used for walls not fronting a street.

- There should be the following minimum setback distances:
  - 10.0 metres from external walls to front boundary.
  - 5.0 metres to side street boundary for corner allotments.
  - 3.0 metres for steel framed structures and metal cladding, or on boundary for brick or concrete walls.

- Land within 10.0 metres of the front boundary should be used for car parking, access and landscaping and maintained to the satisfaction of the responsible authority.

- There should be a minimum setback of 3.0 metres for offices and amenity buildings where car parking is not in front of industrial buildings.

- There should be a minimum 2.0 metres wide strip for landscaping along the frontage of allotments and the sideage of corner allotments.

- When deciding on applications for industrial development, the following matters will be considered, as appropriate:
  - The impact of the development on the amenity and streetscape of the area.
  - The appearance of the proposed development.
  - Buffers prescribed under clause 52.10.
  - The design and layout of the proposed development including setbacks from property boundaries.
  - The type and colour of building materials.
  - The standards of any proposed landscape treatment.

- When deciding on applications for rural industrial development, the following matters will be considered, as appropriate:
  - The nature of the rural industry, including the hours and seasons for operation and the number of workers associated with the industry.
  - The anticipated off site effects associated with the rural industry, including truck movements and frequency, buffer requirements of the industry, impacts on adjoining and nearby rural and residential uses and impact on the rural landscape and the need for the developer to address these impacts.
  - Servicing requirements for the rural industry, including seasonal worker housing, water, effluent disposal, power, external and internal road access, drainage, and telecommunications.
Accessibility to external physical and community infrastructure and services.

When deciding on applications for industrial subdivisions, the following matters will be considered, as appropriate:

- The EPA publication 960 Guideline for Environmental Management Doing It Right on Subdivisions.

**Application of zones and overlays**

- Applying the Industrial 1 Zone for Karinie Street Industrial area and other industrial areas to identify areas suitable for industrial uses.

- Applying the Special Use Zone Schedule 1 to the Swan Hill abattoir to enable the ongoing use of the land for an abattoir.

- Applying the Development Plan Overlay Schedule 3 to land zoned Industrial 1 Zone to guide the form and condition of land zoned Industrial 1 Zone.

**Further strategic work**

- Prepare a strategic assessment report for a new serviced industrial area west of Murray Valley Highway and south of Pethard Road as identified on the Robinvale Framework Plan.

- Investigate an inter-modal freight transport facility to support industries, including the mineral sands industry.

- Review the potential of Blackwire Reserve as a location for solar power generation.

Tourism

**Overview**

Tourism is founded on natural assets, pre and post contact history and cultural heritage of the Mallee and Murray River. The municipality’s location in relation to the Murray River and being midway between Echuca and Mildura should be promoted to attract more tourists to stopover and encourage longer stays.

Tourism attractions based on the Murray River, the river towns, recreational opportunities at places like Lake Boga and the Swan Hill Pioneer Settlement are important components of the municipality’s tourism role. Horticultural industries and product and special regional events are becoming important components of local and regional tourism.

**Key issues**

- Recognising that there are significant tourism opportunities in Swan Hill with the redevelopment of the riverside precinct and linking it to the CBD, the Pioneer Settlement and the new Murray River bridge crossing.

- Recognising that the Murray River corridor outside Swan Hill has significant potential for tourism, of which the Riverside precinct in Robinvale is one example.

**Objective 6**

To strengthen the role and return from tourism development particularly based on the area’s natural and cultural heritage base.

**Strategies**

| Strategy 6.1 | Support tourism opportunities, particularly those based on the agricultural output of the region. |
| Strategy 6.2 | Support accommodation uses aligned with tourism uses. |
Implementation

The strategies in relation to tourism will be implemented through the planning scheme by:

Application of zones and overlays

- Applying the Special Use Zone Schedule 3 to the Big Hill resort to provide for the establishment and growth of an education centre and accommodation.
- Applying the Special Use Zone Schedule 4 to the Two Bays caravan park to provide for camping, a caravan park, service station and convenience restaurant.
- Applying the Special Use Zone Schedule 5 to the Jack Chisholm Reserve Motor Sports Facility to facilitate its expansion and redevelopment as a significant regional facility capable of attracting large race meetings.
- Applying the Design and Development Overlay Schedule 2 to the Swan Hill river precinct to establish a primary public open space area for Swan Hill, which encourages leisure, cultural and tourism opportunities.

Further strategic work

- Continue the staged development of the Swan Hill Riverside Precinct Concept.

Reference documents

Swan Hill River Precinct Project.
INFRASTRUCTURE AND TRANSPORT

This Clause provides local content to support Clause 18 (Transport) and Clause 19 (Infrastructure) of the State Planning Policy Framework.

The Council Plan 2009-2013 is committed to the following in terms of infrastructure issues:

- Providing or facilitating a range of services that maintain community health, and provide opportunities and infrastructure that contribute to the educational, recreational, cultural and leisure needs of our community.
- Ensuring appropriate infrastructure to continue our economic growth.

Infrastructure

Overview

Developers should contribute to the cost of utility, service and community infrastructure.

Water supply is available via the River Murray system and the Torrumbarry Irrigation System. Maintaining water quality of the Murray River is therefore of vital importance for Swan Hill’s future water supply.

Reticulated sewerage is available in Swan Hill, Robinvale and the towns of Lake Boga and Nyah/Nyah West. A proposed reticulated gas supply will be vital for future economic growth.

Irrigation districts served by large pumping stations are located at Robinvale, Nyah and Tresco. The Northern Mallee Pipeline delivers stock and domestic water from the Murray River to dryland farms and towns.

Key issues

- Adopting a coordinated, efficient and equitable approach to the provision of infrastructure and community facilities.
- Ensuring urban development is connected to reticulated services.
- Managing stormwater as a key consideration for urban development.
- Recognising that the provision of reticulated gas is important for value adding industries and reducing the community’s carbon footprint.
- Adopting improved irrigation practices via programs such as the Northern Victorian Irrigation Renewal Project (NVIRP).

Objective 1

To provide for the equitable upgrade of urban infrastructure.

Strategies

Strategy 1.1 Facilitate the expansion of reticulated water supplies to smaller towns.
Strategy 1.2 Require new development to upgrade servicing and road infrastructure.
Strategy 1.3 Require developers to contribute to the provision of infrastructure via the use of the Development Contributions Plan Overlay.

Objective 2

To protect and expand irrigation infrastructure.

Strategies

Strategy 2.1 Facilitate the extension of efficient irrigation systems to areas which have a demonstrated capacity to be able to manage additional water without lessening the value and long term productive capacity of land.
Strategy 2.2 Encourage protection of irrigation infrastructure in horticultural areas in the municipality.
Strategy 2.3  Encourage the restructuring of land no longer used for irrigation into viable dryland business units.

Implementation

The strategies in relation to infrastructure will be implemented through the planning scheme by:

Application of zones and overlays

- Applying the Public Use Zone suite to local government, health, education and utility facilities.

Further strategic work

- Preparing a Development Contributions Plan for the Swan Hill South West Development Precinct (SHSWDP).
- Considering the need to develop local planning policy for health facilities, education facilities, cultural facilities, telecommunications, waste and resource recovery and pipeline infrastructure.

Transport

Overview

The livelihood of the municipality depends upon efficient transport corridors especially the Loddon and Murray Valley Highways which provide regional connections to Bendigo and Mildura. The local road network is an important road infrastructure that needs to be maintained and improved especially for all weather access. New urban development needs to be integrated with land use and road based transport planning, including public transport.

Airports of regional significance are located at Swan Hill and Robinvale. SwanLink provides daily connections between Swan Hill and other regional centres and between centres in the municipality.

Some Murray River bridges are in need of rehabilitation and increased maintenance. There are opportunities for better access and visual connections to the River within urban areas of the municipality’s river towns. The new Swan Hill river crossing provides the opportunity to review and implement the vision of the Riverside Precinct Master Plan.

In order to support a variety of land uses within the municipality, adequate car parking must be provided, appropriate to local needs.

Key issues

- Recognising that the Swan Hill airport has the potential to cater for growth and provide for passenger and freight services.
- Recognising the need for a replacement interstate bridge at Swan Hill.
- Recognising the need for inter-modal freight facilities.

Objective 3

To protect and enhance transport infrastructure.

Strategies

Strategy 3.1  Replace the Swan Hill bridge to improve linkages to NSW and beyond.
Strategy 3.2  Encourage protection of road infrastructure in horticultural areas in the municipality.
Strategy 3.3  Ensure that any new farming development is integrated with land use and road based transport planning, including safe and efficient access to freight movement.
Strategy 3.4  Ensure the safety and efficiency of arterial routes, as significant community investments, are not compromised by inappropriate industrial development and associated vehicular access.
Strategy 3.5  
Require new development to provide car parking on site.

Implementation

The strategies in relation to transport and infrastructure will be implemented through the planning scheme by:

Policy guidelines

- When deciding on applications to vary the number of car spaces required under Clause 52.06 of this scheme, the following matters will be considered, as appropriate:
  - Clause 22.02 (Car Parking).

Application of zones and overlays

- Applying the Public Use Zone to transport facilities.
- Applying the Design and Development Overlay Schedule 1 to the Swan Hill airport environs.
- Applying the Airport Environs Overlay to land around the Swan Hill airport to ensure appropriate development around the airport.

Further strategic work

- Investigating the need for a revision of the Airport Environs Overlay at Swan Hill airport.
- Completing a Parking Precinct Plan for the Swan Hill central business district.
- Considering the need to develop local planning policy for public transport, cycling and pedestrian movements.

Reference documents

Swan Hill Principal Traffic Routes Study, 1997
LOCAL AREAS

This Clause focuses on local area implementation of the objectives and strategies set out in Clauses 21.04-21.09. Each section relates to a particular township within the municipality, and should be read in conjunction with the rest of the Municipal Strategic Statement and not in isolation.

The sections are organised under the following Local Area headings:

21.10-1: Swan Hill
21.10-2: Robinvale
21.10-3: Lake Boga
21.10-4: Nyah
21.10-5: Nyah West

Swan Hill

A strong Swan Hill regional centre greatly enhances the capacity of the municipality and the wider region to retain and attract people, businesses, investment and services.

Swan Hill’s future will depend on whether it can retain its position within a system of regional centres located in south east Australia. For Swan Hill to consolidate its regional role it must continue to embrace a strategy that reduces the ‘escape’ of retail expenditure, provides regional-level facilities and services, develops its regional market for goods and services, and generates local employment opportunities.

Population growth is expected to be largely in and around Swan Hill as well as in the horticultural sections of the Murray River corridor. The number of households in Swan Hill is expected to increase from 7,893 in 2001 to 8,369 in 2011 and 8,918 by the year 2021. With the exception of lower lying areas to the south of the urban area, there are no infrastructure constraints for the future development of Swan Hill urban centre. Strengthening Swan Hill’s industrial base will consolidate its service centre role and attract businesses involved in processing local product. This includes investment in new and emerging industries such as mineral sands and solar power generation.

In recent years, Swan Hill CBD has consolidated its regional centre functions with the establishment of large retail stores and overall increases in retail, office and commercial floor space. Increases in floor space occupied by government and community services highlight the growing importance of Swan Hill’s regional centre role. Retailing from “bulky goods outlets” is increasing because of consumer demand for greater choice. Land use opportunities for bulky goods sales are available to the north of the CBD and the southern highway entrance.

Future floor space demands can be met by infill and redevelopment, particularly in the Nyah Road/Curlewis Street area. Longer term expansion of the CBD will occur to the north of McCallum Street. Development opportunities in Curlewis Street need to be placed within a broader framework of the Swan Hill Riverside Precinct and the traffic status of Curlewis Street.

The Murray Valley Highway entrances to Swan Hill have different entrance characteristics. The southern highway business entrance is characterised with service roads, large lots and consistent building setbacks giving a low impact character. This is an appropriate transition from the rural landscape and enhances the entrance character. The transition at the northern entrance is short with limited development and avenue plantings meeting the edge of the urban area at the rail crossing. This northern entrance character essentially needs to be retained.

Local area implementation

- Ensure that any proposed use or development within Swan Hill is generally consistent with the Swan Hill Urban Framework Plan as shown on page 4 and the Swan Hill CBD Precincts Plan as shown on page 5.
Settlement and housing
- Provide for continuing residential growth and infill development in fully serviced areas within the southern boundary of the urban area.
- Provide for future residential development opportunities, including low density residential development.
- Continue the staged residential growth of Tower Hill.
- Consider residential growth, including south of Werril Street, as part of a review of the Residential Development Strategy 2006-2030.

Built environment and heritage
- Ensure that any development is appropriately scaled to acknowledge and complement the gateway entrance character.
- Encourage land use and development with requirements for large sites that do not have the potential to challenge the role and function of Swan Hill CBD or generate large volumes of traffic. Such land uses and development may include, but are not limited to, motel; landscape garden supplies; motor vehicle, boat and caravan sales; restricted retail premises; rural industry; or trade supplies.
- Avoid domination of existing streetscapes by encouraging appropriate building mass and articulation of building facades fronting the highway.
- Encourage front setbacks that are equivalent to the setback of neighbouring buildings or if these are different, the setback may be at a distance that is between the setbacks of neighbouring buildings.
- Encourage retention, re-use and restoration of heritage buildings within the CBD.
- Support the maintenance, restoration and interpretation of heritage places within the CBD to enhance the experience of tourism in Swan Hill.

Economic development
- Implement a precinct based planning approach for the Swan Hill CBD based on the Swan Hill CBD Precincts Plan as shown on page 5 and the following:
  - Encourage retail between Beveridge Street and Curlewis Street and Nyah Road and Wood Street with:
    - core retail along Campbell Street and Beveridge Street, and
    - tourism and retail along Curlewis Street.
  - Encourage bulky goods sales focus north of Pye Street in the Nyah Road and Curlewis Street area.
  - Encourage office and institutional along Beveridge Street north of McCallum Street, Splatt Street and McCallum Street.
  - Encourage tourism accommodation and retail along Campbell Street and Curlewis Street south of Wood Street that complement the role of the Riverside Park.
- Encourage a range of retail, commercial, cultural, institutional, and residential activities that consolidate and complement the CBD’s regional role and the mixed use function.
- Continue to focus major retail expansion in the CBD and discourage isolated retail developments which challenge the role, function and level of public and private investment in the CBD.
- Improve the built form character and regional centre image of the CBD.
- Encourage a high standard of amenity, services and facilities in the CBD.
Encourage two storey development and redevelopment at corner sites in the CBD in Campbell Street, Beveridge Street, Curlewis Street and McCallum Street.

Encourage development proposals and the design of public space within the CBD that improve the physical and visual links to Riverside Park.

Encourage development proposals that protect and enhance the character of the CBD.

Encourage establishment of an “incubator facility” in Swan Hill.

Ensure the safety and efficiency of arterial routes, as significant community investments, are not compromised by inappropriate development and vehicular access.

Investigate the potential of the following sites for urban uses:

- North Park on Beveridge Street.
- Highway frontage of surplus saleyards land to the north of the CBD.
- Highway frontage of the racecourse land.

Provide for the serviced expansion of the Karinie Street industrial area as the municipality’s major industrial area.

Provide industrial land adjacent to existing rail infrastructure to provide locational advantage for industries requiring transportation of commodities by rail.

Protect the option for an inter-modal freight facility at Swan Hill in the Karinie Street industrial area.

Encourage high standards of development, design, landscaping, amenity and safety in industrial areas.

Facilitate opportunities for the solar power generation industry at Blackwire Reserve.

Continue to focus tourist development within the CBD including the Riverside Park, Pioneer Settlement and railway station. New development within and adjacent to the area is to be consistent with agreed design concepts for the riverside precinct.

Progressively develop the riverside precinct as a primary tourism, recreation and cultural focus with strong links to the CBD edge at Curlewis Street.

Encourage tourist developments at locations with good access to major road and rail links and at sites capable of achieving adequate provision of car parking for patrons.

Encourage the development of Curlewis Street as a Tourism Precinct by supporting proposed uses and developments that can potentially benefit from a river location.

Support the redevelopment and expansion of the Jack Chisholm Reserve Motor Sports Facility as a significant regional facility capable of attracting large race meetings.

Support continuous street frontages and active uses at street level and the retention, restoration and adaptive re-use of heritage buildings in Curlewis Street.

Continue to promote Riverside Park as a primary focus for leisure, heritage and nature appreciation, and tourism. New development/redevelopment within Riverside Park is to be guided by the design principles of the Swan Hill Riverside Precinct Project.
Robinvale

Robinvale is the second largest urban centre in the Rural City of Swan Hill. The township performs an important shopping, business and community role for a large geographic area in the north of the municipality and across the border in New South Wales. Robinvale has experienced population growth in recent years and supports a strong retail centre, largely due to developments in the horticultural industry.

Robinvale’s population has increased in recent years due mainly to industry changes and the growth in irrigated horticulture. It is estimated that Robinvale has a town and district population of 3,900 persons. The 2006 Census recorded a population of 2,318. Robinvale is expanding its role as the economic and social centre for a wider region including the horticultural belt along the Murray River in the north of the municipality.

Robinvale is a diverse community. The ethnic mix of the town and district is a feature with a significant proportion of residents being from the regions of the Pacific Islands, Southern Europe and South East Asia.

The Robinvale 2030 Strategy/Robinvale Framework Plan (refer to plan on page 8) provides a long term land use plan for the township. It provides a framework for growth based on expansion of the horticultural industry, the town’s regional service role and the potential for growth in association with Euston.

A stronger town entry and tourism focus is proposed for Robinvale’s northern entrance along Bromley Road. Land use and development and design improvements along Bromley Road need to be made in the context of the new Murray River Bridge. A new southern town entry to Robinvale is proposed at the intersection of the Murray Valley Highway and Latje Road bringing traffic into the town centre via George Street. Land use and development proposals at this proposed entry and along Latje Road need to respond to an entrance character that is characterised by wide road reservations and established street tree plantings.

Local area implementation

- Ensure that any proposed use or development within Robinvale is generally consistent with the Robinvale 2030 Strategy/Robinvale Framework Plan as shown on page 8.

Settlement and housing

- Ensure efficient provision of infrastructure by sequencing of future residential development in Robinvale’s major development front to the south of the existing urban area.
- Protect longer term future serviced residential opportunities east of Latje Road and north of Ryan Road subject to flood mitigation works and connection to urban sewerage network and when there is a demonstrated need and other locations with residential zoning are developed.
- Ensure low density residential development occurs within the future urban growth boundary identified on the Robinvale Framework Plan.
- Discourage low density development and rezoning outside of the future urban growth boundary until a 70% take-up within the boundary has been reached.
- Provide for longer term expansion of the low density residential area south of Ryan Road as identified on the Robinvale Framework Plan.
- Encourage proposals for accommodation for itinerant workers on rural properties and in the township (where permissible under this scheme).
- Promote initiatives that support the cultural diversity and development of the Robinvale community.

Environment

- Protect the environmental values of the Murray River and the Riverside Park.
Built environment and heritage

- Protect and enhancing the natural and landscape assets of the town including riverside park, Murray River reserve and town entrances.
- Protect and enhance Robinvale’s townscape and river town character.
- Encourage future use and development of land in the township and environs that protects and adds to the character of Robinvale including elements such as riverside location, wide major streets, a compact commercial centre and surrounding horticultural plantations.
- Encourage improvements to the visual appearance and entrance character of the Murray Valley highway town entrances.
- Protect the features which define the township character of Robinvale including the riverside location, wide major streets, compact commercial centre, heritage places of pre-War and post-War vintage, and surrounding horticultural plantations.

Economic development

- Reinforce the strong retail sector by providing for retail expansion and encouraging the retention of the compact retail centre.
- Identify and encourage longer term opportunities for town centre expansion to the south along George Street, as identified on the Robinvale Framework Plan.
- Encourage infill, consolidation and amenity improvements at the Moore Street industrial area.
- Provide opportunities for employment and investment by encouraging the establishment of food processing and other value added industries.
- Encourage food processing industries to locate at or near to Robinvale township at sites provided land capability assessments support the proposed use and development of sites.
- Investigate the potential for a new industrial estate south of Pethard Road and west of the Murray Valley Highway.
SWAN HILL PLANNING SCHEME

ROBINVALE 2030 STRATEGY
PLAN 4: ROBINVALE FRAMEWORK PLAN

- Future urban growth boundary
- Existing developed General Residential Zoned land
- General Residential Zoned land with approved residential subdivision
- Undeveloped General Residential Zoned land
- Potential future serviced residential area subject to completion of local infrastructure network and consultation to local stakeholders when need for further supply can be determined and other possible land uses considered.
- Low density residential area (existing LDR Zone)
- Approved low density residential subdivision
- Future low density residential (existing Rural Zone)
- - when need for further supply can be determined
- - consideration of other land uses
- - Public Conservation and Recreation Zone
- Riverside Precinct
  - implementation of Riverside Riverfront Renewal Project

- Town centre entry point with focus on town entry
- Encourage development of industrial land at southern end of Moore St
- Investigate potential for new serviced industrial area
- Town Centre
  - refer to Town Centre Framework Plan
  - Major town centre infill opportunity
  - Future town centre expansion recommended in George Street
  - Reinforce access and visual links between townships/town centre and Riverside Park

This plan is indicative only. Check Planning Scheme maps for precise boundaries.
Lake Boga

Lake Boga is an attractive, lakeside village and tourist town. The lake provides a range of water based and informal recreational activities for residents and visitors as well as a diverse ecosystem and aquatic and riparian flora and fauna. It is the major southern gateway to the Swan Hill region, and is home to many families who commute to Swan Hill for work and school.

The population in 2006 was 711. This represents an average 0.5% growth rate per year from 2001. Growth is expected to continue at Lake Boga with the added security of water in the lake and the potential of residential land with lake views.

The main industries are agriculture and tourism.

Local area implementation

Settlement and housing

- Encourage the sustainable use and development of land around Lake Boga for recreation, tourism and residential development that are consistent with the Lake Boga Township Framework Plan as shown page 10.
- Capitalize on the variety of residential options at locations with strong environmental, aesthetic and lifestyle amenity options to ensure the ongoing viability of the community and the wider municipality.
- Ensure residential development, including low density residential development, occurs adjacent to existing development and is serviced with reticulated sewerage and town water.
- Investigate the potential of residential development south east of the town in Hayes Road South on the lake foreshore at locations consistent with the town framework plan. Any residential development should be connected to reticulated water and sewerage facilities.
- Provide for longer term residential growth north of Marraboor Street.
- Limit further development in areas north of the town centre that is subject to flooding.
- Investigate the potential for low density residential growth north of Lakeside Drive.
- Provide for tourism related residential development between the Murray Valley Highway and Lake Boga within the township boundary.

Environment

- Rejuvenate the Turtle Lagoon Wetland area.
- Protect the environmental values of Lake Boga.

Built environment and heritage

- Support the maintenance, restoration and interpretation of Aboriginal and post-settlement cultural heritage places and sites within the township.

Economic development

- Provide for highway commercial development on the southern entrance to town.
- Encourage tourism based on the military heritage and lake environs of the town.

Infrastructure and transport

- Improve the foreshore amenity of Lake Boga with facilities such as walkways, and open space that facilitate the public enjoyment of the foreshore.
- Develop a rail trail between Lake Boga and Swan Hill.
Nyah

Nyah is a border town located on the Murray Valley Highway 27 kms north west of Swan Hill. The Nyah and Vinifera State Forests contain a wealth of archaeological material relating to ancient Aboriginal occupation of the land, including canoe trees, middens, burial grounds and boundary markers. These forests of redgum and box follow the Murray River and are open to cars, campers and bushwalkers. At the east end of the Vinifera State Forest is the location of the first commercial rice crop in Australia. Seed from the rice farm was used to produce the first shipment of rice back to Japan in the early 1900’s.

Local area implementation

Settlement and housing

- Encourage fully serviced residential development and low density residential development to the south of the Nyah township in areas not required for horticulture.
- Encourage residential choice at the Nyah township including retirement housing, commuter residential, low density residential and tourist/leisure style accommodation.
- Retain land identified as good quality land for horticulture outside of the Nyah township area for horticultural production.

Environment

- Protect the biodiversity and environmental values of the Murray River corridor.

Built environment and heritage

- Establish a town gateway with appropriate signage and roadside planting.

Economic development

- Establish an identified town centre and introduce improvements to convenience and function of centre.
- Investigate the potential of a new industrial estate north of Yarraby Road.
- Facilitate the expansion of the Two Bays caravan park for tourist and itinerant accommodation.
NYAH FRAMEWORK PLAN

- Industrial: Proposed future industrial area
- Recreation Reserve: Improve appearance of entry to recreation facility
- Murray River Corridor: Protect environmental integrity of River Corridor
- Commercial Centre: Establish identifiable town centre and introduce improvements to convenience and function of centre
- Residential: General location for future serviced residential development
- Low Density Residential: General location for future low density residential development. Sewerage connection required to protect riverine environment
- Township boundary
- Existing small rural lots
- Town Entrance: Establish town gateway with appropriate signage and roadside planting

This plan is indicative only. Refer to planning scheme maps for prospective changes.

Page 215 of 836
Nyah West

Nyah West is located in the Murray River corridor north west of Swan Hill. In 2006, its population was 566, which has grown by an average of 0.6% per year for the last 10 years. Its main industry is agriculture.

The Nyah West town centre comprises a fine collection of substantially intact inter-War buildings which are collectively protected by the Monash Avenue Heritage Overlay Precinct. This intact commercial streetscape is unique in the municipality, and its retention, restoration and interpretation will greatly enhance its tourism potential.

Local area implementation

Settlement and housing

- Encourage residential choice at the Nyah West township including retirement housing, commuter residential, low density residential and tourist/leisure style accommodation.
- Encourage future serviced residential expansion south of Elizabeth Street.
- Retain the existing compact town centre.
- Encourage rural living development on land not required for agriculture.

Built environment and heritage

- Ensure new development and alterations to existing buildings in the town centre complement and enhance the existing streetscape.
- Encourage the reinstatement of original verandahs.
- Retain original shopfronts.
- Ensure development of vacant land has regard to existing buildings scale, materials and detailing.

Economic development

- Ensure the expansion of Nyah West township does not reduce horticultural potential.
FLOODING

This policy applies to all land affected by the Land Subject to Inundation Overlay.

Policy basis

This policy builds on the MSS objective in Clause 21.05-4 to protect the floodplain from inappropriate development.

Objectives

To maintain the unobstructed passage of floodwaters.

To recognise appropriate public and community based flood management organisations and their role in maintenance and development of existing flood protection levee banks.

To provide suitable flood plain management which will ensure that any new development is suitably designed to ensure that development is compatible with the identified flood hazard and local drainage characteristics.

To protect and encourage the rural and riverine character of the area.

To recognise the agricultural value of land within levee protected areas and to support the continued use of these areas for agricultural production.

Policy

It is policy to:

- Require that the realignment of existing lots creates no more lots than previously existed, unless there will be no adverse effect upon the function of the floodplain.

- Permit the construction of a dwelling on land designated as liable to flooding where:
  - This will not adversely affect the function of the floodplain.
  - The floor level height of the dwelling is not less than 300mm above the designated 1% flood probability level.
  - The construction standards for all works comply with relevant Building Codes and have regard to soil base and local drainage considerations.
  - An effective disposal system is provided to the satisfaction of the responsible authority, where a septic tank system or similar suitable waste disposal connected to a dwelling is installed below the designated 1% flood probability level.

- Require any existing dwelling on the lot to be demolished within 6 months from the date of issue of Certificate of Occupancy for the new dwelling.

- Discourage the construction of buildings (excluding farm buildings), where the building or works will result in significant change to the existing condition or natural topography of land.

- Discourage the filling of land, except where all fill used:
  - is of material to the satisfaction of the responsible authority;
  - is compacted and consolidated in a manner to the satisfaction of the responsible authority;
  - is not adversely affected by the flood waters in the event of a 1% probability flood level;
  - renders the use of the site as suitable for the construction of a dwelling or other appropriate development; and
  - is suitable in regard to local drainage considerations and other drainage requirements of the responsible authority.
Application requirements

An application for the construction of a building must be accompanied by the following information, as appropriate:

- Flood level information, to assist in determining the appropriate floor level of the building.

Decision guidelines

Before deciding on an application, in addition to the decision guidelines in the Land Subject to Inundation Overlay, the responsible authority will consider:

- “A planning guide for land liable to flooding in rural Victoria, 1988”.
- “Swan Hill - Tyntynder Flats Floodplain Management Study 1992”.
CAR PARKING

This policy applies to the whole municipality in relation to an application to reduce or to waive the number of car spaces required by the Car parking table in Clause 52.06-5.

Policy Basis

This policy builds on the MSS objective in Clause 21.07 to improve the standard of infrastructure and the strategy to require new development to provide car parking on site.

In particular, adequate car parking is important for the continued development of the retail and business sector within the municipality.

Objectives

To ensure that an appropriate number of car spaces is provided to support a variety of uses within the municipality.

To provide guidance on the assessment of applications to reduce or to waive the number of car spaces required by the Car parking table in Clause 52.06-5.

Policy

It is policy to:

- Ensure that an adequate number of car spaces are provided for the particular uses specified below in Table 1 taking into account local conditions within the Rural City of Swan Hill.
- Require that any new uses specified in Table 1 set aside car parking on the site in accordance with the car space measures and rates outlined below in Table 1.

Table 1: Recommended Car Parking Rates

<table>
<thead>
<tr>

</table>

**Decision guidelines**

Before deciding on an application to reduce or to waive the number of car spaces required by the Car parking table in Clause 52.06-5, in addition to the decision guidelines in Clause 52.06-1, the responsible authority will consider:

- The intensity of the proposed use on the site.
- Any relevant traffic management plan provided with the application.
RELATIONSHIP TO THE PLANNING POLICY FRAMEWORK

Clauses 21 and 22 of this planning scheme (the Local Planning Policy Framework) form part of the Planning Policy Framework. Where a provision of this planning scheme requires consideration of the Planning Policy Framework, that consideration must include Clauses 21 and 22.

A reference in this planning scheme, including any incorporated document, to the:

- State Planning Policy Framework or the Local Planning Policy Framework is to be taken to be a reference to the Planning Policy Framework.
- Planning Policy Framework is to be taken to include the Local Planning Policy Framework.
OPERATION OF THE MUNICIPAL STRATEGIC STATEMENT

The Municipal Strategic Statement (MSS) is a concise statement of the key strategic planning, land use and development objectives for the municipality and the strategies and actions for achieving the objectives. It furthers the objectives of planning in Victoria to the extent that the State Planning Policy Framework is applicable to the municipality and local issues. It provides the strategic basis for the application of the zones, overlays and particular provisions in the planning scheme and decision making by the responsible authority.

The MSS provides an opportunity for an integrated approach to planning across all areas of council and should clearly express links to the corporate plan. The MSS is dynamic and enables community involvement in its ongoing review. The MSS will be built upon as responsible authorities develop and refine their strategic directions in response to the changing needs of the community.

When preparing amendments to this planning scheme and before making decisions about permit applications, planning and responsible authorities must take the MSS into account.
OPERATION OF THE LOCAL PLANNING POLICIES

Local Planning Policies are tools used to implement the objectives and strategies of the Municipal Strategic Statement.

A Local Planning Policy is a policy statement of intent or expectation. It states what the responsible authority will do in specified circumstances or the responsible authority’s expectation of what should happen. A Local Planning Policy gives the responsible authority an opportunity to state its view of a planning issue and its intentions for an area. A Local Planning Policy provides guidance to decision making on a day to day basis. It can help the community to understand how the responsible authority will consider a proposal. The consistent application of policy over time should achieve a desired outcome.

When preparing amendments to this planning scheme and before making decisions about permit applications, planning and responsible authorities must take any relevant Local Planning Policy into account.
ZONES

This section sets out the zones which apply in this scheme.
LOW DENSITY RESIDENTIAL ZONE

Shown on the planning scheme map as LDRZ with a number (if shown).

Purpose

To implement the Municipal Planning Strategy and the Planning Policy Framework.

To provide for low-density residential development on lots which, in the absence of reticulated sewerage, can treat and retain all wastewater.

Section 3 – Prohibited

Use

Amusement parlour
Animal production (other than Grazing animal production)
Brothel
Cinema based entertainment facility
Industry (other than Car wash)
Motor racing track
Nightclub
Office (other than Medical centre)
Retail premises (other than Convenience shop, Food and drink premises, Market and Plant nursery)
Saleyard
Stone extraction
Transport terminal
Warehouse (other than Store)

32.03-2

Use for one or two dwellings or a dependent person’s unit

A lot may be used for one or two dwellings provided the following requirements are met:

- Each dwelling must be connected to reticulated sewerage, if available. If reticulated sewerage is not available, all wastewater from each dwelling must be treated and retained within the lot in accordance with the State Environment Protection Policy (Waters of Victoria) under the Environment Protection Act 1970.

- Each dwelling must be connected to a reticulated potable water supply or have an alternative potable water supply, with appropriate storage capacity, to the satisfaction of the responsible authority.

- Each dwelling must be connected to a reticulated electricity supply or have an alternative energy supply to the satisfaction of the responsible authority.

These requirements also apply to a dependent person’s unit.

32.03-3

Subdivision

Permit requirement

A permit is required to subdivide land.

Each lot must be at least the area specified for the land in a schedule to this zone. Any area specified must be at least:

- 0.4 hectare for each lot where reticulated sewerage is not connected. If no area is specified each lot must be at least 0.4 hectare.

- 0.2 hectare for each lot with connected reticulated sewerage. If no area is specified each lot must be at least 0.2 hectare.

A permit may be granted to create lots smaller than 0.4 hectare if the subdivision:

- Excises land which is required for a road or a utility installation.

- Provides for the re-subdivision of existing lots and the number of lots is not increased.
VicSmart applications

Subject to Clause 71.06, an application under this clause for a development specified in Column 1 is a class of VicSmart application and must be assessed against the provision specified in Column 2.

<table>
<thead>
<tr>
<th>Class of application</th>
<th>Information requirements and decision guidelines</th>
</tr>
</thead>
<tbody>
<tr>
<td>Subdivide land to realign the common boundary between 2 lots where:</td>
<td>Clause 59.01</td>
</tr>
<tr>
<td>- The area of either lot is reduced by less than 15 percent.</td>
<td></td>
</tr>
<tr>
<td>- The general direction of the common boundary does not change.</td>
<td></td>
</tr>
</tbody>
</table>

Buildings and works

A permit is required to construct or carry out any of the following:

- A building or works associated with a use in Section 2 of Clause 32.03-1.
- An outbuilding which has dimensions greater than those specified in a schedule to this zone.

This does not apply to structural changes to a dwelling provided the size of the dwelling is not increased or the number of dwellings is not increased.

VicSmart applications

Subject to Clause 71.06, an application under this clause for a development specified in Column 1 is a class of VicSmart application and must be assessed against the provision specified in Column 2.

<table>
<thead>
<tr>
<th>Class of application</th>
<th>Information requirements and decision guidelines</th>
</tr>
</thead>
<tbody>
<tr>
<td>Construct a building or construct or carry out works with an estimated cost of up to $100,000 where:</td>
<td>Clause 59.04</td>
</tr>
<tr>
<td>- The building or works is not associated with a dwelling.</td>
<td></td>
</tr>
<tr>
<td>- The requirements in the following standards of Clause 54 are met, where the land adjoins land in a residential zone used for residential purposes:</td>
<td></td>
</tr>
<tr>
<td>- A10 Side and rear setbacks.</td>
<td></td>
</tr>
<tr>
<td>- A11 Walls on boundaries.</td>
<td></td>
</tr>
<tr>
<td>- A12 Daylight to existing windows.</td>
<td></td>
</tr>
<tr>
<td>- A13 North-facing windows.</td>
<td></td>
</tr>
<tr>
<td>- A14 Overshadowing open space.</td>
<td></td>
</tr>
<tr>
<td>- A15 Overlooking.</td>
<td></td>
</tr>
</tbody>
</table>

For the purposes of this class of VicSmart application, the Clause 54 standards specified above are mandatory.

If a schedule to the zone specifies a requirement of a standard different from a requirement set out in the Clause 54 standard, the requirement in the schedule to the zone applies and must be met.
Application requirements

Subdivision

An application must be accompanied by a site analysis, documenting the site in terms of land form, vegetation coverage and the relationship with surrounding land, and a report explaining how the proposed subdivision has responded to the site analysis. The report must:

- In the absence of reticulated sewerage, include a land assessment which demonstrates that each lot is capable of treating and retaining all wastewater in accordance with the State Environment Protection Policy (Waters of Victoria) under the Environment Protection Act 1970.

- Show for each lot:
  - A building envelope and driveway to the envelope.
  - Existing vegetation.
  - In the absence of reticulated sewerage, an effluent disposal area.

- Show how the proposed subdivision relates to the existing or likely use and development of adjoining and nearby land.

- If a staged subdivision, show how the balance of the land may be subdivided.

Decision guidelines

General

Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

Subdivision

- The protection and enhancement of the natural environment and character of the area including the retention of vegetation and faunal habitat and the need to plant vegetation along waterways, gullies, ridgelines and property boundaries.

- The availability and provision of utility services, including sewerage, water, drainage, electricity, gas and telecommunications.

- In the absence of reticulated sewerage:
  - The capability of the lot to treat and retain all wastewater in accordance with the State Environment Protection Policy (Waters of Victoria) under the Environment Protection Act 1970.
  - The benefits of restricting the size of lots to the minimum required to treat and retain all wastewater in accordance with the State Environment Protection Policy (Waters of Victoria).
  - The benefits of restricting the size of lots to generally no more than 2 hectares to enable lots to be efficiently maintained without the need for agricultural techniques and equipment.

- The relevant standards of Clauses 56.07-1 to 56.07-4.

Signs

Sign requirements are at Clause 52.05. This zone is in Category 3.
SCHEDULE TO THE LOW DENSITY RESIDENTIAL ZONE

None specified
TOWNSHIP ZONE

Shown on the planning scheme map as TZ with a number (if shown).

Purpose

To implement the Municipal Planning Strategy and the Planning Policy Framework.
To provide for residential development and a range of commercial, industrial and other uses in small towns.
To encourage development that respects the neighbourhood character of the area.
To allow educational, recreational, religious, community and a limited range of other non-residential uses to serve local community needs in appropriate locations.

Neighbourhood character objectives

A schedule to this zone may contain the neighbourhood character objectives to be achieved for the area.

32.05-3
Use for a dwelling or a dependent person’s unit
A lot may be used for a dwelling provided the following requirements are met:

- Each dwelling must be connected to reticulated sewerage, if available. If reticulated sewerage is not available, all wastewater from each dwelling must be treated and retained within the lot in accordance with the State Environment Protection Policy (Waters of Victoria) under the Environment Protection Act 1970.
- Each dwelling must be connected to a reticulated potable water supply or have an alternative potable water supply, with appropriate storage capacity, to the satisfaction of the responsible authority.
- Each dwelling must be connected to a reticulated electricity supply or have an alternative energy supply to the satisfaction of the responsible authority.

These requirements also apply to a dependent person’s unit.

32.05-4
Use for industry and warehouse

Amenity of the neighbourhood
The use of land for an industry or warehouse must not adversely affect the amenity of the neighbourhood, including through:

- The transport of materials or goods to or from the land.
- The appearance of any stored materials or goods.
- Traffic generated by the use.
- Emissions from the land.

32.05-5
Subdivision

Permit requirement
A permit is required to subdivide land.

An application to subdivide land, other than an application to subdivide land into lots each containing an existing dwelling or car parking space, must meet the requirements of Clause 56 and:

- Must meet all of the objectives included in the clauses specified in the following table.
- Should meet all of the standards included in the clauses specified in the following table.

<table>
<thead>
<tr>
<th>Class of subdivision</th>
<th>Objectives and standards to be met</th>
</tr>
</thead>
<tbody>
<tr>
<td>16 or more lots</td>
<td>Clauses 56.02-1, 56.03-5, 56.04-2 to 56.04-5, 56.05-1, 56.05-2, 56.06-2, 56.06-4, 56.06-5, 56.06-7, 56.06-8 and 56.07-1 to 56.09-4.</td>
</tr>
<tr>
<td>3 – 15 lots</td>
<td>Clauses 56.03-5, 56.04-2 to 56.04-5, 56.05-1, 56.06-2, 56.06-4, 56.06-5, 56.06-7 and 56.06-8 to 56.09-4.</td>
</tr>
<tr>
<td>2 lots</td>
<td>Clauses 56.03-5, 56.04-2, 56.04-3, 56.04-5 and 56.06-8 to 56.09-2.</td>
</tr>
</tbody>
</table>

Each lot must be provided with reticulated sewerage, if available. If reticulated sewerage is not available, the application must be accompanied by:
A land assessment which demonstrates that each lot is capable of treating and retaining all wastewater in accordance with the State Environment Protection Policy (Waters of Victoria) under the *Environment Protection Act 1970*.

A plan which shows a building envelope and effluent disposal area for each lot.

**VicSmart applications**

Subject to Clause 71.06, an application under this clause for a development specified in Column 1 is a class of VicSmart application and must be assessed against the provision specified in Column 2.

<table>
<thead>
<tr>

<td></td>
</tr>
<tr>
<td>- Has started lawfully.</td>
<td></td>
</tr>
<tr>
<td>- The subdivision does not create a vacant lot.</td>
<td></td>
</tr>
</tbody>
</table>

**Construction and extension of one dwelling on a lot**

**Permit requirement**

A permit is required to construct or extend one dwelling on:

- A lot of less than 300 square metres.
- A lot of between 300 square metres and 500 square metres if specified in a schedule to this zone.

A permit is required to construct or extend a front fence within 3 metres of a street if:

- The fence is associated with one dwelling on:
  - A lot of less than 300 square metres, or
  - A lot of between 300 and 500 square metres if specified in a schedule to this zone, and
The fence exceeds the maximum height specified in Clause 54.06-2.

A development must meet the requirements of Clause 54.

**No permit required**

No permit is required to:

- Construct or carry out works normal to a dwelling.
- Construct or extend an out-building (other than a garage or carport) on a lot provided the gross floor area of the out-building does not exceed 10 square metres and the maximum building height is not more than 3 metres above ground level.
- Make structural changes to a dwelling provided the size of the dwelling is not increased or the number of dwellings is not increased.

**VicSmart applications**

Subject to Clause 71.06, an application under this clause for a development specified in Column 1 is a class of VicSmart application and must be assessed against the provision specified in Column 2.

<table>
<thead>
<tr>
<th>Class of application</th>
<th>Information requirements and decision guidelines</th>
</tr>
</thead>
<tbody>
<tr>
<td>Construct an outbuilding or extend a dwelling if the development:</td>
<td>Clause 59.14</td>
</tr>
<tr>
<td>- Does not exceed a building height of 5 metres.</td>
<td></td>
</tr>
<tr>
<td>- Is not visible from the street (other than a lane) or a public park.</td>
<td></td>
</tr>
<tr>
<td>- Meets the requirements in the following standards of Clause 54:</td>
<td></td>
</tr>
<tr>
<td>- A10 Side and rear setbacks.</td>
<td></td>
</tr>
<tr>
<td>- A11 Walls on boundaries.</td>
<td></td>
</tr>
<tr>
<td>- A12 Daylight to existing windows.</td>
<td></td>
</tr>
<tr>

<td></td>
</tr>
<tr>
<td>- A15 Overlooking.</td>
<td></td>
</tr>
</tbody>
</table>

For the purposes of this class of VicSmart application, the Clause 54 standards specified above are mandatory.

If a schedule to the zone specifies a requirement of a standard different from a requirement set out in the Clause 54 standard, the requirement in the schedule to the zone applies and must be met.

| Construct or extend a front fence within 3 metres of a street if the fence is associated with one dwelling. | Clause 59.03 |

**Construction and extension of two or more dwellings on a lot, dwellings on common property and residential buildings**

**Permit requirement**

A permit is required to:

- Construct a dwelling if there is at least one dwelling existing on the lot.
- Construct two or more dwellings on a lot.
- Extend a dwelling if there are two or more dwellings on the lot.
- Construct or extend a dwelling if it is on common property.
- Construct or extend a residential building.

A permit is required to construct or extend a front fence within 3 metres of a street if:
- The fence is associated with 2 or more dwellings on a lot or a residential building, and
- The fence exceeds the maximum height specified in Clause 55.06-2.

A development must meet the requirements of Clause 55. This does not apply to a development of five or more storeys, excluding a basement.

An apartment development of five or more storeys, excluding a basement, must meet the requirements of Clause 58.

A permit is not required to construct one dependent person’s unit on a lot.

**VicSmart applications**

Subject to Clause 71.06, an application under this clause for a development specified in Column 1 is a class of VicSmart application and must be assessed against the provision specified in Column 2.

<table>
<thead>
<tr>
<th>Class of application</th>
<th>Information requirements and decision guidelines</th>

</tr>
</tbody>
</table>

**Transitional provisions**

Clause 55 of this scheme, as in force immediately before the approval date of Amendment VC136, continues to apply to:
- An application for a planning permit lodged before that date.
- An application for an amendment of a permit under section 72 of the Act, if the original permit application was lodged before that date.

Clause 58 does not apply to:
- An application for a planning permit lodged before the approval date of Amendment VC136.
- An application for an amendment of a permit under section 72 of the Act, if the original permit application was lodged before the approval date of Amendment VC136.

**Requirements of Clause 54 and Clause 55**

A schedule to this zone may specify the requirements of:
- Standards A3, A5, A6, A10, A11, A17 and A20 of Clause 54 of this scheme.
- Standards B6, B8, B9, B13, B17, B18, B28 and B32 of Clause 55 of this scheme.

If a requirement is not specified in a schedule to this zone, the requirement set out in the relevant standard of Clause 54 or Clause 55 applies.
Residential aged care facility

Permit requirements

A permit is required to construct a building or construct or carry out works for a residential aged care facility.

A development must meet the requirements of Clause 53.17 - Residential aged care facility.

Buildings and works associated with a Section 2 use

A permit is required to construct a building or construct or carry out works for a use in Section 2 of Clause 32.05-2.

VicSmart applications

Subject to Clause 71.06, an application under this clause for a development specified in Column 1 is a class of VicSmart application and must be assessed against the provision specified in Column 2.

</tr>
</tbody>
</table>

For the purposes of this class of VicSmart application, the Clause 54 standards specified above are mandatory.

If a schedule to the zone specifies a requirement of a standard different from a requirement set out in the Clause 54 standard, the requirement in the schedule to the zone applies and must be met.

Maximum building height requirement for a dwelling or residential building

A building must not be constructed for use as a dwelling or a residential building that exceeds the maximum building height specified in a schedule to this zone.

If no maximum building height is specified in a schedule to this zone, the requirement set out in the relevant standard of Clause 54 and Clause 55 applies.

A building may exceed the maximum building height specified in a schedule to this zone if:

- It replaces an immediately pre-existing building and the new building does not exceed the building height of the pre-existing building.
• There are existing buildings on both abutting allotments that face the same street and the new building does not exceed the building height of the lower of the existing buildings on the abutting allotments.

• It is on a corner lot abutted by lots with existing buildings and the new building does not exceed the building height of the lower of the existing buildings on the abutting allotments.

• It is constructed pursuant to a valid building permit that was in effect prior to the introduction of this provision.

An extension to an existing building may exceed the maximum building height specified in a schedule to this zone if it does not exceed the building height of the existing building.

A building may exceed the maximum building height by up to 1 metre if the slope of the natural ground level, measured at any cross section of the site of the building wider than 8 metres, is greater than 2.5 degrees.

The maximum building height requirement in a schedule to this zone applies whether or not a planning permit is required for the construction of a building.

**Building height if land is subject to inundation**

If the land is in a Special Building Overlay, Land Subject to Inundation Overlay or is land liable to inundation the maximum building height specified in the zone or schedule to the zone is the vertical distance from the minimum floor level determined by the relevant drainage authority or floodplain management authority to the roof or parapet at any point.

### Application requirements

#### Use for industry and warehouse

Unless the circumstances do not require, an application to use land for an industry or warehouse must be accompanied by the following information:

• The purpose of the use and the types of activities to be carried out.

• The type and quantity of materials and goods to be stored, processed or produced.

• Whether a Works Approval or Waste Discharge Licence is required from the Environment Protection Authority.

• Whether a notification under the Occupational Health and Safety Regulations 2017 is required, a licence under the *Dangerous Goods Act 1985* is required, or a fire protection quantity under the Dangerous Goods (Storage and Handling) Regulations 2012 is exceeded.

• How land not required for immediate use is to be maintained.

• The likely effects, if any, on the neighbourhood, including noise levels, traffic, air-borne emissions, emissions to land and water, light spill, glare, solar access and hours of operation (including the hours of delivery and despatch of materials and goods).

• Any other application requirements specified in a schedule to this zone.

### Decision guidelines

Before deciding on an application to use land or construct a building or construct or carry out works, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

#### General

• The Municipal Planning Strategy and the Planning Policy Framework.

• The objectives set out in a schedule to this zone.
• The protection and enhancement of the character of the town and surrounding area including the retention of vegetation.

• The availability and provision of utility services, including sewerage, water, drainage, electricity, gas and telecommunications.

• In the absence of reticulated sewerage, the capability of the lot to treat and retain all wastewater in accordance with the State Environment Protection Policy (Waters of Victoria) under the Environment Protection Act 1970.

• The design, height, setback and appearance of the proposed buildings and works including provision for solar access.

• The need for a verandah along the front or side of commercial buildings to provide shelter for pedestrians.

• Provision of car and bicycle parking and loading bay facilities and landscaping.

• The effect that existing uses on adjoining or nearby land may have on the proposed use.

• The scale and intensity of the use and development.

• The safety, efficiency and amenity effects of traffic to be generated by the proposal.

• The impact of overshadowing on existing rooftop solar energy facilities on dwellings on adjoining lots in a General Residential Zone, Mixed Use Zone, Neighbourhood Residential Zone, Residential Growth Zone or Township Zone.

• Any other decision guidelines specified in a schedule to this zone.

Use for industry and warehouse
Before deciding on an application to use land for an industry or warehouse, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

• The Municipal Planning Strategy and the Planning Policy Framework.

• The effect that existing uses on adjoining or nearby land may have on the proposed use.

• The design of buildings, including provision for solar access.

• The availability and provision of utility services.

• The effect of traffic to be generated by the use.

• The interim use of those parts of the land not required for the proposed use.

• Any other decision guidelines specified in a schedule to this zone.

Subdivision
Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

• The Municipal Planning Strategy and the Planning Policy Framework.

• The pattern of subdivision and its effect on the spacing of buildings.

• For subdivision of land for residential development, the objectives and standards of Clause 56.

• Any other decision guidelines specified in a schedule to this zone.

Construction and extension of one dwelling on a lot
Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

• The Municipal Planning Strategy and the Planning Policy Framework.
- The objectives, standards and decision guidelines of Clause 54.
- Any other decision guidelines specified in a schedule to this zone.

**Construction and extension of two or more dwellings on a lot, dwellings on common property and residential buildings**

Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

- For two or more dwellings on a lot, dwellings on common property and residential buildings, the objectives, standards and decision guidelines of Clause 55. This does not apply to an apartment development of five or more storeys, excluding a basement.
- For an apartment development of five or more storeys, excluding a basement, the objectives, standards and decisions guidelines of Clause 58.
- Any other decision guidelines specified in a schedule to this zone.

**Signs**

Sign requirements are at Clause 52.05. This zone is in Category 3.

GENERAL RESIDENTIAL ZONE

Shown on the planning scheme map as GRZ, R1Z, R2Z or R3Z with a number (if shown).

Purpose

To implement the Municipal Planning Strategy and the Planning Policy Framework.
To encourage development that respects the neighbourhood character of the area.
To encourage a diversity of housing types and housing growth particularly in locations offering good access to services and transport.
To allow educational, recreational, religious, community and a limited range of other non-residential uses to serve local community needs in appropriate locations.

Neighbourhood character objectives

A schedule to this zone may contain neighbourhood character objectives to be achieved for the area.

Saleyard
Stone extraction
Transport terminal
Warehouse (other than Store)

Subdivision

Permit requirement
A permit is required to subdivide land.

An application to subdivide land that would create a vacant lot less than 400 square metres capable of development for a dwelling or residential building, must ensure that each vacant lot created less than 400 square metres contains at least 25 percent as garden area. This does not apply to a lot created by an application to subdivide land where that lot is created in accordance with:

- An approved precinct structure plan or an equivalent strategic plan;
- An incorporated plan or approved development plan; or
- A permit for development.
An application to subdivide land, other than an application to subdivide land into lots each containing an existing dwelling or car parking space, must meet the requirements of Clause 56 and:

- Must meet all of the objectives included in the clauses specified in the following table.
- Should meet all of the standards included in the clauses specified in the following table.

<table>
<thead>
<tr>

### VicSmart applications

Subject to Clause 71.06, an application under this clause for a development specified in Column 1 is a class of VicSmart application and must be assessed against the provision specified in Column 2.

<table>
<thead>
<tr>
<th>Class of application</th>
<th>Information requirements and decision guidelines</th>
</tr>
</thead>
<tbody>
<tr>
<td>Subdivide land to realign the common boundary between 2 lots where:</td>
<td>Clause 59.01</td>
</tr>
<tr>
<td>- The area of either lot is reduced by less than 15 percent.</td>
<td></td>
</tr>
<tr>
<td>- The general direction of the common boundary does not change.</td>
<td></td>
</tr>
<tr>
<td>Subdivide land into lots each containing an existing building or car parking space where:</td>
<td>Clause 59.02</td>
</tr>
<tr>
<td>- The buildings or car parking spaces have been constructed in accordance with the provisions of this scheme or a permit issued under this scheme.</td>
<td></td>
</tr>
<tr>
<td>- An occupancy permit or a certificate of final inspection has been issued under the Building Regulations in relation to the buildings within 5 years prior to the application for a permit for subdivision.</td>
<td></td>
</tr>
<tr>
<td>Subdivide land into 2 lots if:</td>
<td>Clause 59.02</td>
</tr>
<tr>
<td>- The construction of a building or the construction or carrying out of works on the land:</td>
<td></td>
</tr>
<tr>
<td>- Has been approved under this scheme or by a permit issued under this scheme and the permit has not expired.</td>
<td></td>
</tr>
<tr>
<td>- Has started lawfully.</td>
<td></td>
</tr>
<tr>
<td>- The subdivision does not create a vacant lot.</td>
<td></td>
</tr>
</tbody>
</table>
Construction or extension of a dwelling or residential building

Minimum garden area requirement

An application to construct or extend a dwelling or residential building on a lot must provide a minimum garden area as set out in the following table:

<table>
<thead>
<tr>
<th>Lot size</th>
<th>Minimum percentage of a lot set aside as garden area</th>
</tr>
</thead>
<tbody>
<tr>
<td>400 - 500 sqm</td>
<td>25%</td>
</tr>
<tr>
<td>Above 500 - 650 sqm</td>
<td>30%</td>
</tr>
<tr>
<td>Above 650 sqm</td>
<td>35%</td>
</tr>
</tbody>
</table>

This does not apply to:

- An application to construct or extend a dwelling or residential building if specified in a schedule to this zone as exempt from the minimum garden area requirement;
- An application to construct or extend a dwelling or residential building on a lot if:
  - The lot is designated as a medium density housing site in an approved precinct structure plan or an approved equivalent strategic plan;
  - The lot is designated as a medium density housing site in an incorporated plan or approved development plan; or
- An application to alter or extend an existing building that did not comply with the minimum garden area requirement of Clause 32.08-4 on the approval date of Amendment VC110.

Construction and extension of one dwelling on a lot

Permit requirement

A permit is required to construct or extend one dwelling on:

- A lot of less than 300 square metres.
- A lot of between 300 square metres and 500 square metres if specified in a schedule to this zone.

A permit is required to construct or extend a front fence within 3 metres of a street if:

- The fence is associated with one dwelling on:
  - A lot of less than 300 square metres, or
  - A lot of between 300 and 500 square metres if specified in a schedule to this zone, and
- The fence exceeds the maximum height specified in Clause 54.06-2.

A development must meet the requirements of Clause 54.

No permit required

No permit is required to:

- Construct or carry out works normal to a dwelling.
- Construct or extend an out-building (other than a garage or carport) on a lot provided the gross floor area of the out-building does not exceed 10 square metres and the maximum building height is not more than 3 metres above ground level.
- Make structural changes to a dwelling provided the size of the dwelling is not increased or the number of dwellings is not increased.

Page 251 of 836
VicSmart applications

Subject to Clause 71.06, an application under this clause for a development specified in Column 1 is a class of VicSmart application and must be assessed against the provision specified in Column 2.

<table>
<thead>
<tr>
<th>Class of application</th>
<th>Information requirements and decision guidelines</th>
</tr>
</thead>
<tbody>
<tr>
<td>Construct an outbuilding or extend a dwelling if the development:</td>
<td>Clause 59.14</td>
</tr>
<tr>
<td>Meets the minimum garden area requirement of Clause 32.08-4.</td>
<td></td>
</tr>
<tr>
<td>Does not exceed a building height of 5 metres.</td>
<td></td>
</tr>
<tr>
<td>Is not visible from the street (other than a lane) or a public park.</td>
<td></td>
</tr>
<tr>
<td>Meets the requirements in the following standards of Clause 54:</td>
<td></td>
</tr>
<tr>
<td>- A10 Side and rear setbacks.</td>
<td></td>
</tr>
<tr>
<td>- A11 Walls on boundaries.</td>
<td></td>
</tr>
<tr>
<td>- A12 Daylight to existing windows.</td>
<td></td>
</tr>
<tr>
<td>- A13 North-facing windows.</td>
<td></td>
</tr>
<tr>
<td>- A14 Overshadowing open space.</td>
<td></td>
</tr>
<tr>
<td>- A15 Overlooking.</td>
<td></td>
</tr>
</tbody>
</table>

For the purposes of this class of VicSmart application, the Clause 54 standards specified above are mandatory.

If a schedule to the zone specifies a requirement of a standard different from a requirement set out in the Clause 54 standard, the requirement in the schedule to the zone applies and must be met.

| Construct or extend a front fence within 3 metres of a street if the fence is associated with one dwelling. | Clause 59.03 |

Construction and extension of two or more dwellings on a lot, dwellings on common property and residential buildings

Permit requirement

A permit is required to:

- Construct a dwelling if there is at least one dwelling existing on the lot.
- Construct two or more dwellings on a lot.
- Extend a dwelling if there are two or more dwellings on the lot.
- Construct or extend a dwelling if it is on common property.
- Construct or extend a residential building.

A permit is required to construct or extend a front fence within 3 metres of a street if:

- The fence is associated with 2 or more dwellings on a lot or a residential building, and
- The fence exceeds the maximum height specified in Clause 55.06-2.

A development must meet the requirements of Clause 55. This does not apply to a development of five or more storeys, excluding a basement.
An apartment development of five or more storeys, excluding a basement, must meet the requirements of Clause 58.

A permit is not required to construct one dependent person’s unit on a lot.

**VicSmart applications**

Subject to Clause 71.06, an application under this clause for a development specified in Column 1 is a class of VicSmart application and must be assessed against the provision specified in Column 2.

<table>
<thead>
<tr>
<th>Class of application</th>
<th>Information requirements and decision guidelines</th>
</tr>
</thead>
<tbody>
<tr>
<td>Construct or extend a front fence within 3 metres of a street if the fence is associated with 2 or more dwellings on a lot or a residential building.</td>
<td>Clause 59.03</td>
</tr>
</tbody>
</table>

**Transitional provisions**

Clause 55 of this scheme, as in force immediately before the approval date of Amendment VC136, continues to apply to:

- An application for a planning permit lodged before that date.
- An application for an amendment of a permit under section 72 of the Act, if the original permit application was lodged before that date.

Clause 58 does not apply to:

- An application for a planning permit lodged before the approval date of Amendment VC136.
- An application for an amendment of a permit under section 72 of the Act, if the original permit application was lodged before the approval date of Amendment VC136.

**Requirements of Clause 54 and Clause 55**

A schedule to this zone may specify the requirements of:

- Standards A3, A5, A6, A10, A11, A17 and A20 of Clause 54 of this scheme.
- Standards B6, B8, B9, B13, B17, B18, B28 and B32 of Clause 55 of this scheme.

If a requirement is not specified in a schedule to this zone, the requirement set out in the relevant standard of Clause 54 or Clause 55 applies.

**Residential aged care facility**

**Permit requirements**

A permit is required to construct a building or construct or carry out works for a residential aged care facility.

A development must meet the requirements of Clause 53.17 - Residential aged care facility.

**Buildings and works associated with a Section 2 use**

A permit is required to construct a building or construct or carry out works for a use in Section 2 of Clause 32.08-2.
VicSmart applications

Subject to Clause 71.06, an application under this clause for a development specified in Column 1 is a class of VicSmart application and must be assessed against the provision specified in Column 2.

<table>
<thead>
<tr>
<th>Class of application</th>
<th>Information requirements and decision guidelines</th>
</tr>
</thead>
<tbody>
<tr>
<td>Construct a building or construct or carry out works with an estimated cost of up to $100,000 where:</td>
<td>Clause 59.04</td>
</tr>
<tr>
<td>- The building or works is not associated with a dwelling.</td>
<td></td>
</tr>
<tr>
<td>- The requirements in the following standards of Clause 54 are met, where the land adjoins land in a residential zone used for residential purposes:</td>
<td></td>
</tr>
<tr>
<td>- A10 Side and rear setbacks.</td>
<td></td>
</tr>
<tr>
<td>- A11 Walls on boundaries.</td>
<td></td>
</tr>
<tr>
<td>- A12 Daylight to existing windows.</td>
<td></td>
</tr>
<tr>
<td>- A13 North-facing windows.</td>
<td></td>
</tr>
<tr>
<td>- A14 Overshadowing open space.</td>
<td></td>
</tr>
<tr>
<td>- A15 Overlooking.</td>
<td></td>
</tr>
</tbody>
</table>

For the purposes of this class of VicSmart application, the Clause 54 standards specified above are mandatory.

If a schedule to the zone specifies a requirement of a standard different from a requirement set out in the Clause 54 standard, the requirement in the schedule to the zone applies and must be met.

Maximum building height requirement for a dwelling or residential building

A building must not be constructed for use as a dwelling or a residential building that:

- exceeds the maximum building height specified in a schedule to this zone; or
- contains more than the maximum number of storeys specified in a schedule to this zone.

If no maximum building height or maximum number of storeys is specified in a schedule to this zone:

- the building height must not exceed 11 metres; and
- the building must contain no more than 3 storeys at any point.

A building may exceed the applicable maximum building height or contain more than the applicable maximum number of storeys if:

- It replaces an immediately pre-existing building and the new building does not exceed the building height or contain a greater number of storeys than the pre-existing building.
- There are existing buildings on both abutting allotments that face the same street and the new building does not exceed the building height or contain a greater number of storeys than the lower of the existing buildings on the abutting allotments.
- It is on a corner lot abutted by lots with existing buildings and the new building does not exceed the building height or contain a greater number of storeys than the lower of the existing buildings on the abutting allotments.

- It is constructed pursuant to a valid building permit that was in effect prior to the introduction of this provision.

An extension to an existing building may exceed the applicable maximum building height or contain more than the applicable maximum number of storeys if it does not exceed the building height of the existing building or contain a greater number of storeys than the existing building.

A building may exceed the maximum building height by up to 1 metre if the slope of the natural ground level, measured at any cross section of the site of the building wider than 8 metres, is greater than 2.5 degrees.

A basement is not a storey for the purposes of calculating the number of storeys contained in a building.

The maximum building height and maximum number of storeys requirements in this zone or a schedule to this zone apply whether or not a planning permit is required for the construction of a building.

**Building height if land is subject to inundation**

If the land is in a Special Building Overlay, Land Subject to Inundation Overlay or is land liable to inundation the maximum building height specified in the zone or schedule to the zone is the vertical distance from the minimum floor level determined by the relevant drainage authority or floodplain management authority to the roof or parapet at any point.

### Application requirements

An application must be accompanied by the following information, as appropriate:

- For a residential development of four storeys or less, the neighbourhood and site description and design response as required in Clause 54 and Clause 55.

- For an apartment development of five or more storeys, an urban context report and design response as required in Clause 58.01.

- For an application for subdivision, a site and context description and design response as required in Clause 56.

- Plans drawn to scale and dimensioned which show:
  - Site shape, size, dimensions and orientation.
  - The siting and use of existing and proposed buildings.
  - Adjacent buildings and uses.
  - The building form and scale.
  - Setbacks to property boundaries.

- The likely effects, if any, on adjoining land, including noise levels, traffic, the hours of delivery and despatch of good and materials, hours of operation and light spill, solar access and glare.

- Any other application requirements specified in a schedule to this zone.

If in the opinion of the responsible authority an application requirement is not relevant to the evaluation of an application, the responsible authority may waive or reduce the requirement.
Exemption from notice and review

Subdivision

An application to subdivide land into lots each containing an existing dwelling or car parking space is exempt from the notice requirements of section 52(1)(a), (b) and (d), the decision requirements of section 64(1), (2) and (3) and the review rights of section 82(1) of the Act.

Decision guidelines

Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

General

- The purpose of this zone.
- The objectives set out in a schedule to this zone.
- Any other decision guidelines specified in a schedule to this zone.
- The impact of overshadowing on existing rooftop solar energy facilities on dwellings on adjoining lots in a General Residential Zone, Mixed Use Zone, Neighbourhood Residential Zone, Residential Growth Zone or Township Zone.

Subdivision

- The pattern of subdivision and its effect on the spacing of buildings.
- For subdivision of land for residential development, the objectives and standards of Clause 56.

Dwellings and residential buildings

- For the construction and extension of one dwelling on a lot, the objectives, standards and decision guidelines of Clause 54.
- For the construction and extension of two or more dwellings on a lot, dwellings on common property and residential buildings, the objectives, standards and decision guidelines of Clause 55. This does not apply to an apartment development of five or more storeys, excluding a basement.
- For the construction and extension of an apartment development of five or more storeys, excluding a basement, the objectives, standards and decisions guidelines of Clause 58.

Non-residential use and development

- Whether the use or development is compatible with residential use.
- Whether the use generally serves local community needs.
- The scale and intensity of the use and development.
- The design, height, setback and appearance of the proposed buildings and works.
- The proposed landscaping.
- The provision of car and bicycle parking and associated accessways.
- Any proposed loading and refuse collection facilities.
- The safety, efficiency and amenity effects of traffic to be generated by the proposal.

Signs

Sign requirements are at Clause 52.05. This zone is in Category 3.
Transitional provisions

The minimum garden area requirements of Clause 32.08-4 and the maximum building height and number of storeys requirements of Clause 32.08-9 introduced by Amendment VC110 do not apply to:

- A planning permit application for the construction or extension of a dwelling or residential building lodged before the approval date of Amendment VC110.

- Where a planning permit is not required for the construction or extension of a dwelling or residential building:
  - A building permit issued for the construction or extension of a dwelling or residential building before the approval date of Amendment VC110.
  - A building surveyor has been appointed to issue a building permit for the construction or extension of a dwelling or residential building before the approval date of Amendment VC110. A building permit must be issued within 12 months of the approval date of Amendment VC110.
  - A building surveyor is satisfied, and certifies in writing, that substantial progress was made on the design of the construction or extension of a dwelling or residential building before the approval date of Amendment VC110. A building permit must be issued within 12 months of the approval date of Amendment VC110.

The minimum garden area requirement of Clause 32.08-3 introduced by Amendment VC110 does not apply to a planning permit application to subdivide land for a dwelling or a residential building lodged before the approval date of Amendment VC110.

Use of land

Application requirements

An application to use land for an industry or warehouse must be accompanied by the following information, as appropriate:

- The purpose of the use and the types of processes to be utilised.
- The type and quantity of goods to be stored, processed or produced.
- How land not required for immediate use is to be maintained.
- Whether a Works Approval or Waste Discharge Licence is required from the Environment Protection Authority.
- Whether a notification under the Occupational Health and Safety Regulations 2017 is required, a licence under the Dangerous Goods Act 1985 is required, or a fire protection quantity under the Dangerous Goods (Storage and Handling) Regulations 2012 is exceeded.

- The likely effects, if any, on the neighbourhood, including:
  - Noise levels.
  - Air-borne emissions.
  - Emissions to land or water.
  - Traffic, including the hours of delivery and despatch.
  - Light spill or glare.

Decision guidelines

Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

- The effect that the use may have on nearby existing or proposed residential areas or other uses which are sensitive to industrial off-site effects, having regard to any comments or directions of the referral authorities.
- The effect that nearby industries may have on the proposed use.
- The drainage of the land.
- The availability of and connection to services.
- The effect of traffic to be generated on roads.
- The interim use of those parts of the land not required for the proposed use.
Subdivision

Permit requirement

A permit is required to subdivide land.

VicSmart applications

Subject to Clause 71.06, an application under this clause for a development specified in Column 1 is a class of VicSmart application and must be assessed against the provision specified in Column 2.

<table>
<thead>
<tr>
<th>Class of application</th>

<td></td>
</tr>
<tr>
<td>- Has started lawfully.</td>
<td></td>
</tr>
<tr>
<td>- The subdivision does not create a vacant lot.</td>
<td></td>
</tr>
</tbody>
</table>

Exemption from notice and review

An application is exempt from the notice requirements of section 52(1)(a), (b) and (d), the decision requirements of section 64(1), (2) and (3) and the review rights of section 82(1) of the Act. This exemption does not apply to land within 30 metres of land (not a road) which is in a residential zone or land used for a hospital or an education centre or land in a Public Acquisition Overlay to be acquired for a hospital or an education centre.

Decision guidelines

Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

- Any natural or cultural values on or near the land.
- Streetscape character.
- Landscape treatment.
Buildings and works

Permit requirement

A permit is required to construct a building or construct or carry out works.

This does not apply to:

- A building or works which rearrange, alter or renew plant if the area or height of the plant is not increased.
- A building or works which are used for crop raising or informal outdoor recreation.
- A rainwater tank with a capacity of more than 10,000 litres if the following requirements are met:
  - The rainwater tank is not located within the building’s setback from a street (other than a lane).
  - The rainwater tank is no higher than the existing building on the site.
  - The rainwater tank is not located in an area that is provided for car parking, loading, unloading or accessway.
- A building or works which are used for grazing animal production, except for permanent or fixed feeding infrastructure for seasonal or supplementary feeding constructed within 100 metres of:
  - A waterway, wetland or designated flood plain.
  - A dwelling not in the same ownership.
  - A residential or urban growth zone.

VicSmart applications

Subject to Clause 71.06, an application under this clause for a development specified in Column 1 is a class of VicSmart application and must be assessed against the provision specified in Column 2.

<table>
<thead>
<tr>
<th>Class of application</th>
<th>Information requirements and decision guidelines</th>
</tr>
</thead>
<tbody>
<tr>
<td>Construct a building or construct or carry out works with an estimated cost of up to $1,000,000 where the land is not:</td>
<td>Clause 59.04</td>
</tr>
<tr>
<td>- Within 30 metres of land (not a road) which is in a residential zone.</td>
<td></td>
</tr>
<tr>
<td>- Used for a purpose listed in the table to Clause 53.10.</td>
<td></td>
</tr>
<tr>
<td>- Used for a Brothel or Adult sex product shop.</td>
<td></td>
</tr>
</tbody>
</table>

Application requirements

An application to construct a building or construct or carry out works must be accompanied by the following information, as appropriate:

- A plan drawn to scale which shows:
  - The boundaries and dimensions of the site.
  - Adjoining roads.
  - Relevant ground levels.
- The layout of existing and proposed buildings and works.
- Driveways and vehicle parking and loading areas.
- Proposed landscape areas.
- External storage and waste treatment areas.

- Elevation drawings to scale which show the colour and materials of all buildings and works.
- Construction details of all drainage works, driveways and vehicle parking and loading areas.
- A landscape layout which includes the description of vegetation to be planted, the surfaces to be constructed, a site works specification and the method of preparing, draining, watering and maintaining the landscape area.

**Exemption from notice and review**

An application is exempt from the notice requirements of section 52(1)(a), (b) and (d), the decision requirements of section 64(1), (2) and (3) and the review rights of section 82(1) of the Act. This exemption does not apply to an application for a building or works within 30 metres of land (not a road) which is in a residential zone or land used for a hospital or an education centre or land in a Public Acquisition Overlay to be acquired for a hospital or an education centre.

**Decision guidelines**

Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

- Any natural or cultural values on or near the land.
- Streetscape character.
- Built form.
- Landscape treatment.
- Interface with non-industrial areas.
- Parking and site access.
- Loading and service areas.
- Outdoor storage.
- Lighting.
- Stormwater discharge.

**Maintenance**

All buildings and works must be maintained in good order and appearance to the satisfaction of the responsible authority.

**Signs**

Sign requirements are at Clause 52.05. This zone is in Category 2.
## SCHEDULE TO CLAUSE 33.01 INDUSTRIAL 1 ZONE

<table>
<thead>
<tr>
<th>Land</th>

<td></td>
</tr>
</tbody>
</table>
COMMERCIAL 1 ZONE
Shown on the planning scheme map as B1Z, B2Z, B5Z or C1Z.

Purpose
To implement the Municipal Planning Strategy and the Planning Policy Framework.
To create vibrant mixed use commercial centres for retail, office, business, entertainment and community uses.
To provide for residential uses at densities complementary to the role and scale of the commercial centre.

Operation
A schedule may apply under this zone to a planning scheme outside of metropolitan Melbourne. That schedule may:
- specify the maximum leasable floor area for office
- specify the maximum leasable floor area for shop (other than restricted retail premises).

Use of land

A use must not detrimentally affect the amenity of the neighbourhood, including through the:

- Transport of materials, goods or commodities to or from the land.
- Appearance of any building, works or materials.
- Emission of noise, artificial light, vibration, smell, fumes, smoke, vapour, steam, soot, ash, dust, waste water, waste products, grit or oil.

Subdivision

A permit is required to subdivide land.

VicSmart applications

Subject to Clause 71.06, an application under this clause for a development specified in Column 1 is a class of VicSmart application and must be assessed against the provision specified in Column 2.

<table>
<thead>
<tr>
<th>Class of application</th>

<td></td>
</tr>
<tr>
<td>- The subdivision does not create a vacant lot.</td>
<td></td>
</tr>
</tbody>
</table>

Buildings and works

A permit is required to construct a building or construct or carry out works.

This does not apply to:

- The installation of an automatic teller machine.
- An alteration to an existing building façade provided:
  - The alteration does not include the installation of an external roller shutter.
- At least 80 per cent of the building facade at ground floor level is maintained as an entry or window with clear glazing.

- An awning that projects over a road if it is authorised by the relevant public land manager.

An apartment development must meet the requirements of Clause 58.

**VicSmart applications**

Subject to Clause 71.06, an application under this clause for a development specified in Column 1 is a class of VicSmart application and must be assessed against the provision specified in Column 2.

<table>
<thead>
<tr>
<th>Class of application</th>
<th>Information requirements and decision guidelines</th>
</tr>
</thead>
<tbody>
<tr>
<td>Construct a building or construct or carry out works with an estimated cost of up to $500,000 where the land is not:</td>
<td>Clause 59.04</td>
</tr>
<tr>
<td>- Within 30 metres of land (not a road) which is in a residential zone.</td>

<tr>
<td>- Used for a purpose listed in the table to Clause 53.10.</td>
<td></td>
</tr>
<tr>
<td>- Used for a Brothel or Adult sex product shop.</td>
<td></td>
</tr>
</tbody>
</table>

**Transitional provisions**

Clause 58 does not apply to:

- An application for a planning permit lodged before the approval date of Amendment VC136.

- An application for an amendment of a permit under section 72 of the Act, if the original permit application was lodged before the approval date of Amendment VC136.

**Maintenance**

All buildings and works must be maintained in good order and appearance to the satisfaction of the responsible authority.

**Neighbourhood and site description and design response**

An application for any of the following must be accompanied by a neighbourhood and site description and a design response as described in Clause 54.01 or 55.01, as appropriate:

- Construction or extension of one dwelling on a lot of less than 300 square metres.

- Construction of a dwelling if there is at least one dwelling existing on the lot.

- Construction of two or more dwellings on a lot.

- Extension of a dwelling if there are two or more dwellings on the lot.

- Construction or extension of a dwelling on common property.

- Construction or extension of a residential building.

Clause 34.01-5 does not apply to an apartment development.

**Satisfactory neighbourhood and site description before notice and decision**

If the responsible authority decides that the neighbourhood and site description is not satisfactory, it may require more information from the applicant under Section 54 of the Act.

The responsible authority must not require notice of an application to be given or decide an application until it is satisfied that the neighbourhood and site description meets the requirements of Clause 54.01 or 55.01 and is satisfactory.
This does not apply if the responsible authority refuses an application under Section 52(1A) of the Act.

Application requirements

Use

An application to use land must be accompanied by the following information, as appropriate:

- The purpose of the use and the types of activities which will be carried out.
- The likely effects, if any, on adjoining land, including noise levels, traffic, the hours of delivery and despatch of goods and materials, hours of operation and light spill, solar access and glare.
- The means of maintaining land not required for immediate use.
- If an industry or warehouse:
  - The type and quantity of goods to be stored, processed or produced.
  - Whether a Works Approval or Waste Discharge Licence is required from the Environment Protection Authority.
  - Whether a notification under the Occupational Health and Safety Regulations 2017 is required, a licence under the Dangerous Goods Act 1985 is required, or a fire protection quantity under the Dangerous Goods (Storage and Handling) Regulations 2012 is exceeded.
  - The likely effects on adjoining land, including air-borne emissions and emissions to land and water.

Buildings and works

An application to construct a building or construct or carry out works must be accompanied by the following information, as appropriate:

- A plan drawn to scale which shows:
  - The boundaries and dimensions of the site.
  - Adjoining roads.
  - The location, height and purpose of buildings and works on adjoining land.
  - Relevant ground levels.
  - The layout of existing and proposed buildings and works.
  - All driveway, car parking and loading areas.
  - Proposed landscape areas.
  - All external storage and waste treatment areas.
  - Areas not required for immediate use.
  - Elevation drawings to scale showing the colour and materials of all buildings and works.
  - Construction details of all drainage works, driveways, vehicle parking and loading areas.
  - A landscape layout which includes the description of vegetation to be planted, the surfaces to be constructed, site works specification and method of preparing, draining, watering and maintaining the landscape area.

An application to construct or extend an apartment development, or to construct or extend a dwelling in or forming part of an apartment development, must be accompanied by an urban context report and design response as required in Clause 58.01.
Exemption from notice and review

An application to subdivide land or construct a building or construct or carry out works is exempt from the notice requirements of section 52(1)(a), (b) and (d), the decision requirements of section 64(1), (2) and (3) and the review rights of section 82(1) of the Act. This exemption does not apply to land within 30 metres of land (not a road) which is in a residential zone, land used for a hospital or an education centre or land in a Public Acquisition Overlay to be acquired for a hospital or an education centre.

Decision guidelines

Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

General

- The interface with adjoining zones, especially the relationship with residential areas.

Use

- The effect that existing uses may have on the proposed use.
- The drainage of the land.
- The availability of and connection to services.
- The effect of traffic to be generated on roads.
- The interim use of those parts of the land not required for the proposed use.

Subdivision

- Provision for vehicles providing for supplies, waste removal and emergency services and public transport.
- The effect the subdivision will have on the potential of the area to accommodate the uses which will maintain or enhance its competitive strengths.

Building and works

- The movement of pedestrians and cyclists, and vehicles providing for supplies, waste removal, emergency services and public transport.
- The provision of car parking.
- The streetscape, including the conservation of buildings, the design of verandahs, access from the street front, protecting active frontages to pedestrian areas, the treatment of the fronts and backs of buildings and their appurtenances, illumination of buildings or their immediate spaces and the landscaping of land adjoining a road.
- The storage of rubbish and materials for recycling.
- Defining the responsibility for the maintenance of buildings, landscaping and paved areas.
- Consideration of the overlooking and overshadowing as a result of building or works affecting adjoining land in a General Residential Zone, Neighbourhood Residential Zone, Residential Growth Zone or Township Zone.
- The impact of overshadowing on existing rooftop solar energy facilities on dwellings on adjoining lots in a General Residential Zone, Mixed Use Zone, Neighbourhood Residential Zone, Residential Growth Zone or Township Zone.
- The availability of and connection to services.
- The design of buildings to provide for solar access.
- The objectives, standards and decision guidelines of Clause 54 and Clause 55. This does not apply to an apartment development.

- For an apartment development, the objectives, standards and decision guidelines of Clause 58.

**Transitional provisions**

The objectives, standards and decision guidelines of Clause 55 of this scheme, as in force immediately before the approval date of Amendment VC136, continues to apply to:

- An application for a planning permit lodged before that date.

- An application for an amendment of a permit under section 72 of the Act, if the original permit application was lodged before that date.

**Signs**

Sign requirements are at Clause 52.05. This zone is in Category 1.
## SCHEDULE TO CLAUSE 34.01 COMMERCIAL 1 ZONE

<table>
<thead>
<tr>
<th>Land</th>
<th>Maximum leasable floor area (m²) for office</th>
<th>Maximum leasable floor area (m²) for shop (other than restricted retail premises)</th>
</tr>
</thead>
<tbody>
<tr>
<td>None specified</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
COMMERCIAL 2 ZONE

Shown on the planning scheme map as B3Z, B4Z or C2Z.

Purpose

To implement the Municipal Planning Strategy and the Planning Policy Framework.
To encourage commercial areas for offices, appropriate manufacturing and industries, bulky goods retailing, other retail uses, and associated business and commercial services.
To ensure that uses do not affect the safety and amenity of adjacent, more sensitive uses.

</table>

**Use of land**

A use must not detrimentally affect the amenity of the neighbourhood, including through the:

- Transport of materials, goods or commodities to or from the land.
- Appearance of any building, works or materials.
- Emission of noise, artificial light, vibration, smell, fumes, smoke, vapour, steam, soot, ash, dust, waste water, waste products, grit or oil.

**Subdivision**

A permit is required to subdivide land.

**VicSmart applications**

Subject to Clause 71.06, an application under this clause for a development specified in Column 1 is a class of VicSmart application and must be assessed against the provision specified in Column 2.
### Class of application

<table>
<thead>
<tr>
<th>Subdivide land to realign the common boundary between 2 lots where:</th>
</tr>
</thead>
<tbody>
<tr>
<td>• The area of either lot is reduced by less than 15 percent.</td>
</tr>
<tr>
<td>• The general direction of the common boundary does not change.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Subdivide land into lots each containing an existing building or car parking space where:</th>
</tr>
</thead>
<tbody>
<tr>
<td>• The buildings or car parking spaces have been constructed in accordance with the provisions of this scheme or a permit issued under this scheme.</td>
</tr>
<tr>
<td>• An occupancy permit or a certificate of final inspection has been issued under the Building Regulations in relation to the buildings within 5 years prior to the application for a permit for subdivision.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Subdivide land into 2 lots if:</th>
</tr>
</thead>
<tbody>
<tr>
<td>• The construction of a building or the construction or carrying out of works on the land:</td>
</tr>
<tr>
<td>• Has been approved under this scheme or by a permit issued under this scheme and the permit has not expired.</td>
</tr>
<tr>
<td>• Has started lawfully.</td>
</tr>
<tr>
<td>• The subdivision does not create a vacant lot.</td>
</tr>
</tbody>
</table>

### Buildings and works

A permit is required to construct a building or construct or carry out works.

This does not apply to:

- The installation of an automatic teller machine.
- An alteration to an existing building façade provided:
  - The alteration does not include the installation of an external roller shutter.
  - At least 80 per cent of the building facade at ground floor level is maintained as an entry or window with clear glazing.
- An awning that projects over a road if it is authorised by the relevant public land manager.

### VicSmart applications

Subject to Clause 71.06, an application under this clause for a development specified in Column 1 is a class of VicSmart application and must be assessed against the provision specified in Column 2.
## Class of application

<table>
<thead>
<tr>

</tr>
</thead>
<tbody>
<tr>
<td>• Used for a purpose listed in the table to Clause 53.10.</td>
</tr>
<tr>
<td>• Used for a Brothel or Adult sex product shop.</td>
</tr>
</tbody>
</table>

### Maintenance

All buildings and works must be maintained in good order and appearance to the satisfaction of the responsible authority.

### Application requirements

#### Use

An application to use land must be accompanied by the following information, as appropriate:

- The purpose of the use and the types of activities which will be carried out.
- The likely effects, if any, on adjoining land, including noise levels, traffic, the hours of delivery and despatch of goods or materials, hours of operation and light spill, solar access and glare.
- The means of maintaining areas not required for immediate use.
- If an industry or warehouse:
  - The type and quantity of goods to be stored, processed or produced.
  - Whether a Works Approval, or Waste Discharge Licence is required from the Environment Protection Authority.
  - Whether a notification under the Occupational Health and Safety Regulations 2017 is required, a licence under the *Dangerous Goods Act 1995* is required, or a fire protection quantity under the *Dangerous Goods (Storage and Handling) Regulations 2012* is exceeded.
  - The likely effects on adjoining land, including air-borne emissions and emissions to land and water.

#### Building and works

An application to construct a building or construct or carry out works must be accompanied by the following information, as appropriate:

- A plan drawn to scale which shows:
  - The boundaries and dimensions of the site.
  - Adjoining roads.
  - The location, height and purpose of buildings and works on adjoining land.
  - Relevant ground levels.
  - The layout of existing and proposed buildings and works.
  - All driveway, car parking and loading areas.
  - Proposed landscape areas.
  - All external storage and waste treatment areas.
  - Areas not required for immediate use.
- Elevation drawings to scale showing the colour and materials of all buildings and works.
- Construction details of all drainage works, driveways, vehicle parking and loading areas.
A landscape layout which includes the description of vegetation to be planted, the surfaces to be constructed, site works specification and method of preparing, draining, watering and maintaining the landscape area.

**Exemption from notice and review**

An application to subdivide land or construct a building or construct or carry out works is exempt from the notice requirements of section 52(1)(a), (b) and (d), the decision requirements of section 64(1), (2) and (3) and the review rights of section 82(1) of the Act. This exemption does not apply to land within 30 metres of land (not a road) which is in a residential zone, land used for a hospital or an education centre or land in a Public Acquisition Overlay to be acquired for a hospital or an education centre.

**Decision guidelines**

**General**

Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

- The interface with adjoining zones, especially the relationship with residential areas.

**Use**

- The effect that existing uses may have on the proposed use.

- The drainage of the land.

- The availability of and connection to services.

- The effect of traffic to be generated on roads.

- The interim use of those parts of the land not required for the proposed use.

- If an industry or warehouse, the effect that the use may have on nearby existing or proposed residential areas or other uses which are sensitive to industrial off-site effects, having regard to any comments or directions of the referral authorities.

**Subdivision**

- The effect the subdivision will have on the potential of the area to accommodate the uses which will maintain or enhance its competitive strengths.

- Any natural or cultural values on or near the land.

- Streetscape character.

- Landscape treatment.

**Building and works**

- The movement of pedestrians and cyclists, and vehicles providing for supplies, waste removal, emergency services and public transport.

- The provision of car parking.

- The streetscape, including the conservation of buildings, the design of verandahs, access from the street front, protecting active frontages to pedestrian areas, the treatment of the fronts and backs of buildings and their appurtenances, illumination of buildings or their immediate spaces and landscaping of land adjoining a road.

- Defining the responsibility for the maintenance of buildings, landscaping and paved areas.

- The availability of and connection to services.
- Any natural or cultural values on or nearby the land.
- Outdoor storage, lighting, and stormwater discharge.
- The design of buildings to provide for solar access.

Signs

Sign requirements are at Clause 52.05. This zone is in Category 1.
35.03
RURAL LIVING ZONE
Shown on the planning scheme map as RLZ with a number (if shown).

Purpose
To implement the Municipal Planning Strategy and the Planning Policy Framework.
To provide for residential use in a rural environment.
To provide for agricultural land uses which do not adversely affect the amenity of surrounding land uses.
To protect and enhance the natural resources, biodiversity and landscape and heritage values of the area.
To encourage use and development of land based on comprehensive and sustainable land management practices and infrastructure provision.

Use of land for a dwelling

A lot used for a dwelling must meet the following requirements:

- Access to the dwelling must be provided via an all-weather road with dimensions adequate to accommodate emergency vehicles.
- The dwelling must be connected to a reticulated sewerage system or if not available, the waste water must be treated and retained on-site in accordance with the State Environment Protection Policy (Waters of Victoria) under the *Environment Protection Act 1970*.
- The dwelling must be connected to a reticulated potable water supply or have an alternative potable water supply with adequate storage for domestic use as well as for fire fighting purposes.
- The dwelling must be connected to a reticulated electricity supply or have an alternative energy source.

These requirements also apply to a dependent person’s unit.

Subdivision

A permit is required to subdivide land.

Each lot must be at least the area specified for the land in a schedule to this zone. If no area is specified, each lot must be at least 2 hectares.

A permit may be granted to create smaller lots if any of the following apply:

- The subdivision is the re-subdivision of existing lots and the number of lots is not increased.
- The number of lots is no more than the number the land could be subdivided into in accordance with a schedule to this zone.
- The subdivision is by a public authority or utility service provider to create a lot for a utility installation.

VicSmart applications

Subject to Clause 71.06, an application under this clause for a development specified in Column 1 is a class of VicSmart application and must be assessed against the provision specified in Column 2.

<table>
<thead>

</table>

| Subdivide land into 2 lots where each new lot is at least the area specified for the land in the zone or the schedule to the zone. | Clause 59.12 |

Buildings and works

A permit is required to construct or carry out any of the following:

- A building or works associated with a use in Section 2 of Clause 35.03-1. This does not apply to:
- An alteration or extension to an existing dwelling provided the floor area of the alteration or extension is not more than the area specified in a schedule to this zone or, if no area is specified, 100 square metres. Any area specified must be more than 100 square metres.

- An out-building associated with an existing dwelling provided the floor area of the out-building is not more than the area specified in a schedule to this zone or, if no area is specified, 100 square metres. Any area specified must be more than 100 square metres.

- An alteration or extension to an existing building used for agriculture provided the floor area of the alteration or extension is not more than the area specified in the schedule to this zone or, if no area is specified, 100 square metres. Any area specified must be more than 100 square metres. The building must not be used to keep, board, breed or train animals.

- A rainwater tank.

- Earthworks specified in a schedule to this zone, if on land specified in a schedule.

- A building which is within any of the following setbacks:
  - The setback from a Road Zone Category 1 or land in a Public Acquisition Overlay to be acquired for a road, Category 1 specified in the schedule to this zone or, if no setback is specified, 30 metres.
  - The setback from any other road or boundary specified in the schedule to this zone.
  - The distance from a dwelling not in the same ownership specified in the schedule to this zone.
  - 100 metres from a waterway, wetlands or designated flood plain.

VicSmart applications

Subject to Clause 71.06, an application under this clause for a development specified in Column 1 is a class of VicSmart application and must be assessed against the provision specified in Column 2.

<table>
<thead>
<tr>
<th>Class of application</th>

<td></td>
</tr>
<tr>
<td>Any works must not be earthworks specified in the schedule to the zone.</td>
<td></td>
</tr>
</tbody>
</table>

Decision guidelines

Before deciding on an application to use or subdivide land, construct a building or construct or carry out works, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

General issues

- Any Regional Catchment Strategy and associated plan applying to the land.
- The capability of the land to accommodate the proposed use or development.
Whether the site is suitable for the use or development and whether the proposal is compatible with adjoining and nearby land uses.

Agricultural issues
- The capacity of the site to sustain the agricultural use.
- Any integrated land management plan prepared for the site.
- The potential for the future expansion of the use or development and the impact of this on adjoining and nearby agricultural and other land uses.

Environmental issues
- The impact on the natural physical features and resources of the area and in particular any impact caused by the proposal on soil and water quality and by the emission of noise, dust and odours.
- The impact of the use or development on the flora, fauna and landscape features of the locality.
- The need to protect and enhance the biodiversity of the area, including the need to retain vegetation and faunal habitat and the need to revegetate land including riparian buffers along waterways, gullies, ridgelines, property boundaries and saline discharge and recharge area.
- The location of on-site effluent disposal areas to minimise the impact of nutrient loads on waterways and native vegetation.

Design and siting issues
- The impact of the siting, design, height, bulk, colours and materials to be used, on the natural environment, major roads, vistas and water features and the measures to be undertaken to minimise any adverse impacts.
- The impact on the character and appearance of the area or features of architectural, historic or scientific significance or of natural scenic beauty or importance.
- The location and design of existing and proposed infrastructure including roads, gas, water, drainage, telecommunications and sewerage facilities.
- Whether the use or development will require traffic management measures.

FARMING ZONE

Shown on the planning scheme map as FZ with a number (if shown).

Purpose

To implement the Municipal Planning Strategy and the Planning Policy Framework.
To provide for the use of land for agriculture.
To encourage the retention of productive agricultural land.
To ensure that non-agricultural uses, including dwellings, do not adversely affect the use of land for agriculture.
To encourage the retention of employment and population to support rural communities.
To encourage use and development of land based on comprehensive and sustainable land management practices and infrastructure provision.
To provide for the use and development of land for the specific purposes identified in a schedule to this zone.

### Use of land for a dwelling

A lot used for a dwelling must meet the following requirements:
Access to the dwelling must be provided via an all-weather road with dimensions adequate to accommodate emergency vehicles.

The dwelling must be connected to a reticulated sewerage system or if not available, the waste water must be treated and retained on-site in accordance with the State Environment Protection Policy (Waters of Victoria) under the Environment Protection Act 1970.

The dwelling must be connected to a reticulated potable water supply or have an alternative potable water supply with adequate storage for domestic use as well as for fire fighting purposes.

The dwelling must be connected to a reticulated electricity supply or have an alternative energy source.

These requirements also apply to a dependent person’s unit.

Subdivision

A permit is required to subdivide land.

Each lot must be at least the area specified for the land in a schedule to this zone. If no area is specified, each lot must be at least 40 hectares.

A permit may be granted to create smaller lots if any of the following apply:

- The subdivision is to create a lot for an existing dwelling. The subdivision must be a two lot subdivision.
- The subdivision is the re-subdivision of existing lots and the number of lots is not increased.
- The subdivision is by a public authority or utility service provider to create a lot for a utility installation.

VicSmart applications

Subject to Clause 71.06, an application under this clause for a development specified in Column 1 is a class of VicSmart application and must be assessed against the provision specified in Column 2.

<table>
<thead>
<tr>
<th>Class of application</th>
<th>Information requirements and decision guidelines</th>

<td></td>
</tr>
<tr>
<td>- The area of either lot is reduced by less than 15 percent.</td>
<td></td>
</tr>
<tr>
<td>- The general direction of the common boundary does not change.</td>
<td></td>
</tr>
</tbody>
</table>

Subdivide land into 2 lots where each new lot is at least the area specified for the land in the zone or the schedule to the zone. | Clause 59.12 |

Buildings and works

A permit is required to construct or carry out any of the following:

- A building or works associated with a use in Section 2 of Clause 35.07-1. This does not apply to:
  - An alteration or extension to an existing dwelling provided the floor area of the alteration or extension is not more than the area specified in a schedule to this zone or, if no area is specified, 100 square metres. Any area specified must be more than 100 square metres.
- An out-building associated with an existing dwelling provided the floor area of the out-building is not more than the area specified in a schedule to this zone or, if no area is specified, 100 square metres. Any area specified must be more than 100 square metres.

- An alteration or extension to an existing building used for agriculture provided the floor area of the alteration or extension is not more than the area specified in a schedule to this zone or, if no area is specified, 200 square metres. Any area specified must be more than 200 square metres. The building must not be used to keep, board, breed or train animals.

- A rainwater tank.

- Earthworks specified in a schedule to this zone, if on land specified in a schedule.

- A building which is within any of the following setbacks:
  - The setback from a Road Zone Category 1 or land in a Public Acquisition Overlay to be acquired for a road, Category 1 specified in a schedule to this zone or, if no setback is specified, 50 metres.
  - The setback from any other road or boundary specified in a schedule to this zone.
  - The setback from a dwelling not in the same ownership specified in a schedule to this zone.
  - 100 metres from a waterway, wetlands or designated flood plain.

- Permanent or fixed feeding infrastructure for seasonal or supplementary feeding for grazing animal production constructed within 100 metres of:
  - A waterway, wetland or designated flood plain.
  - A dwelling not in the same ownership.
  - A residential or urban growth zone.

VicSmart applications

Subject to Clause 71.06, an application under this clause for a development specified in Column 1 is a class of VicSmart application and must be assessed against the provision specified in Column 2.

<table>

</tr>
<tr>
<td>Any works must not be earthworks specified in the schedule to the zone.</td>
<td></td>
</tr>
</tbody>
</table>

Application requirements for dwellings

An application to use a lot for a dwelling must be accompanied by a written statement which explains how the proposed dwelling responds to the decision guidelines for dwellings in the zone.
Decision guidelines

Before deciding on an application to use or subdivide land, construct a building or construct or carry out works, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

General issues

- Any Regional Catchment Strategy and associated plan applying to the land.
- The capability of the land to accommodate the proposed use or development, including the disposal of effluent.
- How the use or development relates to sustainable land management.
- Whether the site is suitable for the use or development and whether the proposal is compatible with adjoining and nearby land uses.
- How the use and development makes use of existing infrastructure and services.

Agricultural issues and the impacts from non-agricultural uses

- Whether the use or development will support and enhance agricultural production.
- Whether the use or development will adversely affect soil quality or permanently remove land from agricultural production.
- The potential for the use or development to limit the operation and expansion of adjoining and nearby agricultural uses.
- The capacity of the site to sustain the agricultural use.
- The agricultural qualities of the land, such as soil quality, access to water and access to rural infrastructure.
- Any integrated land management plan prepared for the site.

Dwelling issues

- Whether the dwelling will result in the loss or fragmentation of productive agricultural land.
- Whether the dwelling will be adversely affected by agricultural activities on adjacent and nearby land due to dust, noise, odour, use of chemicals and farm machinery, traffic and hours of operation.
- Whether the dwelling will adversely affect the operation and expansion of adjoining and nearby agricultural uses.
- The potential for the proposal to lead to a concentration or proliferation of dwellings in the area and the impact of this on the use of the land for agriculture.

Environmental issues

- The impact of the proposal on the natural physical features and resources of the area, in particular on soil and water quality.
- The impact of the use or development on the flora and fauna on the site and its surrounds.
- The need to protect and enhance the biodiversity of the area, including the retention of vegetation and faunal habitat and the need to revegetate land including riparian buffers along waterways, gullies, ridgelines, property boundaries and saline discharge and recharge area.
- The location of on-site effluent disposal areas to minimise the impact of nutrient loads on waterways and native vegetation.
Design and siting issues

- The need to locate buildings in one area to avoid any adverse impacts on surrounding agricultural uses and to minimise the loss of productive agricultural land.
- The impact of the siting, design, height, bulk, colours and materials to be used, on the natural environment, major roads, vistas and water features and the measures to be undertaken to minimise any adverse impacts.
- The impact on the character and appearance of the area or features of architectural, historic or scientific significance or of natural scenic beauty or importance.
- The location and design of existing and proposed infrastructure including roads, gas, water, drainage, telecommunications and sewerage facilities.
- Whether the use and development will require traffic management measures.

Signs

Sign requirements are at Clause 52.05. This zone is in Category 4.

### Permit requirement

A permit is required to:

- Construct a building or construct or carry out works for any use in Section 2 of Clause 36.01-1.  
  This does not apply to navigational beacons and aids.
- Subdivide land.

### Application requirements

An application for a permit by a person other than the relevant public land manager must be accompanied by the written consent of the public land manager, indicating that the public land manager consents generally or conditionally either:

- To the application for permit being made.
To the application for permit being made and to the proposed use or development.

Decision guidelines

Before deciding on an application to use or subdivide land, construct a building or construct or carry out works, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

- The comments of any Minister or public land manager having responsibility for the care or management of the land or adjacent land.
- Whether the development is appropriately located and designed, including in accordance with any relevant use, design or siting guidelines.

Permit not required

A permit is not required to use land, or to construct a building or construct or carry out works on land, listed in a schedule to this zone, provided any condition in the schedule is complied with.

Signs

Sign requirements are at Clause 52.05. This zone, except for the PUZ4 (Transport), is in Category 4 unless a different requirement is specified in the schedule to this zone.

For land within the PUZ4 (Transport), the sign category which applies is the category which applies to the adjoining zone nearest to the land. If land is equidistant from two or more adjoining zones, the least restrictive category applies.

Where the Road Zone is the nearest adjoining zone, a permit is required to display a sign.

Use

Brothel
Cinema based entertainment facility
Corrective institution
Display home
Funeral parlour
Industry
Saleyard
Transport terminal (other than Heliport)
Veterinary centre
Warehouse (other than Store)

Permit requirement

A permit is required to:

- Construct a building or construct or carry out works. This does not apply to:
  - Pathways, trails, seating, picnic tables, drinking taps, shelters, barbeques, rubbish bins, security lighting, irrigation, drainage or underground infrastructure.
  - Playground equipment or sporting equipment, provided these facilities do not occupy more than 10 square metres of parkland.
  - Navigational beacons and aids.
  - Planting or landscaping.
  - Fencing that is 1 metre or less in height above ground level.
  - A building or works shown in an Incorporated plan which applies to the land.
  - A building or works carried out by or on behalf of a public land manager or Parks Victoria under the Local Government Act 1989, the Reference Areas Act 1978, the National Parks Act 1975, the Fisheries Act 1995, the Wildlife Act 1975, the Forest Act 1958, the Water Industry Act 1994, the Water Act 1989, the Marine Act 1988, the Port of Melbourne Authority Act 1958 or the Crown Land (Reserves) Act 1978.

- Subdivide land.

Application requirements

An application for a permit by a person other than the relevant public land manager must be accompanied by the written consent of the public land manager, indicating that the public land manager consents generally or conditionally either:

- To the application for permit being made.
- To the application for permit being made and to the proposed use or development.
**Exemption from notice and review**

An application to subdivide land which is consistent with an Incorporated plan is exempt from the notice requirements of section 52(1) (a), (b) and (d), the decision requirements of section 64(1), (2) and (3) and the review rights of Section 82(1) of the Act.

**Decision guidelines**

Before deciding on an application to use or subdivide land, construct a building or construct or carry out works, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

- The comments of any public land manager or other relevant land manager having responsibility for the care or management of the land or adjacent land.
- Whether the development is appropriately located and designed, including in accordance with any relevant use, design or siting guidelines.

**Incorporated plan**

An Incorporated plan is a plan which shows the way the land is to be used and developed. An Incorporated plan may include the following information:

- Recognition of existing use and how the area is to be developed.
- The building envelope of any proposed buildings.
- Details of any proposed buildings or works.
- The location of pedestrian or vehicle access points or car parking areas.
- The location of any areas for specific uses or a schedule of specific uses which are allowed without permit.
- Topographic details including any proposed cut and fill.
- The location of existing and proposed features.
- The location of existing native and other vegetation and any proposed landscaping works or areas of vegetation to be added or removed.
- The identification of sites of flora or fauna significance (including, in particular, any potentially threatened species or significant habitat) or other places of cultural heritage or scientific value.

The Incorporated plan must be consistent with the intent of the public land reservation under any Act and make reference to relevant policies and guidelines.

An Incorporated plan may be prepared in parts or stages.

**Use and development of land identified in a schedule**

Land identified in a schedule to this zone may be used and developed in accordance with the schedule or the specific controls contained in an incorporated document corresponding to the land, provided any condition in the schedule or incorporated document is complied with.

**Signs**

Sign requirements are at Clause 52.05. This zone is in Category 4 unless a different requirement is specified in the schedule to this zone.

**Permit requirement**

A permit is required to:

- Construct a building or construct or carry out works. This does not apply to:
  - A building or works shown in an Incorporated plan which applies to the land.
  - A building or works specified in Clause 62.02-1 or 62.02-2 carried out by or on behalf of a public authority or municipal council, if the public authority or municipal council is carrying out functions, powers or duties conferred by or under the Local Government Act 1989, the Reference Areas Act 1978, the National Parks Act 1975, the Fisheries Act 1995, the Wildlife Act 1975, the Forests Act 1958, the Water Industry Act 1994, the Water Act 1989, the Marine Act 1988, the Port of Melbourne Authority Act 1958 or the Crown Land (Reserves) Act 1978.
  - A building or works carried out by or on behalf of a public land manager or Parks Victoria under the Local Government Act 1989, the Reference Areas Act 1978, the National Parks Act 1975, the Fisheries Act 1995, the Wildlife Act 1975, the Forests Act 1958, the Water Industry Act 1994, the Water Act 1989, the Marine Act 1988, the Port of Melbourne Authority Act 1958, the Crown Land (Reserves) Act 1978, or the Road Management Act 2004.
- Subdivide land.

**Application requirements**

An application for a permit by a person other than the relevant public land manager must be accompanied by the written consent of the public land manager, indicating that the public land manager consents generally or conditionally either:

- To the application for permit being made.
- To the application for permit being made and to the proposed use or development.
Where there is no public land manager, an application for a permit must be accompanied by the written consent of the Secretary to the Department of Environment, Land, Water and Planning.

**Exemption from notice and review**

An application to subdivide land which is consistent with an Incorporated plan is exempt from the notice requirements of section 52(1) (a), (b), and (d), the decision requirements of sections 64(1), (2) and (3) and the review rights of section 82(1) of the Act.

**Referral of applications**

An application to use or develop land for the purpose of an emergency services facility must be referred under Section 55 of the Act to the person or body specified as the referral authority in Clause 66.03.

**Decision guidelines**

Before deciding on an application to use or subdivide land, construct a building or construct or carry out works, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

- The comments of any public land manager or other relevant land manager having responsibility for the care or management of the land or adjacent land.
- Whether the development is appropriately located and designed, including in accordance with any relevant use, design or siting guidelines.

**Incorporated plan**

An Incorporated plan is a plan which shows the way the land is to be used and developed. An Incorporated plan may include the following information:

- Recognition of existing use and how the area is to be developed.
- The building envelope of any proposed buildings.
- Details of proposed buildings or works.
- The location of pedestrian or vehicle access points or car parking areas.
- The location of any areas for specific uses and a schedule of specific uses which are allowed without permit.
- Topographic details including any proposed cut and fill.
- The location of existing and proposed features.
- The location of existing native or other vegetation and any proposed landscaping works or areas of vegetation to be added or removed.
- The identification of sites of flora or fauna significance (including, in particular, any potentially threatened species or significant habitat) or other places of cultural, heritage or scientific value.

The Incorporated plan must be consistent with the intent of the public land reservation under any Act and make reference to relevant policies and guidelines.

An Incorporated plan may be prepared in parts or stages.
Use and development of land identified in a schedule

Land identified in a schedule to this zone may be used and developed in accordance with the schedule or the specific controls contained in an incorporated document corresponding to the land, provided any condition in the schedule or incorporated document is complied with.

Signs

Sign requirements are at Clause 52.05. This zone is in Category 4 unless a different requirement is specified in the schedule to this zone.

<td></td>
</tr>
</tbody>
</table>

### Permit requirement

A permit is required to:

- Construct a building or construct or carry out works for a use in Section 2 of Clause 36.04-1.
- Subdivide land.

### Decision guidelines

Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider:

- The views of the relevant road authority.
- The effect of the proposal on the operation of the road and on public safety.
Signs

Sign requirements are at Clause 52.05. A permit is required to display a sign over the road formation or over land within 600 millimetres of the road formation. For other land in this zone, the category of advertising control which applies is the category which applies to the adjoining zone nearest to the land. If land is equidistant from two or more adjoining zones, the least restrictive category applies.

Where the Public Use Zone 4 is the nearest adjoining zone, a permit is required to display a sign.
SPECIAL USE ZONE

Shown on the planning scheme map as SUZ with a number.

Purpose

To implement the Municipal Planning Strategy and the Planning Policy Framework.

To recognise or provide for the use and development of land for specific purposes as identified in a schedule to this zone.

Table of uses

</tbody>
</table>

Use of land

Any requirement in the schedule to this zone must be met.

Application requirements

An application to use land must be accompanied by any information specified in the schedule to this zone.

Exemption from notice and review

The schedule to this zone may specify that an application is exempt from the notice requirements of Section 52(1)(a), (b) and (d), the decision requirements of Section 64(1), (2) and (3) and the review rights of Section 82(1) of the Act.

Decision guidelines

Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

- Any guidelines in the schedule to this zone.
Subdivision

Permit requirement

A permit is required to subdivide land.
Any requirement in the schedule to this zone must be met.

VicSmart applications

Subject to Clause 71.06, an application under this clause for a development specified in Column 1 is a class of VicSmart application and must be assessed against the provision specified in Column 2.

<table>
<thead>

</tr>
<tr>
<td>- Has been approved under this scheme or by a permit issued under this scheme and the permit has not expired.</td>
<td></td>
</tr>
<tr>
<td>- Has started lawfully.</td>
<td></td>
</tr>
<tr>
<td>- The subdivision does not create a vacant lot.</td>
<td></td>
</tr>
</tbody>
</table>

Application requirements

An application to subdivide land must be accompanied by any information specified in the schedule to this zone.

Exemption from notice and review

The schedule to this zone may specify that an application is exempt from the notice requirements of section 52(1)(a), (b) and (d), the decision requirements of section 64(1), (2) and (3) and the review rights of section 82(1) of the Act.

Decision guidelines

Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

- Any guidelines in the schedule to this zone.
Buildings and works

Permit requirement
A permit is required to construct a building or construct or carry out works unless the schedule to this zone specifies otherwise.
Any requirement in the schedule to this zone must be met.
An apartment development must meet the requirements of Clause 58.

VicSmart applications
Subject to Clause 71.06, an application under this clause for a development specified in Column 1 is a class of VicSmart application and must be assessed against the provision specified in Column 2.

<table>
<thead>
<tr>

<td></td>
</tr>
<tr>
<td>- Used for a purpose listed in the table to Clause 53.10.</td>
<td></td>
</tr>
</tbody>
</table>

Transitional provisions
Clause 58 does not apply to:
- An application for a planning permit lodged before the approval date of Amendment VC136.
- An application for an amendment of a permit under section 72 of the Act, if the original permit application was lodged before the approval date of Amendment VC136.

Application requirements
An application to construct a building or construct or carry out works must be accompanied by any information specified in the schedule to this zone.
An application to construct or extend an apartment development, or to construct or extend a dwelling in or forming part of an apartment development, must be accompanied by an urban context report and design response as required in Clause 58.01.

Exemption from notice and review
The schedule to this zone may specify that an application is exempt from the notice requirements of section 52(1)(a), (b) and (d), the decision requirements of section 64(1), (2) and (3) and the review rights of section 82(1) of the Act.

Decision guidelines
Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:
- For an apartment development, the objectives, standards and decision guidelines of Clause 58.
- Any guidelines in the schedule to this zone.
Signs

Sign requirements are at Clause 52.05. This zone is in Category 3 unless a schedule to this zone specifies a different category.
SCHEDULE 1 TO THE SPECIAL USE ZONE

Shown on the planning scheme map as SUZ1.

ABATTOIR

Purpose
To provide for the ongoing use of the land for the purposes of an abattoir.

</tbody>
</table>

Use of land

Any development of the land must be related to the operation of the Swan Hill Clay Target Club.

Subdivision

Before deciding on an application to subdivide the land, the responsible authority must consider all relevant matters, as well as the following specific matters:
- Subdivision that excises the land occupied by the Swan Hill Clay Target Club from the Lower Murray Water Wastewater Treatment Facility is to be encouraged. This excision of land must create a land area of at least 28.5 hectares and accommodate all of the Club facilities, including the fall out range.

- Subdivision that results in the fragmentation of the Club facilities will be discouraged.

A subdivision that excises the Club facilities from the Lower Murray Water Wastewater Treatment Facility is exempt from the notice requirements of Section 52(1)(a), (b) and (d), the decision requirements of Section 64(1), (2) and (3) and the review rights of Section 82(1) of the Act.

**Buildings and works**

No permit is required for the construction of buildings or works associated with the operation of the Swan Hill Clay Target Club and consistent with the purpose of this zone.
SCHEDULE 3 TO THE SPECIAL USE ZONE

Shown on the planning scheme map as SUZ3

EDUCATION CENTRE AND ACCOMODATION FACILITY

Purpose
To provide for the use of the land for the establishment and growth of an education centre and accommodation.

Use

Accommodation (other than Camping and caravan park, Group accommodation, Dwelling and Dependent person’s unit)

Industry

Retail premises

Any use not in Section 1 or 2

Use of land

Any use and development of the land must be related to the use of the land as an education centre and accommodation.

Subdivision

Each lot created must be at least 20 hectares.

Buildings and works

No permit is required for the construction of buildings or works associated with any Section 1 use of land in the table to this schedule that is operated as an education centre and accommodation provided:

- No buildings are proposed between the Murray Valley Highway and the main entrance building/reception building.
- No buildings are located closer than 15 metres to the side and rear boundaries.

Advertising signs

No permit is required for an advertising sign that re-uses the existing pole sign that describes the activities carried out on the land.
SCHEDULE 4 TO THE SPECIAL USE ZONE

Shown on the planning scheme map as SUZ4.

TWO BAYS ROADHOUSE AND CARAVAN PARK, NYAH

To provide for the use of the land for a camping and caravan park, service station and convenience restaurant.

Table of uses

</tbody>
</table>

Subdivision

A permit is required to subdivide land
An application to subdivide the caravan park from the service station facility must include plans showing access to and from the caravan park component via the Nyah-West Road.

**Buildings and works**

**Application Requirement**

A planning application for the extension and alteration of the camping and caravan park must be accompanied by:

- a site plan that indicates the number and location of sites,
- common facilities including amenities and recreation areas,
- address the integration of the extension with the existing facility, and
- a landscape plan that indicates location and type of plants.

**Decision Guidelines**

Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

- the need for the facilities including the role of the camping and caravan park in providing accommodation to the itinerant workers for the horticultural industry,
- vehicular access to the caravan park from the existing vehicle access point at the Murray Valley Highway
SCHEDULE 5 TO THE SPECIAL USE ZONE

Shown on the planning scheme map as SUZ5

JACK CHISHOLM RESERVE MOTOR SPORTS FACILITY

Purpose

To provide for the use and development of the land as a Motor racing track including associated recreation and entertainment activities.

To encourage the development of a range of motor sports facilities that is consistent with an approved development plan.

To retain and enhance the economic benefit brought to Swan Hill, the municipality and the region by motor sports and allied activities.

### Use of land

#### Application requirements

An application that is not consistent with the approved development plan for the land must be accompanied by a written statement as to how the use contributes to and supports the overall operation of the motor sports facility.

### Subdivision

#### Exemption from notice and review

An application for subdivision is exempt from the notice requirements of Section 52(1)(a), (b) and (d), the decision requirements of Section 64(1), (2) and (3) and the review rights of Section 82(1) of the Act.

### Buildings and works

#### Permit requirement

A permit is not required to construct a building or construct or carry out works that is generally in accordance with an approved development plan for the land.
A permit must not be granted to construct a building or construct or carry out works until a development plan has been approved to the satisfaction of the responsible authority.

A permit may be granted to construct a building or construct or carry out works associated with existing facilities prior to a development plan being approved.

The development plan may consist of plans or other documents and may, with the agreement of the responsible authority, be prepared and implemented in stages.

The development plan must describe:

- The land to which the plan applies.
- The proposed use and development of each part of the land, including the location of new facilities such as the drag strip, skid pan, formalised and centralised car parking, toilet facilities, food premises and viewing areas.
- Any proposed design features or noise attenuation measures to minimise amenity impacts on nearby dwellings.
- Details of proposed landscaping, including the retention of existing vegetation and the provision of a landscape buffer around the perimeter of the land.

The development plan may be amended to the satisfaction of the responsible authority.

**Exemption from notice and review**

An application to construct a building or construct or carry out works is exempt from the notice requirements of Section 52(1)(a), (b) and (d), the decision requirements of Section 64(1), (2) and (3) and the review rights of Section 82(1) of the Act.

**Advertising signs**

Advertising sign requirements are at Clause 52.05. The land affected by this schedule is in Category 4.
OVERLAYS

This section sets out the overlays which apply in this scheme.
**ENVIRONMENTAL SIGNIFICANCE OVERLAY**

Shown on the planning scheme map as **ESO** with a number.

**Purpose**

To implement the Municipal Planning Strategy and the Planning Policy Framework.

To identify areas where the development of land may be affected by environmental constraints.

To ensure that development is compatible with identified environmental values.

**Environmental significance and objectives**

A schedule to this overlay must contain:

- A statement of environmental significance.
- The environmental objectives to be achieved.

**Permit requirement**

A permit is required to:

- Construct a building or construct or carry out works. This does not apply if a schedule to this overlay specifically states that a permit is not required.
- Construct a fence if specified in a schedule to this overlay.
- Construct bicycle pathways and trails.
- Subdivide land. This does not apply if a schedule to this overlay specifically states that a permit is not required.
- Remove, destroy or lop any vegetation, including dead vegetation. This does not apply:
  - If a schedule to this overlay specifically states that a permit is not required.
  - If the table to Clause 42.01-3 specifically states that a permit is not required.
  - To the removal, destruction or lopping of native vegetation in accordance with a native vegetation precinct plan specified in the schedule to Clause 52.16.

**VicSmart applications**

Subject to Clause 71.06, an application under this clause for a development specified in Column 1 is a class of VicSmart application and must be assessed against the provision specified in Column 2.

<table>
<thead>
<tr>
<th>Class of application</th>
<th>Information requirements and decision guidelines</th>
</tr>
</thead>
<tbody>
<tr>
<td>Subdivide land to realign the common boundary between 2 lots where:</td>
<td>Clause 59.01</td>
</tr>
<tr>
<td>- The area of either lot is reduced by less than 15 percent.</td>
<td></td>
</tr>
<tr>
<td>- The general direction of the common boundary does not change.</td>
<td></td>
</tr>
<tr>
<td>Subdivide land into lots each containing an existing building or car parking space where:</td>
<td>Clause 59.02</td>
</tr>
<tr>
<td>- The buildings or car parking spaces have been constructed in accordance with the provisions of this scheme or a permit issued under this scheme.</td>
<td></td>
</tr>
</tbody>
</table>
### Class of application

<table>
<thead>
<tr>
<th>Information requirements and decision guidelines</th>
</tr>
</thead>
<tbody>
<tr>
<td>An occupancy permit or a certificate of final inspection has been issued under the Building Regulations in relation to the buildings within 5 years prior to the application for a permit for subdivision.</td>
</tr>
</tbody>
</table>

### Subdivide land into 2 lots if:

- The construction of a building or the construction or carrying out of works on the land:
  - Has been approved under this scheme or by a permit issued under this scheme and the permit has not expired.
  - Has started lawfully.
- The subdivision does not create a vacant lot.

### Construct a fence.

Clause 59.05

### Remove, destroy or lop one tree.

Clause 59.06

### Construct a building or construct or carry out works for:

- A carport, garage, pergola, verandah, deck, shed or similar structure.
- A rainwater tank.

The buildings and works must be associated with a dwelling.

---

### Table of exemptions

<table>
<thead>
<tr>
<th>The requirement to obtain a permit does not apply to:</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Emergency works</strong></td>
</tr>
<tr>
<td><strong>Fire protection</strong></td>
</tr>
</tbody>
</table>

#### Emergency works

- in an emergency by, or on behalf of, a public authority or municipal council to create an emergency access or to enable emergency works; or
- where it presents an immediate risk of personal injury or damage to property. Only that part of the vegetation that presents the immediate risk may be removed, destroyed or lopped under this exemption.

#### Fire protection

- fire fighting;
- planned burning;
- making or maintenance of a fuelbreak or fire fighting access track (or any combination thereof) that does not exceed a combined width of 6 metres;
- making of a strategic fuelbreak up to 40 metres wide by, or on behalf of, a public authority in accordance with a strategic fuelbreak plan approved by the Secretary to the Department of Environment, Land, Water and Planning (as constituted under Part 2 of the Conservation, Forests and Lands Act 1987);
- is ground fuel within 30 metres of a building and is vegetation other than native vegetation;
- in accordance with a fire prevention notice issued under either:
  - Section 65 of the Forests Act 1958; or
  - Section 41 of the Country Fire Authority Act 1958.
### The requirement to obtain a permit does not apply to:

- keeping vegetation clear of, or minimising the risk of bushfire ignition from, an electric line in accordance with a code of practice prepared under Part 8 of the *Electricity Safety Act 1998*;
- minimising the risk to life and property from bushfire on a roadside of a public road managed by the relevant responsible road authority, and carried out by, or on behalf of that authority in accordance with the written agreement of the Secretary to the Department of Environment, Land, Water and Planning (as constituted under Part 2 of the *Conservation, Forests and Lands Act 1987*). In this exemption, roadside, public road and responsible road authority have the same meanings as in section 3 of the *Road Management Act 2004*.

*Note: Additional permit exemptions for bushfire protection are provided at Clause 52.12.*

<table>
<thead>
<tr>
<th>Geothermal energy exploration and extraction</th>
<th>Vegetation that is to be removed, destroyed or lopped to the minimum extent necessary in accordance with an operation plan approved under the <em>Geothermal Energy Resources Act 2005</em>.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Greenhouse gas sequestration and exploration</td>
<td>Vegetation that is to be removed, destroyed or lopped to the minimum extent necessary in accordance with an operation plan approved under the <em>Greenhouse Gas Geological Sequestration Act 2008</em>.</td>
</tr>
<tr>
<td>Land management or directions notice</td>
<td>Vegetation that is to be removed, destroyed or lopped to the minimum extent necessary to comply with a land management notice or directions notice served under the <em>Catchment and Land Protection Act 1994</em>.</td>

<tr>
<td>Land use conditions</td>
<td>Vegetation that is to be removed, destroyed or lopped to the minimum extent necessary to comply with a land use condition served under the <em>Catchment and Land Protection Act 1994</em>.</td>
</tr>
</tbody>
</table>
| Mineral exploration and extraction        | Vegetation that is to be removed, destroyed or lopped to the minimum extent necessary by the holder of an exploration, mining, prospecting, or retention licence issued under the *Mineral Resources (Sustainable Development) Act 1990*:
- that is low impact exploration within the meaning of Schedule 4A of the *Mineral Resources (Sustainable Development) Act 1990*; or
- in accordance with a work plan approved under Part 3 of the *Mineral Resources (Sustainable Development) Act 1990*.  
*Note: Schedule 4A of the Mineral Resources (Sustainable Development) Act 1990 specifies limits on the extent of native vegetation that may be removed as part of low impact exploration.* |
| Noxious weeds                             | Vegetation that is a noxious weed subject of a declaration under section 58 or section 58A of the *Catchment and Land Protection Act 1994*. This exemption does not apply to Australian Dodder (*Cuscuta australis*). |
| Pest animal burrows                       | Vegetation that is to be removed, destroyed or lopped to the minimum extent necessary to enable the removal of pest animal burrows.  
In the case of native vegetation the written agreement of an officer of the department responsible for administering the *Flora and Fauna Guarantee Act 1988* is required before the vegetation can be removed, destroyed or lopped. |
| Planted vegetation                        | Vegetation that is to be removed, destroyed or lopped that was either planted or grown as a result of direct seeding for Crop raising or Grazing animal production. |
| Railways                                  | Vegetation that is to be removed, destroyed or lopped to the minimum extent necessary to maintain the safe and efficient function of an existing railway, or railway access road, in accordance with the written agreement of the Secretary to the Department of Environment, Land, Water and Planning (as constituted under Part 2 of the *Conservation, Forests and Lands Act 1987*). |
| Regrowth                                  | Vegetation that is to be removed, destroyed or lopped that has naturally established or regenerated on land lawfully cleared of naturally established vegetation, and is:
- bracken (*Pteridium esculentum*); or
- within the boundary of a timber production plantation, as indicated on a Plantation Development Notice or other documented record, and has established after the plantation. |
## The requirement to obtain a permit does not apply to:

| **Road safety** | Vegetation that is to be removed, destroyed or lopped to the minimum extent necessary by or on behalf of a public authority or municipal council to maintain the safe and efficient function of an existing public road in accordance with the written agreement of the Secretary to the Department of Environment, Land, Water and Planning (as constituted under Part 2 of the Conservation, Forests and Lands Act 1987). |
| **Stone exploration** | Vegetation that is to be removed, destroyed or lopped to the minimum extent necessary to enable the carrying out of Stone exploration. The maximum extent of vegetation removed, destroyed or lopped under this exemption on contiguous land in the same ownership in a five year period must not exceed any of the following:  
- 1 hectare of vegetation which does not include a tree.  
- 15 trees with a trunk diameter of less than 40 centimetres at a height of 1.3 metres above ground level.  
- 5 trees with a trunk diameter of 40 centimetres or more at a height of 1.3 metres above ground level.  
This exemption does not apply to costeaneing and bulk sampling activities. |
| **Stone extraction** | Vegetation that is to be removed, destroyed or lopped to the minimum extent necessary to enable the carrying out of Stone extraction in accordance with a work plan approved under the Mineral Resources (Sustainable Development) Act 1990 and authorised by a work authority granted under that Act. |
| **Surveying** | Vegetation that is to be removed, destroyed or lopped to the minimum extent necessary by, or on behalf of, a licenced surveyor (within the meaning of section 3 of the Surveying Act 2004) using hand-held tools to establish a sightline for the measurement of land. |
| **Traditional owners** | Vegetation that is to be removed, destroyed or lopped by a person acting under, and in accordance with:  
- a natural resources agreement under Part 6 of the Traditional Owners Settlement Act 2010; or  
- an authorisation order made under sections 82 or 84 of the Traditional Owner Settlement Act 2010 as those sections were in force immediately before the commencement of section 24 of the Traditional owners Settlement Amendment Act in 2016 (1 May 2017). |

### Application requirements

An application must be accompanied by any information specified in a schedule to this overlay.

### Decision guidelines

Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

- The statement of environmental significance and the environmental objective contained in a schedule to this overlay.
- The need to remove, destroy or lop vegetation to create a defendable space to reduce the risk of bushfire to life and property.
- Any other matters specified in a schedule to this overlay.
SCHEDULE 1 TO THE ENVIRONMENTAL SIGNIFICANCE OVERLAY

Shown on the planning scheme map as ESO1.

WATERWAY, WETLANDS AND LAKES ENVIRONS

Statement of environmental significance

The Murray River has local, regional, state, national and international significance. The river and environs are an important water supply, tourism, recreational, landscape, cultural and environmental asset. It is essential that the Murray River and its environs be maintained and enhanced as a major resource for these assets. All waterways in the municipality form a vital part of the Murray Darling Basin.

The intensity of development on riparian and riverfront land can result in increased flood hazards, conflicts among recreational uses, loss of riparian vegetation and wildlife habitat, loss of visual amenity and a decline in water quality. Leveebanking, stream modification and construction of water storages for irrigation and domestic water supply has altered flow levels and flooding regimes.

Lakes and wetlands systems are integral to the maintenance of natural, cultural and catchment values associated with major rivers in the municipality and the riparian environments of the Murray River. The lakes and wetlands system in Swan Hill Rural City has outstanding ecological, catchment and recreational values.

Water quality is critical to the riparian environment of waterways and water bodies. Water quality is also vital for other values and uses, such as recreation, tourism, visual landscape, urban water supply, stock and domestic water supply, and irrigation usage.

Environmental objective to be achieved

- To protect and enhance the natural environment and cultural heritage qualities of the Murray River and its anabranches as a major waterway of local, regional, state, national and international significance
- To maintain the quality and availability of water within waterways and water bodies
- To ensure that any use, development or works in the environs of waterways, wetlands and lakes are of a scale, character and form that is compatible with the high environment quality of these systems
- To promote tourist and recreational activities in the vicinity of watercourses, wetlands and lakes subject to the design, siting and landscaping of development to protect the values of these environments
- To protect and enhance the biodiversity, ecological, and cultural values of waterway, wetland and lake environments
- To protect the visual and environmental qualities of waterways, wetlands and lakes, restricting the use and development of land in these areas to maintain these qualities
- To maintain the ability of waterways to carry natural flows
- To prevent the erosion and siltation of waterways and adjoining land
- To provide for the use and development of land adjacent to Lake Boga for tourist and recreational purposes, while protecting the natural beauty and amenity of the area

Permit requirement

A permit is not required for:
- Any building or works located more than 100 metres from Murray River and 60 metres from any other waterway, wetland or lake.
- Any effluent disposal system or line located more than 60 metres from a waterway, wetland, lake or water supply channel in any unsewered area.

- Repairs and routine maintenance to existing buildings and works.

- Alterations or additions to an existing dwelling or building, provided any addition is not located any closer to the waterway, wetland or lake than the existing dwelling or building and that the size of the existing dwelling or building is not increased by more than 100 percent of its existing size.

- Works undertaken by Swan Hill Rural City, a government department or a public authority for municipal purposes, stream improvement, drainage, channel repairs, flooding regulation, erosion control, water supply, sewerage supply, telecommunications or minor utility installation.

- Buildings or works associated with a minor utility installation, low impact telecommunications facility or passive recreation.

- A fence.

- Buildings and works to the minimum extent necessary for actions undertaken by or on behalf of the Roads Corporation in the construction of the Swan Hill Bridge replacement project and associated works.

- Removal, destruction or lopping of any vegetation, including dead vegetation to the minimum extent necessary for actions undertaken by or on behalf of the Roads Corporation in the construction of the Swan Hill Bridge replacement project and associated works.

### Referral of permit applications

Any application of the kind listed below must be referred in accordance with Section 55 of the Act to the referral authority specified in Clause 66.04 or a schedule to that clause:

An application for development and/or works within:

- 30 metres of a Goulburn Water channel or drain, Goulburn Murray Water land or infrastructure asset.

- 60 metres of a lake or waterway.

- 100 metres of the Murray River.

- 50 metres of any public land managed by the Department of Sustainability and Environment.

An application for subdivision creating lots less than 40 hectares.

An application for development associated with Intensive animal husbandry.

### Decision guidelines

Before deciding on an application, the responsible authority must consider, as appropriate:

**Murray River:**

- Whether the proposed development has a demonstrated, essential relationship with the Murray River and the location of development is set back as far as possible from the bank of the Murray River.

- The need for development adjoining the main channel of the Murray River to be for public purposes.

**All waterways, wetlands and lakes:**

- The existing use and development of the land and the reason for development to support that use.

- Impact on and protection of:
- water quality, including reduction of pollution from salts and nutrients
- environmental and biodiversity values of land and water
- erosion and siltation
- ability to maintain natural flows and water levels
- salinity risk
- landscape and visual quality
- recreational and tourism values.

- Maintenance of existing remnant vegetation, and the desirability of protecting this vegetation by excluding stock to enhance environmental values.
- The need to stabilise and revegetate waterway, wetland and lake environs with indigenous species.
- The need to avoid the obstruction of any waterway, wetland or lake and keeping disturbance to any waterway or riparian environment to a minimum.
- The need to avoid the alienation of any waterway, wetland or lake for private purposes and measures to increase public access to them.
- Potential impact on surrounding land uses, including measures to reduce any adverse effects on this land, including landscaping and provision of vegetation buffers.
- The desirability of achieving as large setbacks as possible for development and works from waterways, wetlands and lakes, with a preferred minimum setback of 50 metres.
- The effectiveness of proposed wastewater disposal systems, based on assessment in accordance with the Environment Protection Authority guideline *Land capability assessment for onsite domestic wastewater management*, the *Septic Tank Code of Practice*, Environment Protection Authority, and the *State Environment Protection Policy (Waters of Victoria)*.
- Relevant reference documents listed in clause 21.05.
SCHEDULE 2 TO THE ENVIRONMENTAL SIGNIFICANCE OVERLAY

Shown on the planning scheme map as ESO2.

AREAS OF POOR DRAINAGE OR POTENTIALLY SUBJECT TO INUNDATION

1.0

Statement of environmental significance

Flooding is a major issue for Swan Hill municipality. Existing floodplain management studies need to be implemented through the Planning Scheme.

This schedule will assist in the implementation of floodplain management studies and support strategic policies in the Municipal Strategic Statement and the Flooding Local Policy.

2.0

Environmental objective to be achieved

To identify land in urban and non-urban areas that are potentially liable to inundation by overland flow or sheet flooding due to the soil structure and the likelihood of poor drainage.

To ensure that any development maintains the free passage and temporary storage of floodwaters, minimises flood damage, is compatible with the flood hazard and local drainage conditions and will not cause any significant rise in flood level or flow velocity.

To protect water quality in accordance with the provisions of relevant State Environment Protection Policies, and particularly in accordance with Clauses 33 and 35 of the State Environment Protection Policy (Waters of Victoria).

3.0

Permit requirement

A permit is not required to construct or carry out:

- Repairs and routine maintenance to existing buildings and works.
- Works undertaken by a public authority to:
  - Regulate the flow of water in a watercourse.
  - Regulate flooding.
  - Construct or redirect a watercourse.

4.0

Decision guidelines

Before deciding on an application, the responsible authority must consider, as appropriate:

- The potential for flooding to occur and the effect that flooding may have on the development.
- The effect of the development on the capacity of the land to store and absorb stormwater and flood water.
- The possible effect of the development on the quality and quantity of stormwater and floodwater.
- The effect of any development on flood control and stormwater disposal measures and the flow of floodwater and stormwater.
- Any comments of the relevant Catchment Management Authority, Water Authority and the Department of Sustainability and Environment.
VEGETATION PROTECTION OVERLAY

Shown on the planning scheme map as VPO with a number.

Purpose

To implement the Municipal Planning Strategy and the Planning Policy Framework.
To protect areas of significant vegetation.
To ensure that development minimises loss of vegetation.
To preserve existing trees and other vegetation.
To recognise vegetation protection areas as locations of special significance, natural beauty, interest and importance.
To maintain and enhance habitat and habitat corridors for indigenous fauna.
To encourage the regeneration of native vegetation.

Vegetation significance and objectives

A schedule to this overlay must contain:

- A statement of the nature and significance of the vegetation to be protected.
- The vegetation protection objectives to be achieved.

Permit requirement

A permit is required to remove, destroy or lop any vegetation specified in a schedule to this overlay.

This does not apply:

- If the table to Clause 42.02-3 specifically states that a permit is not required.
- To the removal, destruction or lopping of native vegetation in accordance with a native vegetation precinct plan specified in the schedule to Clause 52.16.

VicSmart applications

Subject to Clause 71.06, an application under this clause for a development specified in Column 1 is a class of VicSmart application and must be assessed against the provision specified in Column 2.

<table>
<thead>
<tr>
<th>Class of application</th>
<th>Information requirements and decision guidelines</th>
</tr>
</thead>
<tbody>
<tr>
<td>Remove, destroy or lop one tree.</td>
<td>Clause 59.06</td>
</tr>
</tbody>
</table>

Table of exemptions

The requirement to obtain a permit does not apply to:

<table>
<thead>
<tr>
<th>Emergency works</th>
<th>Vegetation that is to be removed, destroyed or lopped:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>- in an emergency by, or on behalf of, a public authority or municipal council to create an emergency access or to enable emergency works; or</td>
</tr>
<tr>
<td></td>
<td>- where it presents an immediate risk of personal injury or damage to property. Only that part of the vegetation that presents the immediate risk may be removed, destroyed or lopped under this exemption.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Fire protection</th>
<th>Vegetation that is to be removed, destroyed or lopped to the minimum extent necessary to enable the carrying out of any of the following fire protection activities:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>- fire fighting;</td>
</tr>
</tbody>
</table>
The requirement to obtain a permit does not apply to:

- planned burning;
- making or maintenance of a fuelbreak or fire fighting access track (or any combination thereof) that does not exceed a combined width of 6 metres;
- making a strategic fuelbreak up to 40 metres wide by, or on behalf of, a public authority in accordance with a strategic fuelbreak plan approved by the Secretary to the Department of Environment, Land, Water and Planning (as constituted under Part 2 of the Conservation, Forests and Lands Act 1987);
- is ground fuel within 30 metres of a building and is vegetation other than native vegetation;
- in accordance with a fire prevention notice issued under either:
  - Section 65 of the Forests Act 1958; or
  - Section 41 of the Country Fire Authority Act 1958.
- keeping vegetation clear of, or minimising risk of bushfire ignition from, an electric line in accordance with a code of practice prepared under Part 8 of the Electricity Safety Act 1998;
- minimising the risk to life and property from bushfire on a roadside of a public road managed by the relevant responsible road authority, and carried out by, or on behalf of that authority in accordance with the written agreement of the Secretary to the Department of Environment, Land, Water and Planning (as constituted under Part 2 of the Conservation, Forests and Lands Act 1987). In this exemption, roadside, public road and responsible road authority have the same meanings as in section 3 of the Road Management Act 2004.
- Vegetation that is to be removed, destroyed or lopped to the minimum extent necessary in accordance with an operation plan approved under the Geothermal Energy Resources Act 2005.
- Vegetation that is to be removed, destroyed or lopped to the minimum extent necessary in accordance with an operation plan approved under the Greenhouse Gas Geological Sequestration Act 2008.
- Vegetation that is to be removed, destroyed or lopped to the minimum extent necessary to comply with a land management notice or directions notice served under the Catchment and Land Protection Act 1994.
- Vegetation that is to be removed, destroyed or lopped to the minimum extent necessary to comply with a land use condition served under the Catchment and Land Protection Act 1994.
- Vegetation that is to be removed, destroyed or lopped to the minimum extent necessary by the holder of an exploration, mining, prospecting, or retention licence issued under the Mineral Resources (Sustainable Development) Act 1990:
  - that is low impact exploration within the meaning of Schedule 4A of the Mineral Resources (Sustainable Development) Act 1990; or
  - in accordance with a work plan approved under Part 3 of the Mineral Resources (Sustainable Development) Act 1990.
- Vegetation that is a noxious weed subject of a declaration under section 58 or section 58A of the Catchment and Land Protection Act 1994. This exemption does not apply to Australian Dodder (Cuscuta australis).
- Vegetation that is to be removed, destroyed or lopped to the minimum extent necessary to enable the removal of pest animal burrows.
  In the case of native vegetation the written agreement of an officer of the department responsible for administering the Flora and Fauna Guarantee Act 1988 is required before the vegetation can be removed, destroyed or lopped.
The requirement to obtain a permit does not apply to:

<table>
<thead>
<tr>
<th>Vegetation Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Planted vegetation</td>
<td>Vegetation that is to be removed, destroyed or lopped that was either planted or grown as a result of direct seeding for Crop raising or Grazing animal production.</td>
</tr>
<tr>
<td>Railways</td>
<td>Vegetation that is to be removed, destroyed or lopped to the minimum extent necessary to maintain the safe and efficient function of an existing railway, or railway access road, in accordance with the written agreement of the Secretary to the Department of Environment, Land, Water and Planning (as constituted under Part 2 of the Conservation, Forests and Lands Act 1987).</td>
</tr>
</tbody>
</table>
| Regrowth                | Vegetation that is to be removed, destroyed or lopped that has naturally established or regenerated on land lawfully cleared of naturally established vegetation, and is:  
  - bracken (*Pteridium esculentum*); or  
  - within the boundary of a timber production plantation, as indicated on a Plantation Development Notice or other documented record, and has established after the plantation.  
  This exemption does not apply to land on which vegetation has been destroyed or otherwise damaged as a result of flood, fire or other natural disaster. |
| Road safety             | Vegetation that is to be removed, destroyed or lopped to the minimum extent necessary by and on behalf of a public authority or municipal council to maintain the safe and efficient function of an existing public road in accordance with the written agreement of the Secretary to the Department of Environment, Land, Water and Planning (as constituted under Part 2 of the Conservation, Forests and Lands Act 1987). |
| Stone exploration       | Vegetation is to be removed, destroyed or lopped to the minimum extent necessary to enable the carrying out of Stone exploration.  
  The maximum extent of vegetation removed, destroyed or lopped under this exemption on contiguous land in the same ownership in a five year period must not exceed any of the following:  
  - 1 hectare of vegetation which does not include a tree.  
  - 15 trees with a trunk diameter of less than 40 centimetres at a height of 1.3 metres above ground level.  
  - 5 trees with a trunk diameter of 40 centimetres or more at a height of 1.3 metres above ground level.  
  This exemption does not apply to costeining and bulk sampling activities. |
| Stone extraction        | Vegetation that is to be removed, destroyed or lopped to the minimum extent necessary to enable the carrying out of Stone extraction in accordance with a work plan approved under the *Mineral Resources (Sustainable Development) Act 1990* and authorised by a work authority granted under that Act. |
| Surveying               | Vegetation that is to be removed, destroyed or lopped to the minimum extent necessary by, or on behalf of, a licenced surveyor (within the meaning of section 3 of the *Surveying Act 2004*) using hand-held tools to establish a sightline for the measurement of land. |
| Traditional owners      | Vegetation that is to be removed, destroyed or lopped by a person acting under, and in accordance with:  
  - a natural resources agreement under Part 6 of the *Traditional Owners Settlement Act 2010*; or  
  - an authorisation order made under sections 82 or 84 of the *Traditional Owner Settlement Act 2010* as those sections were in force immediately before the commencement of section 24 of the *Traditional owners Settlement Amendment Act* in 2016 (1 May 2017). |

**Application requirements**

An application must be accompanied by any information specified in a schedule to this overlay.

**Decision guidelines**

Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

The statement of the nature and significance of the vegetation to be protected and the vegetation protection objective contained in a schedule to this overlay.

The effect of the proposed use, building, works or subdivision on the nature and type of vegetation to be protected.

The role of native vegetation in conserving flora and fauna.

The need to retain native or other vegetation if it is rare, supports rare species of flora or fauna or forms part of a wildlife corridor.

The need to retain vegetation which prevents or limits adverse effects on ground water recharge.

The need to retain vegetation:
  - Where ground slopes exceed 20 percent.
  - Within 30 metres of a waterway or wetland.
  - On land where the soil or subsoil may become unstable if cleared.
  - On land subject to or which may contribute to soil erosion, slippage or salinisation.
  - In areas where the removal, destruction or lopping of vegetation could adversely affect the integrity or long term preservation of an identified site of scientific, nature conservation or cultural significance.
  - Which is of heritage or cultural significance.

The need to remove, destroy or lop vegetation to create a defendable space to reduce the risk of bushfire to life and property.

Any relevant permit to remove, destroy or lop vegetation in accordance with a land management plan or works program.

Whether the application includes a land management plan or works program.

Whether provision is made or is to be made to establish and maintain vegetation elsewhere on the land.

Any other matters specified in a schedule to this overlay.
SCHEDULE 1 TO THE VEGETATION PROTECTION OVERLAY

Shown on the planning scheme map as VPO1

REMNANT VEGETATION

1.0

Statement of nature and significance of vegetation to be protected

Remnant native vegetation has high conservation, landscape and recreation significance. There are large areas of native vegetation on public land and private land in Swan Hill Rural City, particularly along the river systems such as the Murray River. Retention of native vegetation is critical to catchment health and management, contributing significantly to water quality, salinity control, erosion control and biodiversity. Remnant vegetation usually has mature trees and trees with hollows, shrublands and grassland which are vital for fauna conservation and biodiversity.

Native vegetation coverage on private land has declined markedly since European settlement. Retention of remnant native vegetation on private land is critical to the biodiversity and environment of the municipality and region. This remnant vegetation provides critical biodiversity linkages between other remnant vegetation on both private and public land.

Sites of Victorian Rare or Threatened Species of Flora and Fauna have been identified and mapped in the municipality. A number of depleted and threatened vegetation communities exist within the Rural City of Swan Hill, including Pine buloke woodland, Belah woodland and various grassland communities. Remnant native vegetation is critical for the continued health and survival of threatened fauna species, such as the Regent Parrot, the Carpet Python and the Plains-Wanderer.

The Regent Parrot, *Polytelis anthopeplus monarchoides*, is vulnerable to extinction in both Victoria and Australia. In Victoria, breeding is restricted to the floodplain of the Murray River downstream of the Wakool Junction, and Outlet Creek downstream of Lake Hindmarsh. The Regent Parrot is listed on the Victorian *Flora and Fauna Guarantee Act* 1988 as threatened. The Regent Parrot is listed on the Federal *Environment Protection and Biodiversity Conservation Act* 1999 as vulnerable to extinction. Native vegetation including dead vegetation is significant habitat for Regent Parrot.

2.0

Vegetation protection objective to be achieved

- To protect remnant native vegetation and habitat, including understorey, and facilitate revegetation of native vegetation.
- To protect and enhance native habitat, particularly areas providing habitat or potential habitat for rare or threatened flora and fauna species.
- To encourage and maintain biodiversity and linkages between existing remnant vegetation.
- To recognise the catchment-wide land and water management benefits of native vegetation retention.
- To provide a ‘net gain’ principle for native vegetation in Swan Hill Rural City.
- To retain native vegetation in any land use or development proposal when there is an alternative to native vegetation removal.
- To protect and enhance native vegetation used by Regent Parrot for habitat.
- To implement the principles and environmental objectives of the *Victorian Native Vegetation Management: A Framework for Action* and *Victoria’s Biodiversity Strategy*.

3.0

Permit requirement

A permit is required to remove, destroy or lop any native vegetation, including any dead trees that are standing.

A permit is not required for:
Works undertaken by Swan Hill Rural City, a government department or a public authority for municipal purposes, stream improvement, drainage, channel repairs, flooding regulation, erosion control, water supply, sewerage supply, telecommunications or minor utility installation.

Any application to remove, destroy or lop any native vegetation must include:

A. A report that outlines and addresses:
   - A full description of the proposal, including an outline of why the native vegetation is proposed to be removed.
   - An assessment of the flora and fauna significance of the native vegetation.
   - All decision guidelines in this overlay and schedule.

B. Plans indicating:
   - Existing site and natural features.
   - Location of proposed native vegetation removal or destruction.

Notice of permit applications
Notice of application of the kind listed below must be given in accordance with Section 52(1)(c) of the Act to the person or body specified as a person or body to be notified in Clause 66.06 or a schedule to that clause:

- In an area of high or very high conservation value under the Victorian Native Vegetation Management: A Framework for Action, 2002.
- If the native vegetation is identified as threatened flora and habitat or providing habitat for threatened fauna under the Flora and Fauna Guarantee Act 1988.
- If the native vegetation is identified in a depleted, endangered or vulnerable ecological vegetation class identified in the Department of Sustainability and Environment ecological vegetation communities mapping.
- If the area of native vegetation to be removed is 4,000 square metres or greater.
- If the native vegetation is within 50 metres of any public land managed by the Department of Sustainability and Environment.
- If the native vegetation is within 100 metres of the Murray River.

Decision guidelines
Before deciding on an application, the responsible authority must consider, as appropriate:

- The purpose of native vegetation removal or destruction and the need to seek alternatives to native vegetation removal or destruction.
- The flora and fauna significance of native vegetation.
- Objectives and principles of relevant regional vegetation plans, regional catchment strategies, Victorian Native Vegetation Framework and Victoria’s Biodiversity Strategy.
- The impact on and need to conserve native vegetation in depleted, endangered or vulnerable ecological vegetation classes identified in the Department of Sustainability and Environment and Catchment Management Authority Ecological Vegetation Class (EVC) mapping.
- Retention of remnant native vegetation that is identified as threatened flora and habitat or providing habitat for threatened fauna under the Flora and Fauna Guarantee Act 1988.
- Measures to minimise the impact on remnant native vegetation, including dead and hollow-bearing trees.
- When native vegetation removal is being considered, the need for compensatory planting.
HERITAGE OVERLAY

Shown on the planning scheme map as **HO** with a number (if shown).

**Purpose**

To implement the Municipal Planning Strategy and the Planning Policy Framework.

To conserve and enhance heritage places of natural or cultural significance.

To conserve and enhance those elements which contribute to the significance of heritage places.

To ensure that development does not adversely affect the significance of heritage places.

To conserve specified heritage places by allowing a use that would otherwise be prohibited if this will demonstrably assist with the conservation of the significance of the heritage place.

**Scope**

The requirements of this overlay apply to heritage places specified in the schedule to this overlay. A heritage place includes both the listed heritage item and its associated land. Heritage places may also be shown on the planning scheme map.

**Permit requirement**

A permit is required to:

- Subdivide land.
- Demolish or remove a building.
- Construct a building or construct or carry out works, including:
  - Domestic services normal to a dwelling if the services are visible from a street (other than a lane) or public park.
  - A solar energy facility attached to a building that primarily services the land on which it is situated if the services are visible from a street (other than a lane) or public park.
  - A rainwater tank if the rainwater tank is visible from a street (other than a lane) or public park.
  - A fence, if the fence is visible from a street (other than a lane) or public park.
  - Roadworks which change the appearance of a heritage place or which are not generally undertaken to the same details, specifications and materials.
  - Street furniture other than:
    - traffic signals, traffic signs, fire hydrants, parking meters, post boxes and seating.
    - speed humps, pedestrian refuges and splitter islands.
  - A domestic swimming pool or spa and associated mechanical and safety equipment, if the swimming pool or spa and associated equipment are visible from a street (other than a lane) or public park.
  - A pergola or verandah, including an open-sided pergola or verandah to a dwelling with a finished floor level not more than 800mm above ground level and a maximum building height of 3 metres above ground level.
  - A deck, including a deck to a dwelling with a finished floor level not more than 800mm above ground level, if the deck is visible from a street (other than a lane) or public park.
  - Non-domestic disabled access, excluding a non-domestic disabled access ramp if the ramp is not visible from a street (other than a lane) or public park.
- An electric vehicle charging station if the charging station is visible from a street (other than a lane) or public park.

- Services normal to a building other than a dwelling, including chimneys, flues, skylights, heating and cooling systems, hot water systems, security systems and cameras, downpipes, window shading devices, or similar, if the works are visible from a street (other than a lane) or public park.

- Externally alter a building by structural work, rendering, sandblasting or in any other way.

- Construct or display a sign.

- Externally paint a building if the schedule to this overlay specifies the heritage place as one where external paint controls apply.

- Externally paint an unpainted surface.

- Externally paint a building if the painting constitutes an advertisement.

- Internally alter a building if the schedule to this overlay specifies the heritage place as one where internal alteration controls apply.

- Carry out works, repairs and routine maintenance which change the appearance of a heritage place or which are not undertaken to the same details, specifications and materials.

- Remove, destroy or lop a tree if the schedule to this overlay specifies the heritage place as one where tree controls apply. This does not apply:
  - To any action which is necessary to keep the whole or any part of a tree clear of an electric line provided the action is carried out in accordance with a code of practice prepared under Section 86 of the *Electricity Safety Act 1998*.
  - If the tree presents an immediate risk of personal injury or damage to property.

**VicSmart applications**

Subject to Clause 71.06, an application under this clause for a development specified in Column 1 is a class of VicSmart application and must be assessed against the provision specified in Column 2.

<table>
<thead>
<tr>
<th>Class of application</th>
<th>Information requirements and decision guidelines</th>
</tr>
</thead>
<tbody>
<tr>
<td>Subdivide land to realign the common boundary between 2 lots where the area of either lot is reduced by less than 15 percent and the general direction of the common boundary does not change.</td>
<td>Clause 59.07</td>
</tr>
<tr>
<td>Subdivide land into lots each containing an existing building or car parking space where:</td>
<td></td>
</tr>
<tr>
<td>- The buildings or car parking spaces have been constructed in accordance with the provisions of this scheme or a permit issued under this scheme.</td>
<td></td>
</tr>
<tr>
<td>- An occupancy permit or a certificate of final inspection has been issued under the Building Regulations in relation to the buildings within 5 years prior to the application for a permit for subdivision.</td>
<td></td>
</tr>
<tr>
<td>Subdivide land into 2 lots if:</td>
<td></td>
</tr>
<tr>
<td>- The construction of a building or the construction or carrying out of works on the land is approved under this scheme or by a permit issued under this scheme and the permit has not expired.</td>
<td></td>
</tr>
</tbody>
</table>
Class of application

- The construction or carrying out of the approved building or works on the land has started lawfully.
- The subdivision does not create a vacant lot.

- Demolish or remove an outbuilding (including a carport, garage, pergola, verandah, deck, shed or similar structure) unless the outbuilding is specified in the schedule to the Heritage Overlay.
- Demolish or remove a fence unless the fence is specified in the schedule to the Heritage Overlay.
- Externally alter a non-contributory building.
- External painting.
- Construct a fence.
- Construct a carport, garage, pergola, verandah, deck, shed or similar structure.
- Construct and install domestic services normal to a dwelling.
- Construct and install a non-domestic disabled access ramp.
- Construct a vehicle cross-over.
- Construct a domestic swimming pool or spa and associated mechanical equipment and safety fencing.
- Construct a rainwater tank.
- Construct or display a sign.
- Lop a tree.
- Construct or install a solar energy facility attached to a dwelling.
- Construct and install an electric vehicle charging station.
- Construct and install services normal to a building other than a dwelling, including chimneys, flues, skylights, heating and cooling systems, hot water systems, security systems and cameras, downpipes, window shading devices, or similar.

Places in the Victorian Heritage Register

A heritage place which is included in the Victorian Heritage Register is subject to the requirements of the Heritage Act 2017.

Permit requirement

A permit is required under this overlay to subdivide a heritage place which is included in the Victorian Heritage Register. This includes the subdivision or consolidation of land including any building or airspace.

Referral of applications

An application to subdivide a heritage place which is included in the Victorian Heritage Register must be referred to the relevant referral authority under Section 55 of the Act in accordance with Clause 66 of this scheme.
No permit required

No permit is required under this overlay:

- For anything done in accordance with an incorporated plan specified in a schedule to this overlay.
- To internally alter a church for liturgical purposes if the responsible authority is satisfied that the alterations are required for liturgical purposes.
- For interments, burials and erection of monuments, re-use of graves, burial of cremated remains and exhumation of remains in accordance with the *Cemeteries and Crematoria Act 2003*.
- To develop a heritage place which is included in the Victorian Heritage Register, other than an application to subdivide a heritage place of which all or part is included in the Victorian Heritage Register.

Exemption from notice and review

An application under this overlay for any of the following classes of development is exempt from the notice requirements of section 52(1) (a), (b) and (d), the decision requirements of section 64(1), (2) and (3) and the review rights of section 82(1) of the Act:

- Demolition or removal of an outbuilding (including a carport, garage, pergola, verandah, deck, shed or similar structure) unless the outbuilding is specified in the schedule to this overlay.
- Demolition or removal of a fence unless the fence is specified in the schedule to this overlay.
- External alteration of a building.
- External painting.
- Construction of a fence.
- Construction of a carport, garage, pergola, verandah, deck, shed or similar structure.
- Domestic services normal to a dwelling.
- Carry out works, repairs and routine maintenance.
- Internally alter a building.
- Non-domestic disabled access ramp.
- Construction of a vehicle cross-over.
- Construction of a domestic swimming pool or spa and associated mechanical equipment and safety fencing.
- Construction of a tennis court.
- Construction of a rainwater tank.
- Construction or display of a sign.
- Lopping of a tree.
- Construction of seating, picnic tables, drinking taps, barbeques, rubbish bins, security lighting, irrigation, drainage or underground infrastructure, bollards, telephone boxes.
- Roadworks.
- An electric vehicle charging station.
- Services normal to a building other than a dwelling, including chimneys, flues, skylights, heating and cooling systems, hot water systems, security systems and cameras, downpipes, window shading devices, or similar.
43.01-5
11/04/2019
VC156

**Statements of significance**

The schedule to this overlay must specify a statement of significance for each heritage place included in the schedule after the commencement of Amendment VC148. This does not apply to:

- a heritage place included in the schedule to this overlay by an amendment prepared or authorised by the Minister under section 8(1)(b) or section 8A(4) of the Act before or within three months after the commencement of Amendment VC148.
- a registered heritage place included in the Victorian Heritage Register established under Part 3 of the *Heritage Act 2017*.

43.01-6
31/07/2018
VC148

**Heritage design guidelines**

The schedule to this overlay may specify heritage design guidelines for any heritage place included in the schedule. A heritage design guideline must not contain any mandatory requirements.

43.01-7
31/07/2018
VC148

**Application requirements**

An application must be accompanied by any information specified in the schedule to this overlay.

43.01-8
04/10/2018
VC149

**Decision guidelines**

Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

- The significance of the heritage place and whether the proposal will adversely affect the natural or cultural significance of the place.
- Any applicable statement of significance (whether or not specified in the schedule to this overlay), heritage study and any applicable conservation policy.
- Any applicable heritage design guideline specified in the schedule to this overlay.
- Whether the location, bulk, form or appearance of the proposed building will adversely affect the significance of the heritage place.
- Whether the location, bulk, form and appearance of the proposed building is in keeping with the character and appearance of adjacent buildings and the heritage place.
- Whether the demolition, removal or external alteration will adversely affect the significance of the heritage place.
- Whether the proposed works will adversely affect the significance, character or appearance of the heritage place.
- Whether the proposed subdivision will adversely affect the significance of the heritage place.
- Whether the proposed subdivision may result in development which will adversely affect the significance, character or appearance of the heritage place.
- Whether the proposed sign will adversely affect the significance, character or appearance of the heritage place.
- Whether the lopping or development will adversely affect the health, appearance or significance of the tree.
- Whether the location, style, size, colour and materials of the proposed solar energy facility will adversely affect the significance, character or appearance of the heritage place.
Use of a heritage place

A permit may be granted to use a heritage place (including a heritage place which is included in the Victorian Heritage Register) for a use which would otherwise be prohibited if all of the following apply:

- The schedule to this overlay specifies the heritage place as one where prohibited uses may be permitted.
- The use will not adversely affect the significance of the heritage place.
- The benefits obtained from the use can be demonstrably applied towards the conservation of the heritage place.

Decision guidelines

Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider the effect of the use on the amenity of the area.

Aboriginal heritage places

A heritage place specified in the schedule to this overlay as an Aboriginal heritage place is also subject to the requirements of the Aboriginal Heritage Act 2006.
SCHEDULE TO CLAUSE 43.01 HERITAGE OVERLAY

Application requirements
None specified.

Heritage places
The requirements of this overlay apply to both the heritage place and its associated land.

</table>
DESIGN AND DEVELOPMENT OVERLAY
Shown on the planning scheme map as DDO with a number.

Purpose
To implement the Municipal Planning Strategy and the Planning Policy Framework.
To identify areas which are affected by specific requirements relating to the design and built form of new development.

Design objectives
A schedule to this overlay must contain a statement of the design objectives to be achieved for the area affected by the schedule.

Buildings and works

Permit requirement
A permit is required to:

- Construct a building or construct or carry out works. This does not apply:
  - If a schedule to this overlay specifically states that a permit is not required.
  - To the construction of an outdoor swimming pool associated with a dwelling unless a specific requirement for this matter is specified in a schedule to this overlay.

- Construct a fence if specified in a schedule to this overlay.

Buildings and works must be constructed in accordance with any requirements in a schedule to this overlay. A schedule may include requirements relating to:

- Building setbacks.
- Building height.
- Plot ratio.
- Landscaping.
- Any other requirements relating to the design or built form of new development.

A permit may be granted to construct a building or construct or carry out works which are not in accordance with any requirement in a schedule to this overlay, unless the schedule specifies otherwise.

VicSmart applications
Subject to Clause 71.06, an application under this clause for a development specified in Column 1 is a class of VicSmart application and must be assessed against the provision specified in Column 2.

<table>

</tr>
</tbody>
</table>
Class of application | Information requirements and decision guidelines
--- | ---
Construct a building or construct or carry out works with an estimated cost of up to $1,000,000 where the land is in an industrial zone. | Clause 59.05
Construct a building or construct or carry out works with an estimated cost of up to $500,000 where the land is in a commercial zone or a Special Use, Comprehensive Development, Capital City, Docklands, Priority Development or Activity Centre Zone. | Clause 59.05

Exemption from notice and review

A schedule to this overlay may specify that an application is exempt from the notice requirements of section 52(1)(a), (b) and (d), the decision requirements of section 64(1), (2) and (3) and the review rights of section 82(1) of the Act.

Subdivision

Permit requirement

A permit is required to subdivide land.

This does not apply if a schedule to this overlay specifically states that a permit is not required.

Subdivision must occur in accordance with any lot size or other requirement specified in a schedule to this overlay.

A permit may be granted to subdivide land which is not in accordance with any lot size or other requirement in a schedule to this overlay, unless the schedule specifies otherwise.

VicSmart applications

Subject to Clause 71.06, an application under this clause for a development specified in Column 1 is a class of VicSmart application and must be assessed against the provision specified in Column 2.

Class of application | Information requirements and decision guidelines
--- | ---
Subdivide land to realign the common boundary between 2 lots where: | Clause 59.01
  - The area of either lot is reduced by less than 15 percent.
  - The general direction of the common boundary does not change.

Subdivide land into lots each containing an existing building or car parking space where: | Clause 59.02
  - The buildings or car parking spaces have been constructed in accordance with the provisions of this scheme or a permit issued under this scheme.
  - An occupancy permit or a certificate of final inspection has been issued under the Building Regulations in relation to the buildings within 5 years prior to the application for a permit for subdivision.

Subdivide land into 2 lots if: | Clause 59.02
  - The construction of a building or the construction or carrying out of works on the land:
### Class of application

- Has been approved under this scheme or by a permit issued under this scheme and the permit has not expired.
- Has started lawfully.

- The subdivision does not create a vacant lot.

### Exemption from notice and review

A schedule to this overlay may specify that an application is exempt from the notice requirements of section 52(1)(a), (b) and (d), the decision requirements of section 64(1), (2) and (3) and the review rights of section 82(1) of the Act.

### Signs

Sign requirements are at Clause 52.05 unless otherwise specified in a schedule to this overlay.

### Application requirements

An application must be accompanied by any information specified in a schedule to this overlay.

### Decision guidelines

Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

- The design objectives of the relevant schedule to this overlay.
- The provisions of any relevant policies and urban design guidelines.
- Whether the bulk, location and appearance of any proposed buildings and works will be in keeping with the character and appearance of adjacent buildings, the streetscape or the area.
- Whether the design, form, layout, proportion and scale of any proposed buildings and works is compatible with the period, style, form, proportion, and scale of any identified heritage places surrounding the site.
- Whether any proposed landscaping or removal of vegetation will be in keeping with the character and appearance of adjacent buildings, the streetscape or the area.
- The layout and appearance of areas set aside for car parking, access and egress, loading and unloading and the location of any proposed off street car parking
- Whether subdivision will result in development which is not in keeping with the character and appearance of adjacent buildings, the streetscape or the area.
- Any other matters specified in a schedule to this overlay.
SCHEDULE 1 TO THE DESIGN AND DEVELOPMENT OVERLAY

Shown on the planning scheme map as DDO1.

AIRPORT ENVIRONS - RESTRICTED BUILDING HEIGHTS

1.0 Design objectives

To maintain the efficiency and safety airfields owned and operated by the Government or licensed under the Air Navigation Regulations.

To ensure any use or development of the land which could prejudice the safety and efficiency of airfields is prevented.

To recognise and implement any adopted Obstacle Surface Limitation Plan.

To ensure any new use or development in the vicinity of airfields is planned to ensure that visual amenity is consistent with the status of the airfield.

2.0 Buildings and works

A permit is not required to:

- Construct a fence
- Undertake internal and external alterations to an existing building where the height of the buildings is not increased.
- Construct a building or carry out works where the building or works will create a structure less than 7.5 metres above ground level.

An application to construct any building or works greater than 7.5 metres above ground level must be referred to the Civil Aviation Safety Authority for comment and consultation regarding the proposed works must occur between the relevant electricity supply or distribution authority.

3.0 Decision guidelines

Before deciding on an application, the responsible authority must consider:

- The need to prevent buildings or structures from being built which could interfere with or cause a safety hazard to aircraft operations in the immediate vicinity of the airfield.
- The existing and likely future use and development of any airfield.
- The availability and suitability of other land for the proposed building.
- The need to include a condition requiring all vegetation to have a mature height so as not to interfere with or cause a safety hazard to aircraft operations.
- The effect of the proposed development on the clear flight path of aircraft.
SCHEDULE 2 TO THE DESIGN AND DEVELOPMENT OVERLAY

Shown on the planning scheme map as DDO2.

SWAN HILL RIVER PRECINCT

1.0

Design objectives

To establish Swan Hill River Precinct as the primary public space for Swan Hill regional centre.
To establish Swan Hill River Precinct as a focus for leisure, cultural and tourism opportunities.
To reinstate the natural landscape of the Murray River.
To protect heritage assets and provide for interpretation of Swan Hill’s cultural heritage.
To have regard to those elements that significantly contribute to the special landscape character of the area.
To progressively provide for uninterrupted access to the Murray River.
To develop stronger physical and visual links between the River reserve and the edge of the Swan Hill Central Business Area.
To develop Curlewis Street as Swan Hill’s premier tourist precinct by encouraging tourism retailing and facilities, continuous street frontages and active uses at street level.

2.0

Buildings and works

A permit is not required to:

- construct a fence;
- construct or carry out works associated with a Minor utility installation;
- construct an open structure associated with Passive recreation;
- construct an amenities block; or
- construct or carry out buildings and works to the minimum extent necessary for actions undertaken by or on behalf of the Roads Corporation in the construction of the Swan Hill Bridge replacement project and associated works.

3.0

Decision guidelines

Before deciding on an application, the responsible authority must consider:

- Whether new development or redevelopment within the River Precinct, including removal of buildings and structures and any new buildings, works or landscaping, are consistent with the River Precinct Plan (as revised) adopted by Council, 1999.
- The need to ensure that the visual and physical relationship between the River Reserve and the Central Business Area, particularly Curlewis Street, are strengthened.
- How the design of new buildings in Curlewis Street addresses the building line and maintain and strengthen the pedestrian/building interface will be encouraged. Large scale car oriented buildings set back from the building line will be discouraged.
SCHEDULE 4 TO THE DESIGN AND DEVELOPMENT OVERLAY

Shown on the planning scheme map as **DDO4**

WILLIAMS ROAD LDRZ – IN1Z INTERFACE

1.0

**Design objective**

To minimise amenity impacts between industrial and low-density residential development.

2.0

**Buildings and works**

Buildings and works must be constructed in accordance with the following requirements to the satisfaction of the responsible authority:

**Within the LDRZ**

- The external wall of any dwelling within the LDRZ must not be closer than 45 metres from the LDRZ/IN1Z boundary.

**Within the IN1Z**

- The external wall of any building used for industrial purposes must not be closer than 25 metres from the IN1Z/LDRZ boundary.
- All buildings must have a maximum wall height of 8 metres.
- Waste pick-up bins or skips are situated in specific and accessible locations, which are properly screened by planting or fencing.

3.0

**Subdivision**

Subdivision must occur in accordance with the following requirement:

**Within the LDRZ**

- An earthen embankment of approximately 2.0 metres high is to be constructed along the LDRZ/IN1Z boundary within the LDRZ land.
- A densely planted landscaping strip on land within the LDRZ that is at least 5 metres wide extending from the drainage reserve adjacent to the LDRZ/IN1Z boundary must be provided and maintained.

**Within the IN1Z**

- A densely planted landscaping strip on land within the IN1Z that is at least 5 metres wide extending from the drainage reserve adjacent to the IN1Z/LDRZ boundary must be provided and maintained.

**Within the LDRZ and IN1Z**

- Building envelopes are to be identified on any plan of subdivision.
- The construction of the earthen embankment and landscaping are to be completed prior to the release of statement of compliance for the subdivision.
- An agreement under section 173 of the Act must be entered into with the landowner and the responsible authority, which ensures that the landscaping plantings are maintained to the satisfaction of the responsible authority. The agreement must be registered on title.

4.0

**Decision guidelines**

Before deciding on any application, the responsible authority must consider:
- Whether the proposed development meets the design objective of this schedule.
- The design and layout of the proposed development including setbacks from property boundaries.
- Whether any proposed landscaping will minimise amenity impacts between the industrial and residential development.
- Whether the location of the earthen embankment will minimise amenity impacts between the industrial and residential development.
SCHEDULE 5 TO THE DESIGN AND DEVELOPMENT OVERLAY

Shown on the planning scheme map as DDO5.

FORMER SWAN HILL TECHNICAL SCHOOL OVAL

1.0

Design objectives
To ensure that future subdivision provides for lower density residential lots.
To provide for the orderly development of interface land between the General Residential Zone and the Low Density Residential Zone.

2.0

Buildings and works
A permit is not required to construct or carry out:

- A building or works associated with a single dwelling or outbuildings ancillary to a dwelling.

Buildings and works must be constructed or carried out in accordance with the following requirements:

- There must be only one dwelling on each lot. This does not apply to a dependent persons unit.
- The building must not be a relocated building or moveable structure. This does not apply to a dependent persons unit.
- All buildings must be constructed of new materials.
- The minimum distance of external walls of all buildings, including outbuildings from site boundaries must be:
  - from front street boundary, 6 metres;
  - from side street boundary, 3 metres.

3.0

Subdivision
The subdivision of the entire parcel of land comprising Lot 1, PS 602520S and Lot 1, LP 113013, must not yield more than sixteen (16) residential lots. Fourteen (14) of the lots must have an area of between 1100m² and 1650m².

A permit may only be granted to create smaller lots if:

- The subdivision excises land which is required for a utility service.
- The subdivision is the minor re-alignment of existing lot boundaries and no additional lots are created.

4.0

Exemption from notice and review
An application for subdivision is exempt from the notice requirements of Section 52(1)(a), (b) and (d), the decision requirements of Section 64(1), (2) and (3) and the review rights of Section 82(1) of the Act.
SCHEDULE 6 TO THE DESIGN AND DEVELOPMENT OVERLAY

Shown on the planning scheme map as DDO6.

HAYES ROAD SOUTH, LAKE BOGA

1.0 Design objectives

To ensure that subdivision and development respect the amenity of Lake Boga and its foreshore environs.

To ensure site responsive subdivision and building design, particularly at the interfaces with Lake Boga, existing residential areas, existing dwellings and the Farming Zone.

To ensure that building height, setbacks and bulk respect the Lake Boga foreshore environs, existing residential areas, existing dwellings and the interface with the Farming Zone.

To locate any public open space to maximise public access to the lake foreshore.

To provide for visual permeability from within the subdivision to Lake Boga.

To provide for uninterrupted pedestrian access to the foreshore of Lake Boga.

2.0 Buildings and works

A permit is required to construct a fence along any boundary with the Lake Boga foreshore or along any boundary with a public space that abuts the foreshore that exceeds 1.2 metres in height and is not at least 50% transparent.

A permit is not required to:

- Construct a dwelling and associated works on a lot that does not immediately abut either the Lake Boga foreshore or public space that abuts the foreshore.
- Undertake alterations to an existing building where the height or area of the buildings is not increased.
- Undertake repairs and routine maintenance to buildings and works.
- Construct an open structure associated with passive recreation.
- Carry out landscaping works associated with a dwelling.
- Construct buildings and works associated with the provision of public open space.
- Construct buildings and works associated with the pumping and taking of water from Lake Boga in accordance with an approved licence.

Buildings and works should be constructed in accordance with the following objectives:

Building Design

- Dwellings on lots that abut either the Lake Boga foreshore or any public space that abuts the foreshore should visually address the lake as well as any road frontage where appropriate.
- The elevation facing the lake of all buildings on lots that abut either the Lake Boga foreshore or any public space that abuts the foreshore should be articulated at all levels.

Building Height

- The height of buildings on lots that abut either the Lake Boga foreshore or any public space that abuts the foreshore should not exceed 2 storeys or 7.5 metres. A third storey may be considered if the building is well articulated and the upper most level is set back sufficiently from the lower levels to minimise the appearance of visual bulk when viewed from the lake and foreshore environs.
Building Setback

- Separation must be provided between buildings immediately abutting either the Lake Boga foreshore or any public space that abuts the foreshore to reduce the visual bulk of buildings and provide visual permeability from roads within the DDO6 area to Lake Boga.

- Buildings on lots abutting either the Lake Boga foreshore or any public space that abuts the foreshore should be set back from the common boundary with the foreshore or public space a minimum of 4.0 metres at all levels. Porches, pergolas, decks and verandahs may encroach into this setback.

Decision guidelines

Before deciding on an application, the responsible authority must consider:

- The visual compatibility of the proposed built form with Lake Boga and its foreshore environs.
- The scale and bulk of any proposed building and its impact on the amenity of existing residential areas or existing dwellings.
- The layout of the proposed subdivision, its orientation to the lake and its design response in relation to Lot 1 PS534129S.
- Whether the proposal is consistent with the Lake Boga Township Framework Plan.
- The visual and physical relationship of the proposed subdivision and built form with Lake Boga and its foreshore environs.
- How the proposal contributes to the provision of pedestrian access to the Lake Boga foreshore.
SCHEDULE 7 TO THE DESIGN AND DEVELOPMENT OVERLAY

Shown on the planning scheme map as DDO7

COMMERCIAL 2 ZONE HIGHWAY ENTRANCES

1.0

Design objectives
To create attractive and vibrant entrances to Swan Hill along the Murray Valley Highway.
To ensure the siting and design of new development is not detrimental to the image of Swan Hill.
To ensure that new development addresses the Murray Valley Highway so that a sense of arrival to Swan Hill is created by appropriate built form.
To encourage contemporary architectural outcomes in terms of building facades, roof forms and lines, colours, materials and setbacks that reinforce an attractive gateway to Swan Hill.
To ensure that signage does not dominate the streetscape or lead to visual clutter.

2.0

Buildings and works
All buildings and works should comply with the following requirements:

Site coverage
- The total building footprint should not exceed 60% of the total area of the lot.
- At least 30% of the area of the lot should be pervious to rainfall (i.e. not building or hardstand). This may include landscaping.

Setbacks
- A front building setback should be provided of at least 10 metres but no more than 30 metres.
- A setback of at least 5 metres should be provided from at least one of the side boundaries and the rear boundary.

Height
- Building height should be no more than 14.5 metres above natural ground level.

Building bulk
- Building facades to the Murray Valley Highway should be articulated and utilise a mix of building materials to minimise the visual impact of large buildings.
- External office and/or administration areas at the front of buildings should be architecturally differentiated from the remainder of the building by the use of fenestration, construction materials and differing horizontal/vertical planes.

Car parking and access
- No car parking spaces except visitor car parking spaces should be provided forward of the front building line.
- No car parking spaces should be provided within the first 5 metres of the front building setback.
- Car parking and manoeuvring areas should be provided with an all-weather surface treatment to the satisfaction of the responsible authority.
- Car parking and manoeuvring areas should be formed and drained to a point of discharge approved by the responsible authority.
- All parking spaces and loading bays should be provided within the lot.
- Loading bays should be located behind the front building line.
• Development (including vehicle ingress and egress) should be designed so that all vehicles (including heavy vehicles) are capable of entering and exiting the lot in a forward direction.

Fences
• Any fencing forward of the front building line should be visually permeable to the satisfaction of the responsible authority.

Landscaping
• Existing native vegetation should be retained where possible.
• At least 15% of the area within the front building setback should be landscaped with trees, shrubs and ground covers in accordance with a landscape plan endorsed by the responsible authority.
• Landscaping should be designed to soften the appearance of large buildings when viewed from the Murray Valley Highway.

Outdoor storage and work areas
• Outdoor storage and work areas should be:
  - Located behind the front building alignment;
  - Substantially screened from public roads and adjoining lots by landscaping; and
  - Suitably surfaced to prevent dust rising as a result of vehicle movements or wind.

Services
• All buildings must be connected to Swan Hill’s reticulated water and sewer systems or an alternative solution to the satisfaction of the relevant servicing authority. This requirement cannot be varied with a permit.
• Stormwater from buildings and open areas be collected and directed to a point of discharge nominated by the responsible authority, to the satisfaction of the responsible authority. This requirement cannot be varied with a permit.

An application is exempt from the notice requirements of Section 52(1)(a),(b) and (d), the decision requirements of Section 64(1),(2) and (3) and the review rights of Section 82(1) of the Act.

Subdivision
• New lots created should be between 1ha and 2ha in area. Lot sizes outside this range must be justified to the responsible authority.
• Lots should be proportionate in terms of depth and width.
• Lots should provide a minimum frontage of 20 metres to the Murray Valley Highway.
• All lots must to be connected to Swan Hill’s reticulated water and sewer systems or an alternative solution to the satisfaction of the relevant servicing authority. This requirement cannot be varied with a permit.
• No direct access may be provided from any lot to the carriageway of the Murray Valley Highway.

An application is exempt from the notice requirements of Section 52(1)(a),(b) and (d), the decision requirements of Section 64(1),(2) and (3) and the review rights of Section 82(1) of the Act.

Advertising signs
• Signage should be restricted to identifying and promoting the business or industry on the land where it is displayed.
• Signage must be maintained in good condition at all times. This requirement cannot be varied with a permit.

• Advertising signs and structures should be of a size, colour and design that are compatible with the building to which they relate.

• Signage should not visually dominate building walls nor extend above the eave of the building.

• Signage should be designed to inform motorists rather than distract them, and should not include flashing, moving, or vividly coloured signs.

• No signage other than that permitted by the Roads Corporation may be displayed within the Murray Valley Highway road reserve.

5.0

Decision guidelines

In addition to other decision guidelines contained within the planning scheme, before deciding on an application, the responsible authority must consider, as appropriate:

• Whether the bulk, location and external appearance of any proposed building and works will be in keeping with the desired streetscape character.

• The impact of any proposed sign, access way, fence, utility service, landscaping or other minor work on the streetscape or adjoining property.

• Whether any proposed landscaping makes a positive contribution to the streetscape.
DEVELOPMENT PLAN OVERLAY

Shown on the planning scheme map as DPO with a number.

Purpose

To implement the Municipal Planning Strategy and the Planning Policy Framework.
To identify areas which require the form and conditions of future use and development to be shown on a development plan before a permit can be granted to use or develop the land.
To exempt an application from notice and review if a development plan has been prepared to the satisfaction of the responsible authority.

Objectives

A schedule to this overlay may specify objectives to be achieved for the area affected by the overlay.

Requirement before a permit is granted

A permit must not be granted to use or subdivide land, construct a building or construct or carry out works until a development plan has been prepared to the satisfaction of the responsible authority.

This does not apply if a schedule to this overlay specifically states that a permit may be granted before a development plan has been prepared to the satisfaction of the responsible authority.

A permit granted must:

- Be generally in accordance with the development plan.
- Include any conditions or requirements specified in a schedule to this overlay.

Exemption from notice and review

If a development plan has been prepared to the satisfaction of the responsible authority, an application under any provision of this planning scheme is exempt from the notice requirements of section 52(1)(a), (b) and (d), the decision requirements of section 64(1), (2) and (3) and the review rights of section 82(1) of the Act.

Preparation of the development plan

The development plan may consist of plans or other documents and may, with the agreement of the responsible authority, be prepared and implemented in stages.

A development plan that provides for residential subdivision in the Neighbourhood Residential Zone, General Residential Zone, Residential Growth Zone, Mixed Use Zone, Township Zone, Comprehensive Development Zone and Priority Development Zone must meet the requirements of Clause 56 as specified in the zone.

The development plan must describe:

- The land to which the plan applies.
- The proposed use and development of each part of the land.
- Any other requirements specified for the plan in a schedule to this overlay.

The development plan may be amended to the satisfaction of the responsible authority.
SCHEDULE 1 TO THE DEVELOPMENT PLAN OVERLAY

Shown on the planning scheme map as DPO1.

GENERAL RESIDENTIAL ZONE

The Development Plan Overlay 1 applies to General Residential zoned land in Swan Hill, Robinvale, Nyah, Nyah-West, and Lake Boga.

1.0

Requirements for development plan

The development plan for this land must describe and assess:

- Site assessment and response, including natural features, slope, orientation, views, drainage lines, native vegetation, and impact on neighbouring and nearby land.
- Proposed lot layout and density, including building envelopes if appropriate.
- Internal road layout and external road access, including future road linkages, street lighting, and proposed road surfacing and standards.
- All servicing, including water, sewerage, drainage and stormwater, electricity and telecommunications.
- Existing and future open space, including linkages to and between areas of open space.
- Landscaping, existing native vegetation and streetscape treatment.
- The stages, if any, in which the land is to be subdivided and developed.

Before any planning permit is granted for any use or development of land that the Development Plan Overlay 1 applies to, the responsible authority must consider and be satisfied that the following guidelines are met:

- The proposed use and/or development is consistent with any approved Development Plan.
- The proposed use and/or development is consistent with the conditions and requirements for permits, requirements for the development plan and decision guidelines sections of this overlay schedule.
- The proposal meets Swan Hill Rural City Council road, drainage and infrastructure standards.
- A requirement for public open space land or monetary contribution for recreation purposes when a contribution is required in accordance with the Subdivision Act.
- Reticulated water and sewerage provision, to meet service authority standards.
- Provision of underground electricity.
- The proposal incorporates and meets the following urban design principles:
  - Urban design and layout principles to meet ResCode objectives and standards.
  - A site assessment and design response that provides proposed layout and development that is compatible with site conditions, adjoining land and general area.
  - A range of lot sizes and housing types to meet a variety of housing needs, and cater for a range of different residential users.
  - A strong sense of place created by attractive built form, compact neighbourhood design, quality landscape and community safety.
  - Pedestrian and vehicular provision, accessibility and safety.
  - Accessibility and linkages to open space, and consideration of how to enhance existing linkages and open space.
  - When additional open space is to be provided rather than a monetary contribution, provision of open space that is accessible, safe and useable for recreational purposes.
- Quality urban environmental standards, including urban stormwater design and treatment, energy and water efficiency, landscaping, and protection and incorporation of natural features.
- Retention of existing native vegetation.
- Urban services, including reticulated water and sewer and street lighting.
SCHEDULE 2 TO THE DEVELOPMENT PLAN OVERLAY

Shown on the planning scheme map as DPO2

LOW DENSITY RESIDENTIAL ZONE

The Development Plan Overlay 2 applies to Low Density Residential zoned land in Swan Hill, Robinvale and Nyah.

1.0

Requirements for development plan

Any development plan for this land must outline and assess:

- Site assessment and response, including natural features, slope, orientation, views, drainage lines, native vegetation, and impact on neighbouring and nearby land.
- Proposed lot layout and density, including building envelopes if appropriate.
- Internal road layout and external road access, including future road linkages, street lighting, and proposed road surfacing and standards.
- All servicing, including water, drainage and stormwater, electricity and telecommunications, and sewerage if applicable.
- Existing and future open space, including linkages to and between areas of open space.
- Landscaping, existing native vegetation and streetscape treatment.
- The stages, if any, in which the land is to be subdivided and developed.

Before any planning permit is granted for any use or development of land that the Development Plan Overlay 2 applies to, the responsible authority must consider and be satisfied that the following guidelines are met:

- The proposed use and/or development is consistent with any approved Development Plan.
- The proposed use and/or development is consistent with the conditions and requirements for permits, requirements for the development plan and decision guidelines sections of this overlay schedule.
- The proposal meets Swan Hill Rural City Council road, drainage and effluent disposal standards.
- A requirement for public open space land or monetary contribution for recreation purposes when a contribution is required in accordance with the Subdivision Act.
- Reticulated water to meet service authority standards.
- Provision of underground electricity.
- The proposal incorporates and meets the following urban design principles:
  - A site assessment and design response that provides proposed layout and development that is compatible with the site conditions, adjoining land and general area.
  - Pedestrian and vehicular provision, accessibility and safety.
  - Accessibility and linkages to open space, and consideration of how to enhance existing linkages and open space.
  - Quality urban environmental standards, including urban stormwater design and treatment, energy and water efficiency, landscaping, and protection and incorporation of natural features.
  - Retention of existing native vegetation.
  - Urban services, including reticulated water, and street lighting.
SCHEDULE 3 TO THE DEVELOPMENT PLAN OVERLAY

Shown on the planning scheme map as DPO3

INDUSTRIAL 1 ZONE

The Development Plan Overlay 3 applies to Industrial 1 zoned land in Swan Hill.

1.0 Requirements for development plan

Any development plan for this land must outline and assess:

- Site assessment and response, including natural features, slope, orientation, drainage lines, native vegetation, and impact on neighbouring and nearby land.
- Proposed lot layout and density, including building envelopes if appropriate.
- Internal road layout and external road access, including future road linkages, street lighting, and proposed road surfacing and standards.
- All servicing, including water, sewerage, drainage and stormwater, electricity and telecommunications.
- Landscaping and existing native vegetation.
- The stages, if any, in which the land is to be subdivided and developed.

Before any planning permit is granted for any use or development of land that the Development Plan Overlay 3 applies to, the responsible authority must consider and be satisfied that the following guidelines are met:

- The proposed use and/or development is consistent with any approved Development Plan.
- The proposed use and/or development is consistent with the conditions and requirements for permits, and requirements for the development plan.
- The proposal meets Swan Hill Rural City Council road and drainage standards.
- Reticulated water to meet service authority standards.
- Provision of underground electricity.
1.0 Requirement before a permit is granted

Before a permit is granted, a development plan must be prepared to guide the form and conditions of the future use and development of land at the north-west corner of Beveridge Street and Pye Street, Swan Hill.

2.0 Requirements for development plan

The development plan must include:

- Existing conditions;

- The size and dimensions of the land;

- Presentation of the development to the Nyah Road and Beveridge Street frontages including design and landscaping measures, to achieve the ‘gateway’ role of the site to the Swan Hill CBD;

- The location of all proposed buildings and land uses;

- Built form outcomes showing composition and transitions in building height, and articulation of building massing and frontages including details of materials and finishes;

- The location of existing vegetation and proposed landscaping areas. A landscaping strip of not less than 4 metres in width must be provided at the interface of the site and the residential areas to the south and west;

- Treatment or articulation of the interface between the site and the residential land to the south and west;

- Measures to avoid or minimise the negative visual impact of car parking areas to abutting roads and residential areas to the south and west;

- Measures that minimise adverse impacts of development with respect to visual presentation, noise, loading and unloading facilities, location of rubbish storage and collection areas, effects of external lighting and loss of privacy on the amenity of adjacent residential areas;

- Measures to manage the interface with the North Park Oval so as to not jeopardise the ongoing use of the North Park Oval for competitive community sports including cricket and junior football; and

- Consideration of the retention of mature trees.

The development plan must be supported by the following:

- A town planning report that includes an assessment of the provisions of the Swan Hill Planning Scheme, including the State and Local Planning Policy Framework, Clause 34.01 (Business 1 Zone) and the provisions of this Schedule.

- A report assessing the interface with the North Park Oval including measures to protect the ongoing use of the Oval for community sport (including training and matches) and to ensure the safety of the public;

- An urban design assessment that addresses building height, bulk, form and setback, particularly with regard to:
  - The sensitive interface with residential areas.
  - The need to develop the land as an important gateway element to the Swan Hill CBD.
- The interface with the North Park Oval.

- An economic impact assessment that considers the effect of the proposal on the integrity of the CBD, its retail catchment and retail floorspace forecasts.

- A transport impact assessment report which addresses issues including:
  - Predicted traffic generated by the proposal;
  - Whether special traffic management control works for access to and from the site are required;
  - Car parking for public and staff;
  - The need to restrict vehicle access points on Pye Street and Splatt Street; and
  - An appropriate design for the termination of the northern end of Splatt Street that maintains access to the recreation reserve.
SCHEDULE 5 TO THE DEVELOPMENT PLAN OVERLAY

Shown on the planning scheme map as DPO5.

HAYES ROAD SOUTH, LAKE BOGA

1.0 Requirement before a permit is granted

A permit may be granted before a development plan has been prepared to the satisfaction of the responsible authority for the following:

- The use of the land for agriculture;
- Any buildings or works associated with the use of the land for agricultural purposes;
- Extensions, additions or modifications to any existing dwelling;
- Buildings and works associated with the pumping and taking of water from Lake Boga in accordance with an approved licence.
- The subdivision of land to realign lot boundaries or create a road reserve.
- A subdivision of land which does not create an additional lot.
- A fence.
- Minor drainage works.
- Minor earthworks.
- To remove, destroy or lop vegetation.

Before granting a permit the responsible authority must be satisfied that the permit will not prejudice the future use and development of the land in an integrated manner.

2.0 Conditions and requirements for permits

The responsible authority must consider the following when applying conditions to planning permits:

- The need for an environmental management plan or construction management plan to address any potential environmental impacts.
- The need for a contribution to the sealing of Hayes Road South if this is required as a result of the development of the land.
- The need for an agreement under section 173 of the Planning and Environment Act 1987 to restrict the further subdivision of any newly created lot.

3.0 Requirements for development plan

A development plan must include the following elements to the satisfaction of the responsible authority:

- A site analysis, including natural features, slope, orientation, views, drainage lines, existing native and exotic vegetation, Aboriginal or post-contact cultural heritage values and any other relevant features.
- Existing and proposed road layout and vehicle and pedestrian access arrangements.
- Details of all servicing, including water, sewerage, drainage, electricity and telecommunications.
- Existing and proposed public open space, including linkages to surrounding or nearby areas.
- Provision of public access to the foreshore of Lake Boga along its entire length within the DPO5 area.
A range of lot sizes to cater for different housing types.

- The stages, if required, in which the land is to be subdivided and developed.
- The identification of existing vegetation to be retained or removed.
- A landscape concept plan.
- A traffic impact assessment that addresses the internal road design, traffic generated by the proposal and the impact of traffic on the integrity of Hayes Road South (including the single lane bridge) and its intersection with the Murray Valley Highway.

- A proposed neighbourhood layout that:
  - Responds positively to the interface with Lake Boga through lot orientation, built form, public access to the foreshore and stabilisation of the foreshore.
  - Provides a sensitive residential interface with existing residential land and existing dwellings.
  - Provides a convenient and safe internal road and shared access network, linking to surrounding areas, including the Lake Boga foreshore.
  - Provides for a variety of lot sizes that respects the existing residential character of the township of Lake Boga and includes a graduation to larger lots sizes at the interface with the Farming Zone.
  - Demonstrates an appropriate interface between residential properties and public open space reserves and roads.
  - Provides adequate space for landscaping in road reserves.
  - Provides useable public open space reserves.
  - Includes public open space that abuts and provides access to the Lake Boga foreshore, incorporating Crime Prevention Through Environmental Design (CPTED) principles, and includes a shared path along the entire length of the foreshore.
  - Shows building envelopes on lots that have an interface with land in the Farming Zone to provide for a minimum setback of 30 metres from the zone boundary, or provides an alternative method of addressing the potential for adverse amenity impacts from land in the Farming Zone.
  - Provides for a subdivision layout which takes into account the topography of the land, particularly the sloping to the rear of the land.
  - Responds to any significant Aboriginal or post-contact cultural heritage values, including the construction of a cultural heritage reserve at the south end of the lunette (in consultation with the Traditional Owners), reconstruction of the lunette profile and stabilisation of the shore of Lake Boga.
  - Provides a single lot on each side of Lot 1 PS 534129S (one on each side), with each lot abutting the entire length of the north and south sides of this lot, and having an area of not less than 1800 sqm.
  - Responds to the technical reports, plans and analyses required to be prepared by this schedule.

The development plan must be supported by the following technical reports that may consist of, or include, reports already submitted to the responsible authority:

- A Cultural Heritage Management Plan approved by the relevant authority.
- A traffic impact assessment and management plan addressing:
  - Details of bridge works on Hayes Road South and of intersection works where Hayes Road South intersects with the Murray Valley Highway that are required as a result of the development of the neighbourhood;
- The impact of the development on the local road network;
- Mitigation works that could be made to the road network;
- Connections to adjoining land;
- Road hierarchy;
- Cross sections;
- Proposed traffic management devices on the site;
- Bicycle network; and
- Pedestrian links.

- A drainage and stormwater management plan for the whole of the site (including any external catchments) detailing how stormwater will be collected and treated, and designed to minimise environmental impacts on Lake Boga and its environs.

- A flora and fauna assessment in accordance with Victoria’s Native Vegetation Management – A Framework for Action (or any relevant replacement policy document).

- A landscaping concept plan.
SCHEDULE 6 TO THE DEVELOPMENT PLAN OVERLAY

Shown on the planning scheme map as DPO6.

SWAN HILL SOUTH WEST DEVELOPMENT PRECINCT (STAGE 1)

1.0 Requirement before a permit is granted

A permit may be granted before a development plan has been prepared to the satisfaction of the responsible authority for the following, subject to the responsible authority being satisfied that the grant of a permit will not prejudice the implementation of the Master Plan for the South West Development Precinct:

- Buildings or works (including extensions and modifications) associated with an existing use, in accordance with the provisions of Clause 63.
- The excision of an existing dwelling, which should be limited to the curtilage of the existing dwelling and any associated outbuildings and works.
- A boundary realignment.
- An outdoor advertising sign/structure.

2.0 Conditions and requirements for permits

A permit for subdivision must include the following conditions and requirements:

Infrastructure works - general

- Prior to the issue of a Statement of Compliance, the developer must provide infrastructure in accordance with an approved Infrastructure Plan prepared in accordance with the requirements of 3.2 (Infrastructure Plan) under this Schedule.

Provision of infrastructure

- Infrastructure must be provided or upgraded generally in accordance with the standards specified in the Infrastructure Design Manual Version 4.4.2, dated 15 October 2015 (or as updated from time to time), to the extent reasonably required to service the subject land and to the satisfaction of the responsible authority.

Conditions to be included on all lots that abut No. 7 Dead Horse Lane Swan Hill (Sub-Precinct 1)

- The owner of the land will enter into an agreement with the responsible authority under section 173 of the Planning and Environment Act, 1987 requiring:
  - An acknowledgement of the non-residential uses and activities at No. 7 Dead Horse Lane.
  - Prior to the issue of a Statement of Compliance a 10 metre wide tree buffer along the full length of the boundary abutting No. 7 Dead Horse Lane must be provided by the developer to the satisfaction of the responsible authority.
  - The landowners must maintain the tree buffer at all times to the satisfaction of responsible authority (maintenance of the tree buffer may include trimming and pruning for safety reasons).
  - No habitable or other buildings may be constructed within the 10 metre tree buffer area.

Conditions to be included on residential lots that abut land within the Farming Zone

- The owner of the land will enter an agreement with the responsible authority under section 173 of the Planning and Environment Act, 1987 requiring:
- An acknowledgement of the non-residential uses and activities conducted on the adjoining land in the Farming Zone.

### Requirements for development plan

A development plan must be prepared for each sub-precinct to the satisfaction of the responsible authority. A development plan must:

- Provide for the use and development of land to be generally in accordance with the Master Plan for the South West Development Precinct (Version 8) (the Master Plan) included at this Clause.
- Provide for orderly development that will create a liveable community and incorporate sustainable design and planning principles consistent with the Heart Foundation publication “Healthy by Design – A guide to planning environments for active living in Victoria”.
- Encourage higher density development along collector roads.
- Provide for the necessary traffic, transport, drainage, recreational, community and social infrastructure to service the community.
- Seek to ensure that future land use and development does not impact detrimentally on the flow and quality of surface water and ground water.
- Ensure that a 30 metre setback is provided for buildings or works from any Goulburn-Murray Water surface infrastructure (including open irrigation channels and drains); a 10 metre setback is provided from any other structure (such as culverts, drainage inlets, subways, syphons); and a 5 metre setback is provided from any below surface infrastructure (including pipelines) located on any G-MW freehold, easements or reserves; all to the satisfaction of the responsible authority.
- Address the requirements of 3.1 to 3.6 in sub-clause 3.0 of this Schedule.

### 3.1 Site analysis and subdivision layout

The development plan must be drawn to scale and should include the following to the satisfaction of the responsible authority:
A site analysis plan showing existing conditions on the subject land and on adjoining and opposite properties; contours at 0.1 metre intervals; and existing infrastructure, vegetation, buildings and any other structures.

A subdivision layout that:

- Creates a safe, convenient and legible street layout that ensures development fronts streets and public open space.
- Is sympathetic with and responds appropriately to established developments within adjoining land parcels. Internal streets must provide linear connections with adjoining properties, precincts and existing streets, and and cul de sacs should be avoided where appropriate.
- Avoids court bowls within developments in situations where there is opportunity to continue streets to provide linear connection and encourage walking.
- Provides for a mix of lot sizes that can offer diverse residential development choices and affordable housing options, including small lots on corner properties where appropriate.
- Provides for lot orientation that is consistent with sustainable design principles, including solar efficiency as appropriate.
- Is consistent with the requirements of Safer Design Guidelines to create passive surveillance to public areas, including streets and open spaces.
- Provides for a minimum subdivision area of 2000 square metres for land abutting Dead Horse Lane as specified in the Master Plan.
- Provides for a minimum subdivision area of 800 square metres for land abutting land in the Farming Zone where shown on the Master Plan.
- Provides for a 10 metre wide tree buffer along the full length of the boundary of No. 7 Dead Horse Lane.
- Incorporates planning principles consistent with the Heart Foundation publication “Healthy by Design – A guide to planning environments for active living in Victoria” to encourage walking, cycling and active living by design where appropriate.
- Identifies vegetation that is to be retained and/or removed.
- Identifies existing and proposed infrastructure.
- Identifies existing buildings, works and structures that are to be removed or relocated.

### 3.2 Infrastructure plan

An infrastructure plan for the land identified in this Schedule must be prepared to the satisfaction of the responsible authority.

The infrastructure plan must address the following to the satisfaction of the responsible authority, unless it can be demonstrated that such information would be more appropriately provided at the subdivision permit application stage:

- The provision, staging and timing of stormwater drainage works, both internal and external to the precinct.
- The provision, staging and timing of road works (including allocation of land for proposed bus stops, associated works, shared paths).
- The provision and staging of the implementation of all recommendations identified in an approved Traffic Impact Assessment prepared for the development.
- Any other infrastructure or related matters reasonably requested by the responsible authority in association with the development of the land.
The infrastructure plan must include the provision of infrastructure where the development impacts on infrastructure beyond the developable area, including infrastructure identified in Table 1 – Infrastructures to be Provided and Table 2 – Existing Infrastructure to be Upgraded (Swan Hill Rural City Council, 2016), both of which are listed as reference documents at Clause 21.04-2. The infrastructure plan must state that the provision of all infrastructure reasonably required by the development of the land identified in this Schedule, whether within or outside the developable area, is at no cost to the responsible authority.

### 3.3 Drainage

A drainage management plan for land identified in this Schedule addressing the management of the quantity of stormwater must be prepared to the satisfaction of the responsible authority. The plan must take into account the Swan Hill South West Development Precinct Drainage Strategy Version 2, 23 July 2015 (or as amended) and must be approved by the responsible authority.

The drainage management plan must address the following to the satisfaction of the responsible authority, unless it can be demonstrated that such information would be more appropriately provided at the subdivision permit application stage:

- Provision for stormwater arriving from upstream, passing through, and moving downstream from the site.
- An assessment of the existing surface and subsurface drainage conditions on the site by a suitably qualified professional, and the potential impacts on the proposed development, including any measures required to mitigate the impacts of groundwater on the development and the impact of the development on drainage.
- Geotechnical and hydrological analysis and design of any retardation basins and their proximity to any groundwater table, and in particular how groundwater infiltration will be addressed, and how accessions to the water table will be addressed to the satisfaction of the responsible authority.
- Computations and stormwater modelling to demonstrate that there will be no adverse impacts on the operation of the Swan Hill Main Drain in a 100 year ARI rainfall event from any discharge to the Swan Hill Main Drain from the drainage system serving the precinct.
- The natural direction of overland flow paths for stormwater to ensure that overland flows will be primarily along road reserves and will avoid overland flow drainage reserves wherever possible.
- The provision, staging and timing of drainage infrastructure to serve land identified in this Schedule.
- A conceptual landscape plan for any retardation basin to be constructed, showing the proposed landscape treatments, tree planting, footpaths around the basins and access for maintenance in accordance with the standards specified in the Infrastructure Design Manual (as updated).
- Siting of any retardation basin, ensuring a minimum of 40% of the perimeter of the retardation basin has frontage to a road/s to allow overland flows to enter the basin unless otherwise agreed in writing by responsible authority.
- The approved drainage connection points to Swan Hill Rural City Council’s existing drainage infrastructure.
- Consideration of fence design for retardation basins to maximise passive surveillance.
- Approval from all relevant service authorities whose assets or land may be affected by surface or pipe flow discharge. In particular, it should be noted that a separate permit (Works on Waterway) from the relevant authority may be required if:
  - There is a direct connection to a waterway.
  - There is a bridge over a waterway or a culvert.
- A retardation basin is to be constructed.

- Any other requirements as reasonably requested by the responsible authority associated with the development of the land.

3.4 Traffic

A traffic impact assessment report that is generally consistent with the report titled Swan Hill South West Development Precinct Traffic Impact Assessment dated May 2015, (or as revised), and the Swan Hill South West Development Precinct Traffic Strategy dated February 2015 (or as revised) must be prepared for the land identified in this Schedule, to the satisfaction of the responsible authority.

The traffic impact assessment report must address the following to the satisfaction of the responsible authority, unless it can be demonstrated that such information would be more appropriately provided at the subdivision permit application stage:

- Appropriate access and circulation of vehicles on the existing and future road network.

- Appropriate integration with the existing or proposed subdivision of adjoining properties, including through the alignment and configuration of the street network and landscape character.

- The identification of existing and proposed public transport routes, bus stops (as shown on the approved Master Plan for the South West Development Precinct) and associated infrastructure.

- The identification of existing and proposed pedestrian and cycling networks and shared paths, including provision for safe and convenient linear access to public transport infrastructure.

- Works necessary to accommodate traffic generated by the development and to mitigate the impact of that traffic on the development.

- Roads and intersections designed to create efficient clearance of traffic and activity areas around public facilities. The proposed road network should not overload or detrimentally affect existing or proposed residential streets and intersections.

- A road layout that provides for natural traffic speed control, appropriate to the street category. The introduction of specific speed control devices should be considered only as a secondary option.

- The road layout should be designed for all road users appropriate to the street type, including service vehicles, emergency vehicles, waste collection vehicles and street-sweepers. Bus routes must also be considered when developing road networks, and be based on the Department of Environment Land Water and Planning publication titled Public Transport Guidelines for Land Use Development (or a replacement document by the department).

- Road reserves of adequate width for the intended road type, which should comply with the requirements of the Infrastructure Design Manual (as updated).

- Typical cross-sections of differing road types, detailing the intended function of the road, e.g. bike lanes, drainage and landscaping.

3.5 Environmental management plan

An environmental management plan must be prepared to the satisfaction of the responsible authority and then approved by the responsible authority.

The environmental management plan should address the following, to the satisfaction of the responsible authority:

- The location of any significant environmental, cultural heritage and/or ecological (faunal and/or floral) features, including fauna and remnant native vegetation.

- A flora and fauna survey, which (among other things) identifies the health and habitat value of all native vegetation.
• Developments on land that are will be reclaimed as a result of decommissioning of the Goulburn-Murray Water channel infrastructure. Such development will require further investigation undertaken by suitably qualified persons to demonstrate the suitability of the land to be used and developed for residential and other purposes to the satisfaction of the responsible authority.

• Demonstration of how any significant environmental features can be protected.
LAND SUBJECT TO INUNDATION OVERLAY

Shown on the planning scheme map as LSIO with a number (if shown).

Purpose

To implement the Municipal Planning Strategy and the Planning Policy Framework.

To identify land in a flood storage or flood fringe area affected by the 1 in 100 year flood or any other area determined by the floodplain management authority.

To ensure that development maintains the free passage and temporary storage of floodwaters, minimises flood damage, is compatible with the flood hazard and local drainage conditions and will not cause any significant rise in flood level or flow velocity.

To reflect any declaration under Division 4 of Part 10 of the Water Act, 1989 where a declaration has been made.

To protect water quality in accordance with the provisions of relevant State Environment Protection Policies, particularly in accordance with Clauses 33 and 35 of the State Environment Protection Policy (Waters of Victoria).

To ensure that development maintains or improves river and wetland health, waterway protection and floodplain health.

Land subject to inundation objectives and statement of risk

A schedule to this overlay may contain:

- Land subject to inundation management objectives to be achieved.
- A statement of risk.

Buildings and works

A permit is required to construct a building or to construct or carry out works, including:

- A fence.
- Roadworks, if the water flow path is redirected or obstructed.
- Bicycle pathways and trails.
- Public toilets.
- A domestic swimming pool or spa and associated mechanical and safety equipment if associated with one dwelling on a lot.
- Rainwater tank with a capacity of not more than 10,000 litres.
- A pergola or verandah, including an open-sided pergola or verandah to a dwelling with a finished floor level not more than 800mm above ground level and a maximum building height of 3 metres above ground level.
- A deck, including a deck to a dwelling with a finished floor level not more than 800mm above ground level.
- A non-domestic disabled access ramp.
- A dependent person’s unit.

This does not apply:

- If a schedule to this overlay specifically states that a permit is not required.
- To flood mitigation works carried out by the responsible authority or floodplain management authority.
To the following works in accordance with plans prepared to the satisfaction of the responsible authority:

- The laying of underground sewerage, water and gas mains, oil pipelines, underground telephone lines and underground power lines provided they do not alter the topography of the land.
- The erection of telephone or power lines provided they do not involve the construction of towers or poles.

- To post and wire and post and rail fencing.

44.04-3

Subdivision

A permit is required to subdivide land.

44.04-4

Application requirements

An application must be accompanied by any information specified in a schedule to this overlay.

44.04-5

Local floodplain development plan

If a local floodplain development plan has been developed for the area and has been incorporated into this scheme, an application must be consistent with the plan.

44.04-6

Exemption from notice and review

An application under this overlay is exempt from the notice requirements of section 52(1)(a), (b) and (d), the decision requirements of section 64(1), (2) and (3) and the review rights of section 82(1) of the Act.

44.04-7

Referral of applications

An application must be referred to the relevant floodplain management authority under Section 55 of the Act unless in the opinion of the responsible authority, the proposal satisfies requirements or conditions previously agreed in writing between the responsible authority and the floodplain management authority.

44.04-8

Decision guidelines

Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

- Any local floodplain development plan.
- Any comments from the relevant floodplain management authority.
- The existing use and development of the land.
- Whether the proposed use or development could be located on flood-free land or land with a lesser flood hazard outside this overlay.
- The susceptibility of the development to flooding and flood damage.
- The potential flood risk to life, health and safety associated with the development. Flood risk factors to consider include:
  - The frequency, duration, extent, depth and velocity of flooding of the site and accessway.
  - The flood warning time available.
- The danger to the occupants of the development, other floodplain residents and emergency personnel if the site or accessway is flooded.

- The effect of the development on redirecting or obstructing floodwater, stormwater or drainage water and the effect of the development on reducing flood storage and increasing flood levels and flow velocities.

- The effect of the development on river health values including wetlands, natural habitat, stream stability, erosion, environmental flows, water quality and sites of scientific significance.

- Any other matters specified in a schedule to this overlay.
SCHEDULE TO THE LAND SUBJECT TO INUNDATION OVERLAY

Shown on the planning scheme map as LSIO.

1.0

Permit requirement

A permit is not required to construct or carry out the following:

Buildings
- A single non-habitable building with a floor area less than 200 square metres
- An extension to an existing habitable building.

Works
- Earthworks that do not raise ground level topography by more than 300 millimetres.
- A protective levee bank around the immediate surrounds of a habitable dwelling.
- Earthworks greater than 300 millimetres in height created during the construction of a dam of less than 3000 cubic metres capacity.
**BUSHFIRE MANAGEMENT OVERLAY**

Shown on the planning scheme map as BMO with a number (if shown).

**Purpose**

To implement the Municipal Planning Strategy and the Planning Policy Framework.

To ensure that the development of land prioritises the protection of human life and strengthens community resilience to bushfire.

To identify areas where the bushfire hazard warrants bushfire protection measures to be implemented.

To ensure development is only permitted where the risk to life and property from bushfire can be reduced to an acceptable level.

---

**Bushfire management objectives and application of schedules**

A schedule to this overlay must contain a statement of the bushfire management objectives to be achieved for the area affected by the schedule and when the requirements within it apply.

---

**Permit requirement**

**Subdivision**

A permit is required to subdivide land. This does not apply if a schedule to this overlay specifically states that a permit is not required.

**Buildings and works**

A permit is required to construct a building or construct or carry out works associated with the following uses:

- Accommodation (including a Dependent person’s unit)
- Child care centre
- Education centre
- Hospital
- Industry
- Leisure and Recreation
- Office
- Place of assembly
- Retail premises
- Service station
- Timber production
- Warehouse

This does not apply to any of the following:

- If a schedule to this overlay specifically states that a permit is not required.
- A building or works consistent with an agreement under Section 173 of the Act prepared in accordance with a condition of permit issued under the requirements of Clause 44.06-5.
- An alteration or extension to an existing building used for a dwelling or a dependent person’s unit that is less than 50 percent of the gross floor area of the existing building.
- An alteration or extension to an existing building (excluding a dwelling and a dependent person’s unit) that is less than 10 percent of the gross floor area of the existing building.

- A building or works with a floor area of less than 100 square metres not used for accommodation and ancillary to a dwelling.

- A building or works associated with Timber production provided the buildings or works are not within 150 metres of Accommodation or land zoned for residential or rural residential purposes.

### Application requirements

Unless a schedule to this overlay specifies different requirements, an application must be accompanied by:

- A **bushfire hazard site assessment** including a plan that describes the bushfire hazard within 150 metres of the proposed development. The description of the hazard must be prepared in accordance with Sections 2.2.3 to 2.2.5 of AS3959:2009 Construction of buildings in bushfire prone areas (Standards Australia) excluding paragraph (a) of section 2.2.3.2. Photographs or other techniques may be used to assist in describing the bushfire hazard.

- A **bushfire hazard landscape assessment** including a plan that describes the bushfire hazard of the general locality more than 150 metres from the site. Photographs or other techniques may be used to assist in describing the bushfire hazard. This requirement does not apply to a dwelling that includes all of the approved measures specified in Clause 53.02-3.

- A **bushfire management statement** describing how the proposed development responds to the requirements in this clause and Clause 53.02. If the application proposes an alternative measure, the bushfire management statement must explain how the alternative measure meets the relevant objective.

If in the opinion of the responsible authority any part of these requirements is not relevant to the assessment of an application, the responsible authority may waive, vary or reduce the requirement.

### Requirements of Clause 53.02

An application must meet the requirements of Clause 53.02 unless the application meets all of the requirements specified in a schedule to this overlay.

A schedule to this overlay may specify substitute approved measures, additional alternative measures and additional or substitute decision guidelines for the purposes of Clause 53.02.

### Mandatory condition

**Subdivision**

A permit which creates a lot for a single dwelling on land zoned for residential or rural residential purposes must include the following condition:

“Before the statement of compliance is issued under the Subdivision Act 1988 the owner must enter into an agreement with the responsible authority under Section 173 of the Planning and Environment Act 1987. The agreement must:

- State that it has been prepared for the purpose of an exemption from a planning permit under Clause 44.06-2 of the [insert name of applicable planning scheme] Planning Scheme.

- Incorporate the plan prepared in accordance with Clause 53.02-4.4 of this planning scheme and approved under this permit.

- State that if a dwelling is constructed on the land without a planning permit that the bushfire protection measures set out in the plan incorporated into the agreement must be implemented and maintained to the satisfaction of the responsible authority on a continuing basis.”
The land owner must pay the reasonable costs of the preparation, execution and registration of the Section 173 Agreement.”

This does not apply:

- If a schedule to this overlay specifies that a Section 173 Agreement is not required.
- Where the relevant fire authority states in writing the preparation of an agreement under Section 173 of the Act is not required for the subdivision.
- For the subdivision of the land into lots each containing an existing dwelling or car parking space.

A permit to subdivide land must include any condition specified in a schedule to this overlay.

Buildings and works

A permit to construct a building or construct or carry out works must include the following condition:

“The bushfire protection measures forming part of this permit or shown on the endorsed plans, including those relating to construction standards, defendable space, water supply and access, must be maintained to the satisfaction of the responsible authority on a continuing basis. This condition continues to have force and effect after the development authorised by this permit has been completed.”

A permit allowing a dwelling to be constructed to the next lower bushfire attack level in accordance with AM1.2 in Clause 53.02-3 must include the following condition:

“Before the development starts, the owner must enter into an agreement with the responsible authority under section 173 of the Planning and Environment Act 1987 to provide for the following:

- A dwelling constructed in accordance with planning permit [*insert planning permit reference] must not be occupied until a private bushfire shelter (a Class 10c building within the meaning of the Building Regulations 2006) is:
  - Constructed on the same land as the dwelling.
  - Available for use by the occupants of the dwelling at all times.
  - Maintained in accordance with the requirements of the building permit issued for that private bushfire shelter.

The land owner must pay the reasonable costs of the preparation, execution and registration of the Section 173 Agreement.”

A permit to construct a building or construct or carry out works must include any condition specified in a schedule to this overlay.

Referral of applications

An application must be referred under Section 55 of the Act to the person or body specified as the referral authority in Clause 66.03, unless a schedule to this overlay specifies otherwise.

Notice and review

An application is exempt from the notice requirements of section 52(1)(a), (b) and (d), the decision requirements of section 64(1), (2) and (3) and the review rights of section 82(1) of the Act, unless a schedule to this overlay specifies otherwise.

A schedule to this overlay may specify that notice be given to any person or body in accordance with section 52(1)(c) of the Act.
Decision guidelines

Before deciding on an application, in addition to the decision guidelines in Clause 53.02 and Clause 65, the responsible authority must consider, as appropriate:

- Any other matters specified in a schedule to this overlay.

Transitional arrangements

The requirements of Clause 44.06 Bushfire Management Overlay do not apply to a single dwelling, or a dependent person's unit, when a permit under the Building Act 1993 was issued before the commencement of Amendment GC13, if:

- vegetation is managed to accord with the bushfire attack level assessment undertaken at the time the building permit was issued; and
- a static water supply of:
  - 2500 litres on lots of 500 square metres or less
  - 5000 litres on lots of more than 500 square metres, is provided to the satisfaction of the responsible authority.
- no permit was required for such development under Clause 44.06 before the commencement of Amendment GC13.
OTHER OVERLAYS
PUBLIC ACQUISITION OVERLAY

Shown on the planning scheme map as \textbf{PAO} with a number.

\textbf{Purpose}

To implement the Municipal Planning Strategy and the Planning Policy Framework.

To identify land which is proposed to be acquired by a Minister, public authority or municipal council.

To reserve land for a public purpose and to ensure that changes to the use or development of the land do not prejudice the purpose for which the land is to be acquired.

To designate a Minister, public authority or municipal council as an acquiring authority for land reserved for a public purpose.

\textbf{Permit required}

A permit is required to:

\begin{itemize}
  \item Use land for any Section 1 or Section 2 use in the zone.
  \item Construct a building or construct or carry out works, including:
    \begin{itemize}
      \item A domestic swimming pool or spa and associated mechanical and safety equipment if associated with one dwelling on a lot.
      \item A pergola or verandah, including an open-sided pergola or verandah to a dwelling with a finished floor level not more than 800mm above ground level and a maximum building height of 3 metres above ground level.
      \item A deck, including a deck to a dwelling with a finished floor level not more than 800mm above ground level.
    \end{itemize}
  \item Damage, demolish or remove a building or works.
  \item Damage, remove, destroy or lop any vegetation. This does not apply:
    \begin{itemize}
      \item If the vegetation has been planted for pasture, timber production or any other crop.
      \item To any action which is necessary to keep the whole or any part of a tree clear of an electric line provided the action is carried out in accordance with a code of practice prepared under Section 86 of the \textit{Electricity Safety Act 1998}.
      \item If the vegetation presents an immediate risk of personal injury or damage to property.
    \end{itemize}
  \item Subdivide land.
\end{itemize}

This does not apply:

\begin{itemize}
  \item To the acquiring authority for the land if the land has been acquired and any of the above matters for which a permit is required is consistent with the purpose for which the land was acquired.
  \item To an authority or a municipal council if the responsible authority, after consulting with the acquiring authority for the land, is satisfied that any of the above matters for which a permit is required is consistent with the purpose for which the land is to be acquired.
\end{itemize}

\textbf{Exemption from notice and review}

An application under this overlay is exempt from the notice requirements of section 52(1)(a), (b) and (d), the decision requirements of section 64(1), (2) and (3) and the review rights of section 82(1) of the Act.
**Referral of applications**

An application must be referred under Section 55 of the Act to the acquiring authority for the land.

**Decision guidelines**

Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

- The effect of the proposed use or development on the purpose for which the land is to be acquired as specified in the schedule to this overlay.

A permit granted under this clause may be conditional on:

- The extent of alterations and extensions to an existing building and works, and the materials that may be used.
- The location, dimensions, design and material or a new building or works.
- The demolition, removal or alteration of any buildings or works.
- The demolition or removal of buildings or works constructed or carried out in accordance with a permit under this clause.
- No compensation being payable for the demolition or removal of any buildings or works constructed under the permit.

**Land not to be spoiled or wasted**

Land must not be spoiled or wasted so as to adversely affect the use of the land for the purpose for which it is to be acquired.

**Reservation for public purpose**

Any land included in a Public Acquisition Overlay is reserved for a public purpose within the meaning of the *Planning and Environment Act 1987*, the *Land Acquisition and Compensation Act 1986* or any other act.

**Acquiring authority**

An acquiring authority is the Minister, public authority or municipal council specified in the schedule to this overlay as the acquiring authority for the land.

45.02
AIRPORT ENVIRONS OVERLAY
Shown on the planning scheme map as AEO with a number.

Purpose
To implement the Municipal Planning Strategy and the Planning Policy Framework.
To identify areas which are or will be subject to high levels of aircraft noise, including areas where
the use of land for uses sensitive to aircraft noise will need to be restricted.
To ensure that land use and development are compatible with the operation of airports in accordance
with the appropriate airport strategy or master plan and with safe air navigation for aircraft
approaching and departing the airfield.
To assist in shielding people from the impact of aircraft noise by requiring appropriate noise
attenuation measures in new dwellings and other noise sensitive buildings.
To limit the number of people residing in the area or likely to be subject to significant levels of
aircraft noise.

45.02-1
Use of land
Any requirement in a schedule to this overlay must be met.

45.02-2
Construction of buildings
Any new building must be constructed so as to comply with any noise attenuation measures required
by Section 3 of Australian Standard AS 2021-2015, Acoustics - Aircraft Noise Intrusion - Building
Siting and Construction, issued by Standards Australia Limited.

Note: In Section 3 of Australian Standard AS 2021-2015, Table 3.3 refers to both building types and activities
within those buildings. Each building type listed has its ordinary meaning and should not be interpreted as
defined in this scheme.

45.02-3
Subdivision
A permit is required to subdivide land.
An application to subdivide land must be referred to the airport owner under Section 55 of the Act
unless in the opinion of the responsible authority the proposal satisfies requirements or conditions
previously agreed in writing between the responsible authority and the airport owner.

45.02-4
Exemption from notice and review
An application under this overlay is exempt from the notice requirements of section 52(1)(a), (b)
and (d), the decision requirements of section 64(1), (2) and (3) and the review rights of section
82(1) of the Act.

45.02-5
Decision guidelines
Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible
authority must consider, as appropriate:

- Whether the proposal will result in an increase in the number of dwellings and people affected
  by aircraft noise.
- Whether the proposal is compatible with the present and future operation of the airport in
  accordance with the appropriate airport strategy or master plan.
- Whether the design of the building incorporates appropriate noise attenuation measures.
- The views of the airport owner.
SCHEDULE 2 TO THE AIRPORT ENVIRONS OVERLAY

Shown on the planning scheme map as AEO2.

1.0 Requirements

An application to use land for the following uses must be referred to the airport owner under Section 55 of the Act unless in the opinion of the responsible authority the proposal satisfies requirements or conditions previously agreed in writing between the responsible authority and the airport owner:

- Accommodation.
- Art and craft centre.
- Child care centre.
- Display home.
- Education centre.
- Hospital.
- Hotel.
- Office.
- Place of assembly.
- Research and development centre.
- Research centre.
- Restricted recreation facility.
- Tavern.
ENVIRONMENTAL AUDIT OVERLAY

Shown on the planning scheme map as EAO.

Purpose
To implement the Municipal Planning Strategy and the Planning Policy Framework.
To ensure that potentially contaminated land is suitable for a use which could be significantly adversely affected by any contamination.

Requirement
Before a sensitive use (residential use, child care centre, pre-school centre or primary school) commences or before the construction or carrying out of buildings and works in association with a sensitive use commences, either:

- A certificate of environmental audit must be issued for the land in accordance with Part IXD of the Environment Protection Act 1970, or
- An environmental auditor appointed under the Environment Protection Act 1970 must make a statement in accordance with Part IXD of that Act that the environmental conditions of the land are suitable for the sensitive use.
PARTICULAR PROVISIONS

This section sets out Particular Provisions which apply to the matters specified.
PROVISIONS THAT APPLY ONLY TO A SPECIFIED AREA
SPECIFIC SITES AND EXCLUSIONS

Purpose

To recognise specific controls designed to achieve a particular land use and development outcome existing on the approval date.

To provide in extraordinary circumstances specific controls designed to achieve a particular land use and development outcome.

Use or development

Land identified in the schedule to this clause may be used or developed in accordance with the specific controls contained in the incorporated document corresponding to that land. The specific controls may:

- allow the land to be used or developed in a manner that would otherwise be prohibited or restricted;
- prohibit or restrict the use or development of the land beyond the controls that may otherwise apply;
- exclude any other control in this scheme.

Expiry of a specific control

If a specific control contained in an incorporated document identified in the schedule to this clause allows a particular use or development, that control will expire if any of the following circumstances applies:

- The development and use is not started within two years of the approval date or another date specified in the incorporated document.
- The development is not completed within one year of the date of commencement of works or another date specified in the incorporated document.

The responsible authority may extend the periods referred to if a request is made in writing before the expiry date or within three months afterwards.

Upon expiry of the specific control, the land may be used and developed only in accordance with the provisions of this scheme.

</table>
PROVISIONS THAT REQUIRE, ENABLE OR EXEMPT A PERMIT
EASEMENTS, RESTRICTIONS AND RESERVES

Purpose
To enable the removal and variation of an easement or restriction to enable a use or development that complies with the planning scheme after the interests of affected people are considered.

Permit requirement
A permit is required before a person proceeds:
- Under Section 23 of the Subdivision Act 1988 to create, vary or remove an easement or restriction or vary or remove a condition in the nature of an easement in a Crown grant.
- Under Section 36 of the Subdivision Act 1988 to acquire or remove an easement or remove a right of way.

This does not apply:
- If the action is required or authorised by the schedule to this clause.
- In the circumstances set out in Section 6A(3) of the Planning and Environment Act 1987.
- If the person proceeds under Section 362A of the Land Act 1958.
- In the case of a person proceeding under Section 36 of the Subdivision Act 1988, if the council or a referral authority gives a written statement in accordance with Section 36(1)(a) or (b) of the Subdivision Act 1988.

In this clause, restriction has the same meaning as in the Subdivision Act 1988.

Decision guidelines
Before deciding on an application, in addition to the decision guidelines in clause 65, the responsible authority must consider the interests of affected people.

Note: Section 23 of the Subdivision Act 1988 provides that either the council or the person benefiting from the direction must lodge a certified plan at the Titles Office for registration.

SATELLITE DISH

Purpose
To provide an opportunity to consider the impact of a satellite dish attached to a building or structure listed in a schedule to the Heritage Overlay.
To provide an opportunity to consider the effect of a satellite dish on the amenity of residential areas.

Application
This clause applies to:

- A building or structure listed in a schedule to the Heritage Overlay.
- Land in a Neighbourhood Residential Zone, General Residential Zone, Residential Growth Zone, Low Density Residential Zone, Mixed Use Zone or Township Zone.

Permit requirement
A permit is required to use land or to construct or install or carry out works for a satellite dish (whether or not it forms part of a network) even if it is ancillary to another use on the land.

This does not apply to a satellite dish with a diameter:

- Less than 1.2 metres.
- Between 1.2 metres and 2.4 metres provided:
  - The dish is not visible from the street (other than a lane) or a public park,
  - The dish is setback from the side or rear boundary 1 metre, plus 0.3 metres for every metre of height over 3.6 metres up to 6.9 metres, plus 1 metre for every metre of height over 6.9 metres, and
  - The dish is setback at least 3 metres from the boundary where it is opposite an existing habitable room window.

Decision guidelines
Before deciding on an application, in addition to Clause 15.01-2S and the decision guidelines in clause 65, the responsible authority must consider the effect of the satellite dish on the visual amenity of nearby land.
SIGNs

Purpose
To regulate the development of land for signs and associated structures.
To ensure signs are compatible with the amenity and visual appearance of an area, including the existing or desired future character.
To ensure signs do not contribute to excessive visual clutter or visual disorder.
To ensure that signs do not cause loss of amenity or adversely affect the natural or built environment or the safety, appearance or efficiency of a road.

Application
This clause applies to the development of land for signs.

Requirements
Sign categories
Clauses 52.05-11 to 52.05-14 specify categories of sign control. The zone provisions specify which category of sign control applies to the zone.
Each category is divided into three sections.
If a sign can be interpreted in more than one way, the most restrictive requirement must be met.

Section 1
A sign in Section 1 of the category may be constructed or put up for display without a permit, but all the conditions opposite the sign must be met. If the conditions are not met, the sign is in Section 2.
Some overlays require a permit for Section 1 signs.

Section 2
A permit is required to construct or put up for display a sign in Section 2.
This does not apply to a sign specified in Clause 52.05-10.
All the conditions opposite the sign must be met. If the conditions are not met, the sign is prohibited.

Section 3
A sign in Section 3 is prohibited and must not be constructed or put up for display.

VicSmart applications
Subject to Clause 71.06, an application under this clause for a development specified in Column 1 is a class of VicSmart application and must be assessed against the provision specified in Column 2.

<table>
<thead>
<tr>
<th>Class of application</th>

<td>Clause 59.09</td>
</tr>
</tbody>
</table>
  - The sign is not within 30 metres of land (not a road) which is in a residential zone. |
Information requirements and decision guidelines

Class of application

- The sign is not a pole sign, a sky sign, a reflective sign, internally illuminated sign, floodlit sign, electronic sign or animated sign.
- The display area of the sign does not exceed 10 square metres.

Referral of applications

An application to construct or put up for display an animated or electronic sign within 60 metres of a freeway or arterial road declared under the Road Management Act 2004 must be referred in accordance with section 55 of the Act to the referral authority specified in Clause 66.03 or a schedule to that clause.

Expiry of permits

A permit for a sign other than a major promotion sign expires on the date specified in the permit. If no date is specified, the expiry date is 15 years from the date of issue of the permit.

Existing signs

A sign that was lawfully displayed on the approval date or that was being constructed or put up for display on that date may be displayed or continue to be displayed and may be repaired and maintained.

The content of a lawfully displayed sign may be renewed or replaced. However, a permit is required if:
- The display area is to be increased.
- The renewal or replacement would result in a different type of sign.

A major promotion sign displayed in accordance with a permit granted between 19 September 1995 and 18 September 1997 may continue to be displayed:
- until 31 December 2008; or
- where a permit application seeking permission to display the sign is lodged before 31 December 2008, until the permit application is finally determined.

Application requirements

An application must be accompanied by the following information, as appropriate:

Site context

- A site context report, using a site plan, photographs or other methods to accurately describe:
  - The location of the proposed sign on the site or building and distance from property boundaries.
  - The location and size of existing signage on the site including details of any signs to be retained or removed.
  - The location and form of existing signage on abutting properties and in the locality.
  - The location of closest traffic control signs.
  - Identification of any view lines or vistas that could be affected by the proposed sign.
Sign details
- The location, dimensions, height above ground level and extent of projection of the proposed sign.
- The height, width, depth of the total sign structure including method of support and any associated structures such as safety devices and service platforms.
- Details of associated on-site works.
- Details of any form of illumination, including details of baffles and the times at which the sign would be illuminated.
- The colour, lettering style and materials of the proposed sign.
- The size of the display (total display area, including all sides of a multi-sided sign).
- The location of any logo box and proportion of display area occupied by such a logo box.
- For animated or electronic signs, a report addressing the decision guidelines at Clause 52.05-8 relating to road safety.
- Any landscaping details.

Signs with a display area of 18 square metres or more
- For a sign with a display area of 18 square metres or more:
  - A description of the existing character of the area including built form and landscapes.
  - The location of any other signs over 18 square metres, or scrolling, electronic or animated signs within 200 metres of the site.
  - Any existing identifiable advertising theme in the area.
  - Photo montages or a streetscape perspective of the proposed sign.
  - Level of illumination including:
    - Lux levels for any sign on or within 60 metres of a Road Zone or a residential zone or public land zone.
    - The dwell and change time for any non-static images.
  - The relationship to any significant or prominent views and vistas.

Exemption from notice and review
An application for a sign is exempt from the notice requirements of section 52(1)(a), (b) and (d), the decision requirements of section 64(1), (2) and (3) and the review rights of section 82(1) of the Act provided the sign:
- Is to be constructed or displayed on land specified in the schedule to this clause.
- Meets any condition specified in the schedule to this clause.

Decision guidelines
Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

All signs
- The character of the area including:
  - The sensitivity of the area in terms of the natural environment, heritage values, waterways and open space, rural landscape or residential character.
- The compatibility of the proposed sign with the existing or desired future character of the area in which it is proposed to be located.
- The cumulative impact of signs on the character of an area or route, including the need to avoid visual disorder or clutter of signs.
- The consistency with any identifiable outdoor advertising theme in the area.

**Impacts on views and vistas:**
- The potential to obscure or compromise important views from the public realm.
- The potential to dominate the skyline.
- The potential to impact on the quality of significant public views.
- The potential to impede views to existing signs.

**The relationship to the streetscape, setting or landscape:**
- The proportion, scale and form of the proposed sign relative to the streetscape, setting or landscape.
- The position of the sign, including the extent to which it protrudes above existing buildings or landscape and natural elements.
- The ability to screen unsightly built or other elements.
- The ability to reduce the number of signs by rationalising or simplifying signs.
- The ability to include landscaping to reduce the visual impact of parts of the sign structure.

**The relationship to the site and building:**
- The scale and form of the sign relative to the scale, proportion and any other significant characteristics of the host site and host building.
- The extent to which the sign displays innovation relative to the host site and host building.
- The extent to which the sign requires the removal of vegetation or includes new landscaping.

**The impact of structures associated with the sign:**
- The extent to which associated structures integrate with the sign.
- The potential of associated structures to impact any important or significant features of the building, site, streetscape, setting or landscape, views and vistas or area.

**The impact of any illumination:**
- The impact of glare and illumination on the safety of pedestrians and vehicles.
- The impact of illumination on the amenity of nearby residents and the amenity of the area.
- The potential to control illumination temporally or in terms of intensity.

**The impact of any logo box associated with the sign:**
- The extent to which the logo box forms an integral part of the sign through its position, lighting and any structures used to attach the logo box to the sign.
- The suitability of the size of the logo box in relation to its identification purpose and the size of the sign.

**The need for identification and the opportunities for adequate identification on the site or locality.**

**The impact on road safety. A sign is a safety hazard if the sign:**
- Obstructs a driver’s line of sight at an intersection, curve or point of egress from an adjacent property.
- Obstructs a driver’s view of a traffic control device, or is likely to create a confusing or dominating background that may reduce the clarity or effectiveness of a traffic control device.
- Could dazzle or distract drivers due to its size, design or colouring, or it being illuminated, reflective, animated or flashing.
- Is at a location where particular concentration is required, such as a high pedestrian volume intersection.
- Is likely to be mistaken for a traffic control device, because it contains red, green or yellow lighting, or has red circles, octagons, crosses, triangles or arrows.
- Requires close study from a moving or stationary vehicle in a location where the vehicle would be unprotected from passing traffic.
- Invites drivers to turn where there is fast moving traffic or the sign is so close to the turning point that there is no time to signal and turn safely.
- Is within 100 metres of a rural railway crossing.
- Has insufficient clearance from vehicles on the carriageway.
- Could mislead drivers or be mistaken as an instruction to drivers.

**Major promotion signs**

- The effect of the proposed major promotion sign on:
  - Significant streetscapes, buildings and skylines.
  - The visual appearance of a significant view corridor, viewline, gateway location or landmark site identified in a framework plan or local policy.
  - Residential areas and heritage places.
  - Open space and waterways.

- When determining the effect of a proposed major promotion sign, the following locational principles must be taken into account:
  - Major promotion signs are encouraged in commercial and industrial locations in a manner that complements or enhances the character of the area.
  - Major promotion signs are discouraged along forest and tourist roads, scenic routes or landscaped sections of freeways.
  - Major promotion signs are discouraged within open space reserves or corridors and around waterways.
  - Major promotion signs are discouraged where they will form a dominant visual element from residential areas, within a heritage place or where they will obstruct significant viewlines.
  - In areas with a strong built form character, major promotion signs are encouraged only where they are not a dominant element in the streetscape and except for transparent feature signs (such as neon signs), are discouraged from being erected on the roof of a building.
Mandatory conditions

All signs

A permit for a sign that includes an expiry date must include a condition that provides that on expiry of the permit the sign and structures built specifically to support and illuminate it must be removed.

Major promotion signs

A permit for a major promotion sign must include conditions that specify:

- That the sign must not:
  - Dazzle or distract drivers due to its colouring.
  - Be able to be mistaken for a traffic signal because it has, for example, red circles, octagons, crosses or triangles.
  - Be able to be mistaken as an instruction to drivers.

- An expiry date that is 15 years from the date the permit is issued unless otherwise specified in this clause. This does not apply to a permit for major promotion sign for a special event or temporary building shrouding.

A permit for a major promotion sign may specify an expiry date other than 15 years, but the date must not be less than 10 years or more than 25 years from the date the permit is issued. Before deciding to alter the specified expiry date of 15 years, the responsible authority must consider, as appropriate:

- The purpose of the sign.
- The existing or desired character of the area.
- The Municipal Planning Strategy and the Planning Policy Framework in terms of the extent to which the proposed sign is consistent with any relevant policy direction and the extent to which the area may be expected to change over time.
- The extent to which the signage is physically and visually integrated into the architecture of the building.

Signs not requiring a permit

Despite any provision in a zone, overlay, or other particular provision of this scheme, a permit is not required to construct or put up for display any of the following signs:

- A sign identifying the functions or property of a government department, public authority or municipal council, but not a promotion sign displayed at the direction of any of these bodies.
- A sign controlling traffic on a public road, railway, tramway, water or in the air, provided it is displayed at the direction of a government department, public authority or municipal council.
- A sign at a hospital that gives direction to emergency facilities.
- A sign in a road reserve that gives direction or guidance about a tourist attraction, service or facility of interest to road users. The sign must be displayed to the satisfaction of the road authority.
- A sign required by statute or regulation, provided it is strictly in accordance with the requirement.
- A sign at a railway station or bus terminal that provides information or direction for people using the station or terminal.
- A sign on a showground, on a motor racing track or on a major sports and recreation facility, provided the sign’s display cannot be seen from nearby land.
A sign with a display area not exceeding 1 square metre to each premises that provides information about a place of worship. It must not be an animated or internally illuminated sign.

A sign inside a building that cannot generally be seen outside.

A sign with a display area not exceeding 2 square metres concerning construction work on the land. Only one sign may be displayed, it must not be an animated or internally illuminated sign and it must be removed when the work is completed.

A sign with a display area not exceeding 5 square metres publicising a local educational, cultural, political, religious, social or recreational event not held for commercial purposes. Only one sign may be displayed on the land, it must not be an animated or internally illuminated sign and it must not be displayed longer than 14 days after the event is held or 3 months, whichever is sooner. A sign publicising a local political event may include information about a candidate for an election.

A sign publicising a special event on the land or in the building on which it is displayed, provided no more than 8 signs are displayed in a calendar year and the total number of days the signs are displayed does not exceed 28 in that calendar year. The sign must be removed when the event is finished.

A sign with a display area not exceeding 2 square metres publicising the sale of goods or livestock on the land or in the building on which it is displayed, provided the land or building is not normally used for that purpose. Only one sign may be displayed, it must not be an animated or internally illuminated sign and it must not be displayed longer than 3 months without a permit.

A sign with an display area not exceeding 10 square metres publicising the sale or letting of the property on which it is displayed. Only one sign may be displayed, it must not be an animated sign and it must not be displayed longer than 7 days after the sale date. A permit may be granted for:

- The display area to exceed 10 square metres if the sign concerns more than 20 lots.
- The sign to be displayed on land excised from the subdivision and transferred to the municipal council.
- The sign to be displayed longer than 7 days after the sale date.

No permit is required to fly the Australian flag or to display the flag on a building, painted or otherwise represented, provided it is correctly dimensioned and coloured in accordance with the Flags Act 1953.

### Category 1 - Commercial areas

Minimum limitation

#### Purpose

To provide for identification and promotion signs and signs that add vitality and colour to commercial areas.

CAR PARKING

Purpose
To ensure that car parking is provided in accordance with the Municipal Planning Strategy and the Planning Policy Framework.
To ensure the provision of an appropriate number of car parking spaces having regard to the demand likely to be generated, the activities on the land and the nature of the locality.
To support sustainable transport alternatives to the motor car.
To promote the efficient use of car parking spaces through the consolidation of car parking facilities.
To ensure that car parking does not adversely affect the amenity of the locality.
To ensure that the design and location of car parking is of a high standard, creates a safe environment for users and enables easy and efficient use.

Scope
Clause 52.06 applies to:

- a new use;
or
- an increase in the floor area or site area of an existing use;
or
- an increase to an existing use by the measure specified in Column C of Table 1 in Clause 52.06-5 for that use.

Clause 52.06 does not apply to:

- the extension of one dwelling on a lot in the Neighbourhood Residential Zone, General Residential Zone, Residential Growth Zone, Mixed Use Zone or Township Zone;
or
- the construction and use of one dwelling on a lot in the Neighbourhood Residential Zone, General Residential Zone, Residential Growth Zone, Mixed Use Zone or Township Zone unless the zone or a schedule to the zone specifies that a permit is required to construct or extend one dwelling on a lot.

Provision of car parking spaces
Before:

- a new use commences;
or
- the floor area or site area of an existing use is increased;
or
- an existing use is increased by the measure specified in Column C of Table 1 in Clause 52.06-5 for that use,

the number of car parking spaces required under Clause 52.06-5 or in a schedule to the Parking Overlay must be provided to the satisfaction of the responsible authority in one or more of the following ways:

- on the land;
or
- in accordance with a permit issued under Clause 52.06-3;
or
- in accordance with a financial contribution requirement specified in a schedule to the Parking Overlay.

If a schedule to the Parking Overlay specifies a maximum parking provision, the maximum provision must not be exceeded except in accordance with a permit issued under Clause 52.06-3.

Permit requirement
A permit is required to:
Reduce (including reduce to zero) the number of car parking spaces required under Clause 52.06-5 or in a schedule to the Parking Overlay.

Provide some or all of the car parking spaces required under Clause 52.06-5 or in a schedule to the Parking Overlay on another site.

Provide more than the maximum parking provision specified in a schedule to the Parking Overlay.

A permit is not required if a schedule to the Parking Overlay specifies that a permit is not required under this clause.

A permit is not required to reduce the number of car parking spaces required for a new use of land if the following requirements are met:

- The number of car parking spaces required under Clause 52.06-5 or in a schedule to the Parking Overlay for the new use is less than or equal to the number of car parking spaces required under Clause 52.06-5 or in a schedule to the Parking Overlay for the existing use of the land.

- The number of car parking spaces currently provided in connection with the existing use is not reduced after the new use commences.

A permit is not required to reduce the required number of car parking spaces for a new use of an existing building if the following requirements are met:

- The building is in the Commercial 1 Zone, Commercial 2 Zone, Commercial 3 Zone or Activity Centre Zone.

- The gross floor area of the building is not increased.

- The reduction does not exceed 10 car parking spaces.

- The building is not in a Parking Overlay with a schedule that allows a financial contribution to be paid in lieu of the provision of the required car parking spaces for the use.

**VicSmart applications**

Subject to Clause 71.06, an application under this clause to reduce the required number of car parking spaces by no more than 10 car parking spaces is a class of VicSmart application and must be assessed against Clause 59.10.

**Exemption from notice and review**

An application under Clause 52.06-3 is exempt from the notice requirements of section 52(1)(a), (b) and (d), the decision requirements of section 64(1), (2) and (3) and the review rights of section 82(1) of the Act if:

- the application is only for a permit under Clause 52.06-3; or

- the application is also for a permit under another provision of the planning scheme and in respect of all other permissions sought, the application is exempt from the notice requirements of Section 52(1)(a), (b) and (d), the decision requirements of Section 64(1), (2) and (3) and the review rights of Section 82(1) of the Act.

**Number of car parking spaces required under Table 1**

Table 1 of this clause sets out the car parking requirement that applies to a use listed in the Table. A car parking requirement in Table 1 may be calculated as either:

- a number of car parking spaces; or

- a percentage of the total site area that must be set aside for car parking.
A car parking requirement in Table 1 is calculated by multiplying the figure in Column A or Column B (whichever applies) by the measure (for example square metres, number of patrons or number of bedrooms) in Column C.

Column A applies unless Column B applies.

Column B applies if:

- any part of the land is identified as being within the Principal Public Transport Network Area as shown on the Principal Public Transport Network Area Maps (State Government of Victoria, August 2018); or
- a schedule to the Parking Overlay or another provision of the planning scheme specifies that Column B applies.

Where an existing use is increased by the measure specified in Column C of Table 1 for that use, the car parking requirement only applies to the increase, provided the existing number of car parking spaces currently being provided in connection with the existing use is not reduced.

If in calculating the number of car parking spaces the result is not a whole number, the required number of car parking spaces is to be rounded down to the nearest whole number.

Where the car parking requirement specified in Table 1 is calculated as a percentage of the total site area, the area to be provided for car parking includes an accessway that directly abuts any car parking spaces, but does not include any accessway or portion of an accessway that does not directly abut any car parking spaces.

The car parking requirement specified in Table 1 includes disabled car parking spaces. The proportion of spaces to be allocated as disabled spaces must be in accordance with Australian Standard AS2890.6-2009 (disabled) and the Building Code of Australia.

The car parking requirement specified for a use listed in Table 1 does not apply if:

- a car parking requirement for the use is specified under another provision of the planning scheme; or
- a schedule to the Parking Overlay specifies the number of car parking spaces required for the use.

**Number of car parking spaces required for other uses**

Where a use of land is not specified in Table 1 or where a car parking requirement is not specified for the use in another provision of the planning scheme or in a schedule to the Parking Overlay, before a new use commences or the floor area or site area of an existing use is increased, car parking spaces must be provided to the satisfaction of the responsible authority. This does not apply to the use of land for a temporary portable land sales office located on the land for sale.

**Application requirements and decision guidelines for permit applications**

For applications to reduce the car parking requirement

An application to reduce (including reduce to zero) the number of car parking spaces required under Clause 52.06-5 or in a schedule to the Parking Overlay must be accompanied by a Car Parking Demand Assessment.

The Car Parking Demand Assessment must assess the car parking demand likely to be generated by the proposed:

- new use; or
- increase in the floor areas or site area of the existing use; or
- increase to the existing use by the measure specified in Column C of Table 1 in Clause 52.06-5 for that use.

The Car Parking Demand Assessment must address the following matters, to the satisfaction of the responsible authority:

- The likelihood of multi-purpose trips within the locality which are likely to be combined with a trip to the land in connection with the proposed use.
- The variation of car parking demand likely to be generated by the proposed use over time.
• The short-stay and long-stay car parking demand likely to be generated by the proposed use.
• The availability of public transport in the locality of the land.
• The convenience of pedestrian and cyclist access to the land.
• The provision of bicycle parking and end of trip facilities for cyclists in the locality of the land.
• The anticipated car ownership rates of likely or proposed visitors to or occupants (residents or employees) of the land.
• Any empirical assessment or case study.

Before granting a permit to reduce the number of spaces, the responsible authority must consider the following, as appropriate:

• The Car Parking Demand Assessment.
• Any relevant local planning policy or incorporated plan.
• The availability of alternative car parking in the locality of the land, including:
  - Efficiencies gained from the consolidation of shared car parking spaces.
  - Public car parks intended to serve the land.
  - On street parking in non residential zones.
  - Streets in residential zones specifically managed for non-residential parking.
• On street parking in residential zones in the locality of the land that is intended to be for residential use.
• The practicality of providing car parking on the site, particularly for lots of less than 300 square metres.
• Any adverse economic impact a shortfall of parking may have on the economic viability of any nearby activity centre.
• The future growth and development of any nearby activity centre.
• Any car parking deficiency associated with the existing use of the land.
• Any credit that should be allowed for car parking spaces provided on common land or by a Special Charge Scheme or cash-in-lieu payment.
• Local traffic management in the locality of the land.
• The impact of fewer car parking spaces on local amenity, including pedestrian amenity and the amenity of nearby residential areas.
• The need to create safe, functional and attractive parking areas.
• Access to or provision of alternative transport modes to and from the land.
• The equity of reducing the car parking requirement having regard to any historic contributions by existing businesses.
• The character of the surrounding area and whether reducing the car parking provision would result in a quality/positive urban design outcome.
• Any other matter specified in a schedule to the Parking Overlay.
• Any other relevant consideration.
For applications to allow some or all of the required car parking spaces to be provided on another site

Before granting a permit to allow some or all of the car parking spaces required under Clause 52.06-5 or in a schedule to the Parking Overlay to be provided on another site, the responsible authority must consider the following, as appropriate:

- The proximity of the car parking on the alternate site to the subject site.
- The likelihood of the long term provision and availability of the car parking spaces.
- Whether the location of the car parking spaces is consistent with any relevant local policy or incorporated plan.
- Any other matter specified in a schedule to the Parking Overlay.

For applications to provide more than the maximum parking provision specified in a schedule to the Parking Overlay

An application to provide more than the maximum parking provision specified in a schedule to the Parking Overlay must be accompanied by a Car Parking Demand Assessment.

The Car Parking Demand Assessment must assess the car parking demand likely to be generated by the proposed use or increase to the existing use.

The Car Parking Demand Assessment must address the following matters, to the satisfaction of the responsible authority:

- The likelihood of multi-purpose trips within the locality which are likely to be combined with a trip to the land in connection with the proposed use.
- The variation of car parking demand likely to be generated by the proposed use over time.
- The short-stay and long-stay car parking demand likely to be generated by the proposed use.
- The availability of public transport in the locality of the land.
- The convenience of pedestrian and cyclist access to the land.
- The provision of bicycle parking and end of trip facilities for cyclists in the locality of the land.
- The anticipated car ownership rates of likely or proposed visitors to or occupants (residents or employees) of the land.
- Any empirical assessment or case study.

Requirement for a car parking plan

Plans must be prepared to the satisfaction of the responsible authority before any of the following occurs:

- a new use commences; or
- the floor area or site area of an existing use is increased; or
- an existing use is increased by the measure specified in Column C of Table 1 in Clause 52.06-5 for that use.

The plans must show, as appropriate:

- All car parking spaces that are proposed to be provided (whether on the land or on other land).
- Access lanes, driveways and associated works.
- Allocation of car parking spaces to different uses or tenancies, if applicable.
- Any landscaping and water sensitive urban design treatments.
- Finished levels, if required by the responsible authority.
Any other matter specified in a schedule to the Parking Overlay. Plans must be provided to the responsible authority under Clause 52.06-8 wherever Clause 52.06 applies, whether or not a permit application is being made under Clause 52.06-3 or any other provision of the planning scheme.

Where an application is being made for a permit under Clause 52.06-3 or another provision of the planning scheme, the information required under Clause 52.06-8 may be included in other plans submitted with the application.

Clause 52.06-8 does not apply where no car parking spaces are proposed to be provided.

### Design standards for car parking

Plans prepared in accordance with Clause 52.06-8 must meet the design standards of Clause 52.06-9, unless the responsible authority agrees otherwise.

Design standards 1, 3, 6 and 7 do not apply to an application to construct one dwelling on a lot.

#### Design standard 1 – Accessways

Accessways must:

- Be at least 3 metres wide.
- Have an internal radius of at least 4 metres at changes of direction or intersection or be at least 4.2 metres wide.
- Allow vehicles parked in the last space of a dead-end accessway in public car parks to exit in a forward direction with one manoeuvre.
- Provide at least 2.1 metres headroom beneath overhead obstructions, calculated for a vehicle with a wheel base of 2.8 metres.
- If the accessway serves four or more car spaces or connects to a road in a Road Zone, the accessway must be designed so that cars can exit the site in a forward direction.
- Provide a passing area at the entrance at least 6.1 metres wide and 7 metres long if the accessway serves ten or more car parking spaces and is either more than 50 metres long or connects to a road in a Road Zone.
- Have a corner splay or area at least 50 per cent clear of visual obstructions extending at least 2 metres along the frontage road from the edge of an exit lane and 2.5 metres along the exit lane from the frontage, to provide a clear view of pedestrians on the footpath of the frontage road. The area clear of visual obstructions may include an adjacent entry or exit lane where more than one lane is provided, or adjacent landscaped areas, provided the landscaping in those areas is less than 900mm in height.

If an accessway to four or more car parking spaces is from land in a Road Zone, the access to the car spaces must be at least 6 metres from the road carriageway.

If entry to the car space is from a road, the width of the accessway may include the road.

#### Design standard 2 – Car parking spaces

Car parking spaces and accessways must have the minimum dimensions as outlined in Table 2.

<table>
<thead>
<tr>
<th>Angle of car parking spaces to access way</th>
<th>Accessway width</th>
<th>Car space width</th>
<th>Car space length</th>
</tr>
</thead>
<tbody>
<tr>
<td>Parallel</td>
<td>3.6 m</td>
<td>2.3 m</td>
<td>6.7 m</td>
</tr>
<tr>
<td>45°</td>
<td>3.5 m</td>
<td>2.6 m</td>
<td>4.9 m</td>
</tr>
</tbody>
</table>
### Table 2: Dimensions of Car Parking Spaces

<table>
<thead>
<tr>
<th>Angle of car parking spaces to access way</th>
<th>Accessway width</th>
<th>Car space width</th>
<th>Car space length</th>
</tr>
</thead>
<tbody>
<tr>
<td>60°</td>
<td>4.9 m</td>
<td>2.6 m</td>

<td>4.9 m</td>
</tr>
<tr>
<td></td>
<td>4.8 m</td>
<td>3.2 m</td>
<td>4.9 m</td>
</tr>
</tbody>
</table>

Note to Table 2: Some dimensions in Table 2 vary from those shown in the Australian Standard AS2890.1-2004 (off street). The dimensions shown in Table 2 allocate more space to aisle widths and less to marked spaces to provide improved operation and access. The dimensions in Table 2 are to be used in preference to the Australian Standard AS2890.1-2004 (off street) except for disabled spaces which must achieve Australian Standard AS2890.6-2009 (disabled).

A wall, fence, column, tree, tree guard or any other structure that abuts a car space must not encroach into the area marked ‘clearance required’ on Diagram 1, other than:

- A column, tree or tree guard, which may project into a space if it is within the area marked ‘tree or column permitted’ on Diagram 1.
- A structure, which may project into the space if it is at least 2.1 metres above the space.

#### Diagram 1 Clearance to car parking spaces

Car spaces in garages or carports must be at least 6 metres long and 3.5 metres wide for a single space and 5.5 metres wide for a double space measured inside the garage or carport.

Where parking spaces are provided in tandem (one space behind the other) an additional 500 mm in length must be provided between each space.

Where two or more car parking spaces are provided for a dwelling, at least one space must be under cover.

Disabled car parking spaces must be designed in accordance with Australian Standard AS2890.6-2009 (disabled) and the Building Code of Australia. Disabled car parking spaces may encroach into an accessway width specified in Table 2 by 500mm.
Design standard 3: Gradients

Accessway grades must not be steeper than 1:10 (10 per cent) within 5 metres of the frontage to ensure safety for pedestrians and vehicles. The design must have regard to the wheelbase of the vehicle being designed for; pedestrian and vehicular traffic volumes; the nature of the car park; and the slope and configuration of the vehicle crossover at the site frontage. This does not apply to accessways serving three dwellings or less.

Ramps (except within 5 metres of the frontage) must have the maximum grades as outlined in Table 3 and be designed for vehicles travelling in a forward direction.

Table 3: Ramp gradients

<table>
<thead>
<tr>
<th>Type of car park</th>
<th>Length of ramp</th>
<th>Maximum grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>Public car parks</td>
<td>20 metres or less</td>
<td>1:5 (20%)</td>
</tr>
<tr>
<td></td>
<td>longer than 20 metres</td>
<td>1:6 (16.7%)</td>
</tr>
<tr>
<td>Private or residential car parks</td>
<td>20 metres or less</td>
<td>1:4 (25%)</td>
</tr>
<tr>
<td></td>
<td>longer than 20 metres</td>
<td>1:5 (20%)</td>
</tr>
</tbody>
</table>

Where the difference in grade between two sections of ramp or floor is greater than 1:8 (12.5 per cent) for a summit grade change, or greater than 1:6.7 (15 per cent) for a sag grade change, the ramp must include a transition section of at least 2 metres to prevent vehicles scraping or bottoming.

Plans must include an assessment of grade changes of greater than 1:5.6 (18 per cent) or less than 3 metres apart for clearances, to the satisfaction of the responsible authority.

Design standard 4: Mechanical parking

Mechanical parking may be used to meet the car parking requirement provided:

- At least 25 per cent of the mechanical car parking spaces can accommodate a vehicle height of at least 1.8 metres.
- Car parking spaces that require the operation of the system are not allocated to visitors unless used in a valet parking situation.
- The design and operation is to the satisfaction of the responsible authority.

Design standard 5: Urban design

Ground level car parking, garage doors and accessways must not visually dominate public space. Car parking within buildings (including visible portions of partly submerged basements) must be screened or obscured where possible, including through the use of occupied tenancies, landscaping, architectural treatments and artworks.

Design of car parks must take into account their use as entry points to the site.

Design of new internal streets in developments must maximise on street parking opportunities.

Design standard 6: Safety

Car parking must be well lit and clearly signed.

The design of car parks must maximise natural surveillance and pedestrian visibility from adjacent buildings.

Pedestrian access to car parking areas from the street must be convenient.

Pedestrian routes through car parking areas and building entries and other destination points must be clearly marked and separated from traffic in high activity parking areas.
Design standard 7: Landscaping

The layout of car parking areas must provide for water sensitive urban design treatment and landscaping.

Landscaping and trees must be planted to provide shade and shelter, soften the appearance of ground level car parking and aid in the clear identification of pedestrian paths.

Ground level car parking spaces must include trees planted with flush grilles. Spacing of trees must be determined having regard to the expected size of the selected species at maturity.

Decision guidelines

Before deciding that a plan prepared under Clause 52.06-8 is satisfactory the responsible authority must consider, as appropriate:

- The role and function of nearby roads and the ease and safety with which vehicles gain access to the site.
- The ease and safety with which vehicles access and circulate within the parking area.
- The provision for pedestrian movement within and around the parking area.
- The provision of parking facilities for cyclists and disabled people.
- The protection and enhancement of the streetscape.
- The provisions of landscaping for screening and shade.
- The measures proposed to enhance the security of people using the parking area particularly at night.
- The amenity of the locality and any increased noise or disturbance to dwellings and the amenity of pedestrians.
- The workability and allocation of spaces of any mechanical parking arrangement.
- The design and construction standards proposed for paving, drainage, line marking, signage, lighting and other relevant matters.
- The type and size of vehicle likely to use the parking area.
- Whether the layout of car parking spaces and access lanes is consistent with the specific standards or an appropriate variation.
- The need for the required car parking spaces to adjoin the premises used by the occupier/s, if the land is used by more than one occupier.
- Whether the layout of car spaces and accessways are consistent with Australian Standards AS2890.1-2004 (off street) and AS2890.6-2009 (disabled).
- The relevant standards of Clauses 56.06-2, 56.06-4, 56.06-5, 56.06-7 and 56.06-8 for residential developments with accessways longer than 60 metres or serving 16 or more dwellings.
- Any other matter specified in a schedule to the Parking Overlay.

Construction of car parking

Where a plan is required under Clause 52.06-8, the car parking spaces, access lanes, driveways and associated works and landscaping shown on the plan must be:

- constructed and available for use in accordance with the plan approved by the responsible authority; and
- formed to such levels and drained so that they can be used in accordance with the plan; and
- treated with an all-weather seal or some other durable surface; and
- line-marked or provided with some other adequate means of showing the car parking spaces, before any of the following occurs:
  - the new use commences; or
  - the floor area or site area of the existing use is increased; or
  - the existing use is increased by the measure specified in Column C of Table 1 in Clause 52.06-5 for that use.
[NO CONTENT]
EARTH AND ENERGY RESOURCES INDUSTRY

Purpose
To encourage land to be used and developed for exploration and extraction of earth and energy resources in accordance with acceptable environmental standards.
To ensure that mineral extraction, geothermal energy extraction, greenhouse gas sequestration and petroleum extraction are not prohibited land uses.
To ensure that planning controls for the use and development of land for the exploration and extraction of earth and energy resources are consistent with other legislation governing these land uses.

Permit requirement
A permit is required to use and develop land for earth and energy resources industry unless the table to this clause specifically states that a permit is not required.

Table of exemptions

</tbody>
</table>

Application requirements for mineral extraction
An application to use and develop land for mineral extraction must be accompanied by:

- A copy of a work plan or a variation to an approved work plan that has received statutory endorsement under section 77TD of the Mineral Resources Act 1990.
- The written notice of statutory endorsement under section 77TD(1) of the Mineral Resources Act 1990.
- Any conditions specified under section 77TD(3) of the Mineral Resources Act 1990.
Referral requirements for mineral extraction

Before deciding on any applications to use and develop land for mineral extraction the Responsible Authority must refer the application to the referral authorities specified under section 55 of the Planning and Environment Act 1987.

Unless the referral authority is the Roads Corporation, the referral requirements of Clause 52.08-2 do not apply to an application to use and develop land for mineral extraction if a copy of the work plan or a variation to an approved work plan was previously referred to the referral authority listed in Clause 66 under section 77TE of the Mineral Resources (Sustainable Development) Act 1990.
STONE EXTRACTION AND EXTRACTIVE INDUSTRY INTEREST AREAS

Purpose
To ensure that use and development of land for stone extraction does not adversely affect the environment or amenity of the area during or after extraction.
To ensure that excavated areas can be appropriately rehabilitated.
To ensure that sand and stone resources, which may be required by the community for future use, are protected from inappropriate development.

Application
These provisions apply to planning permit applications for:

- The use and development of land for stone extraction.
- The use and development of land within an extractive industry interest area.
- The use and development of land within 500 metres of stone extraction.

Permit exemptions for stone extraction
A permit to use and develop land for stone extraction will not be required if the conditions in the table to Clause 52.08-1 are met.

Application requirements
An application to use and develop land for stone extraction must be accompanied by:

- A copy of a work plan or a variation to an approved work plan that has received statutory endorsement under section 77TD of the Mineral Resources (Sustainable Development) Act 1990.
- The written notice of statutory endorsement under section 77TD(1) of the Mineral Resources (Sustainable Development) Act 1990.
- Any conditions specified under section 77TD(3) of the Mineral Resources (Sustainable Development) Act 1990.

These requirements do not apply to an application to use and develop land for stone extraction which is exempt from:

- The requirement to obtain a work plan under Section 77G of the Mineral Resources (Sustainable Development) Act 1990, or
- The provisions of the Mineral Resources (Sustainable Development) Act 1990 under Section 5AA of that Act.

Referral requirements
Before deciding on any applications to use and develop land for stone extraction the responsible authority must refer the application to the referral authorities specified under section 55 of the Planning and Environment Act 1987.

Unless the referral authority is the Roads Corporation, the referral requirements of Clause 52.09-4 do not apply to an application to use and develop land for stone extraction if a copy of the work plan or a variation to an approved work plan was previously referred to the referral authority listed in Clause 66 under section 77TE of the Mineral Resources (Sustainable Development) Act 1990.
Decision guidelines

Before deciding on an application, in addition to the decision guidelines in Clause 65, responsible authority must consider, as appropriate:

- The effect of the proposed stone extraction on any native flora and fauna on and near the land.
- The impact of the stone extraction operations on sites of cultural and historic significance, including any effects on Aboriginal places.
- The effect of the stone extraction operation on the natural and cultural landscape of the surrounding land and the locality generally.
- The ability of the stone extraction operation to contain any resultant industrial emissions within the boundaries of the subject land in accordance with the Regulations associated with the Mineral Resources (Sustainable Development) Act 1990 and other relevant regulations.
- The effect of vehicular traffic, noise, blasting, dust and vibration on the amenity of the surrounding area.
- The ability to rehabilitate the affected land to a form or for a use which is compatible with the natural systems or visual appearance of the surrounding area.
- The ability to rehabilitate the land so it can be used for a purpose or purposes beneficial to the community.
- The effect of the proposed stone extraction on groundwater and quality and the impact on any affected water uses.
- The impact of the proposed stone extraction on surface drainage and surface water quality.
- Any proposed provisions, conditions or requirements in a work plan that has received statutory endorsement issued under the Mineral Resources (Sustainable Development) Act 1990.

Permit conditions for stone extraction

A permit for the use and development of land for stone extraction must not include conditions which require the use to cease by a specified date unless either:

- The subject land is situated in or adjoins land which is being developed or is proposed to be developed for urban purposes.
- Such condition is suggested by the applicant.

A permit for the use and development of land for stone extraction must include conditions which are consistent with the requirements specified in Clause 52.09-7.

Requirements for the use and development of land for stone extraction

Boundary setback

Except with a permit, no alteration may be made to the natural condition or topography of the land within 20 metres of the boundary of the land. This does not apply to driveways, drains, bund walls or landscaping.

Screen planting

Shrubs and trees must be planted and maintained to screen activity on the site to the satisfaction of the responsible authority.

Parking areas

Parking areas must be provided for employees’ cars and all vehicles used on the site to the satisfaction of the responsible authority.
Notice of an application

Notice of the kinds of application listed below must be given under section 52(1)(c) of the Act to the person or body specified as a person or body to be notified in Clause 66.05:

- An application to use or subdivide land or construct a building for Accommodation, Child care centre, Education centre or Hospital:
  - Within an Extractive Industry Interest Area.
  - On land which is within 500 metres of land on which a work authority has been applied for or granted under the Mineral Resources (Sustainable Development) Act 1990.

- An application to construct a building or construct or carry out works on land for which a work authority has been applied for or granted under the Mineral Resources (Sustainable Development) Act 1990.

These requirements do not apply to an extension to buildings or works.
HOME BASED BUSINESS

Purpose
To ensure that the amenity of the neighbourhood is not adversely affected by a business conducted in or from a dwelling.

Requirements to be met
A home based business must meet the following requirements:

- The person conducting the home based business must use the dwelling as their principal place of residence.
- No more than two persons who does not live in the dwelling may work in the home based business at any one time.
- The net floor area used in conducting the business including the storage of any materials or goods must not exceed 100 square metres or one-third of the net floor area of the dwelling, whichever is the lesser. The net floor area includes out-buildings and works normal to a dwelling.
- The business must not impose a load on any utility greater than normally required for domestic use.
- The business must not adversely affect the amenity of the neighbourhood in any way including:
  - The appearance of any building, works or materials used.
  - The parking of motor vehicles.
  - The transporting of materials or goods to or from the dwelling.
  - The hours of operation.
  - Electrical interference.
  - The storage of chemicals, gasses or other hazardous materials.
  - Emissions from the site.
- No motor vehicle may be adjusted, modified, serviced or repaired for gain.
- Only one commercial vehicle (a commercial goods vehicle, commercial passenger vehicle or tow truck within the meaning of the Transport Act 1983), not exceeding 2 tonnes capacity and with or without a trailer registered to a resident of the dwelling may be present at any time. The vehicle must not be fuelled or repaired on the site.
- No goods other than goods manufactured or serviced in the home based business may be offered for sale. This requirement does not apply to goods offered for sale online.
- Materials used or goods manufactured, serviced or repaired in the home based business must be stored within a building.
- No goods manufactured, serviced or repaired may be displayed so that they are visible from outside the site.
- Any goods offered for sale online must not be collected from the dwelling.

Permit requirement
Despite the requirements of Clause 52.11-1, a permit may be granted for a home occupation:

- Which allows no more than three people who do not live in the dwelling to work in the occupation at any one time; or
- Which has a floor area not exceeding 200 square metres or one-third of the net floor area of the dwelling, whichever is the lesser.
Which allows no more than one additional commercial vehicle (a commercial goods vehicle, commercial passenger vehicle or tow truck within the meaning of the Transport Act 1983), not exceeding two tonnes capacity and with or without a trailer registered to a resident of the dwelling, to be present at any time.

Decision guidelines
Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

- Whether there is a need for additional parking or loading facilities.
- The effect of any vehicle parking, storage or washing facilities on the amenity and character of the street.
- Whether the site is suitable for the particular home based business and is compatible with the surrounding use and development.
- Whether there is a need for landscaping to screen any outbuildings or car parking or loading areas or any other area relating to the home based business.
Exemption to create defendable space around buildings used for accommodation

Any requirement of a planning permit, including any condition, which has the effect of prohibiting the removal, destruction or lopping of vegetation, or any requirement of this planning scheme to obtain a planning permit, or any provision of this planning scheme that prohibits the removal, destruction or lopping of vegetation or requires the removal, destruction or lopping of vegetation to be carried out in a particular manner, does not apply to:

- The removal, destruction or lopping of any vegetation within 10 metres of an existing building used for accommodation that was:
  - constructed before 10 September 2009; or
  - approved by a permit issued under this scheme before 10 September 2009; or
  - approved by a building permit issued under the Building Act 1993 before 10 September 2009; or
  - constructed to replace a dwelling or dependent persons unit that was damaged or destroyed by a bushfire that occurred between 1 January 2009 and 31 March 2009.

This does not apply to land covered by the Banyule, Bayside, Boroondara, Brimbank, Darebin, Glen Eira, Greater Dandenong, Hobsons Bay, Kingston, Knox, Maribyrnong, Maroondah, Melbourne, Monash, Moonee Valley, Moreland, Port of Melbourne, Port Phillip, Stonnington, Whitehorse and Yarra planning schemes unless the land is included in a Bushfire Management Overlay or is specified in a schedule to this clause.

- The removal, destruction or lopping of any vegetation, except trees, within 30 metres of an existing building used for accommodation that was:
  - constructed before 10 September 2009; or
  - approved by a permit issued under this scheme before 10 September 2009; or
  - approved by a building permit issued under the Building Act 1993 before 10 September 2009; or
  - constructed to replace a dwelling or dependent persons unit that was damaged or destroyed by a bushfire that occurred between 1 January 2009 and 31 March 2009.

This does not apply to land covered by the Banyule, Bayside, Boroondara, Brimbank, Darebin, Glen Eira, Greater Dandenong, Hobsons Bay, Kingston, Knox, Maribyrnong, Maroondah, Melbourne, Monash, Moonee Valley, Moreland, Port of Melbourne, Port Phillip, Stonnington, Whitehorse and Yarra planning schemes unless the land is specified in a schedule to this clause.

- The removal, destruction or lopping of any vegetation, except trees, within 50 metres of an existing building used for accommodation where land is within the Bushfire Management Overlay and where the existing building was:
  - constructed before 10 September 2009 or lawfully erected before 18 November 2011 without the need for a planning permit; or
  - approved by a permit issued under this scheme before 10 September 2009 and erected before 18 November 2011; or
  - approved by a building permit issued under the Building Act 1993 before 10 September 2009 and erected before 18 November 2011; or
  - constructed to replace a dwelling or dependent persons unit that was damaged or destroyed by a bushfire that occurred between 1 January 2009 and 31 March 2009.
52.12-2
Exemption for vegetation removal along a fenceline

Any requirement of a planning permit, including any condition, which has the effect of prohibiting the removal, destruction or lopping of vegetation, or any requirement of this planning scheme to obtain a planning permit, or any provision of this planning scheme that prohibits the removal, destruction or lopping of vegetation or requires the removal, destruction or lopping of vegetation to be carried out in a particular manner, does not apply to:

- The removal, destruction or lopping of any vegetation for a combined maximum width of 4 metres either side of an existing fence on a boundary between properties in different ownership that was constructed before 10 September 2009.

This does not apply to land covered by the Banyule, Bayside, Boroondara, Brimbank, Darebin, Glen Eira, Greater Dandenong, Hobsons Bay, Kingston, Knox, Maribyrnong, Maroondah, Melbourne, Monash, Moonee Valley, Moreland, Port of Melbourne, Port Phillip, Stonnington, Whitehorse and Yarra planning schemes unless the land is included in a Bushfire Management Overlay.

52.12-3
Exemption for buildings and works associated with a community fire refuge

Any requirement in this scheme relating to the construction of a building or the construction or carrying out of works does not apply to modifying an existing building to create a community fire refuge in accordance with Ministerial Direction No. 4, Construction Requirements for a Community Fire Refuge (1 August 2012).

52.12-4
Exemption for buildings and works associated with a private bushfire shelter

Any requirement in this scheme relating to the construction of a building or the construction or carrying out of works does not apply to buildings and works associated with a private bushfire shelter (a Class 10c building within the meaning of the Building Regulations 2006), provided the total area of all buildings and works does not exceed 30 square metres.

This clause does not apply to land in the Urban Floodway Zone, Erosion Management Overlay, Floodway Overlay, Land Subject to Inundation Overlay, Special Building Overlay or Heritage Overlay.

52.12-5
Exemption to create defendable space for a dwelling approved under Clause 44.06 of this planning scheme

Any requirement of a planning permit, including any condition, which has the effect of prohibiting the removal, destruction or lopping of vegetation, or any requirement of this planning scheme to obtain a planning permit, or any provision of this planning scheme that prohibits the removal, destruction or lopping of vegetation or requires the removal, destruction or lopping of vegetation to be carried out in a particular manner, does not apply to the removal, destruction or lopping of vegetation to construct a dwelling and create its defendable space if all of the following requirements are met:

- Land is in the Bushfire Management Overlay.
- Land is in the General Residential Zone, Residential Growth Zone, Neighbourhood Residential Zone, Urban Growth Zone, Low Density Residential Zone, Township Zone, Rural Living Zone, Farming Zone or Rural Activity Zone.
- The removal, destruction or lopping of vegetation:
  - Does not exceed the distance specified in Table 1 to Clause 53.02-3 of this planning scheme, based on the bushfire attack level determined by a relevant building surveyor in deciding an application for a building permit under the Building Act 1993 for a dwelling or alteration or extension to the dwelling; or
Is required to be undertaken by a condition in a planning permit issued after 31 July 2014 under Clause 44.06 of this scheme for a dwelling or an alteration or extension to the dwelling.

**SCHEDULE TO CLAUSE 52.12 BUSHFIRE PROTECTION: EXEMPTIONS**

1.0

---

31/07/2018 VC148

---

SWAN HILL PLANNING SCHEME
2009 BUSHFIRE - RECOVERY EXEMPTIONS

Purpose
To support recovery operations following the 2009 Victorian bushfires.

Scope
This clause applies to a use or development specified in Clause 52.13-3 carried out for the purposes of recovery from a bushfire that occurred after 1 January 2009.

Exemptions from planning scheme requirements
Any requirement of the scheme to obtain a permit or any provision in the scheme which prohibits the use or development of land or requires the use or development of land to be carried out in a particular manner does not apply to a use or development specified in Clause 52.13-3 provided the following requirements are met:

- Works must only be constructed or carried out for bushfire recovery or in association with the construction of a building under this provision to be used for temporary accommodation.
- A building constructed under this provision must only be used:
  - To provide temporary accommodation for a person or persons whose normal place of residence was damaged or destroyed by bushfire; or
  - For a use that is directly associated with bushfire recovery.
- A building constructed under this provision to be used for temporary accommodation must be located on the same lot as a building used for accommodation that was damaged or destroyed by bushfire unless the building is being constructed by or on behalf of a municipality, the Victorian Bushfire Reconstruction and Recovery Authority or other public authority.
- The construction of a building or the construction or carrying out of works must be completed prior to 31 March 2011.
- Native vegetation must only be removed, destroyed or lopped:
  - To provide access to, make safe or remove building and demolition rubble from a property; or
  - To enable emergency and bushfire recovery works undertaken by or on behalf of a municipality, the Victorian Bushfire Reconstruction and Recovery Authority, other public authority or a utility service provider in the exercise of any power conferred on them under any Act.
- Native vegetation must not be removed, destroyed or lopped after 31 March 2011.
- Any sign displayed must be directly associated with bushfire recovery.
- Any sign displayed must be removed prior to 31 March 2011.

Use and development
The requirements of Clause 52.13-2 apply to the following types of development:
- Demolition or removal of a building.
- Construction of a building.
- Construction or carrying out of works.
- Removal, destruction or lopping of vegetation.
- Display of a sign.
The requirements of Clause 52.13-2 apply to the following uses:

- Temporary accommodation.
- Any use directly associated with bushfire recovery.

**Land in a Heritage Overlay**

For land within a Heritage Overlay, in addition to the requirements specified in Clause 52.13-2, the written authorisation of the responsible authority must be obtained prior to:

- Demolishing or removing a building;
- Externally altering a building by structural work;
- Internally altering a building if the schedule to the Heritage Overlay identifies the heritage place as one where internal alteration controls apply;
- Carrying out works, repairs and routine maintenance which change the appearance of a heritage place or which are not undertaken to the same details, specifications and materials; or
- Removing, destroying or lopping a tree if the schedule to the Heritage Overlay identifies the heritage place as one where tree controls apply.

**Land in a Land Management Overlay**

For land within a Floodway Overlay, Land Subject to Inundation Overlay or Special Building Overlay, in addition to the requirements specified in Clause 52.13-2, the written authorisation of the responsible authority must be obtained prior to constructing a building or constructing and carrying out works.

For land within an Erosion Management Overlay, in addition to the requirements specified in Clause 52.13-2, the written authorisation of the responsible authority must be obtained prior to:

- Constructing a building or constructing and carrying out works; or
- Removing, destroying or lopping vegetation.

**Land in an Environmental Audit Overlay**

For land within an Environmental Audit Overlay, in addition to the requirements specified in Clause 52.13-2, the written authorisation of the responsible authority must be obtained prior to commencing a sensitive use (residential use, child care centre, pre school centre or primary school).

**Cessation of use**

A use must not continue after 30 September 2019 unless in accordance with the requirements of this scheme.

A building must not be used after 30 September 2019 unless in accordance with the requirements of this scheme.

**Decision guidelines**

Before deciding on an application to allow the retention or continuing use of a building, in addition to the decision guidelines in Clause 65 and any other requirements of the Act, the responsible authority must consider the extent to which compliance can be reasonably achieved with all requirements of this scheme.
2009 BUSHFIRE - REPLACEMENT BUILDINGS

Purpose
To support the rebuilding of dwellings, dependent persons’ units and buildings used for agriculture damaged or destroyed by the 2009 Victorian bushfires.

Scope
This clause applies to:

- The construction of a building or the construction and carrying out of works, associated with rebuilding:
  - a dwelling or dependent person’s unit; or
  - a building used for agriculture,

  that was damaged or destroyed by a bushfire that occurred between 1 January 2009 and 31 March 2009.

- The use of land for:
  - a dwelling or dependent person’s unit that is rebuilt in accordance with this clause; or
  - agriculture to the extent that the use relates to a building that was destroyed by a bushfire that occurred between 1 January 2009 and 31 March 2009 and that use cannot continue unless that building is rebuilt.

- The removal, destruction or lopping of vegetation to enable the construction, use and maintenance of a building rebuilt in accordance with this Clause.

This clause does not apply to land in a Heritage Overlay.

For the avoidance of doubt, any planning permit exemption provided by the scheme continues to apply to the use and development specified in this Clause.

If any use or development is within the scope of both this Clause 52.14 and Clause 52.13, then this Clause 52.14 prevails over Clause 52.13 in the event of any inconsistency.

Exemption from planning scheme requirements
Any requirement of the scheme to obtain a permit or any provision in the scheme which prohibits the use or development of land or requires the use or development of land to be carried out in a particular manner does not apply to the use and development specified in Clause 52.14-1 provided the following requirements are met:

Site plan
Before the commencement of construction of a building or the construction or carrying out of works, a site plan must be provided to and approved by the responsible authority. The site plan must show:

- The boundaries of the property.

- The location of any damaged or destroyed dwelling, dependent person’s unit or building used for agriculture.

- The proposed location of the replacement dwelling, dependent person’s unit or building used for agriculture.

- The existing and proposed access to the lot.
Vegetation to be removed destroyed or lopped to enable rebuilding including construction of vehicle access, water storage and waste water treatment.

For replacement dwellings and dependent persons’ units on land in a Farming Zone, Rural Conservation Zone, Rural Activity Zone, Green Wedge Zone, Green Wedge A Zone or the Rural Living Zone:

- The location and dimensions of vehicle access.
- The location and storage of water for potable and fire fighting purposes if the dwelling or dependent person’s unit cannot be connected to a reticulated potable water supply.
- The location of the waste water treatment system if waste water is to be retained and treated on site.

The site plan must be submitted to the responsible authority by 30 September 2017.

**Commencement of development**

- The development must commence within two years after the approval of a site plan by the responsible authority and must be completed within two years after the development commences. The responsible authority may allow an extension of time on the request of the owner or the occupier of the land to which the approved site plan applies, provided that request is made before the expiry of the applicable period or within three months of the expiry of the applicable period.

**Compliance with site plan**

- The development must comply with the approved site plan.

**Use and development conditions**

- The land must not be used for more than the number of dwellings or dependent persons’ units that were damaged or destroyed.

- The removal, destruction or lopping of vegetation to enable the maintenance of a building must not exceed 10 metres beyond the building.

For land in the Farming Zone, Rural Conservation Zone, Rural Activity Zone, Green Wedge Zone, Green Wedge A Zone or the Rural Living Zone:

- Access to the dwelling or dependent person’s unit must be provided via an all weather road with dimensions adequate to accommodate emergency vehicles.

- The dwelling or dependent person’s unit must be connected to a reticulated sewerage system or if not available, the waste water must be managed to the satisfaction of the responsible authority.

- The dwelling or dependent person’s unit must be connected to a reticulated potable water supply or have an alternative potable water supply with adequate storage for domestic use as well as for fire fighting purposes.

- The dwelling or dependent person’s unit must be connected to a reticulated electricity supply or have an alternative energy source.

- A building must be constructed of materials that are non-reflective and of muted tones in the following locations:
  - Land in an Environmental Significance Overlay, Design and Development Overlay or Significant Landscape Overlay.
  - Land in a Green Wedge Zone, Green Wedge A Zone or Rural Conservation Zone in the municipal districts of the Shire of Yarra Ranges and the Shire of Nillumbik.
- For land in a Restructure Overlay, a building must be consistent with any Restructure Plan.
- For land adjacent to a Road Zone, Category 1, or Land in a Public Acquisition Overlay if the purpose of acquisition is for a Category 1 road, access must not be created or altered.

**52.14-3**

Land in an Erosion Management Overlay

For land in an Erosion Management Overlay in the municipal district of the Shire of Yarra Ranges, in addition to the requirements specified in Clause 52.14-2, the written authorisation of the responsible authority must be obtained prior to:

- Constructing a building or constructing and carrying out works; or
- Removing, destroying or lopping vegetation.

**52.14-4**

Land in a Floodway Overlay, Land Subject to Inundation Overlay or Special Building Overlay

For land in a Floodway Overlay, Land Subject to Inundation Overlay or Special Building Overlay, in addition to the requirements specified in Clause 52.14-2, the written authorisation of the relevant floodplain management authority must be obtained prior to the commencement of construction of a building or the construction or carrying out of works.

**52.14-5**

Decision guidelines

Before deciding on approval of the site plan, in addition to the decision guidelines in Clause 65 and any other requirements of the Act, the responsible authority must consider, as appropriate:

- The extent to which the siting of the building and associated development can reasonably achieve compliance with other relevant requirements of this scheme.
- The extent to which the replacement dwelling or dependent person’s unit can be located on the land to assist the minimisation of risk to life and property from bushfire.
HELIPORT AND HELICOPTER LANDING SITE

Purpose
To ensure the amenity impacts of a heliport and a helicopter landing site on surrounding areas is considered.

Permit requirement
A permit is required to use or develop any land for a heliport or a helicopter landing site even if it is ancillary to another use on the land, unless the table to this Clause specifically states that a permit is not required.

Table of exemptions for use

<table>
<thead>
<tr>
<th>No permit is required to use land for a helicopter landing site if any of the following apply:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Emergency services</td>
</tr>
<tr>
<td>Agriculture</td>
</tr>
<tr>
<td>Public land management</td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td>General</td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
</tbody>
</table>

Application requirements
An application to use or develop land for a heliport or a helicopter landing site must be accompanied by the following information, as appropriate:

- A site plan, including:
  - Site boundaries and dimensions.
  - The current land use.
  - The existing siting and layout of buildings and works.
  - The proposed siting and layout of buildings and works.
  - Existing vegetation and proposed vegetation removal.
- Vehicle and pedestrian access.

An application to use land for a heliport or a helicopter landing site must be accompanied by the following information:

- A location plan, including:
  - The siting and use of buildings on adjacent properties.
  - The direction and distance to any building used for a sensitive use (accommodation, child care centre, education centre and hospital) that is not associated with the helicopter operation and is located within 500 metres of the proposed heliport or helicopter landing site.

- A written report which:
  - Demonstrates a suitable separation distance between the landing point of a heliport or helicopter landing site and any building used for a sensitive use that is not associated with the helicopter operation by either:
    - Locating the proposed heliport or helicopter landing site at least 150 metres for helicopters of less than 2 tonnes all-up weight, or 250 metres for helicopters of less than 15 tonnes all-up weight, or
    - Providing an acoustic report by a suitably qualified consultant.
    - Includes details of the proposed frequency of flight movements.
    - Includes the proposed hours of operation.

52.15-3

Decision guidelines

Before deciding on an application to use land for a heliport or a helicopter landing site, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

- Whether the proposal achieves a suitable separation distance from a nearby sensitive use, having regard to the Noise Control Guidelines (Environment Protection Authority, 2008).
- The effect of the proposal on nearby sensitive uses in terms of the proposed frequency of flight movements and hours of operation.
NATIVE VEGETATION PRECINCT PLAN

Purpose

To provide for the protection, management and removal of native vegetation through the use of a native vegetation precinct plan incorporated into this scheme.

To ensure that there is no net loss to biodiversity as a result of the removal, destruction or lopping of native vegetation. This is achieved by applying the following three step approach in accordance with the Guidelines for the removal, destruction or lopping of native vegetation (Department of Environment, Land, Water and Planning, 2017) (the Guidelines):

1. Avoid the removal, destruction or lopping of native vegetation.
2. Minimise impacts from the removal, destruction or lopping of native vegetation that cannot be avoided.
3. Provide an offset to compensate for the biodiversity impact if a permit is granted to remove, destroy or lop native vegetation.

To manage the removal, destruction or lopping of native vegetation to minimise land and water degradation.

Application

This clause applies to land if a native vegetation precinct plan corresponding to that land is incorporated into this scheme and listed in the schedule to this clause.

Native vegetation precinct plans

A native vegetation precinct plan is a plan relating to native vegetation within a defined area which is incorporated into this scheme and listed in the schedule to this clause.

A native vegetation precinct plan may form part of a more general strategic or precinct structure plan.

A native vegetation precinct plan must include the information and provide for the matters set out in section 10.1 of the Guidelines.

Permit requirement

A permit is required to remove, destroy or lop any native vegetation, including dead native vegetation. This does not apply:

- If the removal, destruction or lopping of native vegetation is in accordance with a native vegetation precinct plan incorporated into this scheme. Any conditions or requirements specified in the plan must be met.
- To the removal, destruction or lopping of native vegetation specified in the table to Clause 52.16-8, unless a native vegetation precinct plan specifies otherwise.

Application requirements

An application to remove, destroy or lop native vegetation must comply with the application requirements specified in the Guidelines.

Decision guidelines

Before deciding on an application, in addition to the decision guidelines at Clause 65, the responsible authority must consider the decision guidelines specified in the Guidelines as appropriate.
Offset requirements

If a permit is required to remove, destroy or lop native vegetation, the biodiversity impacts from the removal, destruction or lopping of native vegetation must be offset in accordance with the Guidelines. The conditions on the permit for the removal, destruction or lopping of native vegetation must specify the offset requirement and timing to secure the offset.

Transitional provisions

The requirements of this clause in force immediately before the commencement of Amendment VC138 continue to apply to an application for:

- A permit lodged before that date.
- An amendment to a permit if:
  - the original permit application was lodged before that date; or
  - the original permit application was one that benefited from the following transitional provision.
- A permit lodged within 12 months after that date, if the Secretary to the Department of Environment, Land Water and Planning (as constituted under Part 2 of the Conservation, Forests and Lands Act 1987) has stated in writing that a report about the proposed removal, destruction or lopping of native vegetation has been generated by the Department of Environment, Land, Water and Planning’s native vegetation information systems within 12 months before that date.

Table of exemptions

</tr>
<tr>
<td>- with written agreement of the Secretary to the Department of Environment, Land, Water and Planning (as constituted under Part 2 of the Conservation, Forests and Lands Act 1987).</td>
</tr>
<tr>
<td><strong>Crown land</strong></td>
</tr>
<tr>
<td>Native vegetation that is to be removed, destroyed or lopped to the minimum extent necessary to manage Crown land:</td>
</tr>
<tr>
<td>- by or on behalf of the Secretary to the Department of Environment, Land, Water and Planning (as constituted under Part 2 of the Conservation, Forests and Lands Act 1987), or Parks Victoria, and in accordance with the Procedure for the removal, destruction or lopping of native vegetation on Crown land; or</td>
</tr>
<tr>
<td>- with written permission from the Secretary to the Department of Environment, Land, Water and Planning (as constituted under Part 2 of the Conservation, Forests and Lands Act 1987).</td>
</tr>
<tr>
<td><strong>Emergency works</strong></td>
</tr>
<tr>
<td>Native vegetation that is to be removed, destroyed or lopped:</td>
</tr>
<tr>
<td>- in an emergency by or on behalf of a public authority or municipal council to create an emergency access associated with emergency works; or</td>
</tr>
<tr>
<td>- where it presents an immediate risk of personal injury or damage to property. Only that part of the vegetation that presents the immediate risk may be removed, destroyed or lopped under this exemption.</td>
</tr>
<tr>
<td><strong>Fire protection</strong></td>
</tr>
<tr>
<td>Native vegetation that is to be removed, destroyed or lopped to the minimum extent necessary to enable the carrying out any of the following fire protection activities:</td>
</tr>
<tr>
<td>- fire fighting;</td>
</tr>
<tr>
<td>- planned burning;</td>
</tr>
<tr>
<td>- making or maintenance of a fuelbreak or fire fighting access track (or any combination thereof) that does not exceed a combined width of 6 metres;</td>
</tr>
</tbody>
</table>
The requirement to obtain a permit does not apply to:

- making a strategic fuelbreak up to 40 metres wide by, or on behalf of, a public authority in accordance with a strategic fuelbreak plan approved by the Secretary to the Department of Environment, Land, Water and Planning (as constituted under Part 2 of the Conservation, Forests and Lands Act 1987);

- in accordance with a fire prevention notice issued under either:
  - section 65 of the Forests Act 1958; or

- keeping native vegetation clear of, or minimising the risk of bushfire ignition from, an electric line in accordance with a code of practice prepared under Part 8 of the Electricity Safety Act 1998;

- minimising the risk to life and property from bushfire on a roadside of a public road managed by the relevant responsible road authority, and carried out by or on behalf of that authority, in accordance with written agreement of the Secretary to the Department of Environment, Land, Water and Planning (as constituted under Part 2 of the Conservation, Forest and Lands Act 1987). In this exemption, roadside, public road and responsible road authority have the same meanings as in section 3 of the Road Management Act 2004.

Note: Additional permit exemptions for bushfire protection are provided at Clause 52.12.

</table>
| Regrowth                     | Native vegetation that is to be removed, destroyed or lopped that has naturally established or regenerated on land lawfully cleared of naturally established native vegetation, and is:  
  - bracken (*Pteridium esculentum*); or  
  - within the boundary of a timber production plantation, as indicated on a Plantation Development Notice or other documented record, and has established after the plantation.  
  This exemption does not apply to land where native vegetation has been destroyed or otherwise damaged as a result of flood, fire or other natural disaster. |
| Road safety                  | Native vegetation that is to be removed, destroyed or lopped to the minimum extent necessary by or on behalf of a public authority or municipal council to maintain the safe and efficient function of an existing road in accordance with the written agreement of the Secretary to the Department of Environment, Land, Water and Planning (as constituted under Part 2 of the *Conservation, Forests and Lands Act 1987*). |
| Stone exploration            | - Native vegetation that is to be removed, destroyed or lopped to the minimum extent necessary to enable the carrying out of Stone exploration.  
  The maximum extent of native vegetation that may be removed, destroyed or lopped under this exemption on contiguous land in the same ownership in a five year period must not exceed any of the following:  
  - 1 hectare of native vegetation which does not include a tree.  
  - 15 native trees with trunk diameter of less than 40 centimetres at a height of 1.3 metres above ground level.  
  - 5 native trees with trunk diameter of 40 centimetres or more at a height of 1.3 metres above ground level.  
  This exemption does not apply to costeasing and bulk sampling activities. |
| Stone extraction             | Native vegetation that is to be removed, destroyed or lopped to the minimum extent necessary by, or on behalf of, a licensed surveyor (within the meaning of section 3 of the *Surveying Act 2004*) using hand-held tools to establish a sightline for the measurement of land. |
| Surveying                    | Native vegetation that is to be removed, destroyed or lopped to the minimum extent necessary by, or on behalf of, a utility service provider to maintain or construct a utility installation in accordance with the written agreement of the Secretary to the Department of Environment, Land, Water and Planning (as constituted under Part 2 of the *Conservation, Forests and Lands Act 1987*). |
| Traditional owners           | Native vegetation that is to be removed, destroyed or lopped by a person acting under, and in accordance with:  
  - a natural resource agreement under Part 6 of the *Traditional Owner Settlement Act 2010*; or  
  - an authorisation order made under sections 82 or 84 of the *Traditional Owner Settlement Act 2010* as those sections were in force immediately before the commencement of section 24 of the *Traditional Owner Settlement Amendment Act in 2016* (1 May 2017). |
| Utility installations        | Native vegetation that is to be removed, destroyed or lopped to the minimum extent necessary:  
  - to maintain the safe and efficient function of a Minor utility installation; or  
  - by or on behalf of a utility service provider to maintain or construct a utility installation in accordance with the written agreement of the Secretary to the Department of Environment, Land, Water and Planning (as constituted under Part 2 of the *Conservation, Forests and Lands Act 1987*). |
## Native vegetation precinct plan

<table>
<thead>
<tr>
<th>Name of plan</th>
<th>None specified</th>
</tr>
</thead>
</table>

---
NATIVE VEGETATION

Purpose
To ensure that there is no net loss to biodiversity as a result of the removal, destruction or lopping of native vegetation. This is achieved by applying the following three step approach in accordance with the Guidelines for the removal, destruction or lopping of native vegetation (Department of Environment, Land, Water and Planning, 2017) (the Guidelines):

1. Avoid the removal, destruction or lopping of native vegetation.
2. Minimise impacts from the removal, destruction or lopping of native vegetation that cannot be avoided.
3. Provide an offset to compensate for the biodiversity impact if a permit is granted to remove, destroy or lop native vegetation.

To manage the removal, destruction or lopping of native vegetation to minimise land and water degradation.

Permit requirement
A permit is required to remove, destroy or lop native vegetation, including dead native vegetation. This does not apply:

- If the table to Clause 52.17-7 specifically states that a permit is not required.
- If a native vegetation precinct plan corresponding to the land is incorporated into this scheme and listed in the schedule to Clause 52.16.
- To the removal, destruction or lopping of native vegetation specified in the schedule to this clause.

Application requirements
An application to remove, destroy or lop native vegetation must comply with the application requirements specified in the Guidelines.

Property vegetation plans
A permit granted to remove, destroy or lop native vegetation in accordance with a property vegetation plan must include the following condition:

“This permit will expire if one of the following circumstances applies:

- The removal, destruction or lopping of native vegetation does not start within two years of the date of this permit.
- The removal, destruction or lopping of native vegetation is not completed within ten years of the date of this permit.”

Decision guidelines
Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider the decision guidelines specified in the Guidelines as appropriate.

Offset requirements
If a permit is required to remove, destroy or lop native vegetation, the biodiversity impacts from the removal, destruction or lopping of native vegetation must be offset, in accordance with the Guidelines. The conditions on the permit for the removal, destruction or lopping of native vegetation must specify the offset requirement and the timing to secure the offset.
Transitional provisions

The requirements of this clause in force immediately before the commencement of Amendment VC138 continue to apply to an application for:

- A permit lodged before that date.
- An amendment to a permit if:
  - the original permit application was lodged before that date; or
  - the original permit application was one that benefited from the following transitional provision.
- A permit lodged within 12 months after that date, if the Secretary to the Department of Environment, Land, Water and Planning (as constituted under Part 2 of the Conservation, Forests and Lands Act 1987) has stated in writing that a report about the proposed removal, destruction or lopping of native vegetation has been generated by the Department of Environment, Land, Water and Planning’s native vegetation information systems within 12 months before that date.

Table of exemptions

**The requirement to obtain a permit does not apply to:**

<table>
<thead>
<tr>
<th>Conservation work</th>
<th>Native vegetation that is to be removed, destroyed or lopped to the minimum extent necessary to enable the carrying out of conservation work:</th>

### The requirement to obtain a permit does not apply to:

<table>
<thead>
<tr>
<th>Category</th>
<th>Description</th>
</tr>
</thead>
</table>
| **Mineral exploration and extraction**        | Native vegetation that is to be removed, destroyed or lopped to the minimum extent necessary by the holder of an exploration, mining, prospecting, or retention license issued under the Mineral Resources (Sustainable Development) Act 1990:  
  - that is low impact exploration within the meaning of Schedule 4A of the Mineral Resources (Sustainable Development) Act 1990; or  
  - in accordance with a work plan approved under Part 3 of the Mineral Resources (Sustainable Development) Act 1990.  
  
  Note: Schedule 4A of the Mineral Resources (Sustainable Development) Act 1990 specifies limits on the extent of native vegetation that may be removed as part of low impact exploration. |
| **New buildings and works in the Farming Zone and Rural Activity Zone** | Native vegetation that is to be removed, destroyed or lopped to the minimum extent necessary to enable the construction of a building or works used for Agricultural production, including a dam, utility service, bore and accessway, in the Farming Zone or the Rural Activity Zone.  
  
  The maximum extent of native vegetation that may be removed, destroyed or lopped under this exemption on contiguous land in the same ownership in a five year period must not exceed any of the following:  
  - 1 hectare of native vegetation which does not include a tree.  
  - 15 native trees with a trunk diameter of less than 40 centimetres at a height of 1.3 metres above ground level.  
  - 5 native trees with a trunk diameter of 40 centimetres or more at a height of 1.3 metres above ground level.  
  
  This exemption does not apply to the construction or operation of a pivot irrigation system or horticultural trellising. |
| **New dwellings in the Farming Zone and Rural Activity Zone** | Native vegetation that is to be removed, destroyed or lopped to the minimum extent necessary to enable the construction of a dwelling in the Farming Zone or Rural Activity Zone.  
  
  The maximum extent of native vegetation removed, destroyed or lopped under this exemption on contiguous land in the same ownership in a five year period must not exceed any of the following:  
  - 300 square metres of native vegetation which does not include a tree.  
  - 5 native trees with a trunk diameter of less than 40 centimetres at a height of 1.3 metres above ground level.  
  - 1 native tree with a trunk diameter of 40 centimetres or more at a height of 1.3 metres above ground level.  
  
  This exemption does not apply native vegetation removed, destroyed or lopped to enable the construction of a swimming pool, tennis court or horse ménage. |
| **Personal use**                              | Native vegetation that is to be removed, destroyed or lopped to the minimum extent necessary to obtain reasonable amounts of wood for personal use by the owner or lawful occupier of the land.  
  
  For the purpose of this exemption personal use means uses such as heating and cooking, building and fence construction on land, and hobbies such as arts and craft.  
  
  This exemption does not apply to:  
  - contiguous land in one ownership that has an area of less than 10 hectares;  

The requirement to obtain a permit does not apply to:

- the removal, destruction or lopping of native vegetation by means other than cutting or chopping; or
- a standing native tree (including a dead tree) with a trunk diameter of 40 centimetres or more at a height of 1.3 metres above ground level.

### Pest animal burrows

Native vegetation that is to be removed, destroyed or lopped to the minimum extent necessary to enable the removal of pest animal burrows in the Farming Zone or the Rural Activity Zone:

- in accordance with written agreement of an officer of the department responsible for administering the *Flora and Fauna Guarantee Act 1988*; or
- provided the maximum extent of native vegetation removed, destroyed or lopped on contiguous land in the same ownership in a five year period does not exceed any of the following:
  - 1 hectare of native vegetation which does not include a tree; or
  - 15 native trees with a trunk diameter of less than 20 centimetres at a height of 1.3 metres above ground level.

### Planted vegetation

Native vegetation that is to be removed, destroyed or lopped that was either planted or grown as a result of direct seeding.

This exemption does not apply to native vegetation planted or managed with public funding for the purpose of land protection or enhancing biodiversity unless the removal, destruction or lopping of the native vegetation is in accordance with written permission of the agency (or its successor) that provided the funding.

### Railways

Native vegetation that is to be removed, destroyed or lopped to the minimum extent necessary to maintain the safe and efficient function of an existing railway, or railway access road, in accordance with the written agreement of the Secretary to the Department of Environment, Land, Water and Planning (as constituted under Part 2 of the *Conservation, Forests and Lands Act 1987*).

### Regrowth

Native vegetation that is to be removed, destroyed or lopped that has naturally established or regenerated on land lawfully cleared of naturally established native vegetation, and is:

- less than 10 years old; or
- bracken (*Pteridium esculentum*); or
- within the boundary of a timber production plantation, as indicated on a Plantation Development Notice or other documented record, and has established after the plantation; or
- less than ten years old at the time of a property vegetation plan being signed by the Secretary to the Department of Environment, Land, Water and Planning (as constituted under Part 2 of the *Conservation, Forests and Lands Act 1987*), and is:
  - shown on that plan as being ‘certified regrowth’; and
  - on land that is to be used or maintained for cultivation or pasture during the term of that plan.

This exemption does not apply to land where native vegetation has been destroyed or otherwise damaged as a result of flood, fire or other natural disaster.

TELECOMMUNICATIONS FACILITY

Purpose
To ensure that telecommunications infrastructure and services are provided in an efficient and cost effective manner to meet community needs.
To facilitate an effective statewide telecommunications network in a manner consistent with orderly and proper planning.
To encourage the provision of telecommunications facilities with minimal impact on the amenity of the area.

Permit requirement
A permit is required to construct a building or construct or carry out works for a Telecommunications facility. This does not apply to buildings and works for:

- A low-impact facility as described in the Telecommunications (Low-impact) Facilities Determination 1997 (Cth).
- The inspection and maintenance of a Telecommunications facility as defined in the Telecommunications Act 1997 (Cth).
- A facility authorised by a Facilities Installation Permit issued under the Telecommunications Act 1997 (Cth).
- A temporary defence facility.
- The connection of a building, structure, caravan or mobile home to a Telecommunications line forming part of a Telecommunications network.
- A Telecommunications facility that complies with the requirements of section 5 of A Code of Practice for Telecommunications Facilities in Victoria, July 2004.
- An activity authorised under clause 6(2) of Division 3 of Schedule 3 of the Telecommunications Act 1997 (Cth).
- An activity carried out by a body listed in sections 46 to 51 (inclusive) of the Telecommunications Act 1997 (Cth) pursuant to legislation applying to that body.

Land in public ownership
An application affecting land in a public land zone must be accompanied by written confirmation from the public land manager that the public land manager consents generally or conditionally:

- To the application being made; or
- To the application being made and to the proposed development.

This requirement does not apply if the applicant is the public land manager.

Exemption from notice and review
An application is exempt from the notice requirements of section 52(1)(a), (b) and (d), the decision requirements of section 64(1), (2) and (3) and the review rights of section 82(1) of the Act unless:

- The Telecommunications facility is a radio communications dish greater than 1.2 metres in diameter; or
- The Telecommunications facility is a Telecommunications tower (other than a low-impact facility described in the Telecommunications (Low-impact Facilities) Determination 1997 (Cth)); or
The land is located in an Environmental Significance Overlay, a Vegetation Protection Overlay, a Significant Landscape Overlay, a Heritage Overlay, a Design and Development Overlay or an Erosion Management Overlay; or

The land is public land not in a public land zone and the responsible authority is not the public land manager.

An application under any provision of this scheme to use or develop land for a Telecommunications facility is exempt from the notice requirements of section 52(1)(a), (b) and (d), the decision requirements of section 64(1), (2) and (3) and the review rights of section 82(1) of the Act if the Telecommunications facility is funded, or partly funded, by:

- The Commonwealth through the Mobile Black Spot Program; or
- The State of Victoria.

### Application requirements

An application must be accompanied by the following information as appropriate to the proposal and the location:

- A site analysis and design response explaining how the proposed facility addresses the principles for the design, siting, construction and operation of telecommunications facilities and the requirements in *A Code of Practice for Telecommunications Facilities in Victoria, July 2004*.
- Site boundaries and dimensions.
- The purpose and location of all buildings and works required in the construction of the facility.
- The location of all existing buildings and works to be retained and demolished.
- The location of all proposed buildings and works including dimensions, elevations, materials, colours and finishes.
- The location and use of all buildings on adjoining properties.
- The location of all adjoining streets and access ways.
- Australian Height Datum levels.
- Natural drainage lines, watercourses, coastal dunes, beach systems and wetlands.
- Proposals for the rehabilitation of the land on which development is to occur.
- Roads and parking areas.
- Materials, landscaping, external lighting, colour and reflectivity.

### Decision guidelines

Before deciding on an application, in addition to the decision guidelines of Clause 65, the responsible authority must consider, as appropriate:

- The principles for the design, siting, construction and operation of a Telecommunications facility set out in *A Code of Practice for Telecommunications Facilities in Victoria, July 2004*.
- The effect of the proposal on adjacent land.
- If the Telecommunications facility is located in an Environmental Significance Overlay, a Vegetation Protection Overlay, a Significant Landscape Overlay, a Heritage Overlay, a Design and Development Overlay or an Erosion Management Overlay, the decision guidelines in those overlays and the schedules to those overlays.
[NO CONTENT]
PRIVATE TENNIS COURT

Purpose
To ensure that tennis courts used in association with a dwelling are sited and constructed to minimise the effects of the development on nearby properties.
To ensure that the use of tennis courts in association with a dwelling does not cause unreasonable disturbance to adjoining residents or adversely affect the residential amenity of adjoining areas.

Application
This clause applies to any private tennis court which is used in association with a dwelling.

Permit requirement
A permit is not required under any provision of this scheme to construct, use or illuminate a private tennis court if the performance requirements specified in the Code of Practice - Private Tennis Court Development Revision 1 March 1999 are met.

A permit is required to construct, use or illuminate a private tennis court:
- If any of the performance requirements specified in the Code of Practice - Private Tennis Court Development Revision 1 March 1999 are not met.
- If the land is in an Environmental Significance Overlay, a Vegetation Protection Overlay, a Significant Landscape Overlay, a Heritage Overlay, an Urban Floodway Zone, a Floodway Overlay or a Land Subject to Inundation Overlay and a permit is required for any of the following:
  - To construct a building or construct or carry out works.
  - To remove, destroy, prune or lop a tree or vegetation.

Application requirements
Unless the circumstances do not require, an application under this clause must be accompanied by the following information:
- A copy of title of the land.
- A layout plan to a scale of not less than 1:200.
- The location of dwellings on adjoining land within 10 metres of the court site showing habitable room windows.
- Existing and proposed site levels.
- Location of vegetation to be removed.
- Proposed landscaping.
- Illumination levels and the position and height of light poles and fencing.
- Description of fencing material.
- The location of easements.
- Volume of excavated material to be brought to or removed from the site.
- Means of access to the site.
- Construction method and timing.
Notice provisions

An application for a permit to construct, use or illuminate a private tennis court under any provision of this scheme is exempt from the notice requirements of section 52(1)(a), (b) and (d) of the Act. In accordance with section 52(1)(c) of the Act notice of an application to construct, use or illuminate a private tennis court under any provision of this scheme must be given by ordinary post to the owners and occupiers of adjoining and opposite properties.

Decision guidelines

Before deciding on an application under this Clause, in addition to the decision guidelines in Clause 65, the responsible authority must consider the relevant objectives and considerations specified in the Code of Practice - Private Tennis Court Development Revision 1 March 1999.
COMMUNITY CARE ACCOMMODATION

Purpose
To facilitate the establishment of community care accommodation.
To support the confidentiality of community care accommodation.

Application
This clause applies to the use and development of land for community care accommodation.

Use exemption
Any requirement in the Activity Centre Zone, Capital City Zone, Commercial 1 Zone, General Residential Zone, Low Density Residential Zone, Mixed Use Zone, Neighbourhood Residential Zone, Residential Growth Zone, Rural Living Zone or Township Zone to obtain a permit to use land for community care accommodation does not apply if all of the following requirements are met:

- Any condition opposite the use ‘community care accommodation’ in the table of uses in the zone or schedule to the zone is met.
- The use is funded by, or conducted by or on behalf of, a government department or public authority, including a public authority established for a public purpose under a Commonwealth Act.
- No more than 20 clients are accommodated. This does not include staff.
- No more than 5 persons at any one time who are not residents may access support services provided on the land.

Buildings and works exemption
Any requirement in the General Residential Zone, Low Density Residential Zone, Mixed Use Zone, Neighbourhood Residential Zone, Residential Growth Zone, Rural Living Zone or Township Zone to obtain a permit to construct a building or construct or carry out works for community care accommodation does not apply if all of the following requirements are met:

- The development is funded by, or carried out by or on behalf of, a government department or public authority, including a public authority established for a public purpose under a Commonwealth Act.
- If the development is in the General Residential Zone or Neighbourhood Residential Zone, a garden area is provided in accordance with the minimum garden area requirement specified in the zone.
- If the development is in the General Residential Zone, Mixed Use Zone, Neighbourhood Residential Zone, Residential Growth Zone or Township Zone, standards B6, B17, B18, B19, B20, B21 and B22 of Clause 55 are met.

Exemption from notice and review
An application under any provision of this planning scheme to use land or construct a building or construct or carry out works for community care accommodation is exempt from the notice requirements of section 52(1)(a), (b) and (d), the decision requirements of section 64(1), (2) and (3) and the review rights of section 82(1) of the Act if the application is made by or on behalf of a government department or public authority, including a public authority established for a public purpose under a Commonwealth Act.
ROOMING HOUSE

Purpose
To facilitate the establishment of domestic-scale rooming houses.

Application
This clause applies to use and development of land for a rooming house.

Use exemption
Any requirement in the Activity Centre Zone, Capital City Zone, Commercial 1 Zone, General Residential Zone, Mixed Use Zone, Neighbourhood Residential Zone, Residential Growth Zone or Township Zone to obtain a permit to use land for a rooming house does not apply if all of the following requirements are met:

- Any condition opposite the use ‘rooming house’ in the table of uses in the zone or schedule to the zone is met.
- The total floor area of all buildings on the land does not exceed 300 square metres, excluding outbuildings.
- No more than 12 persons are accommodated.
- No more than 9 bedrooms are provided.

Buildings and works exemption
Any requirement in the General Residential Zone, Mixed Use Zone, Neighbourhood Residential Zone, Residential Growth Zone or Township Zone to obtain a permit to construct a building or construct or carry out works for a rooming house does not apply if all of the following requirements are met:

- No more than 9 bedrooms are developed on the land.
- Bedrooms can only be accessed from within the building.
- The total floor area of all buildings on the land does not exceed 300 square metres, excluding outbuildings.
- If the development is in the General Residential Zone or Neighbourhood Residential Zone, a garden area is provided in accordance with the minimum garden area requirement specified in the zone.
- Shared entry facilities and common areas, including a kitchen and living area, are provided.
CREMATORIUM

Purpose
To ensure that crematoria in cemeteries are developed and used in an appropriate manner.

Permit required
A permit is required to develop and use a crematorium on land that is used for cemetery purposes. This does not apply to land in the Springvale Crematorium.

Decision guidelines
Before deciding on an application to use and develop land for a crematorium, in addition to the decision guidelines in Clause 65, the responsible authority must consider:

- The provision of landscaping and screen planting.
- The location and design of the buildings to be constructed.
- The effect on traffic movement generated by the use.
- The provision of parking facilities.
[NO CONTENT]
LICENCED PREMISES

Purpose
To ensure that licensed premises are situated in appropriate locations.
To ensure that the impact of the licensed premises on the amenity of the surrounding area is considered.

Scope
These provisions apply to premises licensed, or to be licensed, under the *Liquor Control Reform Act 1998*.

Permit required
A permit is required to use land to sell or consume liquor if any of the following apply:

- A licence is required under the *Liquor Control Reform Act 1998*.
- A different licence or category of licence is required from that which is in force.
- The hours of trading allowed under a licence are to be extended.
- The number of patrons allowed under a licence is to be increased.
- The area that liquor is allowed to be consumed or supplied under a licence is to be increased.

This does not apply:

- To a limited licence.
- To a licence to manufacture liquor.
- If the schedule to this clause specifies that a permit is not required to use land to sell or consume liquor under a particular type of licence.
- To a variation that reduces the hours of trading allowed under a licence.
- To a variation that reduces the number of patrons allowed under a licence.
- To a variation that reduces the area within which liquor is allowed to be consumed or supplied under a licence.
- To a variation of licence at the initiative of the Victorian Commission for Gambling and Liquor Regulation, pursuant to Section 58 of the *Liquor Control Reform Act 1998*.
- To a variation of licence for a variation prescribed in Part 6, Regulation 31 of the Liquor Control Reform Regulations 2009.
- If a different licence or category of licence is required solely as a result of changes to licence categories.
- To a licence to sell only packaged liquor for consumption elsewhere issued before 8 April 2011.

The schedule to this clause may specify that a permit may not be granted to use land to sell or consume liquor under a particular type of licence.

Referral of applications
An application must be referred and notice of the application must be given in accordance with Clause 66 of this scheme.

Decision guidelines
Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

The impact of the sale or consumption of liquor permitted by the liquor licence on the amenity of the surrounding area.

The impact of the hours of operation on the amenity of the surrounding area.

The impact of the number of patrons on the amenity of the surrounding area.

The cumulative impact of any existing licensed premises and the proposed licensed premises on the amenity of the surrounding area.

GAMING

Purpose
To ensure that gaming machines are situated in appropriate locations and premises.
To ensure the social and economic impacts of the location of gaming machines are considered.
To prohibit gaming machines in specified shopping complexes and strip shopping centres.

Gaming objectives
A schedule to this clause may specify objectives to be achieved in relation to the installation or use of a gaming machine.

Permit requirement
A permit is required to install or use a gaming machine.
This does not apply in either of the following circumstances:
- Clause 52.28-4 or Clause 52.28-5 specifically prohibit a gaming machine.
- the gaming machine is in an approved venue under the Gambling Regulation Act 2003 on 18 October 2006 and the maximum number of gaming machines for the approved venue on 18 October 2006 is not exceeded.

Prohibition of a gaming machine in a shopping complex
Installation or use of a gaming machine is prohibited on land specified in a schedule to this clause.
This does not apply to a gaming machine in an approved venue under the Gambling Regulation Act 2003 on 18 October 2006; and the maximum number of gaming machines for the approved venue on 18 October 2006 is not exceeded.

Prohibition of a gaming machine in a strip shopping centre
Installation or use of a gaming machine is prohibited in a strip shopping centre if:
- the strip shopping centre is specified in the schedule to this clause.
- the schedule provides that a gaming machine is prohibited in all strip shopping centres on land covered by this planning scheme.
This does not apply to a gaming machine in an approved venue under the Gambling Regulation Act 2003 on 18 October 2006; and the maximum number of gaming machines for the approved venue on 18 October 2006 is not exceeded.
A strip shopping centre is an area that meets all of the following requirements:
- it is zoned for commercial use;
- it consists of at least two separate buildings on at least two separate and adjoining lots;
- it is an area in which a significant proportion of the buildings are shops;
- it is an area in which a significant proportion of the lots abut a road accessible to the public generally;
but it does not include the Capital City Zone in the Melbourne Planning Scheme.

Locations for gaming machines
A schedule to this clause may specify guidelines relating to locations for gaming venues and machines.
52.28-7
31/07/2018
VC148

Venues for gaming machines
A schedule to this clause may specify guidelines relating to venues for gaming machines.

52.28-8
31/07/2018
VC148

Application requirements
An application must be accompanied by any information specified in a schedule to this overlay.

52.28-9
31/07/2018
VC148

Decision guidelines
Before deciding on an application, in addition to the decision guidelines of Clause 65, the responsible authority must consider, as appropriate:

- The compatibility of the proposal with adjoining and nearby land uses.
- The capability of the site to accommodate the proposal.
- Whether the gaming premises provides a full range of hotel facilities or services to patrons or a full range of club facilities or services to members and patrons.
- Any other matters specified in the schedule to this clause.
SCHEDULE TO CLAUSE 52.28 GAMING

1.0 Prohibition of a gaming machine in a shopping complex

Installation or use of a gaming machine as specified in Clause 52.28-3 is prohibited on land described in Table 1 below.

Table 1

<table>
<thead>
<tr>
<th>Name of shopping complex and locality</th>
<th>Land description</th>
</tr>
</thead>
<tbody>
<tr>
<td>None specified</td>
<td></td>
</tr>
</tbody>
</table>

2.0 Prohibition of a gaming machine in a strip shopping centre

A gaming machine as specified in Clause 52.28-4 is prohibited in all strip shopping centres on land covered by this planning scheme.
LAND ADJACENT TO A ROAD ZONE, CATEGORY 1, OR A PUBLIC ACQUISITION OVERLAY FOR A CATEGORY 1 ROAD

Purpose
To ensure appropriate access to identified roads.
To ensure appropriate subdivision of land adjacent to identified roads.

Application
This clause applies to land adjacent to a Road Zone, Category 1, or a Public Acquisition Overlay if the purpose of acquisition is for a Category 1 road.

Permit requirement
A permit is required to:
- Create or alter access to:
  - A road in a Road Zone, Category 1.
  - Land in a Public Acquisition Overlay if the purpose of acquisition is for a Category 1 road.
- Subdivide land adjacent to:
  - A road in a Road Zone, Category 1.
  - Land in a Public Acquisition Overlay if the purpose of acquisition is for a Category 1 road.

Permit not required
A permit is not required to:
- Realign a boundary.
- Subdivide an existing building, provided the building is already connected to services and no new access is required.
- Subdivide land into two lots, provided no new access is required.

Referral of applications
An application to create or alter access to, or to subdivide land adjacent to, a road declared as a freeway or arterial road under the Road Management Act 2004, land owned by the Roads Corporation for the purpose of a road, or land in a Public Acquisition Overlay if the Roads Corporation is the acquiring authority for the land, must be referred to the Roads Corporation under section 55 of the Act.

Any other application must be referred to the owner of, or the acquiring authority for, the adjacent land in the Road Zone, Category 1, or the Public Acquisition Overlay.

Exemption from notice and review
An application is exempt from the notice requirements of section 52(1)(a), (b) and (d), the decision requirements of section 64(1), (2) and (3) and the review rights of section 82(1) of the Act.

Decision guidelines
Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider:
- The views of the relevant road authority.
- The effect of the proposal on the operation of the road and on public safety.
- Any policy made by the relevant road authority pursuant to Schedule 2, Clause 3 of the Road Management Act 2004 regarding access between a controlled access road and adjacent land.
WIND ENERGY FACILITY

Purpose
To facilitate the establishment and expansion of wind energy facilities, in appropriate locations, with minimal impact on the amenity of the area.

Application
This clause applies to land used and developed or proposed to be used and developed for a Wind energy facility.

Use and development of land
A permit is required to use and develop land for a Wind energy facility.

The use and development of land for a Wind energy facility is prohibited at a location listed in the table to this clause unless the condition opposite the location specified in the table is met.

Table to Clause 52.32-2

<table>
<thead>
<tr>
<th>Location</th>
<th>Condition</th>
</tr>
</thead>
<tbody>
<tr>
<td>On land where any turbine (measured from the centre of the tower at ground level) that forms part of the facility is located within one kilometre of an existing dwelling. This does not apply to a Wind energy facility that is located on land in a residential zone, an industrial zone, a commercial zone or a special purpose zone.</td>
<td>Must meet the requirements of clause 52.32-3.</td>
</tr>
<tr>
<td>Land described in a schedule to the National Parks Act 1975</td>
<td>Must be principally used to supply electricity to a facility used in conjunction with conservation, recreation, administration or accommodation use of the land.</td>
</tr>
<tr>
<td>Land declared a Ramsar wetland as defined under section 17 of the Environment Protection and Biodiversity Conservation Act 1999 (Cwth)</td>
<td>Must be on land in a residential zone, industrial zone, commercial zone or special purpose zone and must be integrated as part of the development of the land.</td>
</tr>
<tr>
<td>Land listed in a schedule to Clause 52.32-2</td>
<td>Must be on land in a residential zone, industrial zone, commercial zone or special purpose zone and must be integrated as part of the development of the land.</td>
</tr>
</tbody>
</table>

Turbine within one kilometre of a dwelling
An application that includes a proposed turbine within one kilometre of an existing dwelling must be accompanied by:

- A plan showing all dwellings within one kilometre of a proposed turbine (measured from the centre of the tower at ground level).
- Evidence of the written consent of any owner as at the date of that application of an existing dwelling located within one kilometre of a proposed turbine (measured from the centre of the tower at ground level) that forms part of a Wind energy facility. This does not apply to an application to amend such a permit under section 72 or section 97I of the Act unless the amendment of the permit would:
  - increase the number of turbines; or
- change the location of a turbine so that the centre of the tower (at ground level) is located closer to an existing dwelling (within one kilometre of a permitted turbine) than the centre of the tower (at ground level) of the closest permitted turbine to that dwelling.

This does not apply to a Wind energy facility that is located on land in a residential zone, an industrial zone, a commercial zone or a special purpose zone.

**Application requirements**

An application must be accompanied by the following information as appropriate:

**Site and context analysis**

A site and context analysis may use a site plan, photographs or other techniques to accurately describe the site and surrounding area and must include the following information:

- In relation to the site:
  - Site shape, dimensions and size
  - Orientation and contours
  - Current land use
  - The existing use and siting of buildings or works on the land
  - Existing vegetation types, condition and coverage
  - The landscape of the site
  - Species of flora and fauna listed under the *Flora and Fauna Guarantee Act 1988* and the *Environment Protection and Biodiversity Conservation Act 1999* (Cwth)
  - Sites of cultural heritage significance
  - Wind characteristics
  - Any other notable features, constraints or other characteristics of the site.

- In relation to the surrounding area:
  - Existing land uses
  - Above-ground utilities
  - Access to infrastructure
  - Direction and distances to nearby dwellings, townships, urban areas, significant conservation and recreation areas, water features, tourist routes and walking tracks, major roads, airports, aerodromes and existing and proposed wind energy facilities
  - The siting and use of buildings on adjacent properties
  - Views to and from the site, including views from existing dwellings and key vantage points including major roads, walking tracks, tourist routes and regional population growth corridors
  - Sites of flora and fauna listed under the *Flora and Fauna Guarantee Act 1988* and *Environment Protection and Biodiversity Conservation Act 1999* (Cwth), including significant habitat corridors, and movement corridors for these fauna
  - Sites of cultural heritage significance
  - National Parks, State Parks, Coastal Reserves and other land subject to the *National Parks Act 1975*
  - Land declared a Ramsar wetland as defined under section 17 of the *Environment Protection and Biodiversity Conservation Act 1999* (Cwth)
- Location of any land included in the schedule to clause 52.32-2 of the planning scheme
- Any other notable features or characteristics of the area
- Bushfire risks.

**Design response**

- Detailed plans of the proposed development.
- Plans and elevations of transmission infrastructure and electricity utility works required to connect the facility to the electricity network, and access road options.
- Accurate visual simulations illustrating the development in the context of the surrounding area and from key public view points.
- A rehabilitation plan for the site.
- A written report(s), including:
  - A description of the proposal.
  - An explanation of how the proposed design derives from and responds to the site analysis.
  - A description of how the proposal responds to any significant landscape features for the area identified in the planning scheme.
  - An assessment of:
    - the visual impact of the proposal on the surrounding landscape.
    - the visual impact on abutting land that is described in a schedule to the *National Parks Act 1975* and Ramsar wetlands and coastal areas.
    - the impact of the proposal on any species (including birds and bats) listed under the *Flora and Fauna Guarantee Act 1988* or the *Environment Protection and Biodiversity Conservation Act 1999* (Cwth).
    - the noise impacts of the proposal prepared in accordance with the New Zealand Standard NZS6808:2010, Acoustics – Wind Farm Noise, including an assessment of whether a high amenity noise limit is applicable, as assessed under Section 5.3 of the Standard.
    - the impacts upon Aboriginal or non-Aboriginal cultural heritage.
  - A statement of why the site is suitable for the wind energy facility.
  - An environmental management plan including any rehabilitation and monitoring requirements.

If in the opinion of the responsible authority a requirement of the site and context analysis or design response is not relevant to the evaluation of an application, the responsible authority may waive or reduce the requirement.

An application must be accompanied by the following information:

**Mandatory noise assessment**

- A pre-construction (predictive) noise assessment report demonstrating that the proposal can comply with the New Zealand Standard NZS6808:2010, Acoustics – Wind Farm Noise, including an assessment of whether a high amenity noise limit is applicable under Section 5.3 of the Standard.
- An environmental audit report of the pre-construction (predictive) noise assessment report prepared under Part IXD, Section 53V of the *Environment Protection Act 1970* by an environmental auditor appointed under Part IXD of the *Environment Protection Act 1970*. The environmental audit report must verify that the acoustic assessment undertaken for the purpose
of the pre-construction (predictive) noise assessment report has been conducted in accordance with the New Zealand Standard NZS6808:2010, Acoustics – Wind Farm Noise.

### Mandatory condition

A permit to use or develop land for a wind energy facility must include the following conditions:

- A post-construction noise assessment report prepared in accordance with the New Zealand Standard NZS6808:2010, Acoustics – Wind Farm Noise demonstrating whether the wind energy facility complies with the Standard, must be submitted to the Responsible Authority. If the wind energy facility is constructed in stages, additional post-construction noise assessment reports for each stage must be submitted to the Responsible Authority.

- Each post-construction noise assessment report must be accompanied by an environmental audit report prepared under Part IXD, Section 53V of the Environment Protection Act 1970 by an environmental auditor appointed under Part IXD of the Environment Protection Act 1970. The environmental audit report must verify that the acoustic assessment undertaken for the purpose of the post-construction noise assessment report has been conducted in accordance with the New Zealand Standard NZS6808:2010, Acoustics – Wind Farm Noise.

### Decision guidelines

Before deciding on an application, in addition to the decision guidelines of Clause 65, the responsible authority must consider, as appropriate:

- The effect of the proposal on the surrounding area in terms of noise, blade glint, shadow flicker and electromagnetic interference.

- The impact of the development on significant views, including visual corridors and sightlines.

- The impact of the facility on the natural environment and natural systems.

- The impact of the facility on cultural heritage.

- The impact of the facility on aircraft safety.

- Policy and Planning Guidelines for Development of Wind Energy Facilities in Victoria
  (Department of Environment, Land, Water and Planning, October 2018).

### Anemometer

Despite anything to the contrary in this scheme a permit may be granted to use and develop land for the purpose of wind measurement by an anemometer for a period of more than three years.

### Application to amend a permit under section 72 of the Act

An application to amend a permit made under section 72 of the Act is exempt from the decision requirements of section 64(1), (2) and (3) and the review rights of section 82(1) of the Act if the amendment of the permit does not:

- increase the number of turbines; or

- change the location of a turbine so that the centre of the tower (at ground level) is located closer to an existing dwelling (within one kilometre of a permitted turbine) than the centre of the tower (at ground level) of the closest permitted turbine to that dwelling.
Application to amend a permit under section 97I of the Act

An application to amend a referred wind energy facility permit made under section 97I of the Act is wholly exempt from the requirements of section 97E(1) of the Act if the application does not seek to:

- increase the total number of turbines; or
- increase the maximum height of any turbine; or
- change the location of a turbine so that the centre of the tower (at ground level) is located closer to an existing dwelling (within one kilometre of a permitted turbine) than the centre of the tower (at ground level) of the closest permitted turbine to that dwelling.

The requirements of section 97E(1) of the Act are modified so as to require referral of objections and submissions to an advisory committee established under section 151 of the Act if an application to amend a referred wind energy facility permit made under section 97I of the Act does not seek to:

- increase the total number of turbines by more than 15%; or
- increase the maximum height of any turbine by more than 20%; or
- change the location of a turbine so that the centre of the tower (at ground level) is located closer to an existing dwelling (within one kilometre of a permitted turbine) than the centre of the tower (at ground level) of the closest permitted turbine to that dwelling.
SCHEDULE TO CLAUSE 52.32 WIND ENERGY FACILITY

1.0 Wind energy facility prohibition

<table>
<thead>
<tr>
<th>Land where a Wind energy facility is prohibited</th>
</tr>
</thead>
<tbody>
<tr>
<td>All land within five kilometres of a residential zone, an industrial zone, a business zone or a special purpose zone in the urban area of Swan Hill.</td>
</tr>
</tbody>
</table>
POST BOXES AND DRY STONE WALLS

Purpose
To conserve historic post boxes and dry stone walls.

Permit requirement
A permit is required to demolish or remove a post box constructed before 1930.
A permit is required to demolish, remove or alter a dry stone wall constructed before 1940 on land specified in the schedule to this provision. This does not apply to:

- Dry stone structures other than walls and fences.
- The demolition or removal of a section of a dry stone wall to install a gate.
- The reconstruction of damaged or collapsing walls which are undertaken to the same specifications and using the same materials as the existing walls.

Decision guidelines
Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

- The significance of the post box or dry stone wall.
- Any applicable heritage study, statement of significance and conservation policy.
- Whether the proposal will adversely affect the significance of the post box or dry stone wall.
- Whether the proposal will adversely affect the significance, character or appearance of the area.
## Permit requirement for dry stone walls

<table>
<thead>
<tr>
<th>Land</th>
<th>None specified</th>
</tr>
</thead>
</table>

---
BICYCLE FACILITIES

Purpose
To encourage cycling as a mode of transport.
To provide secure, accessible and convenient bicycle parking spaces and associated shower and change facilities.

Provision of bicycle facilities
A new use must not commence or the floor area of an existing use must not be increased until the required bicycle facilities and associated signage has been provided on the land.
Where the floor area occupied by an existing use is increased, the requirement for bicycle facilities only applies to the increased floor area of the use.

Permit requirement
A permit may be granted to vary, reduce or waive any requirement of Clause 52.34-5 and Clause 52.34-6.

Exemption from notice and review
An application is exempt from the notice requirements of section 52(1)(a), (b) and (d), the decision requirements of section 64(1), (2) and (3) and the review rights of section 82(1) of the Act.

Decision guidelines
Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

- Whether the proposed number, location and design of bicycle facilities meets the purpose of this clause.
- The location of the proposed land use and the distance a cyclist would need to travel to reach the land.
- The users of the land and their opportunities for bicycle travel.
- Whether showers and change rooms provided on the land for users other than cyclists are available to cyclists.
- The opportunities for sharing of bicycle facilities by multiple uses, either because of variation of bicycle parking demand over time or because of efficiencies gained from the consolidation of shared bicycle facilities.
- Any relevant bicycle parking strategy or equivalent.

Required bicycle facilities
Tables 1, 2 and 3 to this clause set out the number and type of bicycle facilities required. Bicycle facilities are required if the use is listed in column 1 of the table. The number of bicycle facilities required for a use is the sum of columns 2 and 3 of the tables.
If in calculating the number of bicycle facilities the result is not a whole number, the required number of bicycle facilities is the nearest whole number. If the fraction is one-half, the requirement is the next whole number.
A bicycle space for an employee or resident must be provided either in a bicycle locker or at a bicycle rail in a lockable compound.
A bicycle space for a visitor, shopper or student must be provided at a bicycle rail.

</tr>
</tbody>
</table>

Design of bicycle spaces

Bicycle spaces should:

- Provide a space for a bicycle of minimum dimensions of 1.7 metres in length, 1.2 metres in height and 0.7 metres in width at the handlebars.
- Be located to allow a bicycle to be ridden to within 30 metres of the bicycle parking space.
- Be located to provide convenient access from surrounding bicycle routes and main building entrances.
- Not interfere with reasonable access to doorways, loading areas, access covers, furniture, services and infrastructure.
- Not cause a hazard.
- Be adequately lit during periods of use.

Bicycle rails

A bicycle rail must:

- Be securely fixed to a wall or to the floor or ground.
- Be in a highly visible location for bicycle security (when not in a compound).
- Be of a shape that allows a cyclist to easily lock the bicycle frame and wheels.
- Be located to allow easy access to park, lock and remove the bicycle.

Bicycle compounds and lockers

A bicycle compound or a bicycle locker must:

- Be located to provide convenient access to other bicycle facilities including showers and change rooms.
- Be fully enclosed.
- Be able to be locked.
- If outside, provide weather protection for the bicycle.

A bicycle locker must provide a bicycle parking space for at least one bicycle.

A bicycle compound must:

- Include wall or floor rails for bicycle parking.
- Provide an internal access path of at least 1.5 metres in width.
Bicycle signage

If bicycle facilities are required by this clause, bicycle signage that directs the cyclists to the bicycle facilities must be provided to the satisfaction of the responsible authority.

Bicycle signage should:

- Be at least 0.3 metres wide and 0.45 metres high.
- Display a white bicycle on a blue background on the top half of the sign.
- Display information about the direction of facilities on the bottom half of the sign.
PUBLIC OPEN SPACE CONTRIBUTION AND SUBDIVISION

A person who proposes to subdivide land must make a contribution to the council for public open space in an amount specified in the schedule to this clause (being a percentage of the land intended to be used for residential, industrial or commercial purposes, or a percentage of the site value of such land, or a combination of both). If no amount is specified, a contribution for public open space may still be required under section 18 of the Subdivision Act 1988.

Exemption from public open space requirement specified in the scheme

A subdivision is exempt from a public open space requirement specified in this scheme if:

- It is one of the following classes of subdivision:
  - Class 1: The subdivision of a building used for residential purposes provided each lot contains part of the building. The building must have been constructed or used for residential purposes immediately before 30 October 1989 or a planning permit must have been issued for the building to be constructed or used for residential purposes immediately before that date.
  - Class 2: The subdivision of a commercial or industrial building provided each lot contains part of the building.

- It is for the purpose of excising land to be transferred to a public authority, council or a Minister for a utility installation.

- It subdivides land into two lots and the council considers it unlikely that each lot will be further subdivided.

Exemption from public open space requirement under section 18(8)(a) of the Subdivision Act 1988

For the purposes of section 18(8)(a) of the Subdivision Act 1988, the following classes of subdivision are exempt from the public open space requirement:

- Class 1: The subdivision of a building used for residential purposes provided each lot contains part of the building. The building must have been constructed or used for residential purposes immediately before 30 October 1989 or a planning permit must have been issued for the building to be constructed or used for residential purposes immediately before that date.

- Class 2: The subdivision of a commercial or industrial building provided each lot contains part of the building.

Note: Check section 18A of the Subdivision Act 1988 for other requirements that apply to a public open space requirement specified in the planning scheme.

**SCHEDULE TO CLAUSE 53.01 PUBLIC OPEN SPACE CONTRIBUTION AND SUBDIVISION**

---
BUSHFIRE PLANNING

Purpose
To implement the Municipal Planning Strategy and the Planning Policy Framework.
To ensure that the development of land prioritises the protection of human life and strengthens community resilience to bushfire.
To ensure that the location, design and construction of development appropriately responds to the bushfire hazard.
To ensure development is only permitted where the risk to life, property and community infrastructure from bushfire can be reduced to an acceptable level.
To specify location, design and construction measures for a single dwelling that reduces the bushfire risk to life and property to an acceptable level.

Application
This clause applies to an application under Clause 44.06 - Bushfire Management Overlay, unless the application meets all of the requirements specified in a schedule to Clause 44.06.
Clause 53.02-3 applies to an application to construct a single dwelling or construct or carry out works associated with a single dwelling if all of the following requirements are met:
- The land is zoned Neighbourhood Residential Zone, General Residential Zone, Residential Growth Zone, Urban Growth Zone, Low Density Residential Zone, Township Zone or Rural Living Zone.
- There is only one dwelling on the lot.
- The application meets all of the approved measures contained in Clause 53.02-3.
Clause 53.02-4 applies to all other applications.

Operation
The provisions of this clause contain:
- Objectives. An objective describes the outcome that must be achieved in a completed development.
- Approved measures (AM). An approved measure meets the objective.
- Alternative measures (AltM). An alternative measure may be considered where the responsible authority is satisfied that the objective can be met. The responsible authority may consider other unspecified alternative measures.
- Decision guidelines. The decision guidelines set out the matters that the responsible authority must consider before deciding on an application, including whether any proposed alternative measure is appropriate.
A schedule to Clause 44.06 may specify substitute approved measures, additional alternative measures and additional or substitute decision guidelines.
A substitute approved measure specified in a schedule to Clause 44.06 substitutes the applicable approved measure contained in this clause.

Dwellings in existing settlements – Bushfire protection objective
To specify bushfire design and construction measures for a single dwelling or alteration and extension to an existing dwelling that reduces the risk to life and property to an acceptable level.
Approved measures

<table>
<thead>
<tr>
<th>Measure</th>
<th>Requirement</th>
</tr>
</thead>
<tbody>
<tr>
<td>AM 1.1</td>
<td>A building is sited to ensure the site best achieves the following:</td>
</tr>
<tr>
<td></td>
<td>• The maximum separation distance between the building and the bushfire hazard.</td>
</tr>
<tr>
<td></td>
<td>• The building is in close proximity to a public road.</td>
</tr>
<tr>
<td></td>
<td>• Access can be provided to the building for emergency service vehicles.</td>
</tr>
<tr>
<td>AM 1.2</td>
<td>A building provides the defendable space in accordance with Table 1 Columns A, B, C, D or E and Table 6 to Clause 53.02-5. Adjoining land may be included as defendable space where there is a reasonable assurance that the land will remain or continue to be managed in that condition as part of the defendable space.</td>
</tr>
<tr>
<td></td>
<td>A building is constructed to the bushfire attack level:</td>
</tr>
<tr>
<td></td>
<td>• That corresponds to the defendable space provided in accordance with Table 1 to Clause 53.02-5, or</td>
</tr>
<tr>
<td></td>
<td>• The next lower bushfire attack level that corresponds to the defendable space provided in accordance with Table 1 to Clause 53.02-5 where all of the following apply:</td>
</tr>
<tr>
<td></td>
<td>• A private bushfire shelter (a Class 10c building within the meaning of the Building Regulations 2006) is constructed on the same land as the dwelling.</td>
</tr>
<tr>
<td></td>
<td>• A minimum bushfire attack level of BAL12.5 is provided in all circumstances.</td>
</tr>
<tr>
<td>AM 1.3</td>
<td>A building is provided with:</td>
</tr>
<tr>
<td></td>
<td>• A static water supply for fire fighting and property protection purposes specified in Table 4 to Clause 53.02-5. The water supply may be in the same tank as other water supplies provided that a separate outlet is reserved for fire fighting water supplies.</td>
</tr>
<tr>
<td></td>
<td>• Vehicle access that is designed and constructed as specified in Table 5 to Clause 53.02-5.</td>
</tr>
</tbody>
</table>

53.02-3.1 Decision guidelines

Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider:

• The Municipal Planning Strategy and the Planning Policy Framework.
• The bushfire hazard site assessment and the bushfire management statement submitted with the application.
• Whether all of the the approved measures have been incorporated into the application.

53.02-4 Bushfire protection objectives

53.02-4.1 Landscape, siting and design objectives

Development is appropriate having regard to the nature of the bushfire risk arising from the surrounding landscape.

Development is sited to minimise the risk from bushfire.

Development is sited to provide safe access for vehicles, including emergency vehicles.

Building design minimises vulnerability to bushfire attack.

<td>The bushfire risk to the development from the landscape beyond the site can be mitigated to an acceptable level.</td>
</tr>
</tbody>
</table>
| AM 2.2  | A building is sited to ensure the site best achieves the following:  
- The maximum separation distance between the building and the bushfire hazard.  
- The building is in close proximity to a public road.  
- Access can be provided to the building for emergency service vehicles. |
| AM 2.3  | A building is designed to be responsive to the landscape risk and reduce the impact of bushfire on the building. |

53.02-4.2

Defendable space and construction objective

Defendable space and building construction mitigate the effect of flame contact, radiant heat and embers on buildings.

Approved measures

<table>
<thead>
<tr>
<th>Measure</th>
<th>Requirement</th>
</tr>
</thead>
</table>
| AM 3.1  | A building used for a dwelling (including an extension or alteration to a dwelling), a dependent person’s unit, industry, office or retail premises is provided with defendable space in accordance with:  
- Table 2 Columns A, B or C and Table 6 to Clause 53.02-5 wholly within the title boundaries of the land; or  
- If there are significant siting constraints, Table 2 Column D and Table 6 to Clause 53.02-5.  
The building is constructed to the bushfire attack level that corresponds to the defendable space provided in accordance with Table 2 to Clause 53.02-5. |
| AM 3.2  | A building used for accommodation (other than a dwelling or dependent person’s unit), a child care centre, an education centre, a hospital, leisure and recreation or a place of assembly is:  
- Provided with defendable space in accordance with Table 3 and Table 6 to Clause 53.02-5 wholly within the title boundaries of the land.  
- Constructed to a bushfire attack level of BAL12.5. |

Alternative measures

<table>
<thead>
<tr>
<th>Measure</th>
<th>Requirement</th>
</tr>
</thead>
<tbody>
<tr>
<td>AltM 3.3</td>
<td>Adjoining land may be included as defendable space where there is a reasonable assurance that the land will remain or continue to be managed in that condition as part of the defendable space.</td>
</tr>
<tr>
<td>AltM 3.4</td>
<td>Defendable space and the bushfire attack level is determined using Method 2 of AS3959:2009 Construction of buildings in bushfire prone areas (Standards Australia) subject to any guidance published by the relevant fire authority.</td>
</tr>
</tbody>
</table>
RequirementMeasure

A building used for a dwelling (including an extension or alteration to a dwelling) may provide defendable space to the property boundary where it can be demonstrated that:

- The lot has access to urban, township or other areas where:
  - Protection can be provided from the impact of extreme bushfire behaviour.
  - Fuel is managed in a minimum fuel condition.
  - There is sufficient distance or shielding to protect people from direct flame contact or harmful levels of radiant heat.

- Less defendable space and a higher construction standard is appropriate having regard to the bushfire hazard landscape assessment.
- The dwelling is constructed to a bushfire attack level of BAL FZ.

This alternative measure only applies where the requirements of AM 3.1 cannot be met.

AltM 3.6

A building used for accommodation (other than a dwelling or dependent person’s unit), child care centre, education centre, hospital, leisure and recreation or place of assembly may provide defendable space in accordance with Table 2 Columns A, B or C and Table 6 to Clause 53.02-5 where it can be demonstrated that:

- An integrated approach to risk management has been adopted that considers:
  - The characteristics of the likely future occupants including their age, mobility and capacity to evacuate during a bushfire emergency.
  - The intended frequency and nature of occupation.
  - The effectiveness of proposed emergency management arrangements, including a mechanism to secure implementation.

- Less defendable space and a higher construction standard is appropriate having regard to the bushfire hazard landscape assessment.

53.02-4.3 Water supply and access objectives

A static water supply is provided to assist in protecting property.
Vehicle access is designed and constructed to enhance safety in the event of a bushfire.

Approved measures

<table>
<thead>
<tr>
<th>Measure</th>
<th>Requirement</th>
</tr>
</thead>
</table>
| AM 4.1  | A building used for a dwelling (including an extension or alteration to a dwelling), a dependent person’s unit, industry, office or retail premises is provided with:
  - A static water supply for fire fighting and property protection purposes specified in Table 4 to Clause 53.02-5.
  - Vehicle access that is designed and constructed as specified in Table 5 to Clause 53.02-5. The water supply may be in the same tank as other water supplies provided that a separate outlet is reserved for fire fighting water supplies. |
| AM 4.2  | A building used for accommodation (other than a dwelling or dependent person’s unit), child care centre, education centre, hospital, leisure and recreation or place of assembly is provided with: |
A static water supply for fire fighting and property protection purposes of 10,000 litres per 1,500 square metres of floor space up to 40,000 litres.

Vehicle access that is designed and constructed as specified in Table 5 to Clause 53.02-5.

An integrated approach to risk management that ensures the water supply and access arrangements will be effective based on the characteristics of the likely future occupants including their age, mobility and capacity to evacuate during a bushfire emergency.

The water supply may be in the same tank as other water supplies provided that a separate outlet is reserved for fire fighting water supplies.

### 53.02-4.4 Subdivision objectives

To provide lots that are capable of being developed in accordance with the objectives of Clause 53.02.

To specify at the subdivision stage bushfire protection measures to develop a lot with a single dwelling on land zoned for residential or rural residential purposes.

<table>
<thead>
<tr>
<th>Measure</th>
<th>Requirement</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>AM 5.1</strong></td>
<td>An application to subdivide land, other than where AM 5.2 applies, demonstrates that each proposed lot is capable of meeting:</td>
</tr>
<tr>
<td></td>
<td>- The defendable space in accordance with Table 2 Columns A, B or C and Table 6 to Clause 53.02-5.</td>
</tr>
<tr>
<td></td>
<td>- The approved measures in Clause 53.02-4.1 and Clause 53.02-4.3.</td>
</tr>
<tr>
<td><strong>AM 5.2</strong></td>
<td>An application to subdivide land zoned for residential or rural residential purposes must be accompanied by a plan that shows:</td>
</tr>
<tr>
<td></td>
<td>- Each lot satisfies the approved measure in AM 2.1.</td>
</tr>
<tr>
<td></td>
<td>- A building envelope for a single dwelling on each lot that complies with AM 2.2 and provides defendable space in accordance with:</td>
</tr>
<tr>
<td></td>
<td>- Columns A or B of Table 2 to Clause 53.02-5 for a subdivision that creates 10 or more lots; or</td>
</tr>
<tr>
<td></td>
<td>- Columns A, B or C of Table 2 to Clause 53.02-5 for a subdivision that creates less than 10 lots.</td>
</tr>
<tr>
<td></td>
<td>The bushfire attack level that corresponds to the defendable space provided in accordance with Table 2 to Clause 53.02-5 must be noted on the building envelope.</td>
</tr>
<tr>
<td></td>
<td>- Defendable space wholly contained within the boundaries of the proposed subdivision.</td>
</tr>
<tr>
<td></td>
<td>- Defendable space may be shared between lots within the subdivision. Defendable space for a lot may utilise communal areas, such as roads, where that land can meet the requirements for defendable space.</td>
</tr>
<tr>
<td></td>
<td>- Vegetation management requirements in accordance with Table 6 to implement and maintain the defendable space required under this approved measure.</td>
</tr>
<tr>
<td></td>
<td>- Water supply and vehicle access that complies with AM 4.1.</td>
</tr>
<tr>
<td><strong>AM 5.3</strong></td>
<td>An application to subdivide land to create 10 or more lots provides a perimeter road adjoining the hazardous vegetation to support fire fighting.</td>
</tr>
</tbody>
</table>
Requirement Measure

A subdivision manages the bushfire risk to future development from existing or proposed landscaping, public open space and communal areas.

</tr>
<tr>
<td></td>
<td>- All other requirements of AM 5.2 have been met.</td>
</tr>
<tr>
<td></td>
<td>- Less defendable space and a higher construction standard is appropriate having regard to the bushfire hazard landscape assessment.</td>
</tr>
</tbody>
</table>

53.02-4.5 Decision guidelines

Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider:

- The bushfire hazard landscape assessment, the bushfire hazard site assessment and the bushfire management statement submitted with the application.
- The impact of any State, regional or local bushfire management and prevention actions occurring around the site and in the wider area on the bushfire hazard and the level of risk to the proposed development.
- Whether the proposed development meets the objectives of Clause 53.02-4 regardless of other measures which may be available, including private bushfire shelters, community shelters and the presence of places of last resort.
- Whether the proposed measures can be practically implemented and maintained in conjunction with the ongoing use of the land.
- Whether the use of an alternative measure meets the relevant objective having regard to the bushfire hazard and the nature of any constraint that prevents the applicable approved measure from being implemented.
- If one or more of the objectives in Clause 53.02-4 will not be achieved in the completed development, whether the development will, taking all relevant factors into account, reduce the bushfire risk to a level that warrants it proceeding.
- Whether the risk arising from the broader landscape can be mitigated to an acceptable level or warrants the development not proceeding.

| Slope >20 degrees | All vegetation | Defendable space and the bushfire attack level is determined using Method 2 of AS3959:2009 Construction of buildings in bushfire prone areas (Standards Australia) subject to any guidance published by the relevant fire authority.
| All slopes  | Low threat vegetation | Defendable space is to be provided for a distance of 50 metres, or the property boundary whichever is the lesser, for buildings constructed to all bushfire attack levels. The minimum construction standard is BAL 12.5.
| All slopes  | Modified vegetation  | Defendable space is to be provided for a distance of 50 metres, or the property boundary whichever is the lesser, for buildings constructed to all bushfire attack levels. The minimum construction standard is BAL 29.

Note 1: Slope and vegetation type is determined through the bushfire hazard site assessment.

Note 2: Modified vegetation is vegetation that doesn’t fit into the vegetation classifications in AS3959:2009 Construction of buildings in bushfire prone areas (the standard) because it:
- has been modified, altered or is managed due to urban development, or gardening,
- has different fuel loads from those assumed in the standard,
- has limited or no understorey vegetation, or
- is not low-threat or low-risk vegetation as defined in the standard.

Defendable space and the bushfire attack level is determined using Method 2 of AS3959:2009 Construction of buildings in bushfire prone areas (Standards Australia) subject to any guidance published by the relevant fire authority.

Defendable space is to be provided for a distance of 50 metres, or the property boundary whichever is the lesser, for buildings constructed to all bushfire attack levels. The minimum construction standard is BAL 12.5.

Modified vegetation:
- has been modified, altered or is managed due to urban development, or gardening,
- has different fuel loads from those assumed in the standard,
- has limited or no understorey vegetation, or
- is not low-threat or low-risk vegetation as defined in the standard.

</tr>
</tbody>
</table>

*Note 1: A hydrant is available if it is located within 120 metres of the rear of the building*

**Fire authority requirements**

Unless otherwise agreed in writing by the relevant fire authority, the water supply must:

- Be stored in an above ground water tank constructed of concrete or metal.
- Have all fixed above ground water pipes and fittings required for firefighting purposes made of corrosion resistant metal.
- Include a separate outlet for occupant use.

Where a 10,000 litre water supply is required, fire authority fittings and access must be provided as follows:

- Be readily identifiable from the building or appropriate identification signs to the satisfaction of the relevant fire authority.
- Be located within 60 metres of the outer edge of the approved building.
- The outlet/s of the water tank must be within 4 metres of the accessway and unobstructed.
- Incorporate a separate ball or gate valve (British Standard Pipe (BSP 65 millimetre) and coupling (64 millimetre CFA 3 thread per inch male fitting).
- Any pipework and fittings must be a minimum of 65 millimetres (excluding the CFA coupling).

**Table 5 Vehicle access design and construction**

Vehicle access (or part thereof) of a length specified in Column A implements the design and construction requirements specified in Column B.

<table>
<thead>
<tr>
<th>Column A</th>
<th>Column B</th>
</tr>
</thead>
<tbody>
<tr>
<td>Length of access is less than 30 metres</td>
<td>There are no design and construction requirements if fire authority access to the water supply is not required under AM4.1.</td>
</tr>
</tbody>
</table>
Where fire authority access to the water supply is required under AM4.1, fire authority vehicles should be able to get within 4 metres of the water supply outlet.

**Length of access is less than 30 metres**

The following design and construction requirements apply:
- All-weather construction.
- A load limit of at least 15 tonnes.
- Provide a minimum trafficable width of 3.5 metres.
- Be clear of encroachments for at least 0.5 metres on each side and at least 4 metres vertically.
- Curves must have a minimum inner radius of 10 metres.
- The average grade must be no more than 1 in 7 (14.4%) (8.1°) with a maximum grade of no more than 1 in 5 (20%) (11.3°) for no more than 50 metres.
- Dips must have no more than a 1 in 8 (12.5 per cent) (7.1 degrees) entry and exit angle.

**Length of access is greater than 30 metres**

A turning area for fire fighting vehicles must be provided close to the building by one of the following:
- A turning circle with a minimum radius of eight metres.
- A driveway encircling the dwelling.
- The provision of other vehicle turning heads – such as a T or Y head – which meet the specification of Austroad Design for an 8.8 metre Service Vehicle.

**Length of access is greater than 100 metres**

- Passing bays must be provided at least every 200 metres.
- Passing bays must be a minimum of 20 metres long with a minimum trafficable width of 6 metres.

**Length of access is greater than 200 metres**

- Passing bays must be provided at least every 200 metres.
- Passing bays must be a minimum of 20 metres long with a minimum trafficable width of 6 metres.

---

**Note 1:** The length of access should be measured from a public road to either the building or the water supply outlet, whichever is longer.

### Table 6 Vegetation management requirement

**Vegetation management requirement**

Defendable space is provided and is managed in accordance with the following requirements:
- Grass must be short cropped and maintained during the declared fire danger period.
- All leaves and vegetation debris must be removed at regular intervals during the declared fire danger period.
- Within 10 metres of a building, flammable objects must not be located close to the vulnerable parts of the building.
- Plants greater than 10 centimetres in height must not be placed within 3 metres of a window or glass feature of the building.
- Shrubs must not be located under the canopy of trees.
- Individual and clumps of shrubs must not exceed 5 square metres in area and must be separated by at least 5 metres.
Vegetation management requirement

- Trees must not overhang or touch any elements of the building.
- The canopy of trees must be separated by at least 5 metres.
- There must be a clearance of at least 2 metres between the lowest tree branches and ground level.

Unless specified in a schedule or otherwise agreed in writing to the satisfaction of the relevant fire authority.

Table 7 Outbuilding construction requirement

Building construction condition

The proposed outbuilding is separated from the adjacent building by a wall that extends to the underside of a non-combustible roof covering and:

- has a FRL of not less than 60/60/60 for loadbearing walls and -/60/60 for non-load bearing walls when tested from the attached structure side, or
- is of masonry, earth wall or masonry-veneer construction with the masonry leaf of not less than 90 millimetres in thickness.

Any openings in the wall shall be protected in accordance with the following:

i. Doorways – by FLR -/60/30 self-closing fire doors

ii. Windows – by FRL -/60/- fire windows permanently fixed in the closed position

iii. Other openings – by construction with a FRL of not less than -/60/-

*Note: Control and construction joints, subfloor vents, weepholes and penetrations for pipes and conduits need not comply with item iii.*

Note 1: These conditions are required for some non habitable outbuildings ancillary to a dwelling that do not require referral to the relevant fire authority. Applications for non habitable outbuildings can also use the bushfire protection measures in Clause 53.02 however referral to the relevant fire authority will be required.
BROTHELS

Purpose

To provide consistent planning controls for the establishment and expansion of brothels throughout Victoria coordinated with the provisions of the Sex Work Act 1994.

Permit requirement

A permit for a brothel must include a condition that specifies that the use or development must not commence until a licence is granted under the Sex Work Act 1994.

Decision guidelines

Responsible authorities should consider the matters set out in section 73 of the Sex Work Act 1994 before deciding an application to use or develop land for a brothel.

Responsible authorities should refuse a permit to use or develop land for a brothel in accordance with the restrictions contained in section 74 of the Sex Work Act 1994, unless section 76(2) of Sex Work Act 1994 applies.

If the effect of:

- A request to amend a permit in accordance with section 87 or section 87A of the Planning and Environment Act 1987, or
- An application to amend a permit in accordance with Part 4 Division 1A of the Planning and Environment Act 1987, or
- A request to amend plans, drawings or other documents under a permit in accordance with:
  - Section 216 of the Planning and Environment Act 1987, or
  - Any condition in a planning permit which allows such an amendment

is to expand or extend the use or development of a brothel, the application or request should be determined as if it were an application for a permit for use or development of land for the purposes of the operation of a brothel in accordance with Part 4 of the Sex Work Act 1994.
CONVENIENCE RESTAURANT AND TAKE-AWAY FOOD PREMISES

Application

These requirements only apply to land in a residential zone.

Decision guidelines

Before deciding on an application to use land for a convenience restaurant or take-away food premises or to construct a building or construct or carry out works associated with a convenience restaurant or take-away food premises, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

- Any policy in this scheme relating to convenience restaurants or take-away food premises.
- Whether the location is appropriate for a convenience restaurant or take-away food premises having regard to:
  - Amenity of the neighbourhood.
  - Proximity of the land to non-residential uses and zones.
  - Effect of the use on heritage and environment features.
  - Capacity of the land to contain significant off-site effects.
  - Access to land in a Road Zone.
  - The suitability of the land for a residential use.
- The effect on the amenity or character of the street or neighbourhood having regard to:
  - Massing and proportions of any building.
  - Ground floor height above ground level.
  - Ceiling heights.
  - Roof form and pitch.
  - Facade articulation.
  - Window and door proportions.
  - Building features including verandas, towers, eaves, parapets and decorative elements.
  - Building materials, patterns, textures and colours.
- Whether the site layout and the design of buildings, noise attenuation measures, landscaping, car parking, vehicle access lanes, loading bays, rubbish bins, plant and equipment, lights, signs, drive through facilities and playgrounds are designed to prevent significant loss of amenity to adjoining land due to noise, emission of noise, emission of light or glare, loss of privacy, litter or odour.
- Whether any special measure may be necessary to protect the amenity of adjoining land in residential use, including buffer planting, noise attenuation measures and litter collection arrangements.
- The adequacy of traffic measures to:
  - Provide safe pedestrian movement.
  - Achieve safe, efficient vehicle movement on site and access to and egress from the land.
  - Avoid disruption to traffic flow on land in a Road Zone.
  - Prevent inappropriate use of local residential streets.
- The adequacy of car parking, loading and drive through queuing spacing to accommodate customers at peak periods and employee requirements on the land.
FREEWAY SERVICE CENTRE

Purpose
To ensure that freeway service centres are appropriately designed and located.
To ensure that access to a freeway service centre from a freeway is designed to the requirements of the Roads Corporation.
To ensure that freeway service centres with access to a rural freeway provide only essential services and facilities which encourage drivers to stop and take an effective break at appropriate intervals in the interests of driver safety.
To ensure that any new freeway service centre meets an identifiable need to provide essential services and facilities along a freeway where those services and facilities are not readily available.
To ensure that the use of land for a freeway service centre does not adversely affect the amenity of surrounding land uses.

Requirements to be met
Facilities and services
A freeway service centre must provide only essential services and facilities. These essential services and facilities must be available at all times. Essential services and facilities that a freeway service centre must include are:

- Designated parking areas.
- Undercover fuel sales area for petrol, diesel and LPG.
- An area of not more than 240 square metres for the sale of food, drinks and other convenience goods.
- An indoor sit-down eating area.
- A safe play area for children.
- Public toilets.
- A public telephone.

A freeway service centre with access to a rural freeway must also provide local and regional tourist information.

A freeway service centre must not include:

- Mechanical repairs (other than the emergency repair of vehicles).
- Retail facilities of more than 240 square metres.
- Video hire.
- Post office services or facilities.
- Entertainment facilities, amusement machines or gaming machines.
- The sale, distribution or consumption of alcohol unless associated with a residential hotel/motel.
- Car or truck wash facilities.

A freeway service centre with access to a rural freeway must not include overnight accommodation (other than for a caretaker or site manager).

Access to freeway service centres
No vehicular access between a freeway service centre with access to a metropolitan freeway and the local road network may be permitted.
An application to use or develop land for a freeway service centre must be referred to the Roads Corporation in accordance with section 55 of the Act.

A permit must not be granted for a freeway service centre until approval for access to the freeway has been given by the Roads Corporation.

In accordance with section 62(1)(a) of the Act, a permit granted for a freeway service centre must include the condition:

“This permit will expire if one of the following circumstances applies:

- The development is not commenced within two years of the date of this permit.
- The development is not completed within four years of the date of this permit.

The responsible authority may extend the periods referred to if a request is made in writing before the permit expires or within three months afterwards.”

**Metropolitan freeway service centre adjoining a residential zone**

If the site for a freeway service centre with access to a metropolitan freeway adjoins a residential zone:

- A landscape buffer at least 3 metres wide must be provided on the site along the common boundary and must be planted and maintained to the satisfaction of the responsible authority.
- Except for the landscape buffer strip, all of the site not occupied by buildings must be sealed to prevent dust.
- External lights must be directed away from the residential zone to prevent light spill and glare.

**Decision guidelines**

Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider:

LIVE MUSIC AND ENTERTAINMENT NOISE

Purpose
To recognise that live music is an important part of the State’s culture and economy.
To protect live music entertainment venues from the encroachment of noise sensitive residential uses.
To ensure that noise sensitive residential uses are satisfactorily protected from unreasonable levels of live music and entertainment noise.
To ensure that the primary responsibility for noise attenuation rests with the agent of change.

Application
This clause applies to an application required under any zone of this scheme to use land for, or to construct a building or construct or carry out works associated with:

- a live music entertainment venue.
- a noise sensitive residential use that is within 50 metres of a live music entertainment venue.

This clause does not apply to:

- the extension of an existing dwelling.
- a noise sensitive residential use that is in an area specified in clause 1.0 of the schedule to this clause.

Meaning of terms
In this clause:

- **live music entertainment venue** means:
  - a food and drink premises, nightclub, function centre or residential hotel that includes live music entertainment
  - a rehearsal studio
  - any other venue used for the performance of music and specified in clause 2.0 of the schedule to this clause, subject to any specified condition or limitation.

- **noise sensitive residential use** means a community care accommodation, dependent person's unit, dwelling, residential aged care facility, residential village, retirement village or rooming house.

Requirements to be met
A live music entertainment venue must be designed, constructed and managed to minimise noise emissions from the premises and provide acoustic attenuation measures that would protect a noise sensitive residential use within 50 metres of the venue.

A noise sensitive residential use must be designed and constructed to include acoustic attenuation measures that will reduce noise levels from any:

- indoor live music entertainment venue to below the noise limits specified in State Environment Protection Policy (Control of Music Noise from Public Premises) No. N-2 (SEPP N2).
- outdoor live music entertainment venue to below 45dB(A), assessed as an $L_{eq}$ over 15 minutes.

For the purpose of assessing whether the above noise standards are met, the noise measurement point may be located inside a habitable room of a noise sensitive residential use with windows and doors closed (Schedule B1 of SEPP N2 does not apply).
A permit may be granted to reduce or waive these requirements if the responsible authority is satisfied that an alternative measure meets the purpose of this clause.

**Application requirements**

An application must be accompanied by the following information, as appropriate:

- A site analysis, including plans detailing:
  - the existing and proposed layout of the use, buildings or works, including all external windows and doors
  - the location of any doors, windows and open space areas of existing properties in close proximity to the site.

- If the application is associated with a noise sensitive residential use:
  - the location of any live music entertainment venues within 50 metres of the site
  - the days and hours of operation of identified venues.

- If the application is associated with a live music entertainment venue:
  - the location of any noise sensitive residential uses within 50 metres of the site
  - the days and hours of operation of that venue
  - the times during which live music will be performed.

- Details of existing and proposed acoustic attenuation measures.

If in the opinion of the responsible authority an application requirement is not relevant to the evaluation of an application, the responsible authority may waive or reduce the requirement.

**Decision guidelines**

Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

- the extent to which the siting, layout, design and construction minimise the potential for noise impacts.

- whether existing or proposed noise sensitive residential uses will be satisfactorily protected from unreasonable live music and entertainment noise.

- whether the proposal adversely affects any existing uses.
## SCHEDULE TO CLAUSE 53.06 LIVE MUSIC AND ENTERTAINMENT NOISE

SHIPPING CONTAINER STORAGE

Application

This clause applies to all land except land which is in a Special Use Zone established for the purpose of port and port-related activities, or is in a Port Zone.

Decision guidelines

Before deciding on an application to use land for shipping container storage, or construct a building or carry out works associated with shipping container storage, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

- Whether the location is appropriate for shipping container storage having regard to:
  - The zoning of the land.
  - Amenity of the neighbourhood.
  - Proximity of the land to residential uses and zones or other sensitive uses.
  - Access to a road in a Road Zone.
  - Access to rail facilities.
  - Capacity and suitability of the road network to accommodate the type and volume of vehicle traffic generated by the use.
  - Capacity of the site to accommodate the proposed use.

- The effect on the environment and the amenity and character of the neighbourhood having regard to:
  - Existing and planned use of land in the neighbourhood.
  - Location, height and setback of shipping container stacks, particularly near road boundaries.
  - Location of facilities for the cleaning, repair, servicing, painting or fumigation of shipping containers.
  - Hours of operation.
  - Design, construction and maintenance of external storage and vehicle movement areas.
  - Treatment and disposal of wastewater.

- Whether the site layout and the design of buildings, landscaping, vehicle access lanes, loading bays, wash bays, lighting and fencing are designed to avoid or minimise any significant off-site impacts due to the emission of noise, light, glare, dust, fumes or drainage.

- Whether any special measure may be necessary to protect the environment and the amenity of nearby sensitive uses, including noise attenuation measures, dust minimisation measures and waste storage arrangements.

- The need for landscaping and fencing to screen or soften the appearance of shipping container storage areas, particularly near road boundaries.

- The adequacy and effect of the landscaping on the appearance of the site, taking into account the streetscape character, the size of the site, and the height, mass and scale of shipping container stacks on the site.

- The adequacy of traffic measures to:
  - Achieve safe, efficient vehicle movement on site and access to and egress from the land.
  - Prevent inappropriate use of local residential streets.
- The adequacy of truck parking, loading and truck queuing spacing to accommodate truck movements at peak periods and employee requirements on the land.
CATTLE FEEDLOT

Purpose
To facilitate the establishment and expansion of cattle feedlots in Victoria in a manner which is consistent with orderly and proper planning and the protection of the environment.

Requirements to be met
All use and development of cattle feedlots must comply with the Victorian Code for Cattle Feedlots - August 1995.
The Code must be complied with to the satisfaction of the responsible authority.
POULTRY FARM

Purpose
To facilitate the establishment and expansion of poultry farms, including broiler farms, in a manner that is consistent with orderly and proper planning and the protection of the environment.

Application
This clause applies to permit applications to use land or construct a building or construct or carry out works for a poultry farm, including to increase the farm capacity of an existing poultry farm.

Permit not required – Outdoor range area for existing broiler farm
Any requirement of this scheme relating to the use of land or to the construction of a building or the construction or carrying out of works does not apply to the use and development of land for an outdoor range area in association with an existing broiler farm provided the following requirements are met:

- There are no more than 150,000 chickens permitted on the land at any time.
- The number of chickens on the land is not increased.

This exemption does not apply to the requirements of any overlay that applies to the land.

Requirement – Broiler farm
An application to use land or construct a building or construct or carry out works for a broiler farm must comply with the *Victorian Code for Broiler Farms 2009 (plus 2018 amendments)*.

This requirement does not apply if:

- There are no more than 10,000 chickens permitted on the land at any time; or
- The number of chickens on the land is not increased.

Exemption from notice and review
The following applications are exempt from the notice requirements of section 52 (1)(a), (b) and (d), the decision requirements of section 64(1), (2) and (3) and the review rights of section 82(1) of the Act:

- An application to use land or construct a building or construct or carry out works for a new broiler farm, or to increase the farm capacity of an existing broiler farm, if the application meets the requirements of a “Class A Broiler Farm”, as specified in the *Victorian Code for Broiler Farms 2009 (plus 2018 amendments)*.

- An application to use land or construct a building or construct or carry out works for a poultry farm for the production of chicken meat or chicken eggs, if the application meets the following requirements:
  - The number of chickens does not exceed 5,000 for egg production or 10,000 for meat production.
  - The outdoor stocking density does not exceed 1,500 chickens per hectare.
  - A Nutrient Management Plan demonstrates chickens are kept outdoors on paddocks with:
    - A minimum of 50% ground cover; and
  - Mobile housing and feeding infrastructure that is relocated at least every two weeks.
  - An area used as a poultry range, including associated buildings and works, meets the setback requirements specified in Table 1.
Table 1 Minimum setbacks

53.09-5
21/09/2018 VC150

Notice of an application

Notice of an application to use or develop land to establish a new broiler farm, or to increase the farm capacity of an existing broiler farm, that meets the requirements of a Special Class Broiler Farm or Farm Cluster as specified in the *Victorian Code for Broiler Farms 2009 (plus 2018 amendments)*, must be given under Section 52(1)(c) of the Act to the person or body specified as a person or body to be notified in Clause 66.05.

53.09-6
21/09/2018 VC150

Decision guidelines

Before deciding on an application to use land or construct a building or construct or carry out works, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

- The purpose of the relevant zone.
- The design, height, setback and appearance of the proposed buildings and works.
- The proposed landscaping.
- The need to protect amenity of existing uses on adjoining land.
- The impact of the use of the land on the surrounding area, including from the emission of noise, light, vibration, odour, dust, or waste products.
- The impact of the proposal on any wetlands, waterways or water bodies.
- The likely environmental impact on the natural physical features and biodiversity of the land, including consideration of any Nutrient Management Plan submitted with the application.
- Whether the development will support and enhance agricultural production.
- The requirements of the *Victorian Low Density Mobile Outdoor Poultry Farm Planning Permit Guidelines* (June 2018).
USES WITH ADVERSE AMENITY POTENTIAL

Purpose
To define those types of industries and warehouses which if not appropriately designed and located may cause offence or unacceptable risk to the neighbourhood.

Threshold Distance
The threshold distance referred to in the table to this clause is the minimum distance from any part of the land of the proposed use or buildings and works to land (not a road) in a residential zone, Capital City Zone or Docklands Zone, land used for a hospital or an education centre or land in a Public Acquisition Overlay to be acquired for a hospital or an education centre.

NOTE 1 of the table: The threshold distance is variable, dependent on the processes to be used and the materials to be processed or stored.

NOTE 2 of the table: An assessment of risk to the safety of people located off the land may be required.

TIMBER PRODUCTION

Timber production on Crown land

Any requirement of this scheme which:

- requires timber production to be conducted in a particular way
- requires that a permit be obtained to use or develop land for timber production or to carry out timber production in a particular way
- requires that some aspect of timber production be carried out to the satisfaction of the responsible authority

does not apply to timber production on unalienated land of the Crown managed and controlled by the Minister responsible for administering the Forests Act 1958 and the Sustainable Forests (Timber) Act 2004, or the Secretary to the Department of Environment, Land, Water and Planning (as constituted under Part 2 of the Conservation, Forest and Lands Act 1987), whether or not occupied under a licence or other right. All requirements of this scheme apply to Crown land which has been leased.

Timber production to comply with the Code of Practice for Timber Production

All timber production activities (except agroforestry (the simultaneous and substantial production of forest and other agricultural products from the same land unit), windbreaks and commercial plantations of 5 hectares or less) must comply with the Code of Practice for Timber Production (Department of Environment and Primary Industries, 2014). In accordance with Section 6(4A) of the Planning and Environment Act 1987, this applies whether the use of land for timber production is commenced before or after the coming into effect of this requirement.

The Code must be complied with to the satisfaction of the responsible authority.

A permit may require that matters required by the Code must be done to the satisfaction of the responsible authority or a Minister, public authority or referral authority, and may require the responsible authority to seek comments from any other person or authority before making a decision.

Road repairs

After a Timber Harvesting Plan is lodged with the responsible authority under the Code and before the commencement of harvesting operations, the responsible authority, in consultation with the forest owner or manager, must establish the condition of any roads which are proposed to be used as a cartage route.

The forest owner or manager must advise the responsible authority when harvesting operations are complete. After receiving this advice, the responsible authority, in consultation with the forest owner or manager, must establish the condition of any roads which were used as a cartage route.

It is the responsibility of the forest owner or manager to restore any roads which were used as a cartage route to the same condition that they were in before the commencement of harvesting operations to the extent of any damage caused as a result of the harvesting operations.

The cartage of timber associated with harvesting operations is extraordinary traffic for the purpose of Section 112 of the Road Management Act 2004.

Decision guidelines

Before deciding on an application to use or develop land for timber production, in addition to the decision guidelines in Clause 65, the responsible authority must consider:

- The need to encourage plantation establishment and timber production in locations where it is of significance to national, state and regional economies, and in areas affected by salinity and other forms of land degradation.
• The role of native forest and plantations in:
  - Protecting water quality.
  - Conserving flora and fauna.
  - Preventing land degradation, including soil erosion, salinisation and water logging.
  - Preventing adverse effects on groundwater recharge.

• The preservation of and impact on the natural environment, cultural heritage and visual amenity.

• Whether it is appropriate to require environmental protection standards greater than those in the Code.
RACING DOG KEEPING AND TRAINING

Purpose
To ensure the use and development of land for racing dog keeping and racing dog training is consistent with orderly and proper planning.

Requirement
An application to use land, or construct a building or construct or carry out works, for racing dog keeping or racing dog training under a provision of a rural zone must comply with *Planning requirements for racing dog keeping and training* (Department of Environment, Land, Water and Planning, August 2017).

This requirement does not apply to an application to construct a building or construct or carry out works associated with a use that is a Section 1 use in the Table of uses of the zone.

Exemption from notice and review
An application to which the requirement in Clause 53.12-1 applies is exempt from the notice requirements of section 52(1)(a), (b) and (d), the decision requirements of section 64(1), (2) and (3) and the review rights of section 82(1) of the Act if the approved measures specified in *Planning requirements for racing dog keeping and training* (Department of Environment, Land, Water and Planning, August 2017) are met.
RENEWABLE ENERGY FACILITY (OTHER THAN WIND ENERGY FACILITY AND GEOTHERMAL ENERGY EXTRACTION)

Purpose
To facilitate the establishment and expansion of renewable energy facilities, in appropriate locations, with minimal impact on the amenity of the area.

Application
This clause applies to land used and developed or proposed to be used and developed for a renewable energy facility.

Application requirements
An application must be accompanied by the following information, as appropriate:

- A site and context analysis, including:
  - A site plan, photographs or other techniques to accurately describe the site and the surrounding area.
  - A location plan showing the full site area, local electricity grid, access roads to the site and direction and distance to nearby accommodation, hospital or education centre.

- A design response, including:
  - Detailed plans of the proposed development including, the layout and height of the facility and associated building and works, materials, reflectivity, colour, lighting, landscaping, the electricity distribution starting point (where the electricity will enter the distribution system), access roads and parking areas.
  - Accurate visual simulations illustrating the development in the context of the surrounding area and from key public view points.
  - The extent of vegetation removal and a rehabilitation plan for the site.
  - Written report and assessment, including:
    - An explanation of how the proposed design derives from and responds to the site analysis.
    - A description of the proposal, including the types of process to be utilised, materials to be stored and the treatment of waste.
    - Whether a Works Approval or Licence is required from the Environment Protection Authority.
      - the potential amenity impacts such as noise, glint, light spill, emissions to air, land or water, vibration, smell and electromagnetic interference.
      - the effect of traffic to be generated on roads.
      - the impact upon Aboriginal or non-Aboriginal cultural heritage.
    - A statement of why the site is suitable for a renewable energy facility including, a calculation of the greenhouse benefits.
    - An environmental management plan including, a construction management plan, any rehabilitation and monitoring.
Decision guidelines

Before deciding on an application, in addition to the decision guidelines of Clause 65, the responsible authority must consider, as appropriate:

- The effect of the proposal on the surrounding area in terms of noise, glint, light spill, vibration, smell and electromagnetic interference
- The impact of the proposal on significant views, including visual corridors and sightlines.
- The impact of the proposal on the natural environment and natural systems.
- Whether the proposal will require traffic management measures.
RESOURCES RECOVERY

Purpose
To facilitate the establishment and expansion of a Transfer station and/or a Materials recycling facility in appropriate locations with minimal impact on the environment and amenity of the area.

Application
This clause applies to all land used and developed or proposed to be used and developed for:

- A Transfer station;
- A Materials recycling facility.

Application requirements
An application must be accompanied by the following information:

- A location plan showing the site and surrounding uses including distances to nearby sensitive uses such as residential, hospital or education uses.
- A detailed site plan showing the layout and height of buildings and works, materials, reflectivity, colour, lighting, landscaping, access roads and parking areas.
- Plans or other media showing anticipated views of the facility from sensitive use locations.
- A written report(s) including:
  - Identification of the purpose of the use.
  - A description of the proposal including the materials to be processed, the types of processes to be used and any materials to be stored and handled.
  - Proposed hours of operation.
  - Likely traffic generation including heavy vehicles.
  - Consideration of whether a works approval or licence is required from the Environment Protection Authority.
- An assessment of:
  - Potential amenity impacts such as noise, odour, emissions to air, land or water, vibration, dust, light spill, visual impact.
  - The impact of traffic generation on local roads.

Decision Guidelines
Before deciding on an application, in addition to the Decision Guidelines of Clause 65, the responsible authority must consider:

- The contribution of the proposal to achieving resource recovery targets established by the Victorian Government.
- The impact of the proposal on the amenity of the surrounding area.
- The Statewide Waste and Resource Recovery Infrastructure Plan (Sustainability Victoria, 2015).
 Relevant guidelines applicable to the application including the guideline for *Designing, Constructing and Operating Composting Facilities* (Environmental Protection Authority, 2015), the *Guide to Best Practice for Organics Recovery* (Sustainability Victoria, 2009) and the *Guide to Best Practice at Resource Recovery Centres* (Sustainability Victoria, 2009).
STATEMENT OF UNDERLYING PROVISIONS

Purpose
To specify the planning scheme provisions which would have applied to land reserved for a public purpose pursuant to section 6(2)(i) of the Planning and Environment Act 1987 if the land had not been reserved for that purpose.

Application
In relation to any land identified in the schedule to this clause, the provisions of the planning scheme which would have applied to that land if it had not been reserved for a public purpose are the provisions which are contained in the relevant incorporated document, also identified in the schedule to this clause.

The incorporated document may contain some or all of the provisions which would have applied to the relevant land under this scheme if the land had not been reserved for a public purpose.

The incorporated document may also contain a statement or explanation of the strategic basis for those provisions. Alternatively, the incorporated document may make reference to a separate document, not forming part of the incorporated document, which contains a statement or explanation of the strategic basis for those provisions.

PIG FARM

Purpose

To facilitate the establishment and expansion of pig farms in a manner that is consistent with orderly and proper planning and the protection of the environment.

Application

This clause applies to permit applications to use land or construct a building or construct or carry out works for a pig farm, including to increase the farm capacity of an existing pig farm.

Exemption from notice and review

An application to use land or construct a building or construct or carry out works for a pig farm is exempt from the notice requirements of section 52 (1)(a), (b) and (d), the decision requirements of section 64(1), (2) and (3) and the review rights of section 82(1) of the Act if the following requirements are met:

- The number of pigs does not exceed 150 sows or 1,000 Standard Pig Units as calculated in Table 1.
- The outdoor stocking density does not exceed 12 Standard Pig Units per hectare as calculated in Table 1.
- A Nutrient Management Plan demonstrates pigs are kept outdoors on paddocks with:
  - A minimum of 50% ground cover; and
  - Mobile housing and feeding infrastructure that is relocated at least every three months.
- Any area used as a pig range, including associated buildings and works, is setback a minimum distance of:
  - 100 metres from a building used for a sensitive use (accommodation, a child care centre, an education centre or a hospital), and
  - 400 metres from land in a residential zone.

### Decision guidelines

Before deciding on an application to use land or construct a building or construct or carry out works, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

- The purpose of the relevant zone.
- The design, height, setback and appearance of the proposed buildings and works.
- The proposed landscaping.
- The need to protect amenity of existing uses on adjoining land.
- The impact of the use of the land on the surrounding area, including from the emission of noise, light, vibration, odour, dust, or waste products.
- The impact of the proposal on any wetlands, waterways or water bodies.
- The likely environmental impact on the natural physical features and biodiversity of the land, including consideration of any Nutrient Management Plan submitted with the application.
- Whether the development will support and enhance agricultural production.
- The requirements of the *Victorian Low Density Mobile Outdoor Pig Farm Planning Permit Guidelines* (June 2018).
RESIDENTIAL AGED CARE FACILITY

Purpose
To facilitate the development of well-designed residential aged care facilities to meet existing and future needs.
To recognise that residential aged care facilities have a different scale and built form to the surrounding neighbourhood.
To ensure residential aged care facilities do not unreasonably impact on the amenity of adjoining dwellings.

Application
This clause applies to an application to construct a building or construct or carry out works for a residential aged care facility in the General Residential Zone, Mixed Use Zone, Neighbourhood Residential Zone, Residential Growth Zone or Township Zone.

Application requirements
An application must be accompanied by:

- A site and context description.
- A design response.
- A landscape plan.

Site and context description
The site and context description may use a site plan, photographs or other techniques and must include:

- Site shape, size, orientation and easements.
- Levels of the site and the difference in levels between the site and surrounding properties.
- The location of existing buildings on the site and on adjacent properties, including the location and height of walls built to the boundary of the site.
- The use of adjacent buildings and land.
- The location of secluded private open space and habitable room windows of adjacent properties which have an outlook to the site within 9 metres.
- Solar access to the site and to adjacent properties.
- Any contaminated soils and filled areas, where known.
- Location of significant trees existing on the site and any significant trees removed from the site in the 12 months prior to the application being made, where known.
- Street frontage features such as poles, street trees and kerb crossovers.
- Any other notable features or characteristics of the site.

If in the opinion of the responsible authority a requirement of the site and context description is not relevant to the evaluation of an application, the responsible authority may waive or reduce the requirement.

Design response
The design response must explain how the proposed design:

- Responds to the site and context description.
- Meets the requirements of this clause.
Landscape plan
The landscape plan must include:

- Landscaping of communal open space for the enjoyment of residents and staff.
- Landscaping along the boundaries of the site.
- On-site management of run-off from paved areas.
- Retaining significant trees where possible.

Development requirements

Operation
If there is any inconsistency between a requirement in this clause and a requirement in another provision of this planning scheme, this clause prevails.

Building height
In the Neighbourhood Residential Zone, General Residential Zone and Township Zone the maximum building height must not exceed 16 metres.

In the Mixed Use Zone and Residential Growth Zone the maximum building height should not exceed 16 metres.

Street setback
Walls of buildings should be set back from streets the distance specified in the table:

<table>
<thead>
<tr>
<th>Development context</th>
<th>Minimum setback from front street (metres)</th>
<th>Minimum setback from a side street (metres)</th>
</tr>
</thead>
<tbody>
<tr>
<td>There is an existing building on both the abutting allotments facing the same street, and the site is not on a corner.</td>
<td>The average distance of the setbacks of the front walls of the existing buildings on the abutting allotments facing the front street or 9 metres, whichever is the lesser. This does not include a porte cochère.</td>
<td>Not applicable</td>
</tr>
<tr>
<td>There is an existing building on one abutting allotment facing the same street and no existing building on the other abutting allotment facing the same street, and the site is not on a corner.</td>
<td>The same distance as the setback of the front wall of the existing building on the abutting allotment facing the front street or 9 metres, whichever is the lesser. This does not include a porte cochère.</td>
<td>Not applicable</td>
</tr>
<tr>
<td>There is no existing building on either of the abutting allotments facing the same street, and the site is not on a corner.</td>
<td>6 metres for streets in a Road Zone, Category 1, and 4 metres for other streets.</td>
<td>Not applicable</td>
</tr>
<tr>
<td>The site is on a corner.</td>
<td>If there is a building on the abutting allotment facing the front street, the same distance as the setback of the front wall of the existing building on the abutting allotment facing the front street or 9 metres, whichever is the lesser. This does not include a porte cochère.</td>
<td>Front walls of new development fronting the side street of a corner site should be setback at least the same distance as the setback of the front wall of any existing building on the abutting</td>
</tr>
</tbody>
</table>
### Development context

<table>
<thead>
<tr>
<th>Minimum setback from front street (metres)</th>
<th>Minimum setback from a side street (metres)</th>
</tr>
</thead>
<tbody>
<tr>
<td>If there is no building on the abutting allotment facing the front street, 6 metres for streets in a Road Zone, Category 1, and 4 metres for other streets.</td>
<td>allotment facing the side street or 4 metres, whichever is the lesser.</td>
</tr>
<tr>
<td>Side walls of new development on a corner site should be setback the same distance as the setback of the front wall of any existing building on the abutting allotment facing the side street or 2 metres, whichever is the lesser.</td>
<td></td>
</tr>
</tbody>
</table>

### Side and rear setbacks

A new building not on or within 200mm of a boundary should be set back from side or rear boundaries by 1 metre, plus 0.3 metres for every metre of height over 3.6 metres up to 6.9 metres, plus 1 metre for every metre of height over 6.9 metres.

Screens, sunblinds, verandahs, porches, eaves, fascias, gutters, masonry chimneys, flues, pipes, domestic fuel or water tanks, and heating or cooling equipment or other services may encroach not more than 0.5 metres into the setbacks of this standard.

Landings having an area of not more than 2 square metres and less than 1 metre high, stairways, ramps, pergolas, shade sails and carports may encroach into the setbacks of this standard.
Walls on boundaries

A new wall constructed on or within 200mm of a side or rear boundary of a lot or a carport constructed on or within 1 metre of a side or rear boundary of lot should not abut the boundary for a length of more than:

- 10 metres plus 25 per cent of the remaining length of the boundary of an adjoining lot, or
- Where there are existing or simultaneously constructed walls or carports abutting the boundary on an abutting lot, the length of the existing or simultaneously constructed walls or carports; whichever is the greater.

A new wall or carport may fully abut a side or rear boundary where slope and retaining walls or fences would result in the effective height of the wall or carport being less than 2 metres on the abutting property boundary.

A building on a boundary includes a building set back up to 200mm from a boundary.

The height of a new wall constructed on or within 200mm of a side or rear boundary or a carport constructed on or within 1 metre of a side or rear boundary should not exceed an average of 3.2 metres with no part higher than 3.6 metres unless abutting a higher existing or simultaneously constructed wall.

Daylight to existing windows

Buildings opposite an existing habitable room window should provide for a light court to the existing window that has a minimum area of 3 square metres and minimum dimension of 1 metre clear to the sky. The calculation of the area may include land on the abutting lot.
Walls or carports more than 3 metres in height opposite an existing habitable room window should be set back from the window at least 50 per cent of the height of the new wall if the wall is within a 55 degree arc from the centre of the existing window. The arc may be swung to within 35 degrees of the plane of the wall containing the existing window.

Where the existing window is above ground floor level, the wall height is measured from the floor level of the room containing the window.

North-facing windows

If a north-facing habitable room window of an existing dwelling is within 3 metres of a boundary on an abutting lot, a building should be setback from the boundary 1 metre, plus 0.6 metres for every metre of height over 3.6 metres up to 6.9 metres, plus 1 metre for every metre of height over 6.9 metres, for a distance of 3 metres from the edge of each side of the window. A north-facing window is a window with an axis perpendicular to its surface oriented north 20 degrees west to north 30 degrees east.
**Overshadowing open space**

Where sunlight to the secluded private open space of an existing dwelling is reduced, at least 75 per cent, or 40 square metres with minimum dimension of 3 metres, whichever is the lesser area, of the secluded private open space should receive a minimum of five hours of sunlight between 9 am and 3 pm on 22 September.

If existing sunlight to the secluded private open space of an existing dwelling is less than the requirements of this standard, the amount of sunlight should not be further reduced.

**Solar panel overshadowing**

Buildings should be sited and designed to ensure that the capacity of existing rooftop solar energy facilities on dwellings on adjoining lots in a General Residential Zone, Neighbourhood Residential Zone or Township Zone are not unreasonably reduced.

**Overlooking**

A habitable room window, balcony, terrace, deck or patio should be located and designed to avoid direct views into the secluded private open space of an existing dwelling within a horizontal distance of 9 metres (measured at ground level) of the window, balcony, terrace, deck or patio. Views should be measured within a 45 degree angle from the plane of the window or perimeter of the balcony, terrace, deck or patio, and from a height of 1.7 metres above floor level.

A habitable room window, balcony, terrace, deck or patio with a direct view into a habitable room window of existing dwelling within a horizontal distance of 9 metres (measured at ground level) of the window, balcony, terrace, deck or patio should be either:

- Offset a minimum of 1.5 metres from the edge of one window to the edge of the other.
- Have sill heights of at least 1.2 metres above floor level.
- Have fixed, obscure glazing in any part of the window below 1.2 metres above floor level.
- Have permanently fixed external screens to at least 1.2 metres above floor level and be no more than 25 per cent transparent.

Obscure glazing in any part of the window below 1.2 metres above floor level may be openable provided that there are no direct views as specified in this standard.

Screens used to obscure a view should be:
- Perforated panels or trellis with a maximum of 25 per cent openings or solid translucent panels.
- Permanent, fixed and durable.
- Designed and coloured to blend in with the development.

This standard does not apply to a new habitable room window, balcony, terrace, deck or patio which faces a property boundary where there is a visual barrier at least 1.8 metres high and the floor level of the habitable room, balcony, terrace, deck or patio is less than 0.8 metres above ground level at the boundary.

### Noise impacts

Noise sources, such as mechanical plant, should not be located near bedrooms of immediately adjacent existing dwellings.

### Daylight to new windows

A window in a habitable room should be located to face:
- An outdoor space clear to the sky or a light court with a minimum area of 3 square metres and minimum dimension of 1 metre clear to the sky, not including land on an abutting lot, or
- A verandah provided it is open for at least one third of its perimeter, or
- A carport provided it has two or more open sides and is open for at least one third of its perimeter.

### Site coverage

The site area covered by buildings should not exceed 80 percent.

### Access

Access ways should be designed to:
- Provide direct access to on-site designated areas for car and bicycle parking.
- Provide direct access to the building for emergency vehicles.
- Provide access for service and delivery vehicles to on-site loading bays and storage areas.
- Ensure vehicles can enter and exit a development in a forward direction.
• Provide a carriageway width of at least 5.5 metres and an internal radius of at least 4 metres at a change of direction.

• The number and location of access points from streets to the site and the design of crossovers must be to the requirements of the relevant road authority.

• Shared access ways or car parks should be located at least 1.5 metres from the windows of habitable rooms. This setback may be reduced by 1 metre where there is a fence at least 1.5 metres high or where window sills are at least 1.4 metres above the access way.

**Building entry**

The main pedestrian entry to a building should:

• Have convenient access from a street.

• Be sheltered from the weather.

• Have convenient access from on-site car parking.

• Have a designated vehicle standing area suitable for use by a community bus and a disabled parking area should be provided in an area that is convenient for the drop-off and pick-up of residents.

**Communal open space**

Accessible and useable communal open space should be provided for residents and staff.

**Front fence**

A front fence within 3 metres of a street should not exceed:

• 2 metres in height in streets in a Road Category 1; and

• 1.5 metres in height on all other streets.

**Decision guidelines**

Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

• The Municipal Planning Strategy and the Planning Policy Framework.

• How the proposed development responds to the site and context description.

• Where the requirements of this clause are not met, the impact on the amenity of the adjoining dwellings.

• The proposed amenity for future residents of the residential aged care facility.

• The effect of overshadowing on an appropriately located existing rooftop solar energy facility on an adjoining lot.
STORMWATER MANAGEMENT IN URBAN DEVELOPMENT

Purpose

To ensure that stormwater in urban development, including retention and reuse, is managed to mitigate the impacts of stormwater on the environment, property and public safety, and to provide cooling, local habitat and amenity benefits.

Application

This clause applies to an application under a provision of a zone to subdivide land, construct a building, or construct or carry out works, other than the following applications:

- An application under a provision of the Farming Zone, Green Wedge Zone, Green Wedge A Zone, Low Density Residential Zone, Public Conservation and Resource Zone, Road Zone, Rural Activity Zone, Rural Conservation Zone, Rural Living Zone, Urban Floodway Zone or Urban Growth Zone.
- A VicSmart application.
- An application to subdivide land in a residential zone for residential purposes.
- An application to construct or extend a dwelling, fence or residential building in a residential zone.
- An application for development associated with the use of land for agriculture or earth and energy resources industry.
- An application to construct a building or construct or carry out works associated with one dwelling on a lot.
- An application to alter, extend or make structural changes to an existing building provided the gross floor area of the building is not increased by more than 50 square metres.
- An application to construct a building with a gross floor area not exceeding 50 square metres.
- An application to construct or carry out works with an area not exceeding 50 square metres.
- An application to subdivide land into lots each containing an existing building or car parking space.
- An application to construct a building or to construct or carry out works on a lot if all of the following requirements are met:
  - The lot was created in accordance with a permit granted under this planning scheme.
  - The application for that permit was assessed against the requirements of this clause.
- An application for land affected by a development plan or incorporated plan that was approved or incorporated in this planning scheme before the approval date of Amendment VC154.
- An application lodged before the approval date of Amendment VC154.
- An application for an amendment of a permit under section 72 of the Act, if the original permit application was lodged before the approval date of Amendment VC154.

Operation

The provisions of this clause contain:

- Objectives. An objective describes the desired outcome to be achieved in the completed development.
- Standards. A standard contains the requirements to meet the objective.
A standard should normally be met. However, if the responsible authority is satisfied that an application for an alternative solution meets the objective, the alternative solution may be considered.

53.18-3
26/10/2018
VC154
Requirements
An application to subdivide land:
- Must meet all of the objectives of Clauses 53.18-4 and 53.18-6.
- Should meet all of the standards of Clauses 53.18-4 and 53.18-6.

An application to construct a building or construct or carry out works:
- Must meet all of the objectives of Clauses 53.18-5 and 53.18-6.
- Should meet all of the standards of Clauses 53.18-5 and 53.18-6.

An application must be accompanied by details of the proposed stormwater management system, including drainage works and retention, detention and discharges of stormwater to the drainage system.

53.18-4
26/10/2018
VC154
Stormwater management objectives for subdivision
To minimise damage to properties and inconvenience to the public from stormwater.
To ensure that the street operates adequately during major storm events and provides for public safety.
To minimise increases in stormwater and protect the environmental values and physical characteristics of receiving waters from degradation by stormwater.
To encourage stormwater management that maximises the retention and reuse of stormwater.
To encourage stormwater management that contributes to cooling, local habitat improvements and provision of attractive and enjoyable spaces.

Standard W1
The stormwater management system should be:
- Designed and managed in accordance with the requirements and to the satisfaction of the relevant drainage authority.
- Designed and managed in accordance with the requirements and to the satisfaction of the water authority where reuse of stormwater is proposed.
- Designed to ensure that flows downstream of the subdivision site are restricted to pre-development levels unless increased flows are approved by the relevant drainage authority and there are no detrimental downstream impacts.
- Designed to contribute to cooling, improving local habitat and providing attractive and enjoyable spaces.

The stormwater management system should be integrated with the overall development plan including the street and public open space networks and landscape design.

For all storm events up to and including the 20% Average Exceedence Probability (AEP) standard:
- Stormwater flows should be contained within the drainage system to the requirements of the relevant authority.
- Ponding on roads should not occur for longer than 1 hour after the cessation of rainfall.
For storm events greater than 20% AEP and up to and including 1% AEP standard:

- Provision must be made for the safe and effective passage of stormwater flows.
- All new lots should be free from inundation or to a lesser standard of flood protection where agreed by the relevant floodplain management authority.
- Ensure that streets, footpaths and cycle paths that are subject to flooding meet the safety criteria \( da \cdot V_{ave} < 0.35 \text{ m}^2/\text{s} \) (where, \( da = \text{average depth in metres} \) and \( V_{ave} = \text{average velocity in metres per second} \)).

The design of the local drainage network should:

- Ensure stormwater is retarded to a standard required by the responsible drainage authority.
- Ensure every lot is provided with drainage to a standard acceptable to the relevant drainage authority. Wherever possible, stormwater should be directed to the front of the lot and discharged into the street drainage system or legal point of discharge.
- Ensure that inlet and outlet structures take into account the effects of obstructions and debris build up. Any surcharge drainage pit should discharge into an overland flow in a safe and predetermined manner.
- Include water sensitive urban design features to manage stormwater in streets and public open space. Where such features are provided, an application must describe maintenance responsibilities, requirements and costs.

Any flood mitigation works must be designed and constructed in accordance with the requirements of the relevant floodplain management authority.

**Stormwater management objectives for buildings and works**

To encourage stormwater management that maximises the retention and reuse of stormwater.

To encourage development that reduces the impact of stormwater on the drainage system and filters sediment and waste from stormwater prior to discharge from the site.

To encourage stormwater management that contributes to cooling, local habitat improvements and provision of attractive and enjoyable spaces.

To ensure that industrial and commercial chemical pollutants and other toxicants do not enter the stormwater system.

**Standard W2**

The stormwater management system should be designed to:

- Minimise the impact of chemical pollutants and other toxicants including by, but not limited to, bunding and covering or roofing of storage, loading and work areas.
- Contribute to cooling, improving local habitat and providing attractive and enjoyable spaces.

**Site management objectives**

To protect drainage infrastructure and receiving waters from sedimentation and contamination.

To protect the site and surrounding area from environmental degradation prior to and during construction of subdivision works.
Standard W3

An application should describe how the site will be managed prior to and during the construction period and may set out requirements for managing:

- Erosion and sediment.
- Stormwater.
- Litter, concrete and other construction wastes.
- Chemical contamination.

Decision guidelines

Before deciding on an application, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

- Any relevant water and stormwater management objective, policy or statement set out in this planning scheme.
- The capacity of the site to incorporate stormwater retention and reuse and other water sensitive urban design features.
- Whether the development has utilised alternative water sources and/or incorporated water sensitive urban design.
- Whether stormwater discharge from the site will adversely affect water quality entering the drainage system.
- The capacity of the drainage network to accommodate additional stormwater.
- Whether the stormwater treatment areas can be effectively maintained.
- Whether the owner has entered into an agreement to contribute to off-site stormwater management in lieu of providing an on-site stormwater management system.
ONE DWELLING ON A LOT

Purpose
To implement the Municipal Planning Strategy and the Planning Policy Framework.
To achieve residential development that respects the existing neighbourhood character or which contributes to a preferred neighbourhood character.
To encourage residential development that provides reasonable standards of amenity for existing and new residents.
To encourage residential development that is responsive to the site and the neighbourhood.

Application
These provisions apply to an application to construct a building or construct or carry out works associated with one dwelling on a lot under the provisions of:
- A Neighbourhood Residential Zone, General Residential Zone, Residential Growth Zone, Mixed Use Zone or Township Zone.
- A Neighbourhood Character Overlay if the land is in a Neighbourhood Residential Zone, General Residential Zone, Residential Growth Zone, Mixed Use Zone or Township Zone.

Operation
The provisions of this clause contain:
- **Objectives.** An objective describes the desired outcome to be achieved in the completed development.
- **Standards.** A standard contains the requirements to meet the objective.
  A standard should normally be met. However, if the responsible authority is satisfied that an application for an alternative design solution meets the objective, the alternative design solution may be considered.
- **Decision guidelines.** The decision guidelines set out the matters that the responsible authority must consider before deciding if an application meets the objectives.

Requirements
A development:
- Must meet all of the objectives of this clause.
- Should meet all of the standards of this clause.

If a zone or a schedule to a zone specifies a requirement of a standard different from a requirement set out in this clause, the requirement in the zone or a schedule to the zone applies.

If the land is included in a Neighbourhood Character Overlay and a schedule to the overlay specifies a requirement of a standard different from a requirement set out in this clause or a requirement in the zone or a schedule to the zone, the requirement in the schedule to the overlay applies.

If the land is included in an overlay, other than a Neighbourhood Character Overlay, and a schedule to the overlay specifies a requirement different from a requirement of a standard set out in this clause or a requirement of a standard set out in the zone or a schedule to the zone, the requirement in the overlay applies.
NEIGHBOURHOOD AND SITE DESCRIPTION AND DESIGN RESPONSE

An application must be accompanied by:

- A neighbourhood and site description.
- A design response.

Neighbourhood and site description

The neighbourhood and site description may use a site plan, photographs or other techniques and must accurately describe:

- In relation to the neighbourhood:
  - The built form, scale and character of surrounding development including front fencing.
  - Architectural and roof styles.
  - Any other notable features or characteristics of the neighbourhood.

- In relation to the site:
  - Site shape, size, orientation and easements.
  - Levels of the site and the difference in levels between the site and surrounding properties.
  - Location of existing buildings on the site and on surrounding properties, including the location and height of walls built to the boundary of the site.
  - The use of surrounding buildings.
  - The location of secluded private open space and habitable room windows of surrounding properties which have an outlook to the site within 9 metres.
  - Solar access to the site and to surrounding properties.
  - Location of significant trees existing on the site and any significant trees removed from the site in the 12 months prior to the application being made, where known.
  - Any contaminated soils and filled areas, where known.
  - Views to and from the site.
  - Street frontage features such as poles, street trees and kerb crossovers.
  - Any other notable features or characteristics of the site.

If in the opinion of the responsible authority a requirement of the neighbourhood and site description is not relevant to the evaluation of an application, the responsible authority may waive or reduce the requirement.

Satisfactory neighbourhood and site description

If the responsible authority decides that the neighbourhood and site description is not satisfactory, it may require more information from the applicant under Section 54 of the Act.

The responsible authority must not require notice of an application to be given or decide an application until it is satisfied that the neighbourhood and site description meets the requirements of Clause 54.01-1 and is satisfactory.

This does not apply if the responsible authority refuses an application under Section 52(1A) of the Act.

Design response

The design response must explain how the proposed design:
- Derives from and responds to the neighbourhood and site description.
- Meets the objectives of Clause 54.
- Responds to any neighbourhood character features for the area identified in a local planning policy or a Neighbourhood Character Overlay.

The design response must include correctly proportioned street elevations or photographs showing the development in the context of adjacent buildings. If in the opinion of the responsible authority this requirement is not relevant to the evaluation of an application, it may waive or reduce the requirement.
**Neighbourhood character objective**

To ensure that the design respects the existing neighbourhood character or contributes to a preferred neighbourhood character.

To ensure that the design responds to the features of the site and the surrounding area.

**Standard A1**

The design response must be appropriate to the neighbourhood and the site.

The proposed design must respect the existing or preferred neighbourhood character and respond to the features of the site.

**Decision guidelines**

Before deciding on an application, the responsible authority must consider:

- Any relevant neighbourhood character objective, policy or statement set out in this scheme.
- The neighbourhood and site description.
- The design response.

**Integration with the street objective**

To integrate the layout of development with the street.

**Standard A2**

Dwellings should be oriented to front existing and proposed streets.

High fencing in front of dwellings should be avoided if practicable.

Dwellings should be designed to promote the observation of abutting streets and any abutting public open spaces.

**Decision guidelines**

Before deciding on an application, the responsible authority must consider:

- Any relevant neighbourhood character objective, policy or statement set out in this scheme.
- The design response.
SITE LAYOUT AND BUILDING MASSING

Street setback objective
To ensure that the setbacks of buildings from a street respect the existing or preferred neighbourhood character and make efficient use of the site.

Standard A3
Walls of buildings should be set back from streets:

- At least the distance specified in a schedule to the zone, or
- If no distance is specified in a schedule to the zone, the distance specified in Table A1.

Porches, pergolas and verandahs that are less than 3.6 metres high and eaves may encroach not more than 2.5 metres into the setbacks of this standard.

Table A1 Street setback

<table>
<thead>
<tr>
<th>Development context</th>
<th>Minimum setback from front street (Metres)</th>
<th>Minimum setback from a side street (Metres)</th>
</tr>
</thead>
<tbody>
<tr>
<td>There is an existing building on both the abutting allotments facing the same street, and the site is not on a corner.</td>
<td>The average distance of the setbacks of the front walls of the existing buildings on the abutting allotments facing the front street or 9 metres, whichever is the lesser.</td>
<td>Not applicable</td>
</tr>
<tr>
<td>There is an existing building on one abutting allotment facing the same street and no existing building on the other abutting allotment facing the same street, and the site is not on a corner.</td>
<td>The same distance as the setback of the front wall of the existing building on the abutting allotment facing the front street or 9 metres, whichever is the lesser.</td>
<td>Not applicable</td>
</tr>
<tr>
<td>There is no existing building on either of the abutting allotments facing the same street, and the site is not on a corner.</td>
<td>6 metres for streets in a Road Zone, Category 1, and 4 metres for other streets.</td>
<td>Not applicable</td>
</tr>
<tr>
<td>The site is on a corner.</td>
<td>If there is a building on the abutting allotment facing the front street, the same distance as the setback of the front wall of the existing building on the abutting allotment facing the front street or 9 metres, whichever is the lesser.</td>
<td>The same distance as the setback of the front wall of any existing building on the abutting allotment facing the side street or 2 metres, whichever is the lesser.</td>
</tr>
</tbody>
</table>

If there is no building on the abutting allotment facing the front street, 6 metres for streets in a Road Zone, Category 1, and 4 metres for other streets.

Decision guidelines
Before deciding on an application, the responsible authority must consider:

- Any relevant neighbourhood character objective, policy or statement set out in this scheme.
- The design response.
- Whether a different setback would be more appropriate, taking into account the prevailing setbacks of existing buildings on nearby lots.
- The visual impact of the building when viewed from the street and from adjoining properties.
- The value of retaining vegetation within the front setback.
Building height objective
To ensure that the height of buildings respects the existing or preferred neighbourhood character.

Standard A4
The maximum building height should not exceed the maximum height specified in the zone, schedule to the zone or an overlay that applies to the land.

If no maximum height is specified in the zone, schedule to the zone or an overlay, the maximum building height should not exceed 9 metres, unless the slope of the natural ground level at any cross section wider than 8 metres of the site of the building is 2.5 degrees or more, in which case the maximum building height should not exceed 10 metres.

Changes of building height between existing buildings and new buildings should be graduated.

Decision guidelines
Before deciding on an application, the responsible authority must consider:

- Any relevant neighbourhood character objective, policy or statement set out in this scheme.
- Any maximum building height specified in the zone, a schedule to the zone or an overlay applying to the land.
- The design response.
- The effect of the slope of the site on the height of the building.
- The relationship between the proposed building height and the height of existing adjacent buildings.
- The visual impact of the building when viewed from the street and from adjoining properties.

Site coverage objective
To ensure that the site coverage respects the existing or preferred neighbourhood character and responds to the features of the site.

Standard A5
The site area covered by buildings should not exceed:

- The maximum site coverage specified in a schedule to the zone, or
- If no maximum site coverage is specified in a schedule to the zone, 60 per cent.

Decision guidelines
Before deciding on an application, the responsible authority must consider:

- Any relevant neighbourhood character objective, policy or statement set out in this scheme.
- The design response.
- The existing site coverage and any constraints imposed by existing development or the features of the site.
- The site coverage of adjacent properties.
- The effect of the visual bulk of the building and whether this is acceptable in the neighbourhood.

Permeability objectives
To reduce the impact of increased stormwater run-off on the drainage system.

To facilitate on-site stormwater infiltration.
**Standard A6**
The site area covered by pervious surfaces should be at least:
- The minimum area specified in a schedule to the zone; or
- If no minimum area is specified in a schedule to the zone, 20 per cent of the site.

**Decision guidelines**
Before deciding on an application, the responsible authority must consider:
- The design response.
- The existing site coverage and any constraints imposed by existing development.
- The capacity of the drainage network to accommodate additional stormwater.
- The capacity of the site to absorb run-off.
- The practicality of achieving the minimum site coverage of pervious surfaces, particularly on lots of less than 300 square metres.

**Energy efficiency protection objectives**
To achieve and protect energy efficient dwellings.
To ensure the orientation and layout of development reduce fossil fuel energy use and make appropriate use of daylight and solar energy.

**Standard A7**
Buildings should be:
- Oriented to make appropriate use of solar energy.
- Sited and designed to ensure that the energy efficiency of existing dwellings on adjoining lots is not unreasonably reduced.
- Sited and designed to ensure that the performance of existing rooftop solar energy facilities on dwellings on adjoining lots in a General Residential Zone, Neighbourhood Residential Zone or Township Zone are not unreasonably reduced. The existing rooftop solar energy facility must exist at the date the application is lodged.

Living areas and private open space should be located on the north side of the dwelling, if practicable.

Dwellings should be designed so that solar access to north-facing windows is maximised.

**Decision guidelines**
Before deciding on an application, the responsible authority must consider:
- The design response.
- The size, orientation and slope of the lot.
- The existing amount of solar access to abutting properties.
- The extent to which an existing rooftop solar energy facility on an adjoining lot is overshadowed by existing buildings or other permanent structures.
- Whether the existing rooftop solar energy facility on an adjoining lot is appropriately located.
- The effect of overshadowing on an existing rooftop solar energy facility on an adjoining lot.
- The availability of solar access to north-facing windows on the site.
**Significant trees objectives**

To encourage development that respects the landscape character of the neighbourhood.

To encourage the retention of significant trees on the site.

**Standard A8**

Development should provide for the retention or planting of trees, where these are part of the neighbourhood character.

Development should provide for the replacement of any significant trees that have been removed in the 12 months prior to the application being made.

**Decision guidelines**

Before deciding on an application, the responsible authority must consider:

- Any relevant neighbourhood character objective, policy or statement set out in this scheme.
- The design response.
- The health of any trees that were removed or are proposed to be removed.
- Whether a tree was removed to gain a development advantage.
AMENITY IMPACTS

Side and rear setbacks objective

To ensure that the height and setback of a building from a boundary respects the existing or preferred neighbourhood character and limits the impact on the amenity of existing dwellings.

Standard A10

A new building not on or within 200mm of a boundary should be set back from side or rear boundaries:

- At least the distance specified in a schedule to the zone, or
- If no distance is specified in a schedule to the zone, 1 metre, plus 0.3 metres for every metre of height over 3.6 metres up to 6.9 metres, plus 1 metre for every metre of height over 6.9 metres.

Sunblinds, verandahs, porches, eaves, fascias, gutters, masonry chimneys, flues, pipes, domestic fuel or water tanks, and heating or cooling equipment or other services may encroach not more than 0.5 metres into the setbacks of this standard.

Landings having an area of not more than 2 square metres and less than 1 metre high, stairways, ramps, pergolas, shade sails and carports may encroach into the setbacks of this standard.

Diagram A1 Side and rear setbacks

Decision guidelines

Before deciding on an application, the responsible authority must consider:

- Any relevant neighbourhood character objective, policy or statement set out in this scheme.
- The design response.
- The impact on the amenity of the habitable room windows and secluded private open space of existing dwellings.
- Whether the wall is opposite an existing or simultaneously constructed wall built to the boundary.
- Whether the wall abuts a side or rear lane.

**Walls on boundaries objective**

To ensure that the location, length and height of a wall on a boundary respects the existing or preferred neighbourhood character and limits the impact on the amenity of existing dwellings.

**Standard A11**

A new wall constructed on or within 200mm of a side or rear boundary of a lot or a carport constructed on or within 1 metre of a side or rear boundary of a lot should not abut the boundary:

- For a length more than the distance specified in a schedule to the zone; or
- If no distance is specified in a schedule to the zone, for a length of more than:
  - 10 metres plus 25 per cent of the remaining length of the boundary of an adjoining lot, or
  - Where there are existing or simultaneously constructed walls or carports abutting the boundary on an abutting lot, the length of the existing or simultaneously constructed walls or carports, whichever is the greater.

A new wall or carport may fully abut a side or rear boundary where the slope and retaining walls or fences would result in the effective height of the wall or carport being less than 2 metres on the abutting property boundary.

A building on a boundary includes a building set back up to 200mm from a boundary.

The height of a new wall constructed on or within 200mm of a side or rear boundary or a carport constructed on or within 1 metre of a side or rear boundary should not exceed an average of 3.2 metres with no part higher than 3.6 metres unless abutting a higher existing or simultaneously constructed wall.

**Decision guidelines**

Before deciding on an application, the responsible authority must consider:

- Any relevant neighbourhood character objective, policy or statement set out in this scheme.
- The design response.
- The extent to which walls on boundaries are part of the neighbourhood character.
- The visual impact of the building when viewed from adjoining properties.
- The impact on the amenity of existing dwellings.
- The opportunity to minimise the length of walls on boundaries by aligning a new wall on a boundary with an existing wall on a lot of an adjoining property.
- The orientation of the boundary that the wall is being built on.
- The width of the lot.
- The extent to which the slope and retaining walls or fences reduce the effective height of the wall.
- Whether the wall abuts a side or rear lane.
- The need to increase the wall height to screen a box gutter.
**Daylight to existing windows objective**

To allow adequate daylight into existing habitable room windows.

**Standard A12**

Buildings opposite an existing habitable room window should provide for a light court to the existing window that has a minimum area of 3 square metres and minimum dimension of 1 metre clear to the sky. The calculation of the area may include land on the abutting lot.

Walls or carports more than 3 metres in height opposite an existing habitable room window should be set back from the window at least 50 per cent of the height of the new wall if the wall is within a 55 degree arc from the centre of the existing window. The arc may be swung to within 35 degrees of the plane of the wall containing the existing window.

Where the existing window is above ground floor level, the wall height is measured from the floor level of the room containing the window.

**Diagram A2 Daylight to existing windows**

![Daylight to existing windows diagram]

**Decision guidelines**

Before deciding on an application, the responsible authority must consider:

- The design response.
- The extent to which the existing dwelling has provided for reasonable daylight access to its habitable rooms through the siting and orientation of its habitable room windows.
- The impact on the amenity of existing dwellings.

**North-facing windows objective**

To allow adequate solar access to existing north-facing habitable room windows.

**Standard A13**

If a north-facing habitable room window of an existing dwelling is within 3 metres of a boundary on an abutting lot, a building should be setback from the boundary 1 metre, plus 0.6 metre for every metre of height over 3.6 metres up to 6.9 metres, plus 1 metre for every metre of height over 6.9 metres, for a distance of 3 metres from the edge of each side of the window. A north-facing window is a window with an axis perpendicular to its surface oriented north 20 degrees west to north 30 degrees east.
Decision guidelines
Before deciding on an application, the responsible authority must consider:

- The design response.
- Existing sunlight to the north-facing habitable room window of the existing dwelling.
- The impact on the amenity of existing dwellings.

Overshadowing open space objective
To ensure buildings do not unreasonably overshadow existing secluded private open space.

Standard A14
Where sunlight to the secluded private open space of an existing dwelling is reduced, at least 75 per cent, or 40 square metres with minimum dimension of 3 metres, whichever is the lesser area, of the secluded private open space should receive a minimum of five hours of sunlight between 9 am and 3 pm on 22 September.

If existing sunlight to the secluded private open space of an existing dwelling is less than the requirements of this standard, the amount of sunlight should not be further reduced.

Decision guidelines
Before deciding on an application, the responsible authority must consider:

- The design response.
- The impact on the amenity of existing dwellings.
- Existing sunlight penetration to the secluded private open space of the existing dwelling.
- The time of day that sunlight is available to the secluded private open space of the existing dwelling.
- The effect of a reduction in sunlight on the existing use of the secluded private open space.

**Overlooking objective**

To limit views into existing secluded private open space and habitable room windows.

**Standard A15**

A habitable room window, balcony, terrace, deck or patio should be located and designed to avoid direct views into the secluded private open space and habitable room windows of an existing dwelling within a horizontal distance of 9 metres (measured at ground level) of the window, balcony, terrace, deck or patio. Views should be measured within a 45 degree angle from the plane of the window or perimeter of the balcony, terrace, deck or patio, and from a height of 1.7 metres above floor level.

A habitable room window, balcony, terrace, deck or patio with a direct view into a habitable room window of existing dwelling within a horizontal distance of 9 metres (measured at ground level) of the window, balcony, terrace, deck or patio should be either:

- Offset a minimum of 1.5 metres from the edge of one window to the edge of the other, or
- Have sill heights of at least 1.7 metres above floor level, or
- Have obscure glazing in any part of the window below 1.7 metres above floor level, or
- Have permanently fixed external screens to at least 1.7 metres above floor level and be no more than 25 per cent transparent.

Obscure glazing in any part of the window below 1.7 metres above floor level may be openable provided that there are no direct views as specified in this standard.

Screens used to obscure a view should be:

- Perforated panels or trellis with a maximum of 25 per cent openings or solid translucent panels.
- Permanent, fixed and durable.
- Designed and coloured to blend in with the development.

This standard does not apply to a new habitable room window, balcony, terrace, deck or patio which faces a property boundary where there is a visual barrier at least 1.8 metres high and the floor level of the habitable room, balcony, terrace, deck or patio is less than 0.8 metres above ground level at the boundary.

**Diagram A4 Overlooking open space**

**Decision guidelines**

Before deciding on an application, the responsible authority must consider:

- The design response.
- The impact on the amenity of the secluded private open space or habitable room window.
- The existing extent of overlooking into the secluded private open space and habitable room windows of existing dwellings.
- The internal daylight to and amenity of the proposed dwelling.
ON-SITE AMENITY AND FACILITIES

Daylight to new windows objective
To allow adequate daylight into new habitable room windows.

Standard A16
A window in a habitable room should be located to face:

- An outdoor space clear to the sky or a light court with a minimum area of 3 square metres and minimum dimension of 1 metre clear to the sky, not including land on an abutting lot, or
- A verandah provided it is open for at least one third of its perimeter, or
- A carport provided it has two or more open sides and is open for at least one third of its perimeter.

Decision guidelines
Before deciding on an application, the responsible authority must consider:

- The design response.
- Whether there are other windows in the habitable room which have access to daylight.

Private open space objective
To provide adequate private open space for the reasonable recreation and service needs of residents.

Standard A17
A dwelling should have private open space of an area and dimensions specified in a schedule to the zone.

If no area or dimensions is specified in a schedule to the zone, a dwelling should have private open space consisting of an area of 80 square metres or 20 per cent of the area of the lot, whichever is the lesser, but not less than 40 square metres. At least one part of the private open space should consist of secluded private open space with a minimum area of 25 square metres and a minimum dimension of 3 metres at the side or rear of the dwelling with convenient access from a living room.

Decision guidelines
Before deciding on an application, the responsible authority must consider:

- The design response.
- The useability of the private open space, including its size and accessibility.
- The availability of and access to public open space.
- The orientation of the lot to the street and the sun.

Solar access to open space objective
To allow solar access into the secluded private open space of a new dwelling.

Standard A18
The private open space should be located on the north side of the dwelling, if practicable.
The southern boundary of secluded private open space should be set back from any wall on the north of the space at least \((2 + 0.9h)\) metres, where ‘h’ is the height of the wall.
**Decision guidelines**

Before deciding on an application, the responsible authority must consider:

- The design response.

- The useability and amenity of the secluded private open space based on the sunlight it will receive.
DETAILED DESIGN

Design detail objective
To encourage design detail that respects the existing or preferred neighbourhood character.

Standard A19
The design of buildings, including:
- Facade articulation and detailing,
- Window and door proportions,
- Roof form, and
- Verandahs, eaves and parapets,
should respect the existing or preferred neighbourhood character.
Garages and carports should be visually compatible with the development and the existing or preferred neighbourhood character.

Decision guidelines
Before deciding on an application, the responsible authority must consider:
- Any relevant neighbourhood character objective, policy or statement set out in this scheme.
- The design response.
- The effect on the visual bulk of the building and whether this is acceptable in the neighbourhood setting.
- Whether the design is innovative and of a high architectural standard.

Front fences objective
To encourage front fence design that respects the existing or preferred neighbourhood character.

Standard A20
The design of front fences should complement the design of the dwelling and any front fences on adjoining properties.
A front fence within 3 metres of a street should not exceed:
- The maximum height specified in a schedule to the zone, or
- If no maximum height is specified in a schedule to the zone, the maximum height specified in Table A2.

Table A2 Maximum front fence height

<table>
<thead>
<tr>
<th>Street context</th>
<th>Maximum front fence height</th>
</tr>
</thead>
<tbody>
<tr>
<td>Streets in a Road Zone, Category 1</td>
<td>2 metres</td>
</tr>
<tr>
<td>Other streets</td>
<td>1.5 metres</td>
</tr>
</tbody>
</table>

Decision guidelines
Before deciding on an application, the responsible authority must consider:
- Any relevant neighbourhood character objective, policy or statement set out in this scheme.
- The design response.
- The setback, height and appearance of front fences on adjacent properties.
- The extent to which slope and retaining walls reduce the effective height of the front fence.
- Whether the fence is needed to minimise noise intrusion.
TWO OR MORE DWELLINGS ON A LOT AND RESIDENTIAL BUILDINGS

Purpose

To implement the Municipal Planning Strategy and the Planning Policy Framework.

To achieve residential development that respects the existing neighbourhood character or which contributes to a preferred neighbourhood character.

To encourage residential development that provides reasonable standards of amenity for existing and new residents.

To encourage residential development that is responsive to the site and the neighbourhood.

Application

Provisions in this clause apply to an application to:

- Construct a dwelling if there is at least one dwelling existing on the lot,
- Construct two or more dwellings on a lot,
- Extend a dwelling if there are two or more dwellings on the lot,
- Construct or extend a dwelling on common property, or
- Construct or extend a residential building,

in the Neighbourhood Residential Zone, General Residential Zone, Residential Growth Zone, Mixed Use Zone or Township Zone.

The provisions of this clause apply to an application specified above, in the manner set out in the following table.

<table>
<thead>
<tr>
<th>Application type</th>
<th>Applicable clauses</th>
</tr>
</thead>
<tbody>
<tr>
<td>To construct or extend a dwelling (other than a dwelling in or forming part of an apartment development), or To construct or extend a residential building.</td>
<td>All of Clause 55 except Clause 55.07-1 to 55.07-15 (inclusive).</td>
</tr>
<tr>
<td>To construct or extend an apartment development, or To construct or extend a dwelling in or forming part of an apartment development.</td>
<td>All of Clause 55 except Clause 55.03-5, Clause 55.03-6, Clause 55.04-8, Clause 55.05-1, Clause 55.05-2 and Clause 55.05-6.</td>
</tr>
</tbody>
</table>

These provisions do not apply to an application to construct or extend a development of five or more storeys, excluding a basement or to construct or extend a dwelling in a development of five or more storeys, excluding a basement.

Operation

The provisions of this clause contain:

- **Objectives.** An objective describes the desired outcome to be achieved in the completed development.

- **Standards.** A standard contains the requirements to meet the objective.
  A standard should normally be met. However, if the responsible authority is satisfied that an application for an alternative design solution meets the objective, the alternative design solution may be considered.

- **Decision guidelines.** The decision guidelines set out the matters that the responsible authority must consider before deciding if an application meets the objectives.

Requirements

A development:
Must meet all of the objectives of this clause that apply to the application.

Should meet all of the standards of this clause that apply to the application.

For all of the provisions of Clause 55 other than Clause 55.07 (Apartment developments):

- If a zone or a schedule to a zone specifies a requirement of a standard different from a requirement set out in this clause, the requirement in the zone or a schedule to the zone applies.

- If the land is included in a Neighbourhood Character Overlay and a schedule to the overlay specifies a requirement of a standard different from a requirement set out in this clause or a requirement in the zone or a schedule to the zone, the requirement in the schedule to the overlay applies.

- If the land is included in an overlay, other than a Neighbourhood Character Overlay, and a schedule to the overlay specifies a requirement different from a requirement of a standard set out in this clause or a requirement of a standard set out in the zone or a schedule to the zone, the requirement in the overlay applies.

The requirements of a standard set out in Clause 55.07 (Apartment developments) apply to the exclusion of any different requirement specified in a zone, a schedule to a zone, or a schedule to an overlay.

**Transitional provisions**

Clause 55.03-4 of this planning scheme, as in force immediately before the approval date of Amendment VC154, continues to apply to:

- An application for a planning permit lodged before that date.

- An application for an amendment of a permit under section 72 of the Act, if the original permit application was lodged before that date.
NEIGHBOURHOOD AND SITE DESCRIPTION AND DESIGN RESPONSE

An application must be accompanied by:

- A neighbourhood and site description.
- A design response.

Neighbourhood and site description

The neighbourhood and site description may use a site plan, photographs or other techniques and must accurately describe:

- In relation to the neighbourhood:
  - The pattern of development of the neighbourhood.
  - The built form, scale and character of surrounding development including front fencing.
  - Architectural and roof styles.
  - Any other notable features or characteristics of the neighbourhood.

- In relation to the site:
  - Site shape, size, orientation and easements.
  - Levels of the site and the difference in levels between the site and surrounding properties.
  - The location of existing buildings on the site and on surrounding properties, including the location and height of walls built to the boundary of the site.
  - The use of surrounding buildings.
  - The location of secluded private open space and habitable room windows of surrounding properties which have an outlook to the site within 9 metres.
  - Solar access to the site and to surrounding properties.
  - Location of significant trees existing on the site and any significant trees removed from the site 12 months prior to the application being made, where known.
  - Any contaminated soils and filled areas, where known.
  - Views to and from the site.
  - Street frontage features such as poles, street trees and kerb crossovers.
  - The location of local shops, public transport services and public open spaces within walking distance.
  - Any other notable features or characteristics of the site.

If in the opinion of the responsible authority a requirement of the neighbourhood and site description is not relevant to the evaluation of an application, the responsible authority may waive or reduce the requirement.

Satisfactory neighbourhood and site description

If the responsible authority decides that the neighbourhood and site description is not satisfactory, it may require more information from the applicant under Section 54 of the Act.

The responsible authority must not require notice of an application to be given or decide an application until it is satisfied that the neighbourhood and site description meets the requirements of Clause 55.01-1 and is satisfactory.

This does not apply if the responsible authority refuses an application under Section 52(1A) of the Act.
Design response

The design response must explain how the proposed design:

- Derives from and responds to the neighbourhood and site description.
- Meets the objectives of Clause 55.
- Responds to any neighbourhood character features for the area identified in a local planning policy or a Neighbourhood Character Overlay.

The design response must include correctly proportioned street elevations or photographs showing the development in the context of adjacent buildings. If in the opinion of the responsible authority this requirement is not relevant to the evaluation of an application, it may waive or reduce the requirement.
NEIGHBOURHOOD CHARACTER AND INFRASTRUCTURE

**Neighbourhood character objectives**

To ensure that the design respects the existing neighbourhood character or contributes to a preferred neighbourhood character.

To ensure that development responds to the features of the site and the surrounding area.

**Standard B1**

The design response must be appropriate to the neighbourhood and the site.

The proposed design must respect the existing or preferred neighbourhood character and respond to the features of the site.

**Decision guidelines**

Before deciding on an application, the responsible authority must consider:

- Any relevant neighbourhood character objective, policy or statement set out in this scheme.
- The neighbourhood and site description.
- The design response.

**Residential policy objectives**

To ensure that residential development is provided in accordance with any policy for housing in the Municipal Planning Strategy and the Planning Policy Framework.

To support medium densities in areas where development can take advantage of public transport and community infrastructure and services.

**Standard B2**

An application must be accompanied by a written statement to the satisfaction of the responsible authority that describes how the development is consistent with any relevant policy for housing in the Municipal Planning Strategy and the Planning Policy Framework.

**Decision guidelines**

Before deciding on an application, the responsible authority must consider:

- The design response.

**Dwelling diversity objective**

To encourage a range of dwelling sizes and types in developments of ten or more dwellings.

**Standard B3**

Developments of ten or more dwellings should provide a range of dwelling sizes and types, including:

- Dwellings with a different number of bedrooms.
- At least one dwelling that contains a kitchen, bath or shower, and a toilet and wash basin at ground floor level.

**Infrastructure objectives**

To ensure development is provided with appropriate utility services and infrastructure.
To ensure development does not unreasonably overload the capacity of utility services and infrastructure.

**Standard B4**

Development should be connected to reticulated services, including reticulated sewerage, drainage, electricity and gas, if available.

Development should not unreasonably exceed the capacity of utility services and infrastructure, including reticulated services and roads.

In areas where utility services or infrastructure have little or no spare capacity, developments should provide for the upgrading of or mitigation of the impact on services or infrastructure.

**Decision guidelines**

Before deciding on an application, the responsible authority must consider:

- The capacity of the existing infrastructure.
- In the absence of reticulated sewerage, the capacity of the development to treat and retain all wastewater in accordance with the State Environment Protection Policy (Waters of Victoria) under the *Environment Protection Act 1970*.
- If the drainage system has little or no spare capacity, the capacity of the development to provide for stormwater drainage mitigation or upgrading of the local drainage system.

**Integration with the street objective**

To integrate the layout of development with the street.

**Standard B5**

Developments should provide adequate vehicle and pedestrian links that maintain or enhance local accessibility.

Development should be oriented to front existing and proposed streets.

High fencing in front of dwellings should be avoided if practicable.

Development next to existing public open space should be laid out to complement the open space.

**Decision guidelines**

Before deciding on an application, the responsible authority must consider:

- Any relevant neighbourhood character objective, policy or statement set out in this scheme.
- The design response.
SITE LAYOUT AND BUILDING MASSING

Street setback objective
To ensure that the setbacks of buildings from a street respect the existing or preferred neighbourhood character and make efficient use of the site.

Standard B6
Walls of buildings should be set back from streets:

- At least the distance specified in a schedule to the zone, or
- If no distance is specified in a schedule to the zone, the distance specified in Table B1.

Porches, pergolas and verandahs that are less than 3.6 metres high and eaves may encroach not more than 2.5 metres into the setbacks of this standard.

Table B1 Street setback

<table>
<thead>
<tr>
<th>Development context</th>
<th>Minimum setback from front street (metres)</th>
<th>Minimum setback from a side street (metres)</th>
</tr>
</thead>
<tbody>
<tr>
<td>There is an existing building on both the abutting allotments facing the same street, and the site is not on a corner.</td>
<td>The average distance of the setbacks of the front walls of the existing buildings on the abutting allotments facing the front street or 9 metres, whichever is the lesser.</td>
<td>Not applicable</td>
</tr>
<tr>
<td>There is an existing building on one abutting allotment facing the same street and no existing building on the other abutting allotment facing the same street, and the site is not on a corner.</td>
<td>The same distance as the setback of the front wall of the existing building on the abutting allotment facing the front street or 9 metres, whichever is the lesser.</td>
<td>Not applicable</td>
</tr>
<tr>
<td>There is no existing building on either of the abutting allotments facing the same street, and the site is not on a corner.</td>
<td>6 metres for streets in a Road Zone, Category 1, and 4 metres for other streets.</td>
<td>Not applicable</td>
</tr>
<tr>
<td>The site is on a corner.</td>
<td>If there is a building on the abutting allotment facing the front street, the same distance as the setback of the front wall of the existing building on the abutting allotment facing the front street or 9 metres, whichever is the lesser.</td>
<td>Front walls of new development fronting the side street of a corner site should be setback at least the same distance as the setback of the front wall of any existing building on the abutting allotment facing the side street or 3 metres, whichever is the lesser.</td>
</tr>
<tr>
<td></td>
<td>If there is no building on the abutting allotment facing the front street, 6 metres for streets in a Road Zone, Category 1, and 4 metres for other streets.</td>
<td>Side walls of new development on a corner site should be setback the same distance as the setback of the front wall of any existing building on the abutting allotment facing the side street or 2 metres, whichever is the lesser.</td>
</tr>
</tbody>
</table>

Decision guidelines
Before deciding on an application, the responsible authority must consider:

- Any relevant neighbourhood character objective, policy or statement set out in this scheme.
- The design response.
Whether a different setback would be more appropriate taking into account the prevailing setbacks of existing buildings on nearby lots.

- The visual impact of the building when viewed from the street and from adjoining properties.
- The value of retaining vegetation within the front setback.

**Building height objective**

To ensure that the height of buildings respects the existing or preferred neighbourhood character.

**Standard B7**

The maximum building height should not exceed the maximum height specified in the zone, schedule to the zone or an overlay that applies to the land.

If no maximum height is specified in the zone, schedule to the zone or an overlay, the maximum building height should not exceed 9 metres, unless the slope of the natural ground level at any cross section wider than 8 metres of the site of the building is 2.5 degrees or more, in which case the maximum building height should not exceed 10 metres.

Changes of building height between existing buildings and new buildings should be graduated.

**Decision guidelines**

Before deciding on an application, the responsible authority must consider:

- Any relevant neighbourhood character objective, policy or statement set out in this scheme.
- Any maximum building height specified in the zone, a schedule to the zone or an overlay applying to the land.
- The design response.
- The effect of the slope of the site on the height of the building.
- The relationship between the proposed building height and the height of existing adjacent buildings.
- The visual impact of the building when viewed from the street and from adjoining properties.

**Site coverage objective**

To ensure that the site coverage respects the existing or preferred neighbourhood character and responds to the features of the site.

**Standard B8**

The site area covered by buildings should not exceed:

- The maximum site coverage specified in a schedule to the zone, or
- If no maximum site coverage is specified in a schedule to the zone, 60 per cent.

**Decision guidelines**

Before deciding on an application, the responsible authority must consider:

- Any relevant neighbourhood character objective, policy or statement set out in this scheme.
- The design response.
- The existing site coverage and any constraints imposed by existing development or the features of the site.
- The site coverage of adjacent properties.
- The effect of the visual bulk of the building and whether this is acceptable in the neighbourhood.
Permeability and stormwater management objectives

To reduce the impact of increased stormwater run-off on the drainage system.

To facilitate on-site stormwater infiltration.

To encourage stormwater management that maximises the retention and reuse of stormwater.

Standard B9

The site area covered by the pervious surfaces should be at least:

- The minimum area specified in a schedule to the zone, or
- If no minimum is specified in a schedule to the zone, 20 percent of the site.

The stormwater management system should be designed to:

- Contribute to cooling, improving local habitat and providing attractive and enjoyable spaces.

Decision guidelines

Before deciding on an application, the responsible authority must consider:

- The design response.
- The capacity of the site to incorporate stormwater retention and reuse.
- The existing site coverage and any constraints imposed by existing development.
- The capacity of the drainage network to accommodate additional stormwater.
- The capacity of the site to absorb run-off.
- The practicality of achieving the minimum site coverage of pervious surfaces, particularly on lots of less than 300 square metres.
- Whether the owner has entered into an agreement to contribute to off-site stormwater management in lieu of providing an on-site stormwater management system.

Energy efficiency objectives

To achieve and protect energy efficient dwellings and residential buildings.

To ensure the orientation and layout of development reduce fossil fuel energy use and make appropriate use of daylight and solar energy.

Standard B10

Buildings should be:

- Oriented to make appropriate use of solar energy.
- Sited and designed to ensure that the energy efficiency of existing dwellings on adjoining lots is not unreasonably reduced.
- Sited and designed to ensure that the performance of existing rooftop solar energy facilities on dwellings on adjoining lots in a General Residential Zone, Neighbourhood Residential Zone or Township Zone are not unreasonably reduced. The existing rooftop solar energy facility must exist at the date the application is lodged.

Living areas and private open space should be located on the north side of the development, if practicable.

Developments should be designed so that solar access to north-facing windows is maximised.
Decision guidelines
Before deciding on an application, the responsible authority must consider:

- The design response.
- The size, orientation and slope of the lot.
- The existing amount of solar access to abutting properties.
- The availability of solar access to north-facing windows on the site.
- The extent to which an existing rooftop solar energy facility on an adjoining lot is overshadowed by existing buildings or other permanent structures.
- Whether the existing rooftop solar energy facility on an adjoining lot is appropriately located.
- The effect of overshadowing on an existing rooftop solar energy facility on an adjoining lot.

Open space objective
To integrate the layout of development with any public and communal open space provided in or adjacent to the development.

Standard B11
If any public or communal open space is provided on site, it should:

- Be substantially fronted by dwellings, where appropriate.
- Provide outlook for as many dwellings as practicable.
- Be designed to protect any natural features on the site.
- Be accessible and useable.

Decision guidelines
Before deciding on an application, the responsible authority must consider:

- Any relevant plan or policy for open space in the Municipal Planning Strategy and the Planning Policy Framework.
- The design response.

Safety objective
To ensure the layout of development provides for the safety and security of residents and property.

Standard B12
Entrances to dwellings and residential buildings should not be obscured or isolated from the street and internal accessways.

Planting which creates unsafe spaces along streets and accessways should be avoided.

Developments should be designed to provide good lighting, visibility and surveillance of car parks and internal accessways.

Private spaces within developments should be protected from inappropriate use as public thoroughfares.

Decision guideline
Before deciding on an application, the responsible authority must consider the design response.

Landscaping objectives
To encourage development that respects the landscape character of the neighbourhood.
To encourage development that maintains and enhances habitat for plants and animals in locations of habitat importance.

To provide appropriate landscaping.

To encourage the retention of mature vegetation on the site.

**Standard B13**

The landscape layout and design should:

- Protect any predominant landscape features of the neighbourhood.
- Take into account the soil type and drainage patterns of the site.
- Allow for intended vegetation growth and structural protection of buildings.
- In locations of habitat importance, maintain existing habitat and provide for new habitat for plants and animals.
- Provide a safe, attractive and functional environment for residents.

Development should provide for the retention or planting of trees, where these are part of the character of the neighbourhood.

Development should provide for the replacement of any significant trees that have been removed in the 12 months prior to the application being made.

The landscape design should specify landscape themes, vegetation (location and species), paving and lighting.

Development should meet any additional landscape requirements specified in a schedule to the zone.

**Decision guidelines**

Before deciding on an application, the responsible authority must consider:

- Any relevant neighbourhood character objective, policy or statement set out in this scheme.
- Any relevant plan or policy for landscape design in the Municipal Planning Strategy and the Planning Policy Framework.
- The design response.
- The location and size of gardens and the predominant plant types in the neighbourhood.
- The health of any trees to be removed.
- Whether a tree was removed to gain a development advantage.

**Access objective**

To ensure the number and design of vehicle crossovers respects the neighbourhood character.

**Standard B14**

The width of accessways or car spaces should not exceed:

- 33 per cent of the street frontage, or
- if the width of the street frontage is less than 20 metres, 40 per cent of the street frontage.

No more than one single-width crossover should be provided for each dwelling fronting a street.

The location of crossovers should maximise the retention of on-street car parking spaces.

The number of access points to a road in a Road Zone should be minimised.

Developments must provide for access for service, emergency and delivery vehicles.
Decision guidelines
Before deciding on an application, the responsible authority must consider:

- The design response.
- The impact on the neighbourhood character.
- The reduction of on-street car parking spaces.
- The effect on any significant vegetation on the site and footpath.

Parking location objectives
To provide convenient parking for resident and visitor vehicles.
To protect residents from vehicular noise within developments.

Standard B15
Car parking facilities should:

- Be reasonably close and convenient to dwellings and residential buildings.
- Be secure.
- Be well ventilated if enclosed.

Shared accessways or car parks of other dwellings and residential buildings should be located at least 1.5 metres from the windows of habitable rooms. This setback may be reduced to 1 metre where there is a fence at least 1.5 metres high or where window sills are at least 1.4 metres above the accessway.

Decision guideline
Before deciding on an application, the responsible authority must consider the design response.
AMENITY IMPACTS

Side and rear setbacks objective

To ensure that the height and setback of a building from a boundary respects the existing or preferred neighbourhood character and limits the impact on the amenity of existing dwellings.

Standard B17

A new building not on or within 200mm of a boundary should be set back from side or rear boundaries:

- At least the distance specified in a schedule to the zone, or
- If no distance is specified in a schedule to the zone, 1 metre, plus 0.3 metres for every metre of height over 3.6 metres up to 6.9 metres, plus 1 metre for every metre of height over 6.9 metres.

Sunblinds, verandahs, porches, eaves, fascias, gutters, masonry chimneys, flues, pipes, domestic fuel or water tanks, and heating or cooling equipment or other services may encroach not more than 0.5 metres into the setbacks of this standard.

Landings having an area of not more than 2 square metres and less than 1 metre high, stairways, ramps, pergolas, shade sails and carports may encroach into the setbacks of this standard.

Diagram B1 Side and rear setbacks

Decision guidelines

Before deciding on an application, the responsible authority must consider:

- Any relevant neighbourhood character objective, policy or statement set out in this scheme.
- The design response.
• The impact on the amenity of the habitable room windows and secluded private open space of existing dwellings.
• Whether the wall is opposite an existing or simultaneously constructed wall built to the boundary.
• Whether the wall abuts a side or rear lane.

Walls on boundaries objective
To ensure that the location, length and height of a wall on a boundary respects the existing or preferred neighbourhood character and limits the impact on the amenity of existing dwellings.

Standard B18
A new wall constructed on or within 200mm of a side or rear boundary of a lot or a carport constructed on or within 1 metre of a side or rear boundary of lot should not abut the boundary:
• For a length of more than the distance specified in a schedule to the zone; or
• If no distance is specified in a schedule to the zone, for a length of more than:
  • 10 metres plus 25 per cent of the remaining length of the boundary of an adjoining lot, or
  • Where there are existing or simultaneously constructed walls or carports abutting the boundary on an abutting lot, the length of the existing or simultaneously constructed walls or carports whichever is the greater.

A new wall or carport may fully abut a side or rear boundary where slope and retaining walls or fences would result in the effective height of the wall or carport being less than 2 metres on the abutting property boundary.

A building on a boundary includes a building set back up to 200mm from a boundary.

The height of a new wall constructed on or within 200mm of a side or rear boundary or a carport constructed on or within 1 metre of a side or rear boundary should not exceed an average of 3.2 metres with no part higher than 3.6 metres unless abutting a higher existing or simultaneously constructed wall.

Decision guidelines
Before deciding on an application, the responsible authority must consider:
• Any relevant neighbourhood character objective, policy or statement set out in this scheme.
• The design response.
• The extent to which walls on boundaries are part of the neighbourhood character.
• The impact on the amenity of existing dwellings.
• The opportunity to minimise the length of walls on boundaries by aligning a new wall on a boundary with an existing wall on a lot of an adjoining property.
• The orientation of the boundary that the wall is being built on.
• The width of the lot.
• The extent to which the slope and retaining walls or fences reduce the effective height of the wall.
• Whether the wall abuts a side or rear lane.
• The need to increase the wall height to screen a box gutter.

Daylight to existing windows objective
To allow adequate daylight into existing habitable room windows.
Standard B19

Buildings opposite an existing habitable room window should provide for a light court to the existing window that has a minimum area of 3 square metres and minimum dimension of 1 metre clear to the sky. The calculation of the area may include land on the abutting lot.

Walls or carports more than 3 metres in height opposite an existing habitable room window should be set back from the window at least 50 per cent of the height of the new wall if the wall is within a 55 degree arc from the centre of the existing window. The arc may be swung to within 35 degrees of the plane of the wall containing the existing window.

Where the existing window is above ground floor level, the wall height is measured from the floor level of the room containing the window.

Diagram B2 Daylight to existing windows

Decision guidelines

Before deciding on an application, the responsible authority must consider:

- The design response.
- The extent to which the existing dwelling has provided for reasonable daylight access to its habitable rooms through the siting and orientation of its habitable room windows.
- The impact on the amenity of existing dwellings.

North-facing windows objective

To allow adequate solar access to existing north-facing habitable room windows.

Standard B20

If a north-facing habitable room window of an existing dwelling is within 3 metres of a boundary on an abutting lot, a building should be setback from the boundary 1 metre, plus 0.6 metres for every metre of height over 3.6 metres up to 6.9 metres, plus 1 metre for every metre of height over 6.9 metres, for a distance of 3 metres from the edge of each side of the window. A north-facing window is a window with an axis perpendicular to its surface oriented north 20 degrees west to north 30 degrees east.
Diagram B3 North-facing windows

**Decision guidelines**

Before deciding on an application, the responsible authority must consider:

- The design response.
- Existing sunlight to the north-facing habitable room window of the existing dwelling.
- The impact on the amenity of existing dwellings.

**Overshadowing open space objective**

To ensure buildings do not significantly overshadow existing secluded private open space.

**Standard B21**

Where sunlight to the secluded private open space of an existing dwelling is reduced, at least 75 per cent, or 40 square metres with minimum dimension of 3 metres, whichever is the lesser area, of the secluded private open space should receive a minimum of five hours of sunlight between 9 am and 3 pm on 22 September.

If existing sunlight to the secluded private open space of an existing dwelling is less than the requirements of this standard, the amount of sunlight should not be further reduced.

**Decision guidelines**

Before deciding on an application, the responsible authority must consider:

- The design response.
- The impact on the amenity of existing dwellings.
- Existing sunlight penetration to the secluded private open space of the existing dwelling.
- The time of day that sunlight will be available to the secluded private open space of the existing dwelling.
- The effect of a reduction in sunlight on the existing use of the existing secluded private open space.

55.04-6
19/01/2006
VC37

Overlooking objective

To limit views into existing secluded private open space and habitable room windows.

Standard B22

A habitable room window, balcony, terrace, deck or patio should be located and designed to avoid direct views into the secluded private open space of an existing dwelling within a horizontal distance of 9 metres (measured at ground level) of the window, balcony, terrace, deck or patio. Views should be measured within a 45 degree angle from the plane of the window or perimeter of the balcony, terrace, deck or patio, and from a height of 1.7 metres above floor level.

A habitable room window, balcony, terrace, deck or patio with a direct view into a habitable room window of existing dwelling within a horizontal distance of 9 metres (measured at ground level) of the window, balcony, terrace, deck or patio should be either:

- Offset a minimum of 1.5 metres from the edge of one window to the edge of the other.
- Have sill heights of at least 1.7 metres above floor level.
- Have fixed, obscure glazing in any part of the window below 1.7 metre above floor level.
- Have permanently fixed external screens to at least 1.7 metres above floor level and be no more than 25 per cent transparent.

Obscure glazing in any part of the window below 1.7 metres above floor level may be openable provided that there are no direct views as specified in this standard.

Screens used to obscure a view should be:

- Perforated panels or trellis with a maximum of 25 per cent openings or solid translucent panels.
- Permanent, fixed and durable.
- Designed and coloured to blend in with the development.

This standard does not apply to a new habitable room window, balcony, terrace, deck or patio which faces a property boundary where there is a visual barrier at least 1.8 metres high and the floor level of the habitable room, balcony, terrace, deck or patio is less than 0.8 metres above ground level at the boundary.

Diagram B4 Overlooking open space

Decision guidelines

Before deciding on an application, the responsible authority must consider:
- The design response.
- The impact on the amenity of the secluded private open space or habitable room window.
- The existing extent of overlooking into the secluded private open space and habitable room windows of existing dwellings.
- The internal daylight to and amenity of the proposed dwelling or residential building.

**Internal views objective**

To limit views into the secluded private open space and habitable room windows of dwellings and residential buildings within a development.

**Standard B23**

Windows and balconies should be designed to prevent overlooking of more than 50 per cent of the secluded private open space of a lower-level dwelling or residential building directly below and within the same development.

**Decision guideline**

Before deciding on an application, the responsible authority must consider the design response.

**Noise impacts objectives**

To contain noise sources in developments that may affect existing dwellings.

To protect residents from external noise.

**Standard B24**

Noise sources, such as mechanical plant, should not be located near bedrooms of immediately adjacent existing dwellings.

Noise sensitive rooms and secluded private open spaces of new dwellings and residential buildings should take account of noise sources on immediately adjacent properties.

Dwellings and residential buildings close to busy roads, railway lines or industry should be designed to limit noise levels in habitable rooms.

**Decision guideline**

Before deciding on an application, the responsible authority must consider the design response.
ON-SITE AMENITY AND FACILITIES

Accessibility objective
To encourage the consideration of the needs of people with limited mobility in the design of developments.

Standard B25
The dwelling entries of the ground floor of dwellings and residential buildings should be accessible or able to be easily made accessible to people with limited mobility.

Dwelling entry objective
To provide each dwelling or residential building with its own sense of identity.

Standard B26
Entries to dwellings and residential buildings should:
- Be visible and easily identifiable from streets and other public areas.
- Provide shelter, a sense of personal address and a transitional space around the entry.

Daylight to new windows objective
To allow adequate daylight into new habitable room windows.

Standard B27
A window in a habitable room should be located to face:
- An outdoor space clear to the sky or a light court with a minimum area of 3 square metres and minimum dimension of 1 metre clear to the sky, not including land on an abutting lot, or
- A verandah provided it is open for at least one third of its perimeter, or
- A carport provided it has two or more open sides and is open for at least one third of its perimeter.

Decision guidelines
Before deciding on an application, the responsible authority must consider:
- The design response.
- Whether there are other windows in the habitable room which have access to daylight.

Private open space objective
To provide adequate private open space for the reasonable recreation and service needs of residents.

Standard B28
A dwelling or residential building should have private open space of an area and dimensions specified in a schedule to the zone.

If no area or dimensions are specified in a schedule to the zone, a dwelling or residential building should have private open space consisting of:
- An area of 40 square metres, with one part of the private open space to consist of secluded private open space at the side or rear of the dwelling or residential building with a minimum area of 25 square metres, a minimum dimension of 3 metres and convenient access from a living room, or
- A balcony of 8 square metres with a minimum width of 1.6 metres and convenient access from a living room, or
- A roof-top area of 10 square metres with a minimum width of 2 metres and convenient access from a living room.

The balcony requirements in Clause 55.05-4 do not apply to an apartment development.

**Decision guidelines**

Before deciding on an application, the responsible authority must consider:

- The design response.
- The useability of the private open space, including its size and accessibility.
- The availability of and access to public or communal open space.
- The orientation of the lot to the street and the sun.

### Solar access to open space objective

To allow solar access into the secluded private open space of new dwellings and residential buildings.

**Standard B29**

The private open space should be located on the north side of the dwelling or residential building, if appropriate.

The southern boundary of secluded private open space should be set back from any wall on the north of the space at least \((2 + 0.9h)\) metres, where ‘\(h\)’ is the height of the wall.

**Diagram B5 Solar access to open space**

**Decision guidelines**

Before deciding on an application, the responsible authority must consider:

- The design response.
- The useability and amenity of the secluded private open space based on the sunlight it will receive.

### Storage objective

To provide adequate storage facilities for each dwelling.
Standard B30
Each dwelling should have convenient access to at least 6 cubic metres of externally accessible, secure storage space.
DETAILED DESIGN

Design detail objective
To encourage design detail that respects the existing or preferred neighbourhood character.

Standard B31
The design of buildings, including:
- Facade articulation and detailing,
- Window and door proportions,
- Roof form, and
- Verandahs, eaves and parapets,
should respect the existing or preferred neighbourhood character.
Garages and carports should be visually compatible with the development and the existing or preferred neighbourhood character.

Decision guidelines
Before deciding on an application, the responsible authority must consider:
- Any relevant neighbourhood character objective, policy or statement set out in this scheme.
- The design response.
- The effect on the visual bulk of the building and whether this is acceptable in the neighbourhood setting.
- Whether the design is innovative and of a high architectural standard.

Front fences objective
To encourage front fence design that respects the existing or preferred neighbourhood character.

Standard B32
The design of front fences should complement the design of the dwelling or residential building and any front fences on adjoining properties.
A front fence within 3 metres of a street should not exceed:
- The maximum height specified in a schedule to the zone, or
- If no maximum height is specified in a schedule to the zone, the maximum height specified in Table B3.

Table B3 Maximum front fence height

<table>
<thead>
<tr>
<th>Street Context</th>
<th>Maximum front fence height</th>
</tr>
</thead>
<tbody>
<tr>
<td>Streets in a Road Zone, Category 1</td>
<td>2 metres</td>
</tr>
<tr>
<td>Other streets</td>
<td>1.5 metres</td>
</tr>
</tbody>
</table>

Decision guidelines
Before deciding on an application, the responsible authority must consider:
- Any relevant neighbourhood character objective, policy or statement set out in this scheme.
- The design response.
- The setback, height and appearance of front fences on adjacent properties.
The extent to which slope and retaining walls reduce the effective height of the front fence.

- Whether the fence is needed to minimise noise intrusion.

**Common property objectives**

To ensure that communal open space, car parking, access areas and site facilities are practical, attractive and easily maintained.

To avoid future management difficulties in areas of common ownership.

**Standard B33**

Developments should clearly delineate public, communal and private areas.

Common property, where provided, should be functional and capable of efficient management.

**Site services objectives**

To ensure that site services can be installed and easily maintained.

To ensure that site facilities are accessible, adequate and attractive.

**Standard B34**

The design and layout of dwellings and residential buildings should provide sufficient space (including easements where required) and facilities for services to be installed and maintained efficiently and economically.

Bin and recycling enclosures, mailboxes and other site facilities should be adequate in size, durable, waterproof and blend in with the development.

Bin and recycling enclosures should be located for convenient access by residents.

Mailboxes should be provided and located for convenient access as required by Australia Post.

**Decision guideline**

Before deciding on an application, the responsible authority must consider the design response.
APARTMENT DEVELOPMENTS

Purpose
Clause 55.07 sets out requirements for an apartment development.

Energy efficiency objectives
To achieve and protect energy efficient dwellings and buildings.
To ensure the orientation and layout of development reduce fossil fuel energy use and make appropriate use of daylight and solar energy.
To ensure dwellings achieve adequate thermal efficiency.

Standard B35
Buildings should be:

- Oriented to make appropriate use of solar energy.
- Sited and designed to ensure that the energy efficiency of existing dwellings on adjoining lots is not unreasonably reduced.
- Sited and designed to ensure that the performance of existing rooftop solar energy facilities on dwellings on adjoining lots in a General Residential Zone, Neighbourhood Residential Zone or Township Zone are not unreasonably reduced. The existing rooftop solar energy facility must exist at the date the application is lodged.

Living areas and private open space should be located on the north side of the development, if practicable.

Developments should be designed so that solar access to north-facing windows is optimised.

Dwellings located in a climate zone identified Table B4 in should not exceed the maximum NatHERS annual cooling load specified in the following table.

Table B4 Cooling load

<table>
<thead>
<tr>
<th>NatHERS climate zone</th>
<th>NatHERS maximum cooling load MJ/M² per annum</th>
</tr>
</thead>
<tbody>
<tr>

<td>21</td>
</tr>
<tr>
<td>Climate zone 64 Cape Otway</td>
<td>19</td>
</tr>
<tr>
<td>Climate zone 66 Ballarat</td>
<td>23</td>
</tr>
</tbody>
</table>

Note: Refer to NatHERS zone map, Nationwide House Energy Rating Scheme (Commonwealth Department of Environment and Energy).

Decision guidelines
Before deciding on an application, the responsible authority must consider:

- The design response.
- The size, orientation and layout of the site.
- The existing amount of solar access to abutting properties.
- The availability of solar access to north-facing windows on the site.
- The annual cooling load for each dwelling.
- The extent to which an existing rooftop solar energy facility on an adjoining lot is overshadowed by existing buildings or other permanent structures.
- Whether the existing rooftop solar energy facility on an adjoining lot is appropriately located.
- The effect of overshadowing on an existing rooftop solar energy facility on an adjoining lot.

Communal open space objective

To ensure that communal open space is accessible, practical, attractive, easily maintained and integrated with the layout of the development.

Standard B36

Developments with 40 or more dwellings should provide a minimum area of communal open space of 2.5 square metres per dwelling or 250 square metres, whichever is lesser.

Communal open space should:

- Be located to:
  - Provide passive surveillance opportunities, where appropriate.
  - Provide outlook for as many dwellings as practicable.
  - Avoid overlooking into habitable rooms and private open space of new dwellings.
  - Minimise noise impacts to new and existing dwellings.

- Be designed to protect any natural features on the site.
- Maximise landscaping opportunities.
- Be accessible, usable and capable of efficient management.

Decision guidelines

Before deciding on an application, the responsible authority must consider:

- Any relevant urban design objective, policy or statement set out in this scheme.
- The design response.
- The useability and amenity of the communal open space based on its size, location, accessibility and reasonable recreation needs of residents.
- The availability of and access to public open space.

Solar access to communal outdoor open space objective

To allow solar access into communal outdoor open space.

Standard B37

The communal outdoor open space should be located on the north side of a building, if appropriate. At least 50 per cent or 125 square metres, whichever is the lesser, of the primary communal outdoor open space should receive a minimum of two hours of sunlight between 9am and 3pm on 21 June.
Decision guidelines

Before deciding on an application, the responsible authority must consider:

- The design response.
- The useability and amenity of the primary communal outdoor open space areas based on the urban context, the orientation of the building, the layout of dwellings and the sunlight it will receive.

Deep soil areas and canopy trees objective

To promote climate responsive landscape design and water management in developments to support thermal comfort and reduce the urban heat island effect.

Standard B38

The landscape layout and design should:

- Be responsive to the site context.
- Consider landscaping opportunities to reduce heat absorption such as green walls, green roofs and rooftop gardens and improve on-site storm water infiltration.
- Maximise deep soil areas for planting of canopy trees.
- Integrate planting and water management.

Developments should provide the deep soil areas and canopy trees specified in Table B5.

If the development cannot provide the deep soil areas and canopy trees specified in Table B5, an equivalent canopy cover should be achieved by providing either:

- Canopy trees or climbers (over a pergola) with planter pits sized appropriately for the mature tree soil volume requirements.
- Vegetated planters, green roofs or green facades.

Table B5 Deep soil areas and canopy trees

<table>
<thead>
<tr>
<th>Site area</th>
<th>Deep soil areas</th>
<th>Minimum tree provision</th>
</tr>
</thead>
<tbody>
<tr>
<td>750 - 1000 square metres</td>
<td>5% of site area (minimum dimension of 3 metres)</td>
<td>1 small tree (6-8 metres) per 30 square metres of deep soil</td>
</tr>
<tr>
<td>1001 - 1500 square metres</td>
<td>7.5% of site area (minimum dimension of 3 metres)</td>
<td>1 medium tree (8-12 metres) per 50 square metres of deep soil or 1 large tree per 90 square metres of deep soil</td>
</tr>
<tr>
<td>1501 - 2500 square metres</td>
<td>10% of site area (minimum dimension of 6 metres)</td>
<td>1 large tree (at least 12 metres) per 90 square metres of deep soil or 2 medium trees per 90 square metres of deep soil</td>
</tr>
<tr>
<td>&gt;2500 square metres</td>
<td>15% of site area (minimum dimension of 6 metres)</td>
<td>1 large tree (at least 12 metres) per 90 square metres of deep soil or 2 medium trees per 90 square metres of deep soil</td>
</tr>
</tbody>
</table>

Note: Where an existing canopy tree over 8 metres can be retained on a lot greater than 1000 square metres without damage during the construction period, the minimum deep soil requirement is 7% of the site area.
Decision guidelines

Before deciding on an application, the responsible authority must consider:

- Any relevant plan or policy for environmental sustainability in the Municipal Planning Strategy and the Planning Policy Framework.
- The design response.
- The suitability of the proposed location and soil volume for canopy trees.
- The ongoing management of landscaping within a development.
- The soil type and drainage patterns of the site.

Integrated water and stormwater management objectives

To encourage the use of alternative water sources such as rainwater, stormwater and recycled water.

To facilitate stormwater collection, utilisation and infiltration within the development.

To encourage development that reduces the impact of stormwater run-off on the drainage system and filters sediment and waste from stormwater prior to discharge from the site.

Standard B39

Buildings should be designed to collect rainwater for non-drinking purposes such as flushing toilets, laundry appliances and garden use.

Buildings should be connected to a non-potable dual pipe reticulated water supply, where available from the water authority.

The stormwater management system should be:

- Designed to maximise infiltration of stormwater, water and drainage of residual flows into permeable surfaces, tree pits and treatment areas.

Decision guidelines

Before deciding on an application, the responsible authority must consider:

- Any relevant water and stormwater management objective, policy or statement set out in this scheme.
- The design response.
- Whether the development has utilised alternative water sources and/or incorporated water sensitive urban design.
- Whether stormwater discharge from the site will adversely affect water quality entering the drainage system.
- The capacity of the drainage network to accommodate additional stormwater.
- Whether the stormwater treatment areas can be effectively maintained.
- Whether the owner has entered into an agreement to contribute to off-site stormwater management in lieu of providing an on-site stormwater management system.

Noise impacts objectives

To contain noise sources in developments that may affect existing dwellings.

To protect residents from external and internal noise sources.
**Standard B40**

Noise sources, such as mechanical plants should not be located near bedrooms of immediately adjacent existing dwellings.

The layout of new dwellings and buildings should minimise noise transmission within the site.

Noise sensitive rooms (such as living areas and bedrooms) should be located to avoid noise impacts from mechanical plants, lifts, building services, non-residential uses, car parking, communal areas and other dwellings.

New dwellings should be designed and constructed to include acoustic attenuation measures to reduce noise levels from off-site noise sources.

Buildings within a noise influence area specified in Table B6 should be designed and constructed to achieve the following noise levels:

- Not greater than 35dB(A) for bedrooms, assessed as an LAeq,8h from 10pm to 6am.
- Not greater than 40dB(A) for living areas, assessed LAeq,16h from 6am to 10pm.

Buildings, or part of a building screened from a noise source by an existing solid structure, or the natural topography of the land, do not need to meet the specified noise level requirements.

Noise levels should be assessed in unfurnished rooms with a finished floor and the windows closed.

**Table B6 Noise influence area**

</tr>
<tr>
<td>Railway servicing freight in Metropolitan Melbourne</td>
<td>135 metres from the centre of the nearest track</td>
</tr>
</tbody>
</table>

*Note: The noise influence area should be measured from the closest part of the building to the noise source.*

**Decision guidelines**

Before deciding on an application, the responsible authority must consider:

- The design response.
- Whether it can be demonstrated that the design treatment incorporated into the development meets the specified noise levels or an acoustic report by a suitably qualified specialist submitted with the application.
- Whether the impact of potential noise sources within a development have been mitigated through design, location and siting.
- Whether the layout of rooms within a dwelling mitigates noise transfer within and between dwellings.
- Whether an alternative design meets the relevant objectives having regard to the amenity of the dwelling and the site context.
Accessibility objective

To ensure the design of dwellings meets the needs of people with limited mobility.

Standard B41

At least 50 per cent of dwellings should have:

- A clear opening width of at least 850mm at the entrance to the dwelling and main bedroom.
- A clear path with a minimum width of 1.2 metres that connects the dwelling entrance to the main bedroom, an adaptable bathroom and the living area.
- A main bedroom with access to an adaptable bathroom.
- At least one adaptable bathroom that meets all of the requirements of either Design A or Design B specified in Table B7.

</tbody>
</table>

Building entry and circulation objectives

To provide each dwelling and building with its own sense of identity.

To ensure the internal layout of buildings provide for the safe, functional and efficient movement of residents.

To ensure internal communal areas provide adequate access to daylight and natural ventilation.

Standard B42

Entries to dwellings and buildings should:
Be visible and easily identifiable.

Provide shelter, a sense of personal address and a transitional space around the entry.

The layout and design of buildings should:

- Clearly distinguish entrances to residential and non-residential areas.
- Provide windows to building entrances and lift areas.
- Provide visible, safe and attractive stairs from the entry level to encourage use by residents.
- Provide common areas and corridors that:
  - Include at least one source of natural light and natural ventilation.
  - Avoid obstruction from building services.
  - Maintain clear sight lines.

**Decision guidelines**

Before deciding on an application, the responsible authority must consider:

- The design response.
- The useability and amenity of internal communal areas based on daylight access and the natural ventilation it will receive.

**Private open space above ground floor objective**

To provide adequate private open space for the reasonable recreation and service needs of residents.

**Standard B43**

A dwelling should have private open space consisting of:

- An area of 15 square metres, with a minimum dimension of 3 metres at a podium or other similar base and convenient access from a living room, or
- A balcony with an area and dimensions specified in Table B8 and convenient access from a living room.

If a cooling or heating unit is located on a balcony, the balcony should provide an additional area of 1.5 square metres.

**Table B8 Balcony size**

<table>
<thead>
<tr>
<th>Dwelling type</th>
<th>Minimum area</th>
<th>Minimum dimension</th>

<td>8 square metres</td>
<td>2 metres</td>
</tr>
<tr>
<td>3 or more bedroom dwelling</td>
<td>12 square metres</td>
<td>2.4 metres</td>
</tr>
</tbody>
</table>

**Decision guidelines**

Before deciding on an application, the responsible authority must consider:

- The design response.
- The useability and functionality of the private open space, including its size and accessibility.
- The amenity of the private open space based on the orientation of the lot, the wind conditions and the sunlight it will receive.
- The availability of and access to public or communal open space.
Storage objective

To provide adequate storage facilities for each dwelling.

Standard B44

Each dwelling should have convenient access to usable and secure storage space.

The total minimum storage space (including kitchen, bathroom and bedroom storage) should meet the requirements specified in Table B9.

Table B9 Storage

<table>
<thead>
<tr>
<th>Dwelling type</th>
<th>Total minimum storage volume</th>

<td>14 cubic metres</td>
<td>9 cubic metres</td>
</tr>
<tr>
<td>3 or more bedroom dwelling</td>
<td>18 cubic metres</td>
<td>12 cubic metres</td>
</tr>
</tbody>
</table>

Decision guidelines

Before deciding on an application, the responsible authority must consider:

- The design response.
- The useability, functionality and location of storage facilities provided for the dwelling.

Waste and recycling objectives

To ensure dwellings are designed to encourage waste recycling.

To ensure that waste and recycling facilities are accessible, adequate and attractive.

To ensure that waste and recycling facilities are designed and managed to minimise impacts on residential amenity, health and the public realm.

Standard B45

Developments should include dedicated areas for:

- Waste and recycling enclosures which are:
  - Adequate in size, durable, waterproof and blend in with the development.
  - Adequately ventilated.
  - Located and designed for convenient access by residents and made easily accessible to people with limited mobility.

- Adequate facilities for bin washing. These areas should be adequately ventilated.

- Collection, separation and storage of waste and recyclables, including where appropriate opportunities for on-site management of food waste through composting or other waste recovery as appropriate.

- Collection, storage and reuse of garden waste, including opportunities for on-site treatment, where appropriate, or off-site removal for reprocessing.

- Adequate circulation to allow waste and recycling collection vehicles to enter and leave the site without reversing.

- Adequate internal storage space within each dwelling to enable the separation of waste, recyclables and food waste where appropriate.
Waste and recycling management facilities should be design and managed in accordance with a Waste Management Plan approved by the responsible authority and:

- Be designed to meet the best practice waste and recycling management guidelines for residential development adopted by Sustainability Victoria.
- Protect public health and amenity of residents and adjoining premises from the impacts of odour, noise and hazards associated with waste collection vehicle movements.

**Decision guidelines**

Before deciding on an application, the responsible authority must consider:

- The design response.
- Any relevant waste and recycling objective, policy or statement set out in this scheme.

### Functional layout objective

To ensure dwellings provide functional areas that meet the needs of residents.

**Standard B46**

Bedrooms should:

- Meet the minimum internal room dimensions specified in Table B10.
- Provide an area in addition to the minimum internal room dimensions to accommodate a wardrobe.

**Table B10 Bedroom dimensions**

<table>
<thead>
<tr>
<th>Bedroom type</th>

</tr>
</tbody>
</table>

**Decision guidelines**

Before deciding on an application, the responsible authority must consider:

- The design response.
- The useability, functionality and amenity of habitable rooms.

### Room depth objective

To allow adequate daylight into single aspect habitable rooms.

**Standard B47**

Single aspect habitable rooms should not exceed a room depth of 2.5 times the ceiling height.

The depth of a single aspect, open plan, habitable room may be increased to 9 metres if all the following requirements are met:
The room combines the living area, dining area and kitchen.

The kitchen is located furthest from the window.

The ceiling height is at least 2.7 metres measured from finished floor level to finished ceiling level. This excludes where services are provided above the kitchen.

The room depth should be measured from the external surface of the habitable room window to the rear wall of the room.

**Decision guidelines**

Before deciding on an application, the responsible authority must consider:

- The design response.
- The extent to which the habitable room is provided with reasonable daylight access through the number, size, location and orientation of windows.
- The useability, functionality and amenity of the dwelling based on layout, siting, size and orientation of habitable rooms.
- Any overhang above habitable room windows that limits daylight access.

### Windows objective

To allow adequate daylight into new habitable room windows.

**Standard B48**

Habitable rooms should have a window in an external wall of the building.

A window may provide daylight to a bedroom from a smaller secondary area within the bedroom where the window is clear to the sky.

The secondary area should be:

- A minimum width of 1.2 metres.
- A maximum depth of 1.5 times the width, measured from the external surface of the window.

**Decision guidelines**

Before deciding on an application, the responsible authority must consider:

- The design response.
- The extent to which the habitable room is provided with reasonable daylight access through the number, size, location and orientation of windows.
- The useability and amenity of the dwelling based on the layout, siting, size and orientation of habitable rooms.

### Natural ventilation objectives

To encourage natural ventilation of dwellings.

To allow occupants to effectively manage natural ventilation of dwellings.

**Standard B49**

The design and layout of dwellings should maximise openable windows, doors or other ventilation devices in external walls of the building, where appropriate.

At least 40 per cent of dwellings should provide effective cross ventilation that has:

- A maximum breeze path through the dwelling of 18 metres.
- A minimum breeze path through the dwelling of 5 metres.
- Ventilation openings with approximately the same area.

The breeze path is measured between the ventilation openings on different orientations of the dwelling.

**Decision guidelines**

Before deciding on an application, the responsible authority must consider:

- The design response.
- The size, orientation, slope and wind exposure of the site.
- The extent to which the orientation of the building and the layout of dwellings maximises opportunities for cross ventilation.
- Whether an alternative design meets the relevant objectives having regard to the amenity of the dwelling and the site context.
RESIDENTIAL SUBDIVISION

Purpose
To implement the Municipal Planning Strategy and the Planning Policy Framework.
To create liveable and sustainable neighbourhoods and urban places with character and identity.
To achieve residential subdivision outcomes that appropriately respond to the site and its context for:
- Metropolitan Melbourne growth areas.
- Infill sites within established residential areas.
- Regional cities and towns.

To ensure residential subdivision design appropriately provides for:
- Policy implementation.
- Liveable and sustainable communities.
- Residential lot design.
- Urban landscape.
- Access and mobility management.
- Integrated water management.
- Site management.
- Utilities.

Application
These provisions apply to an application to subdivide land in the Neighbourhood Residential Zone, General Residential Zone, Residential Growth Zone, Mixed Use Zone or Township Zone and any Comprehensive Development Zone or Priority Development Zone that provides for residential development.

These provisions do not apply to an application to subdivide land into lots each containing an existing dwelling or car parking space.

Operation
The provisions of this clause contain:
- Objectives. An objective describes the desired outcome to be achieved in the completed subdivision.
- Standards. A standard contains the requirements to meet the objective.

A standard should normally be met. However, if the responsible authority is satisfied that an application for an alternative design solution meets the objective, the alternative design solution may be considered.

Requirement
An application to subdivide land:
- Must be accompanied by a site and context description and a design response.
- Must meet all of the objectives included in the clauses specified in the zone.
- Should meet all of the standards included in the clauses specified in the zone.
Certification of standards

A subdivision may be certified by a person authorised by the Minister for Planning as meeting the requirements of a standard in this clause.

A standard that is certified as met is deemed to have met the objective of that standard.
Subdivision site and context description

The site and context description may use a site plan, photographs or other techniques and must accurately describe:

- In relation to the site:
  - Site shape, size, dimensions and orientation.
  - Levels and contours of the site.
  - Natural features including trees and other significant vegetation, drainage lines, water courses, wetlands, ridgelines and hill tops.
  - The siting and use of existing buildings and structures.
  - Street frontage features such as poles, street trees and kerb crossovers.
  - Access points.
  - Location of drainage and other utilities.
  - Easements.
  - Any identified natural or cultural features of the site.
  - Significant views to and from the site.
  - Noise and odour sources or other external influences.
  - Soil conditions, including any land affected by contamination, erosion, salinity, acid sulphate soils or fill.
  - Any other notable features or characteristics of the site.
  - Adjacent uses.
  - Any other factor affecting the capacity to develop the site including whether the site is affected by inundation.

- An application for subdivision of 3 or more lots must also describe in relation to the surrounding area:
  - The pattern of subdivision.
  - Existing land uses.
  - The location and use of existing buildings on adjacent land.
  - Abutting street and path widths, materials and detailing.
  - The location and type of significant vegetation.

- An application for subdivision of 60 or more lots must also describe in relation to the surrounding area:
  - Location, distance and type of any nearby public open space and recreational facilities.
  - Direction and distances to local shops and community facilities.
  - Directions and walking distances to public transport routes and stops.
  - Direction and walking distances to existing neighbourhood, major and principal activity centres and major employment areas.
- Existing transport routes, including freeways, arterial roads and streets connecting neighbourhoods.
- Local street network including potential connections to adjacent subdivisions.
- Traffic volumes and movements on adjacent roads and streets.
- Pedestrian, bicycle and shared paths identifying whether their primary role is neighbourhood or regional access.
- Any places of cultural significance.
- Natural features including trees and other significant vegetation, drainage lines, water courses, wetlands, ridgelines and hill tops.
- Proximity of any fire threats.
- Pattern of ownership of adjoining lots.

If in the opinion of the responsible authority a requirement of the site and context description is not relevant to the assessment of an application, the responsible authority may waive or reduce the requirement.

**Satisfactory subdivision site and context description**

If the responsible authority decides that the site and context description is not satisfactory, it may require more information from the applicant under Section 54 of the Act.

The responsible authority must not require notice of an application to be given or decide an application until it is satisfied that the site and context description meets the requirements of Clause 56.01-1 and is satisfactory.

This does not apply if the responsible authority refuses an application under Section 52(1A) of the Act.

**Subdivision design response**

The design response must explain how the proposed design:

- Derives from and responds to the site and context description.
- Responds to any site and context features for the area identified in a local planning policy or a Neighbourhood Character Overlay.
- Responds to any relevant objective, policy, strategy or plan set out for the area in this scheme.
- Meets the relevant objectives of Clause 56.

The design response must include a dimensioned plan to scale showing the layout of the subdivision in context with the surrounding area. If in the opinion of the responsible authority this requirement is not relevant to the assessment of an application, it may waive or reduce the requirement.

An application for subdivision of 60 or more lots must also include a plan that meets the requirements of Standard C2. The plan must also show the:

- Proposed uses of each part of the site.
- Natural features of the site and identify any features proposed to be altered.
- Proposed integrated water management system.
- Proposed staging of the subdivision.
POLICY IMPLEMENTATION

Strategic implementation objective
To ensure that the layout and design of a subdivision is consistent with and implements any objective, policy, strategy or plan for the area set out in this scheme.

Standard C1
An application must be accompanied by a written statement that describes how the subdivision is consistent with and implements any relevant growth area, activity centre, housing, access and mobility, community facilities, open space and recreation, landscape (including any native vegetation precinct plan) and urban design objective, policy, strategy or plan for the area set out in this scheme.
LIVEABLE AND SUSTAINABLE COMMUNITIES

Compact and walkable neighbourhoods objectives

To create compact neighbourhoods that are oriented around easy walking distances to activity centres, schools and community facilities, public open space and public transport.

To allow easy movement through and between neighbourhoods for all people.

Standard C2

A subdivision should implement any relevant growth area or any approved land-use and development strategy, plan or policy for the area set out in this scheme.

An application for subdivision must include a plan of the layout of the subdivision that:

- Meets the objectives (if relevant to the class of subdivision specified in the zone) of:
  - Clause 56.03-2 Activity centres
  - Clause 56.03-3 Planning for community facilities
  - Clause 56.04-1 Lot diversity and distribution
  - Clause 56.06-2 Walking and cycling network
  - Clause 56.06-3 Public transport network
  - Clause 56.06-4 Neighbourhood street network

- Shows the 400 metre street walking distance around each existing or proposed bus stop, 600 metres street walking distance around each existing or proposed tram stop and 800 metres street walking distance around each existing or proposed railway station and shows the estimated number of dwellings within those distances.

- Shows the layout of the subdivision in relation to the surrounding area.

- Is designed to be accessible for people with disabilities.

Activity centre objective

To provide for mixed-use activity centres, including neighbourhood activity centres, of appropriate area and location.

Standard C3

A subdivision should implement any relevant activity centre strategy, plan or policy for the area set out in this scheme.

Subdivision should be supported by activity centres that are:

- Accessible by neighbourhood and regional walking and cycling networks.

- Served by public transport that is connected to the regional public transport network.

- Located at public transport interchange points for the convenience of passengers and easy connections between public transport services.

- Located on arterial roads or connector streets.

- Of appropriate size to accommodate a mix of uses that meet local community needs.

- Oriented to support active street frontages, support street-based community interaction and pedestrian safety.
Planning for community facilities objective

To provide appropriately located sites for community facilities including schools, libraries, preschools and childcare, health services, police and fire stations, recreation and sports facilities.

Standard C4

A subdivision should:

- Implement any relevant regional and local community facility strategy, plan or policy for the area set out in this scheme.
- Locate community facilities on sites that are in or near activity centres and public transport.

School sites should:

- Be integrated with the neighbourhood and located near activity centres.
- Be located on walking and cycling networks.
- Have a bus stop located along the school site boundary.
- Have student drop-off zones, bus parking and on-street parking in addition to other street functions in abutting streets.
- Adjoin the public open space network and community sporting and other recreation facilities.
- Be integrated with community facilities.
- Be located on land that is not affected by physical, environmental or other constraints.

Schools should be accessible by the Principal Public Transport Network in Metropolitan Melbourne and on the regional public transport network outside Metropolitan Melbourne.

Primary schools should be located on connector streets and not on arterial roads.

New State Government school sites must meet the requirements of the Department of Education and Training and abut at least two streets with sufficient widths to provide student drop-off zones, bus parking and on-street parking in addition to other street functions.

Built environment objective

To create urban places with identity and character.

Standard C5

The built environment should:

- Implement any relevant urban design strategy, plan or policy for the area set out in this scheme.
- Provide living and working environments that are functional, safe and attractive.
- Provide an integrated layout, built form and urban landscape.
- Contribute to a sense of place and cultural identity.

An application should describe the identity and character to be achieved and the elements that contribute to that identity and character.

Neighbourhood character objective

To design subdivisions that respond to neighbourhood character.

Standard C6

Subdivision should:
- Respect the existing neighbourhood character or achieve a preferred neighbourhood character consistent with any relevant neighbourhood character objective, policy or statement set out in this scheme.

- Respond to and integrate with the surrounding urban environment.

- Protect significant vegetation and site features.
LOT DESIGN

Lot diversity and distribution objectives

To achieve housing densities that support compact and walkable neighbourhoods and the efficient provision of public transport services.

To provide higher housing densities within walking distance of activity centres.

To achieve increased housing densities in designated growth areas.

To provide a range of lot sizes to suit a variety of dwelling and household types.

Standard C7

A subdivision should implement any relevant housing strategy, plan or policy for the area set out in this scheme.

Lot sizes and mix should achieve the average net residential density specified in any zone or overlay that applies to the land or in any relevant policy for the area set out in this scheme.

A range and mix of lot sizes should be provided including lots suitable for the development of:

- Single dwellings.
- Two dwellings or more.
- Higher density housing.
- Residential buildings and Retirement villages.

Unless the site is constrained by topography or other site conditions, lot distribution should provide for 95 per cent of dwellings to be located no more than 400 metre street walking distance from the nearest existing or proposed bus stop, 600 metres street walking distance from the nearest existing or proposed tram stop and 800 metres street walking distance from the nearest existing or proposed railway station.

Lots of 300 square metres or less in area, lots suitable for the development of two dwellings or more, lots suitable for higher density housing and lots suitable for Residential buildings and Retirement villages should be located in and within 400 metres street walking distance of an activity centre.

Lot area and building envelopes objective

To provide lots with areas and dimensions that enable the appropriate siting and construction of a dwelling, solar access, private open space, vehicle access and parking, water management, easements and the retention of significant vegetation and site features.

Standard C8

An application to subdivide land that creates lots of less than 300 square metres should be accompanied by information that shows:

- That the lots are consistent or contain building envelope that is consistent with a development approved under this scheme, or

- That a dwelling may be constructed on each lot in accordance with the requirements of this scheme.

Lots of between 300 square metres and 500 square metres should:

- Contain a building envelope that is consistent with a development of the lot approved under this scheme, or
• If no development of the lot has been approved under this scheme, contain a building envelope and be able to contain a rectangle measuring 10 metres by 15 metres, or 9 metres by 15 metres if a boundary wall is nominated as part of the building envelope.

If lots of between 300 square metres and 500 square metres are proposed to contain dwellings that are built to the boundary, the long axis of the lots should be within 30 degrees east and 20 degrees west of north unless there are significant physical constraints that make this difficult to achieve.

Lots greater than 500 square metres should be able to contain a rectangle measuring 10 metres by 15 metres, and may contain a building envelope.

A building envelope may specify or incorporate any relevant siting and design requirement. Any requirement should meet the relevant standards of Clause 54, unless:

- The objectives of the relevant standards are met, and
- The building envelope is shown as a restriction on a plan of subdivision registered under the Subdivision Act 1988, or is specified as a covenant in an agreement under Section 173 of the Act.

Where a lot with a building envelope adjoins a lot that is not on the same plan of subdivision or is not subject to the same agreement relating to the relevant building envelope:

- The building envelope must meet Standards A10 and A11 of Clause 54 in relation to the adjoining lot, and
- The building envelope must not regulate siting matters covered by Standards A12 to A15 (inclusive) of Clause 54 in relation to the adjoining lot. This should be specified in the relevant plan of subdivision or agreement.

Lot dimensions and building envelopes should protect:

- Solar access for future dwellings and support the siting and design of dwellings that achieve the energy rating requirements of the Building Regulations.
- Existing or proposed easements on lots.
- Significant vegetation and site features.

### Solar orientation of lots objective

To provide good solar orientation of lots and solar access for future dwellings.

### Standard C9

Unless the site is constrained by topography or other site conditions, at least 70 percent of lots should have appropriate solar orientation.

Lots have appropriate solar orientation when:

- The long axis of lots are within the range north 20 degrees west to north 30 degrees east, or east 20 degrees north to east 30 degrees south.
- Lots between 300 square metres and 500 square metres are proposed to contain dwellings that are built to the boundary, the long axis of the lots should be within 30 degrees east and 20 degrees west of north.
- Dimensions of lots are adequate to protect solar access to the lot, taking into account likely dwelling size and the relationship of each lot to the street.

### Street orientation objective

To provide a lot layout that contributes to community social interaction, personal safety and property security.
Standard C10
Subdivision should increase visibility and surveillance by:

- Ensuring lots front all roads and streets and avoid the side or rear of lots being oriented to connector streets and arterial roads.
- Providing lots of 300 square metres or less in area and lots for 2 or more dwellings around activity centres and public open space.
- Ensuring streets and houses look onto public open space and avoiding sides and rears of lots along public open space boundaries.
- Providing roads and streets along public open space boundaries.

Common area objectives
To identify common areas and the purpose for which the area is commonly held.

To ensure the provision of common area is appropriate and that necessary management arrangements are in place.

To maintain direct public access throughout the neighbourhood street network.

Standard C11
An application to subdivide land that creates common land must be accompanied by a plan and a report identifying:

- The common area to be owned by the body corporate, including any streets and open space.
- The reasons why the area should be commonly held.
- Lots participating in the body corporate.
- The proposed management arrangements including maintenance standards for streets and open spaces to be commonly held.
URBAN LANDSCAPE

Integrated urban landscape objectives

To provide attractive and continuous landscaping in streets and public open spaces that contribute to the character and identity of new neighbourhoods and urban places or to existing or preferred neighbourhood character in existing urban areas.

To incorporate natural and cultural features in the design of streets and public open space where appropriate.

To protect and enhance native habitat and discourage the planting and spread of noxious weeds.

To provide for integrated water management systems and contribute to drinking water conservation.

Standard C12

An application for subdivision that creates streets or public open space should be accompanied by a landscape design.

The landscape design should:

- Implement any relevant streetscape, landscape, urban design or native vegetation precinct plan, strategy or policy for the area set out in this scheme.
- Create attractive landscapes that visually emphasise streets and public open spaces.
- Respond to the site and context description for the site and surrounding area.
- Maintain significant vegetation where possible within an urban context.
- Take account of the physical features of the land including landform, soil and climate.
- Protect and enhance any significant natural and cultural features.
- Protect and link areas of significant local habitat where appropriate.
- Support integrated water management systems with appropriate landscape design techniques for managing urban run-off including wetlands and other water sensitive urban design features in streets and public open space.
- Promote the use of drought tolerant and low maintenance plants and avoid species that are likely to spread into the surrounding environment.
- Ensure landscaping supports surveillance and provides shade in streets, parks and public open space.
- Develop appropriate landscapes for the intended use of public open space including areas for passive and active recreation, the exercising of pets, playgrounds and shaded areas.
- Provide for walking and cycling networks that link with community facilities.
- Provide appropriate pathways, signage, fencing, public lighting and street furniture.
- Create low maintenance, durable landscapes that are capable of a long life.
- The landscape design must include a maintenance plan that sets out maintenance responsibilities, requirements and costs.

Public open space provision objectives

To provide a network of quality, well-distributed, multi-functional and cost-effective public open space that includes local parks, active open space, linear parks and trails, and links to regional open space.

To provide a network of public open space that caters for a broad range of users.

To encourage healthy and active communities.
To provide adequate unencumbered land for public open space and integrate any encumbered land with the open space network.

To ensure land provided for public open space can be managed in an environmentally sustainable way and contributes to the development of sustainable neighbourhoods.

**Standard C13**

The provision of public open space should:

- Implement any relevant objective, policy, strategy or plan (including any growth area precinct structure plan) for open space set out in this scheme.
- Provide a network of well-distributed neighbourhood public open space that includes:
  - Local parks within 400 metres safe walking distance of at least 95 percent of all dwellings. Where not designed to include active open space, local parks should be generally 1 hectare in area and suitably dimensioned and designed to provide for their intended use and to allow easy adaptation in response to changing community preferences.
  - Additional small local parks or public squares in activity centres and higher density residential areas.
  - Active open space of a least 8 hectares in area within 1 kilometre of 95 percent of all dwellings that is:
    - Suitably dimensioned and designed to provide for the intended use, buffer areas around sporting fields and passive open space
    - Sufficient to incorporate two football/cricket ovals
    - Appropriate for the intended use in terms of quality and orientation
    - Located on flat land (which can be cost effectively graded)
    - Located with access to, or making provision for, a recycled or sustainable water supply
    - Adjoin schools and other community facilities where practical
    - Designed to achieve sharing of space between sports.
    - Linear parks and trails along waterways, vegetation corridors and road reserves within 1 kilometre of 95 percent of all dwellings.

Public open space should:

- Be provided along foreshores, streams and permanent water bodies.
- Be linked to existing or proposed future public open spaces where appropriate.
- Be integrated with floodways and encumbered land that is accessible for public recreation.
- Be suitable for the intended use.
- Be of an area and dimensions to allow easy adaptation to different uses in response to changing community active and passive recreational preferences.
- Maximise passive surveillance.
- Be integrated with urban water management systems, waterways and other water bodies.
- Incorporate natural and cultural features where appropriate.
ACCESS AND MOBILITY MANAGEMENT

Integrated mobility objectives

To achieve an urban structure where compact and walkable neighbourhoods are clustered to support larger activity centres on the Principal Public Transport Network in Metropolitan Melbourne and on the regional public transport network outside Metropolitan Melbourne.

To provide for walking (including persons with impaired mobility), cycling, public transport and other motor vehicles in an integrated manner.

To contribute to reduced car dependence, improved energy efficiency, improved transport efficiency, reduced greenhouse gas emissions and reduced air pollution.

Standard C14

An application for a subdivision must include a plan of the layout of the neighbourhood that meets the objectives of:

- Clause 56.06-2 Walking and cycling network.
- Clause 56.06-3 Public transport network.
- Clause 56.06-4 Neighbourhood street network.

Walking and cycling network objectives

To contribute to community health and well being by encouraging walking and cycling as part of the daily lives of residents, employees and visitors.

To provide safe and direct movement through and between neighbourhoods by pedestrians and cyclists.

To reduce car use, greenhouse gas emissions and air pollution.

Standard C15

The walking and cycling network should be designed to:

- Implement any relevant regional and local walking and cycling strategy, plan or policy for the area set out in this scheme.
- Link to any existing pedestrian and cycling networks.
- Provide safe walkable distances to activity centres, community facilities, public transport stops and public open spaces.
- Provide an interconnected and continuous network of safe, efficient and convenient footpaths, shared paths, cycle paths and cycle lanes based primarily on the network of arterial roads, neighbourhood streets and regional public open spaces.
- Provide direct cycling routes for regional journeys to major activity centres, community facilities, public transport and other regional activities and for regional recreational cycling.
- Ensure safe street and road crossings including the provision of traffic controls where required.
- Provide an appropriate level of priority for pedestrians and cyclists.
- Have natural surveillance along streets and from abutting dwellings and be designed for personal safety and security particularly at night.
- Be accessible to people with disabilities.

Public transport network objectives

To provide an arterial road and neighbourhood street network that supports a direct, efficient and safe public transport system.
To encourage maximum use of public transport.

**Standard C16**

The public transport network should be designed to:

- Implement any relevant public transport strategy, plan or policy for the area set out in this scheme.
- Connect new public transport routes to existing and proposed routes to the satisfaction of the relevant public transport authority.
- Provide for public transport links between activity centres and other locations that attract people using the Principal Public Transport Network in Metropolitan Melbourne and the regional public transport network outside Metropolitan Melbourne.
- Locate regional bus routes principally on arterial roads and locate local bus services principally on connector streets to provide:
  - Safe and direct movement between activity centres without complicated turning manoeuvres.
  - Direct travel between neighbourhoods and neighbourhood activity centres.
  - A short and safe walk to a public transport stop from most dwellings.

**Neighbourhood street network objective**

To provide for direct, safe and easy movement through and between neighbourhoods for pedestrians, cyclists, public transport and other motor vehicles using the neighbourhood street network.

**Standard C17**

The neighbourhood street network must:

- Take account of the existing mobility network of arterial roads, neighbourhood streets, cycle paths, shared paths, footpaths and public transport routes.
- Provide clear physical distinctions between arterial roads and neighbourhood street types.
- Comply with the Roads Corporation’s arterial road access management policies.
- Provide an appropriate speed environment and movement priority for the safe and easy movement of pedestrians and cyclists and for accessing public transport.
- Provide safe and efficient access to activity centres for commercial and freight vehicles.
- Provide safe and efficient access to all lots for service and emergency vehicles.
- Provide safe movement for all vehicles.
- Incorporate any necessary traffic control measures and traffic management infrastructure.

The neighbourhood street network should be designed to:

- Implement any relevant transport strategy, plan or policy for the area set out in this scheme.
- Include arterial roads at intervals of approximately 1.6 kilometres that have adequate reservation widths to accommodate long term movement demand.
- Include connector streets approximately halfway between arterial roads and provide adequate reservation widths to accommodate long term movement demand.
- Ensure connector streets align between neighbourhoods for direct and efficient movement of pedestrians, cyclists, public transport and other motor vehicles.
- Provide an interconnected and continuous network of streets within and between neighbourhoods for use by pedestrians, cyclists, public transport and other vehicles.
- Provide an appropriate level of local traffic dispersal.
- Indicate the appropriate street type.
- Provide a speed environment that is appropriate to the street type.
- Provide a street environment that appropriately manages movement demand (volume, type and mix of pedestrians, cyclists, public transport and other motor vehicles).
- Encourage appropriate and safe pedestrian, cyclist and driver behaviour.
- Provide safe sharing of access lanes and access places by pedestrians, cyclists and vehicles.
- Minimise the provision of culs-de-sac.
- Provide for service and emergency vehicles to safely turn at the end of a dead-end street.
- Facilitate solar orientation of lots.
- Facilitate the provision of the walking and cycling network, integrated water management systems, utilities and planting of trees.
- Contribute to the area’s character and identity.
- Take account of any identified significant features.

**Walking and cycling network detail objectives**

To design and construct footpaths, shared path and cycle path networks that are safe, comfortable, well constructed and accessible for people with disabilities.

To design footpaths to accommodate wheelchairs, prams, scooters and other footpath bound vehicles.

**Standard C18**

Footpaths, shared paths, cycle paths and cycle lanes should be designed to:

- Be part of a comprehensive design of the road or street reservation.
- Be continuous and connect.
- Provide for public transport stops, street crossings for pedestrians and cyclists and kerb crossovers for access to lots.
- Accommodate projected user volumes and mix.
- Meet the requirements of Table C1.
- Provide pavement edge, kerb, channel and crossover details that support safe travel for pedestrians, footpath bound vehicles and cyclists, perform required drainage functions and are structurally sound.
- Provide appropriate signage.
- Be constructed to allow access to lots without damage to the footpath or shared path surfaces.
- Be constructed with a durable, non-skid surface.
- Be of a quality and durability to ensure:
  - Safe passage for pedestrians, cyclists, footpath bound vehicles and vehicles.
  - Discharge of urban run-off.
  - Preservation of all-weather access.
  - Maintenance of a reasonable, comfortable riding quality.
  - A minimum 20 year life span.
- Be accessible to people with disabilities and include tactile ground surface indicators, audible signals and kerb ramps required for the movement of people with disabilities.

**Public transport network detail objectives**

To provide for the safe, efficient operation of public transport and the comfort and convenience of public transport users.

To provide public transport stops that are accessible to people with disabilities.

**Standard C19**

Bus priority measures must be provided along arterial roads forming part of the existing or proposed Principal Public Transport Network in Metropolitan Melbourne and the regional public transport network outside Metropolitan Melbourne to the requirements of the relevant roads authority.

Road alignment and geometry along bus routes should provide for the efficient, unimpeded movement of buses and the safety and comfort of passengers.

The design of public transport stops should not impede the movement of pedestrians.

Bus and tram stops should have:

- Surveillance from streets and adjacent lots.
- Safe street crossing conditions for pedestrians and cyclists.

Safe pedestrian crossings on arterial roads and at schools including the provision of traffic controls as required by the roads authority.

- Continuous hard pavement from the footpath to the kerb.
- Sufficient lighting and paved, sheltered waiting areas for forecast user volume at neighbourhood centres, schools and other locations with expected high patronage.
- Appropriate signage.

Public transport stops and associated waiting areas should be accessible to people with disabilities and include tactile ground surface indicators, audible signals and kerb ramps required for the movement of people with physical disabilities.

**Neighbourhood street network detail objective**

To design and construct street carriageways and verges so that the street geometry and traffic speeds provide an accessible and safe neighbourhood street system for all users.

**Standard C20**

The design of streets and roads should:

- Meet the requirements of Table C1. Where the widths of access lanes, access places, and access streets do not comply with the requirements of Table C1, the requirements of the relevant fire authority and roads authority must be met.

- Provide street blocks that are generally between 120 metres and 240 metres in length and generally between 60 metres to 120 metres in width to facilitate pedestrian movement and control traffic speed.

- Have verges of sufficient width to accommodate footpaths, shared paths, cycle paths, integrated water management, street tree planting, lighting and utility needs.

- Have street geometry appropriate to the street type and function, the physical land characteristics and achieve a safe environment for all users.

- Provide a low-speed environment while allowing all road users to proceed without unreasonable inconvenience or delay.
- Provide a safe environment for all street users applying speed control measures where appropriate.
- Ensure intersection layouts clearly indicate the travel path and priority of movement for pedestrians, cyclists and vehicles.
- Provide a minimum 5 metre by 5 metre corner splay at junctions with arterial roads and a minimum 3 metre by 3 metre corner splay at other junctions unless site conditions justify a variation to achieve safe sight lines across corners.
- Ensure streets are of sufficient strength to:
  - Enable the carriage of vehicles.
  - Avoid damage by construction vehicles and equipment.
- Ensure street pavements are of sufficient quality and durability for the:
  - Safe passage of pedestrians, cyclists and vehicles.
  - Discharge of urban run-off.
  - Preservation of all-weather access and maintenance of a reasonable, comfortable riding quality.
- Ensure carriageways of planned arterial roads are designed to the requirements of the relevant road authority.
- Ensure carriageways of neighbourhood streets are designed for a minimum 20 year life span.
- Provide pavement edges, kerbs, channel and crossover details designed to:
  - Perform the required integrated water management functions.
  - Delineate the edge of the carriageway for all street users.
  - Provide efficient and comfortable access to abutting lots at appropriate locations.
  - Contribute to streetscape design.
- Provide for the safe and efficient collection of waste and recycling materials from lots.
- Be accessible to people with disabilities.
- Meet the requirements of Table C1. Where the widths of access lanes, access places, and access streets do not comply with the requirements of Table C1, the requirements of the relevant fire authority and roads authority must be met. Where the widths of connector streets do not comply with the requirements of Table C1, the requirements of the relevant public transport authority must be met.

A street detail plan should be prepared that shows, as appropriate:
- The street hierarchy and typical cross-sections for all street types.
- Location of carriageway pavement, parking, bus stops, kerbs, crossovers, footpaths, tactile surface indicators, cycle paths and speed control and traffic management devices.
- Water sensitive urban design features.
- Location and species of proposed street trees and other vegetation.
- Location of existing vegetation to be retained and proposed treatment to ensure its health.
- Any relevant details for the design and location of street furniture, lighting, seats, bus stops, telephone boxes and mailboxes.
Lot access objective
To provide for safe vehicle access between roads and lots.

Standard C21
Vehicle access to lots abutting arterial roads should be provided from service roads, side or rear access lanes, access places or access streets where appropriate and in accordance with the access management requirements of the relevant roads authority.

Vehicle access to lots of 300 square metres or less in area and lots with a frontage of 7.5 metres or less should be provided via rear or side access lanes, places or streets.

The design and construction of a crossover should meet the requirements of the relevant road authority.

Table C1 Design of roads and neighbourhood streets

Access Lane
A side or rear lane principally providing access to parking on lots with another street frontage.

- **Carriageway width³, cycle lane provision, parking provision and bus stops within street reservation**
  - 3.5m minimum lane width in each direction of travel.
  - 4.0m minimum lane width at approaches to and departures from roundabouts and T-intersections.
  - For on-street cycling, increase the minimum clear carriageway in each direction by:
    - 0.7m where the trafficable carriageway is shared by cyclists but no dedicated bicycle lane is marked on the carriageway; or
    - 1.5m where a trafficable carriageway is shared by cyclists but no dedicated bicycle lane is marked on the carriageway and there is a single lane in each direction separated by a raised trafficable median of at least 2.0m in width with mountable kerbs; or
    - 1.7m where a dedicated 1.7m wide bicycle lane is marked on the carriageway.
  - An additional dedicated parking lane or indented parking within the verge must be provided where street parking is required. A parking lane width of 2.3m is required where parallel parking is provided.
  - Bus stops at the kerbside, not indented within the verge.

<table>

**Key to Table C1**

1. Indicative maximum traffic volume for 24-hour period. These volumes depend upon location. Generation rates may vary between existing and newly developing areas.

2. Target speed is the desired speed at which motorists should travel. This is not necessarily the design speed and is not greater than the marked legal speed limit.

3. Width is measured from kerb invert to kerb invert. Widening may be required at bends to allow for wider vehicle paths using appropriate Australian Standards for on street and off-street parking but should not negate the function of bends serving as slow points.

4. Verge width includes footpaths. Additional width may be required to accommodate a bicycle path.

5. Where drainage is not required a flush pavement edge treatment can be used. Layback kerbs are preferred for safety reasons. Upright kerbs may be considered for drainage purposes or in locations where on-street parking should be clearly defined and parking within the verge is not desired.

6. Turning requirements to access and egress parking on abutting lots may require additional carriageway width. The recommended carriageway width of 5.5m will provide adequate access to a standard 3.5m wide single garage built to the property line.

7. 50kph is the default urban speed limit in Victoria.

8. Target speed must not exceed the legal speed limit.
INTEGRATED WATER MANAGEMENT

Drinking water supply objectives
To reduce the use of drinking water.
To provide an adequate, cost-effective supply of drinking water.

Standard C22
The supply of drinking water must be:

- Designed and constructed in accordance with the requirements and to the satisfaction of the relevant water authority.
- Provided to the boundary of all lots in the subdivision to the satisfaction of the relevant water authority.

Reused and recycled water objective
To provide for the substitution of drinking water for non-drinking purposes with reused and recycled water.

Standard C23
Reused and recycled water supply systems must be:

- Designed, constructed and managed in accordance with the requirements and to the satisfaction of the relevant water authority, Environment Protection Authority and Department of Health and Human Services.
- Provided to the boundary of all lots in the subdivision where required by the relevant water authority.

Waste water management objective
To provide a waste water system that is adequate for the maintenance of public health and the management of effluent in an environmentally friendly manner.

Standard C24
Waste water systems must be:

- Designed, constructed and managed in accordance with the requirements and to the satisfaction of the relevant water authority and the Environment Protection Authority.
- Consistent with any relevant approved domestic waste water management plan.

Reticulated waste water systems must be provided to the boundary of all lots in the subdivision where required by the relevant water authority.

Stormwater management objectives
To minimise damage to properties and inconvenience to residents from stormwater.
To ensure that the street operates adequately during major storm events and provides for public safety.
To minimise increases in stormwater and protect the environmental values and physical characteristics of receiving waters from degradation by stormwater.
To encourage stormwater management that maximises the retention and reuse of stormwater.
To encourage stormwater management that contributes to cooling, local habitat improvements and provision of attractive and enjoyable spaces.
Standard C25

The stormwater management system must be:

- Designed and managed in accordance with the requirements and to the satisfaction of the relevant drainage authority.
- Designed and managed in accordance with the requirements and to the satisfaction of the water authority where reuse of stormwater is proposed.
- Designed to ensure that flows downstream of the subdivision site are restricted to pre-development levels unless increased flows are approved by the relevant drainage authority and there are no detrimental downstream impacts.
- Designed to contribute to cooling, improving local habitat and providing attractive and enjoyable spaces.

The stormwater management system should be integrated with the overall development plan including the street and public open space networks and landscape design.

For all storm events up to and including the 20% Average Exceedence Probability (AEP) standard:

- Stormwater flows should be contained within the drainage system to the requirements of the relevant authority.
- Ponding on roads should not occur for longer than 1 hour after the cessation of rainfall.

For storm events greater than 20% AEP and up to and including 1% AEP standard:

- Provision must be made for the safe and effective passage of stormwater flows.
- All new lots should be free from inundation or to a lesser standard of flood protection where agreed by the relevant floodplain management authority.
- Ensure that streets, footpaths and cycle paths that are subject to flooding meet the safety criteria $d_a V_{ave} < 0.35 \text{ m}^2/\text{s}$ (where, $d_a =$ average depth in metres and $V_{ave} =$ average velocity in metres per second).

The design of the local drainage network should:

- Ensure stormwater is retarded to a standard required by the responsible drainage authority.
- Ensure every lot is provided with drainage to a standard acceptable to the relevant drainage authority. Wherever possible, stormwater should be directed to the front of the lot and discharged into the street drainage system or legal point of discharge.
- Ensure that inlet and outlet structures take into account the effects of obstructions and debris build up. Any surcharge drainage pit should discharge into an overland flow in a safe and predetermined manner.
- Include water sensitive urban design features to manage stormwater in streets and public open space. Where such features are provided, an application must describe maintenance responsibilities, requirements and costs.

Any flood mitigation works must be designed and constructed in accordance with the requirements of the relevant floodplain management authority.
SITE MANAGEMENT

Site management objectives
To protect drainage infrastructure and receiving waters from sedimentation and contamination.
To protect the site and surrounding area from environmental degradation or nuisance prior to and during construction of subdivision works.
To encourage the re-use of materials from the site and recycled materials in the construction of subdivisions where practicable.

Standard C26
A subdivision application must describe how the site will be managed prior to and during the construction period and may set out requirements for managing:

- Erosion and sediment.
- Dust.
- Run-off.
- Litter, concrete and other construction wastes.
- Chemical contamination.
- Vegetation and natural features planned for retention.

Recycled material should be used for the construction of streets, shared paths and other infrastructure where practicable.
UTILITIES

Shared trenching objectives
To maximise the opportunities for shared trenching.
To minimise constraints on landscaping within street reserves.

Standard C27
Reticulated services for water, gas, electricity and telecommunications should be provided in shared trenching to minimise construction costs and land allocation for underground services.

Electricity, telecommunications and gas objectives
To provide public utilities to each lot in a timely, efficient and cost effective manner.
To reduce greenhouse gas emissions by supporting generation and use of electricity from renewable sources.

Standard C28
The electricity supply system must be designed in accordance with the requirements of the relevant electricity supply agency and be provided to the boundary of all lots in the subdivision to the satisfaction of the relevant electricity authority.

Arrangements that support the generation or use of renewable energy at a lot or neighbourhood level are encouraged.

The telecommunication system must be designed in accordance with the requirements of the relevant telecommunications servicing agency and should be consistent with any approved strategy, policy or plan for the provision of advanced telecommunications infrastructure, including fibre optic technology. The telecommunications system must be provided to the boundary of all lots in the subdivision to the satisfaction of the relevant telecommunications servicing authority.

Where available, the reticulated gas supply system must be designed in accordance with the requirements of the relevant gas supply agency and be provided to the boundary of all lots in the subdivision to the satisfaction of the relevant gas supply agency.

Fire hydrants objective
To provide fire hydrants and fire plugs in positions that enable fire fighters to access water safely, effectively and efficiently.

Standard C29
Fire hydrants should be provided:
- A maximum distance of 120 metres from the rear of the each lot.
- No more than 200 metres apart.

Hydrants and fire plugs must be compatible with the relevant fire service equipment. Where the provision of fire hydrants and fire plugs does not comply with the requirements of standard C29, fire hydrants must be provided to the satisfaction of the relevant fire authority.

Public lighting objective
To provide public lighting to ensure the safety of pedestrians, cyclists and vehicles.
To provide pedestrians with a sense of personal safety at night.
To contribute to reducing greenhouse gas emissions and to saving energy.
Standard C30

Public lighting should be provided to streets, footpaths, public telephones, public transport stops and to major pedestrian and cycle paths including public open spaces that are likely to be well used at night to assist in providing safe passage for pedestrians, cyclists and vehicles.

Public lighting should be designed in accordance with the relevant Australian Standards.

Public lighting should be consistent with any strategy, policy or plan for the use of renewable energy and energy efficient fittings.
[NO CONTENT]
APARTMENT DEVELOPMENTS

Purpose

To implement the Municipal Planning Strategy and the Planning Policy Framework.

To encourage apartment development that provides reasonable standards of amenity for existing and new residents.

To encourage apartment development that is responsive to the site and the surrounding area.

Application

Provisions in this clause apply to an application to construct or extend an apartment development, or to construct or extend a dwelling in or forming part of an apartment development, if:

- The apartment development is five or more storeys, excluding a basement, and is in the General Residential Zone, Residential Growth Zone, Mixed Use Zone or Township Zone, or
- The apartment development is in the Commercial 1 Zone, Commercial 3 Zone, Special Use Zone, Comprehensive Development Zone, Capital City Zone, Docklands Zone, Priority Development Zone or Activity Centre Zone.

Operation

The provisions of this clause contain:

- Objectives. An objective describes the desired outcome to be achieved in the completed development.

- Standards. A standard contains the requirements to meet the objective.
  A standard should normally be met. However, if the responsible authority is satisfied that an application for an alternative design solution meets the objective, the alternative design solution may be considered.

- Decision guidelines. The decision guidelines set out the matters that the responsible authority must consider before deciding if an application meets the objectives.

Requirements

A development:

- Must meet all of the objectives of this clause.

- Should meet all of the standards of this clause.

If a zone or a schedule to a zone, or a schedule to an overlay specifies a requirement different from a requirement of a standard set out in Clause 58 (excluding Clause 58.04-1), the requirement in Clause 58 applies.

For Clause 58.04-1 (Building setback):

- If a zone or a schedule to a zone specifies a building setback requirement different from a requirement set out in Clause 58.04-1, the building setback requirement in the zone or a schedule to the zone applies.

- If the land is included in an overlay and a schedule to the overlay specifies a building setback requirement different from the requirement set out Clause 58.04-1 or a requirement set out in the zone or a schedule to the zone, the requirement for building setback in the overlay applies.
Application requirements

An application must be accompanied by:

- An urban context report.
- A design response.

Urban context report

The urban context report may use a site plan, photographs or other techniques and must include:

An accurate description of:

- Site shape, size, orientation and easements.
- Levels and contours of the site and the difference in levels between the site and surrounding properties.
- The location and height of existing buildings on the site and surrounding properties.
- The use of surrounding buildings.
- The location of private open space of surrounding properties and the location of trees, fences and other landscape elements.
- Solar access to the site and to surrounding properties.
- Views to and from the site.
- Street frontage features such as poles, street trees and kerb crossovers.
- The location of local shops, public transport services and public open spaces within walking distance.
- Movement systems through and around the site.
- Any other notable feature or characteristic of the site.

An assessment of the characteristics of the area including:

- Any environmental features such as vegetation, topography and significant views.
- The pattern of subdivision.
- Street design and landscape.
- The pattern of development.
- Building form, scale and rhythm.
- Connection to the public realm.
- Architectural style, building details and materials.
- Off-site noise sources.
- The relevant NatHERS climate zones (as identified in Clause 58.03-1).
- Social and economic activity.
- Any other notable or cultural characteristics of the area.

Satisfactory urban context report

If the responsible authority decides that the urban context report is not satisfactory, it may require more information from the applicant under Section 54 of the Act.
The responsible authority must not require notice of an application to be given or decide an application until it is satisfied that the urban context report meets the requirements of Clause 58.01-2 and is satisfactory.

This does not apply if the responsible authority refuses an application under Section 52(1A) of the Act.

**Design response**

The design response must explain how the proposed design:

- Responds to any relevant planning provision that applies to the land.
- Meets the objectives of Clause 58.
- Responds to any relevant housing, urban design and landscape plan, strategy or policy set out in this scheme.
- Derives from and responds to the urban context report.

The design response must include correctly proportioned street elevations or photographs showing the development in the context of adjacent buildings. If in the opinion of the responsible authority this requirement is not relevant to the evaluation of an application, it may waive or reduce the requirement.
URBAN CONTEXT

Urban context objectives
To ensure that the design responds to the existing urban context or contributes to the preferred future development of the area.

To ensure that development responds to the features of the site and the surrounding area.

Standard D1
The design response must be appropriate to the urban context and the site.

The proposed design must respect the existing or preferred urban context and respond to the features of the site.

Decision guidelines
Before deciding on an application, the responsible authority must consider:

• Any relevant urban design objective, policy or statement set out in this scheme.

• The urban context report.

• The design response.

Residential policy objectives
To ensure that residential development is provided in accordance with any policy for housing in the Municipal Planning Strategy and the Planning Policy Framework.

To support higher density residential development where development can take advantage of public and community infrastructure and services.

Standard D2
An application must be accompanied by a written statement to the satisfaction of the responsible authority that describes how the development is consistent with any relevant policy for housing in the Municipal Planning Strategy and the Planning Policy Framework.

Decision guidelines
Before deciding on an application, the responsible authority must consider:

• The Municipal Planning Strategy and the Planning Policy Framework.

• The design response.

Dwelling diversity objective
To encourage a range of dwelling sizes and types in developments of ten or more dwellings.

Standard D3
Developments of ten or more dwellings should provide a range of dwelling sizes and types, including dwellings with a different number of bedrooms.

Infrastructure objectives
To ensure development is provided with appropriate utility services and infrastructure.

To ensure development does not unreasonably overload the capacity of utility services and infrastructure.
Standard D4
Development should be connected to reticulated services, including reticulated sewerage, drainage, electricity and gas, if available.

Development should not unreasonably exceed the capacity of utility services and infrastructure, including reticulated services and roads.

In areas where utility services or infrastructure have little or no spare capacity, developments should provide for the upgrading of or mitigation of the impact on services or infrastructure.

Decision guidelines
Before deciding on an application, the responsible authority must consider:

- The capacity of the existing infrastructure.
- In the absence of reticulated sewerage, the capacity of the development to treat and retain all wastewater in accordance with the State Environment Protection Policy (Waters of Victoria) under the *Environment Protection Act 1970*.
- If the drainage system has little or no spare capacity, the capacity of the development to provide for stormwater drainage mitigation or upgrading of the local drainage system.

Integration with the street objective
To integrate the layout of development with the street.

Standard D5
Developments should provide adequate vehicle and pedestrian links that maintain or enhance local accessibility.

Development should be oriented to front existing and proposed streets.

High fencing in front of dwellings should be avoided if practicable.

Development next to existing public open space should be laid out to complement the open space.

Decision guidelines
Before deciding on an application, the responsible authority must consider:

- Any relevant urban design objective, policy or statement set out in this scheme.
- The design response.
SITE LAYOUT

Energy efficiency objectives
To achieve and protect energy efficient dwellings and buildings.
To ensure the orientation and layout of development reduce fossil fuel energy use and make appropriate use of daylight and solar energy.
To ensure dwellings achieve adequate thermal efficiency.

Standard D6
Buildings should be:

- Oriented to make appropriate use of solar energy.
- Sited and designed to ensure that the energy efficiency of existing dwellings on adjoining lots is not unreasonably reduced.

Living areas and private open space should be located on the north side of the development, if practicable.

Developments should be designed so that solar access to north-facing windows is optimised.

Dwellings located in a climate zone identified in Table D1 should not exceed the maximum NatHERS annual cooling load specified in the following table.

Table D1 Cooling load

<table>
<thead>
<tr>
<th>NatHERS climate zone</th>
<th>NatHERS maximum cooling load MJ/M² per annum</th>
</tr>
</thead>
<tbody>
<tr>
<td>Climate zone 21 Melbourne</td>
<td>30</td>
</tr>
<tr>
<td>Climate zone 22 East Sale</td>
<td>22</td>
</tr>
<tr>

<tr>
<td>Climate zone 63 Warrnambool</td>
<td>21</td>
</tr>
<tr>
<td>Climate zone 64 Cape Otway</td>
<td>19</td>
</tr>
<tr>
<td>Climate zone 66 Ballarat</td>
<td>23</td>
</tr>
</tbody>
</table>

Note: Refer to NatHERS zone map, Nationwide House Energy Rating Scheme (Commonwealth Department of Environment and Energy).

Decision guidelines
Before deciding on an application, the responsible authority must consider:

- The design response.
- The size, orientation and layout of the site.
- The existing amount of solar access to abutting properties.
- The availability of solar access to north-facing windows on the site.
- The annual cooling load for each dwelling.
Communal open space objective

To ensure that communal open space is accessible, practical, attractive, easily maintained and integrated with the layout of the development.

**Standard D7**

Developments with 40 or more dwellings should provide a minimum area of communal open space of 2.5 square metres per dwelling or 250 square metres, whichever is lesser.

Communal open space should:

- Be located to:
  - Provide passive surveillance opportunities, where appropriate.
  - Provide outlook for as many dwellings as practicable.
  - Avoid overlooking into habitable rooms and private open space of new dwellings.
  - Minimise noise impacts to new and existing dwellings.

- Be designed to protect any natural features on the site.

- Maximise landscaping opportunities.

- Be accessible, useable and capable of efficient management.

**Decision guidelines**

Before deciding on an application, the responsible authority must consider:

- Any relevant urban design objective, policy or statement set out in this scheme.

- The design response.

- The useability and amenity of the communal open space based on its size, location, accessibility and reasonable recreation needs of residents.

- The availability of and access to public open space.

Solar access to communal outdoor open space objective

To allow solar access into communal outdoor open space.

**Standard D8**

The communal outdoor open space should be located on the north side of a building, if appropriate. At least 50 per cent or 125 square metres, whichever is the lesser, of the primary communal outdoor open space should receive a minimum of two hours of sunlight between 9am and 3pm on 21 June.

**Decision guidelines**

Before deciding on an application, the responsible authority must consider:

- The design response.

- The useability and amenity of the primary communal outdoor open space areas based on the urban context, the orientation of the building, the layout of dwellings and the sunlight it will receive.

Safety objective

To ensure the layout of development provides for the safety and security of residents and property.

**Standard D9**

Entrances to dwellings should not be obscured or isolated from the street and internal accessways.
Planting which creates unsafe spaces along streets and accessways should be avoided. Developments should be designed to provide good lighting, visibility and surveillance of car parks and internal accessways.

Private spaces within developments should be protected from inappropriate use as public thoroughfares.

**Decision guideline**
Before deciding on an application, the responsible authority must consider the design response.

**Landscaping objectives**
To encourage development that respects the landscape character of the area.

To encourage development that maintains and enhances habitat for plants and animals in locations of habitat importance.

To provide appropriate landscaping.

To encourage the retention of mature vegetation on the site.

To promote climate responsive landscape design and water management in developments that support thermal comfort and reduces the urban heat island effect.

**Standard D10**
The landscape layout and design should:

- Be responsive to the site context.
- Protect any predominant landscape features of the area.
- Take into account the soil type and drainage patterns of the site and integrate planting and water management.
- Allow for intended vegetation growth and structural protection of buildings.
- In locations of habitat importance, maintain existing habitat and provide for new habitat for plants and animals.
- Provide a safe, attractive and functional environment for residents.
- Consider landscaping opportunities to reduce heat absorption such as green walls, green roofs and roof top gardens and improve on-site stormwater infiltration.
- Maximise deep soil areas for planting of canopy trees.

Development should provide for the retention or planting of trees, where these are part of the urban context.

Development should provide for the replacement of any significant trees that have been removed in the 12 months prior to the application being made.

The landscape design should specify landscape themes, vegetation (location and species), paving and lighting.

Development should provide the deep soil areas and canopy trees specified in Table D2.

If the development cannot provide the deep soil areas and canopy trees specified in Table D2, an equivalent canopy cover should be achieved by providing either:

- Canopy trees or climbers (over a pergola) with planter pits sized appropriately for the mature tree soil volume requirements.
- Vegetated planters, green roofs or green facades.
Table D2 Deep soil areas and canopy trees

<table>
<thead>
<tr>
<th>Site area</th>
<th>Deep soil areas</th>
<th>Minimum tree provision</th>
</tr>
</thead>
<tbody>
<tr>
<td>750 - 1000 square metres</td>
<td>5% of site area (minimum dimension of 3 metres)</td>
<td>1 small tree (6-8 metres) per 30 square metres of deep soil</td>
</tr>
<tr>
<td>1001 - 1500 square metres</td>
<td>7.5% of site area (minimum dimension of 3 metres)</td>
<td>1 medium tree (8-12 metres) per 50 square metres of deep soil or 1 large tree per 90 square metres of deep soil</td>
</tr>
<tr>
<td>1501 - 2500 square metres</td>
<td>10% of site area (minimum dimension of 6 metres)</td>
<td>1 large tree (at least 12 metres) per 90 square metres of deep soil or 2 medium trees per 90 square metres of deep soil</td>
</tr>
<tr>
<td>&gt;2500 square metres</td>
<td>15% of site area (minimum dimension of 6 metres)</td>
<td>1 large tree (at least 12 metres) per 90 square metres of deep soil or 2 medium trees per 90 square metres of deep soil</td>
</tr>
</tbody>
</table>

Note: Where an existing canopy tree over 8 metres can be retained on a lot greater than 1000 square metres without damage during the construction period, the minimum deep soil requirement is 7% of the site area.

Decision guidelines

Before deciding on an application, the responsible authority must consider:

- Any relevant plan or policy for landscape character and environmental sustainability in the Municipal Planning Strategy and the Planning Policy Framework.
- The design response.
- The location and size of gardens and the predominant plant types in the area.
- The health of any trees to be removed.
- The suitability of the proposed location and soil volume for canopy trees.
- The ongoing management of landscaping within the development.
- The soil type and drainage patterns of the site.

Access objective

To ensure the number and design of vehicle crossovers respects the urban context.

Standard D11

The width of accessways or car spaces should not exceed:

- 33 per cent of the street frontage, or
- if the width of the street frontage is less than 20 metres, 40 per cent of the street frontage.

No more than one single-width crossover should be provided for each dwelling fronting a street. The location of crossovers should maximise the retention of on-street car parking spaces. The number of access points to a road in a Road Zone should be minimised. Developments must provide for access for service, emergency and delivery vehicles.
Decision guidelines
Before deciding on an application, the responsible authority must consider:

- The design response.
- The impact on the streetscape.
- The reduction of on-street car parking spaces.
- The effect on any significant vegetation on the site and footpath.

Parking location objectives
To provide convenient parking for resident and visitor vehicles.
To protect residents from vehicular noise within developments.

Standard D12
Car parking facilities should:

- Be reasonably close and convenient to dwellings.
- Be secure.
- Be well ventilated if enclosed.

Shared accessways or car parks of other dwellings should be located at least 1.5 metres from the windows of habitable rooms. This setback may be reduced to 1 metre where there is a fence at least 1.5 metres high or where window sills are at least 1.4 metres above the accessway.

Decision guideline
Before deciding on an application, the responsible authority must consider the design response.

Integrated water and stormwater management objectives
To encourage the use of alternative water sources such as rainwater, stormwater and recycled water.

To facilitate stormwater collection, utilisation and infiltration within the development.

To encourage development that reduces the impact of stormwater run-off on the drainage system and filters sediment and waste from stormwater prior to discharge from the site.

Standard D13
Buildings should be designed to collect rainwater for non-drinking purposes such as flushing toilets, laundry appliances and garden use.

Buildings should be connected to a non-potable dual pipe reticulated water supply, where available from the water authority.

The stormwater management system should be:

- Designed to maximise infiltration of stormwater, water and drainage of residual flows into permeable surfaces, tree pits and treatment areas.

Decision guidelines
Before deciding on an application, the responsible authority must consider:

- Any relevant water and stormwater management objective, policy or statement set out in this scheme.
The design response.

Whether the development has utilised alternative water sources and/or incorporated water sensitive urban design.

Whether stormwater discharge from the site will adversely affect water quality entering the drainage system.

The capacity of the drainage network to accommodate additional stormwater.

Whether the stormwater treatment areas can be effectively maintained.

Whether the owner has entered into an agreement to contribute to off-site stormwater management in lieu of providing an on-site stormwater management system.
AMENITY IMPACTS

Building setback objectives
To ensure the setback of a building from a boundary appropriately responds to the existing urban context or contributes to the preferred future development of the area.
To allow adequate daylight into new dwellings.
To limit views into habitable room windows and private open space of new and existing dwellings.
To provide a reasonable outlook from new dwellings.
To ensure the building setbacks provide appropriate internal amenity to meet the needs of residents.

Standard D14
The built form of the development must respect the existing or preferred urban context and respond to the features of the site.
Buildings should be set back from side and rear boundaries, and other buildings within the site to:
- Ensure adequate daylight into new habitable room windows.
- Avoid direct views into habitable room windows and private open space of new and existing dwellings. Developments should avoid relying on screening to reduce views.
- Provide an outlook from dwellings that creates a reasonable visual connection to the external environment.
- Ensure the dwellings are designed to meet the objectives of Clause 58.

Decision Guidelines
Before deciding on an application, the responsible authority must consider:
- The purpose of the zone and/or overlay that applies to the land.
- Any relevant urban design objective, policy or statement set out in this scheme.
- The urban context report.
- The design response.
- The relationship between the proposed building setback and the building setbacks of existing adjacent buildings, including the interface with laneways.
- The extent to which the proposed dwellings are provided with reasonable daylight access through the layout of rooms and the number, size, location and orientation of windows.
- The impact of overlooking on the amenity of existing and proposed dwellings.
- The existing extent of overlooking into existing dwellings and private open space.
- Whether the development meets the objectives of Clause 58.

Internal views objective
To limit views into the private open space and habitable room windows of dwellings within a development.

Standard D15
Windows and balconies should be designed to prevent overlooking of more than 50 per cent of the private open space of a lower-level dwelling directly below and within the same development.

Decision guideline
Before deciding on an application, the responsible authority must consider the design response.
Noise impacts objectives

To contain noise sources in developments that may affect existing dwellings.
To protect residents from external and internal noise sources.

Standard D16

Noise sources, such as mechanical plants should not be located near bedrooms of immediately adjacent existing dwellings.

The layout of new dwellings and buildings should minimise noise transmission within the site.

Noise sensitive rooms (such as living areas and bedrooms) should be located to avoid noise impacts from mechanical plants, lifts, building services, non-residential uses, car parking, communal areas and other dwellings.

New dwellings should be designed and constructed to include acoustic attenuation measures to reduce noise levels from off-site noise sources.

Buildings within a noise influence area specified in Table D3 should be designed and constructed to achieve the following noise levels:

- Not greater than 35dB(A) for bedrooms, assessed as an LAeq,8h from 10pm to 6am.
- Not greater than 40dB(A) for living areas, assessed LAeq,16h from 6am to 10pm.

Buildings, or part of a building screened from a noise source by an existing solid structure, or the natural topography of the land, do not need to meet the specified noise level requirements.

Noise levels should be assessed in unfurnished rooms with a finished floor and the windows closed.

<tr>
<td>Railway servicing freight in Metropolitan Melbourne</td>
<td>135 metres from the centre of the nearest track</td>
</tr>
</tbody>
</table>

Note: The noise influence area should be measured from the closest part of the building to the noise source.

Decision guidelines

Before deciding on an application, the responsible authority must consider:

- The design response.
- Whether it can be demonstrated that the design treatment incorporated into the development meets the specified noise levels or an acoustic report by a suitably qualified consultant submitted with the application.
- Whether the impact of potential noise sources within a development have been mitigated through design, location and siting.
- Whether the layout of rooms within a dwelling mitigates noise transfer within and between dwellings.
- Whether an alternative design meets the relevant objectives having regard to the amenity of the dwelling and the site context.
ON-SITE AMENITY AND FACILITIES

Accessibility objective
To ensure the design of dwellings meets the needs of people with limited mobility.

Standard D17
At least 50 per cent of dwellings should have:

- A clear opening width of at least 850mm at the entrance to the dwelling and main bedroom.
- A clear path with a minimum width of 1.2 metres that connects the dwelling entrance to the main bedroom, an adaptable bathroom and the living area.
- A main bedroom with access to an adaptable bathroom.
- At least one adaptable bathroom that meets all of the requirements of either Design A or Design B specified in Table D4.

Table D4 Bathroom design

</tbody>
</table>

Building entry and circulation objectives
To provide each dwelling and building with its own sense of identity.
To ensure the internal layout of buildings provide for the safe, functional and efficient movement of residents.
To ensure internal communal areas provide adequate access to daylight and natural ventilation.
Standard D18

Entries to dwellings and buildings should:
- Be visible and easily identifiable.
- Provide shelter, a sense of personal address and a transitional space around the entry.

The layout and design of buildings should:
- Clearly distinguish entrances to residential and non-residential areas.
- Provide windows to building entrances and lift areas.
- Provide visible, safe and attractive stairs from the entry level to encourage use by residents.
- Provide common areas and corridors that:
  - Include at least one source of natural light and natural ventilation.
  - Avoid obstruction from building services.
  - Maintain clear sight lines.

Decision guidelines

Before deciding on an application, the responsible authority must consider:
- The design response.
- The useability and amenity of internal communal areas based on daylight access and the natural ventilation it will receive.

Private open space objective

To provide adequate private open space for the reasonable recreation and service needs of residents.

Standard D19

A dwelling should have private open space consisting of:
- An area of 25 square metres, with a minimum dimension of 3 metres at natural ground floor level and convenient access from a living room, or
- An area of 15 square metres, with a minimum dimension of 3 metres at a podium or other similar base and convenient access from a living room, or
- A balcony with an area and dimensions specified in Table D5 and convenient access from a living room, or
- A roof-top area of 10 square metres with a minimum dimension of 2 metres and convenient access from a living room.

If a cooling or heating unit is located on a balcony, the balcony should provide an additional area of 1.5 square metres.

Table D5 Balcony size

<td>8 square metres</td>
<td>2 metres</td>
</tr>
<tr>
<td>3 or more bedroom dwelling</td>
<td>12 square metres</td>
<td>2.4 metres</td>
</tr>
</tbody>
</table>

Decision guidelines

Before deciding on an application, the responsible authority must consider:
The design response.

- The useability and functionality of the private open space, including its size and accessibility.
- The amenity of the private open space based on the orientation of the lot, the wind conditions and the sunlight it will receive.
- The availability of and access to public or communal open space.

Storage objective

To provide adequate storage facilities for each dwelling.

Standard D20

Each dwelling should have convenient access to usable and secure storage space.

The total minimum storage space (including kitchen, bathroom and bedroom storage) should meet the requirements specified in Table D6.

Table D6 Storage

<tr>
<td>3 or more bedroom dwelling</td>
<td>18 cubic metres</td>
<td>12 cubic metres</td>
</tr>
</tbody>
</table>

Decision guidelines

Before deciding on an application, the responsible authority must consider:

- The design response.
- The useability, functionality and location of storage facilities provided for the dwelling.
**DETAILED DESIGN**

**Common property objectives**
To ensure that communal open space, car parking, access areas and site facilities are practical, attractive and easily maintained.

To avoid future management difficulties in areas of common ownership.

**Standard D21**
Developments should clearly delineate public, communal and private areas.

Common property, where provided, should be functional and capable of efficient management.

**Site services objectives**
To ensure that site services can be installed and easily maintained.

To ensure that site facilities are accessible, adequate and attractive.

**Standard D22**
The design and layout of dwellings should provide sufficient space (including easements where required) and facilities for services to be installed and maintained efficiently and economically.

Mailboxes and other site facilities should be adequate in size, durable, waterproof and blend in with the development.

Mailboxes should be provided and located for convenient access as required by Australia Post.

**Decision guideline**
Before deciding on an application, the responsible authority must consider the design response.

**Waste and recycling objectives**
To ensure dwellings are designed to encourage waste recycling.

To ensure that waste and recycling facilities are accessible, adequate and attractive.

To ensure that waste and recycling facilities are designed and managed to minimise impacts on residential amenity, health and the public realm.

**Standard D23**
Developments should include dedicated areas for:

- Waste and recycling enclosures which are:
  - Adequate in size, durable, waterproof and blend in with the development.
  - Adequately ventilated.
  - Located and designed for convenient access by residents and made easily accessible to people with limited mobility.

- Adequate facilities for bin washing. These areas should be adequately ventilated.

- Collection, separation and storage of waste and recyclables, including where appropriate opportunities for on-site management of food waste through composting or other waste recovery as appropriate.

- Collection, storage and reuse of garden waste, including opportunities for on-site treatment, where appropriate, or off-site removal for reprocessing.
- Adequate circulation to allow waste and recycling collection vehicles to enter and leave the site without reversing.

- Adequate internal storage space within each dwelling to enable the separation of waste, recyclables and food waste where appropriate.

Waste and recycling management facilities should be designed and managed in accordance with a Waste Management Plan approved by the responsible authority and:

- Be designed to meet the best practice waste and recycling management guidelines for residential development adopted by Sustainability Victoria.

- Protect public health and amenity of residents and adjoining premises from the impacts of odour, noise and hazards associated with waste collection vehicle movements.

**Decision guidelines**

Before deciding on an application, the responsible authority must consider:

- The design response.

- Any relevant waste and recycling objective, policy or statement set out in this scheme.
INTERNAL AMENITY

Functional layout objective
To ensure dwellings provide functional areas that meet the needs of residents.

Standard D24
Bedrooms should:

- Meet the minimum internal room dimensions specified in Table D7.
- Provide an area in addition to the minimum internal room dimensions to accommodate a wardrobe.

Table D7 Bedroom dimensions

<table>
<thead>
<tr>
<th>Bedroom type</th>
<th>Minimum width</th>

</tr>
</tbody>
</table>

Decision guidelines
Before deciding on an application, the responsible authority must consider:

- The design response.
- The useability, functionality and amenity of habitable rooms.

Room depth objective
To allow adequate daylight into single aspect habitable rooms.

Standard D25
Single aspect habitable rooms should not exceed a room depth of 2.5 times the ceiling height.
The depth of a single aspect, open plan, habitable room may be increased to 9 metres if all the following requirements are met:

- The room combines the living area, dining area and kitchen.
- The kitchen is located furthest from the window.
- The ceiling height is at least 2.7 metres measured from finished floor level to finished ceiling level. This excludes where services are provided above the kitchen.

The room depth should be measured from the external surface of the habitable room window to the rear wall of the room.

Decision guidelines
Before deciding on an application, the responsible authority must consider:
The design response.

The extent to which the habitable room is provided with reasonable daylight access through the number, size, location and orientation of windows.

The useability, functionality and amenity of the dwelling based on layout, siting, size and orientation of habitable rooms.

Any overhang above habitable room windows that limits daylight access.

**Windows objective**

To allow adequate daylight into new habitable room windows.

**Standard D26**

Habitable rooms should have a window in an external wall of the building. A window may provide daylight to a bedroom from a smaller secondary area within the bedroom where the window is clear to the sky.

The secondary area should be:

- A minimum width of 1.2 metres.
- A maximum depth of 1.5 times the width, measured from the external surface of the window.

**Decision guidelines**

Before deciding on an application, the responsible authority must consider:

- The design response.
- The extent to which the habitable room is provided with reasonable daylight access through the number, size, location and orientation of windows.
- The useability and amenity of the dwelling based on the layout, siting, size and orientation of habitable rooms.

**Natural ventilation objectives**

To encourage natural ventilation of dwellings.

To allow occupants to effectively manage natural ventilation of dwellings.

**Standard D27**

The design and layout of dwellings should maximise openable windows, doors or other ventilation devices in external walls of the building, where appropriate.

At least 40 per cent of dwellings should provide effective cross ventilation that has:

- A maximum breeze path through the dwelling of 18 metres.
- A minimum breeze path through the dwelling of 5 metres.
- Ventilation openings with approximately the same area.

The breeze path is measured between the ventilation openings on different orientations of the dwelling.

**Decision guidelines**

Before deciding on an application, the responsible authority must consider:

- The design response.
- The size, orientation, slope and wind exposure of the site.
- The extent to which the orientation of the building and the layout of dwellings maximises opportunities for cross ventilation.

- Whether an alternative design meets the relevant objectives having regard to the amenity of the dwelling and the site context.
REALIGN THE COMMON BOUNDARY BETWEEN TWO LOTS

Information requirements

An application must be accompanied by the following information as appropriate:

- A copy of title for the subject land and a copy of any registered restrictive covenant.
- A layout plan, drawn to scale and fully dimensioned showing:
  - The location, shape and size of the site.
  - The location of any existing buildings, car parking area, driveways, storage areas, loading areas and private open space.
  - The location of any easements on the subject land.
  - The location of the approved stormwater discharge point.
  - The location and details of any significant vegetation.
  - The location of any street trees, poles, pits or other street furniture.
  - Existing and proposed vehicle access to the lots.
  - Any abutting roads.
  - The location of the existing and proposed common boundary between the lots and the proposed size and shape of the realigned lots.
  - Any proposed common property to be owned by a body corporate and the lots participating in the body corporate.

- If the land is in more than one ownership, the consent of the owners of the land.
- If common property is proposed, an explanation of why the common property is required.
- A written statement that describes:
  - The existing use of the land and its possible future development.
  - The reason for the realignment of the common boundary.
  - For land in an overlay, how the proposal responds to any statement of significance, objectives or requirements specified in the schedule to the overlay.

- If the land is in an area where reticulated sewerage is not provided, a plan which shows the location of any existing effluent disposal area for each lot or a land assessment which demonstrates that each lot is capable of treating and retaining all wastewater in accordance with the State Environment Protection Policy (Waters of Victoria) under the Environment Protection Act 1970.

- If the land is in a residential zone and the realignment of the common boundary will result in a vacant lot, information that shows that the vacant lot meets the requirements of Standard C8 of Clause 56.

Decision guidelines

In assessing an application the responsible authority must consider as appropriate:

- The suitability of the subdivision including how the layout and dimensions of the subdivision:
  - Respond to and integrate with the surrounding urban or rural environment.
  - Protect significant vegetation.
  - Appropriately accommodate any existing or proposed easements on the lots.
- Protect solar access for existing and any future dwellings on the lots.
- Appropriately accommodate any existing waste storage areas, loading bays and vehicle standing areas on the site.
- Appropriately accommodate private open space.
- Appropriately accommodate the provision of utility services to each lot.
- If the land is in an area where reticulated sewerage is not provided to each lot, whether the layout of the subdivision accommodates the effluent disposal area for each lot.
- Appropriately accommodate the siting of buildings having regard to the risk of spread of fire.
- Appropriately accommodate the existing use and possible future development of the land.
- Whether the provision of common property is appropriate for the purpose for which the land is to be commonly held.
- If the land is in a residential zone and the realignment of the common boundary will result in a vacant lot, the objective and standard of Clause 56.04-2.
- The statement of significance and the objectives contained in the schedule to the overlay and whether the subdivision will adversely affect that significance or the objectives.
- Whether the proposal meets any requirements specified in the overlay or the schedule to the overlay.
SUBDIVISION OF BUILDINGS AND CAR PARKING SPACES

Information requirements

An application must be accompanied by the following information as appropriate:

- A copy of title for the subject land and a copy of any registered restrictive covenant.
- A copy of the relevant planning permit and approved plans for the development.
- A layout plan, drawn to scale and fully dimensioned showing:
  - The location, shape and size of the site.
  - The location of any existing buildings, car parking areas and private open space.
  - The location, shape and size of the proposed lots to be created.
  - The location of any easements on the subject land.
  - The location and details of any significant vegetation.
  - The location of the approved stormwater discharge point.
  - Any abutting roads.
  - The location of any street trees, poles, pits and other street furniture.
  - Existing and proposed vehicle access to the lots.
  - Any loading bays and vehicle standing areas.
  - Any waste storage areas.
  - Any proposed common property to be owned by a body corporate and the lots participating in the body corporate.
- For the subdivision of existing buildings and car parking spaces, a copy of the occupancy permit or a certificate of final inspection for the development.
- For the subdivision of land into two lots with an approved development currently under construction, evidence that the construction has commenced.
- If common property is proposed, an explanation of why the common property is required.
- If the land is in an area where reticulated sewerage is not provided, a plan which shows the location of any existing effluent disposal area for each lot or a land assessment which demonstrates that each lot is capable of treating and retaining all wastewater in accordance with the State Environment Protection Policy (Waters of Victoria) under the Environment Protection Act 1970.
- For land in an overlay, a written statement that describes how the proposal responds to any statement of significance, objectives or requirements specified in the schedule to the overlay.

Decision guidelines

In assessing an application the responsible authority must consider as appropriate:

- The suitability of the subdivision including how the layout and dimensions of the subdivision:
  - Are consistent with the approved plans and conditions of any relevant planning permit for the development.
  - Are consistent with the layout of existing buildings and car parking spaces on the land.
  - Appropriately accommodate any existing waste storage areas.
  - Appropriately accommodate any existing loading bay and vehicle storage area.
- Appropriately accommodate significant vegetation.
- Appropriately accommodate existing or proposed easements on the lots.
- Appropriately accommodate the provision of utility services to each lot.
- Appropriately accommodate the siting of buildings having regard to safety and the risk of spread of fire.

- If the land is in an area where reticulated sewerage is not provided to each lot, whether the layout of the subdivision accommodates the effluent disposal area for each lot.
- For the subdivision of existing buildings and car parking spaces, whether each new lot, other than common property, contains an existing building, part of an existing building or a car parking space.
- Whether the provision and location of common property is appropriate for the purpose for which the land is to be commonly held.
- Whether any public open space contribution is required under Clause 53.01 of this scheme or under Section 18 of the Subdivision Act 1988.
- The statement of significance and the objectives contained in the schedule to the overlay and whether the subdivision will adversely affect that significance or the objectives.
- Whether the proposal meets any requirements specified in the overlay or the schedule to the overlay.
FRONT FENCE IN A RESIDENTIAL ZONE

Information requirements
An application must be accompanied by the following information as appropriate:

- A copy of the title for the subject land and a copy of any registered restrictive covenant.
- A plan drawn to scale and fully dimensioned showing:
  - The location, shape and size of the site.
  - The location, length, height and design of the proposed fence including details of materials.
  - The location, height and design of any existing front fence on adjoining and nearby properties including details of materials.
- A photograph of the site and adjoining and nearby properties along the street frontage.
- The reason for the proposed height.

Decision guidelines
In assessing an application the responsible authority must consider as appropriate:

- Whether the setback, height and design of the proposed fence are:
  - Appropriate to the neighbourhood character and the site.
  - Consistent with any relevant neighbourhood character objective or policy set out in the scheme.
  - Appropriate with the setback, height and appearance of front fences on adjoining and nearby properties.
  - Complement the design of the dwelling.
- The extent to which slope and retaining walls reduce the effective height of the proposed fence.
- Whether the proposed fence is needed to minimise noise intrusion.
- The reason for the proposed height.
BUILDINGS AND WORKS IN A ZONE (EXCEPT A RURAL ZONE)

Information requirements

An application must be accompanied by the following information as appropriate:

- A copy of title for the subject land and a copy of any registered restrictive covenant.
- A description of the use of the land and the proposed buildings and works.
- A layout plan, drawn to scale and fully dimensioned showing:
  - The boundaries and dimensions of the site.
  - Adjoining roads.
  - The location, height and use of buildings and works on adjoining land.
  - Relevant ground levels.
  - Any contaminated soils and filled areas, where known.
  - The layout of existing and proposed buildings and works.
  - All existing and proposed driveways, car parking, bicycle parking and loading areas.
  - Existing and proposed landscape areas.
  - All external storage and waste treatment areas.
  - The location of easements and services.

- Elevation drawings to scale showing the height, colour and materials of all proposed buildings and works.
- A photograph of the building or area affected by the proposal.
- A written statement describing the proposal and if relevant:
  - The built form and character of adjoining and nearby buildings.
  - The heritage character of any adjoining heritage places.
  - Ground floor street frontages, including visual impacts and pedestrian safety.

- A written statement describing whether the proposed buildings and works meet:
  - The number of car parking spaces required under Clause 52.06 or in the schedule to Clause 45.09.
  - Any development requirement specified in the zone or the schedule to the zone.

- Any relevant requirement in an approved development plan or incorporated plan for the land.
- Any other information specified in the schedule to the zone.
- For land in a residential zone, a written statement, plan or diagram showing how the proposal meets:
  - The requirements in the following standards of Clause 54:
    - A10 Side and rear setbacks.
    - A11 Walls on boundaries.
    - A12 Daylight to existing windows.
    - A13 North-facing windows.
    - A14 Overshadowing open space.
If a schedule to the zone specifies a requirement of a standard different from a requirement set out in the Clause 54 standard the schedule to the zone applies.

Decision guidelines

In assessing an application the responsible authority must consider as appropriate:

- Whether the proposal is consistent with any relevant urban design and built form policy set out in the scheme.
- Whether the movement of pedestrians and cyclists, and vehicles providing for supplies and waste removal are appropriately accommodated.
- Whether the design complements the built form of the surrounding properties and the streetscape, including the conservation of buildings, the design of verandahs, access from the street front, protecting active frontages to pedestrian areas, the treatment of the fronts and backs of buildings and their appurtenances, illumination of buildings or their immediate spaces and the landscaping of land adjoining a road.
- Whether the land and building have availability of and connection to services.
- Whether the proposed development adversely impacts the amenity of the land and the locality including existing dwellings on adjoining sites.
- Whether the proposed development appropriately provides for landscaping.
- Whether the proposed development adversely affects solar access to existing open spaces and public places.
- Whether the proposal meets the car parking requirements specified in Clause 52.06 or in the schedule to the Parking Overlay.
- Whether the proposal meets the maximum building height specified in the schedule to the zone.
- Whether the proposal meets any relevant requirements specified in the zone or the schedule to the zone.
- Whether the proposal is consistent with any relevant approved development plan or incorporated plan.
- The objectives set out in the schedule to the zone.
- Whether the proposal provides adequate vehicle loading and unloading facilities.

For land in a residential zone:

- Whether the proposed development is consistent with any neighbourhood character objectives set out in the schedule to the zone.
- Whether the development is compatible with residential use.
- The scale and intensity of the development.
- The design, height, setback and appearance of the proposed buildings and works.
BUILDINGS AND WORKS IN AN OVERLAY

Information requirements

An application must be accompanied by the following information as appropriate:

- A copy of title for the subject land and a copy of any registered restrictive covenant.
- A plan, drawn to scale and fully dimensioned showing:
  - The location, shape and size of the site.
  - The location, height and design of the proposed buildings and works including details of materials.
  - The location of any existing buildings, including fences and trees.
  - For land in a Neighbourhood Character Overlay, any buildings proposed to be demolished.
- For land in a Neighbourhood Character Overlay, a written description of the proposal including:
  - The built form and character of adjoining and nearby buildings.
  - How the proposal responds to the key features and objectives specified in the schedule to the overlay.
  - If demolition is proposed, the reason for the demolition.
  - How the proposal meets the requirements of Clause 54.02-1, 54.02-2, 54.03-1, 54.03-2, 54.03-3, 54.03-4, 54.04-1, 54.04-2, 54.04-3, 54.04-4, 54.06-1, 54.06-2, including any Clause 54 modification specified in the schedule to the overlay.
- For land in a Design and Development Overlay, a written description of the proposal including:
  - How the proposal responds to the design objectives specified in a schedule to the overlay.
  - How the proposal meets the requirements specified in a schedule to the overlay.
  - The built form and character of adjoining and nearby buildings.
- A photograph of the building or area affected by the proposal.
- For land in an Erosion Management Overlay, information showing:
  - The extent of any proposed earthworks.
  - The means proposed to stabilise disturbed areas.
- For an application under the Salinity Management Overlay, written advice including plan references and any conditions from the referral authority demonstrating that the referral authority has considered the proposal for which the application is made within the past three months and does not object to the granting of the permit for the proposal.

Decision guidelines

In assessing an application the responsible authority must consider as appropriate:

- The statement of significance and the objectives contained in the schedule to the overlay and whether the buildings and works will adversely affect that significance or the objectives.
- Whether the proposal meets any requirements specified in the overlay or the schedule to the overlay.
- For an application in a Salinity Management Overlay, any comments from the relevant referral authority.
- For an application in a Neighbourhood Character Overlay, the relevant objectives, standards and decision guidelines of Clause 54.
- Any relevant decision guideline specified in the overlay and the schedule to the overlay.
REMOVE, DESTROY OR LOP A TREE

Information requirements
An application must be accompanied by the following information as appropriate:

- A copy of title for the subject land and a copy of any registered restrictive covenant.
- If the tree to be removed, destroyed or lopped is identified as a significant tree in a schedule to the overlay, a report prepared by an arborist.
- A layout plan, drawn to scale and fully dimensioned showing:
  - The location, shape, size and slope of the site.
  - The location of the tree to be removed, destroyed or lopped.
  - The location and type of other significant vegetation on the site.
  - The location, species and height of any significant trees on the site that have been removed or approved to be removed in the past 3 years.
- A written statement that describes:
  - The species, height and trunk girth of the tree to be removed, destroyed or lopped.
  - The reason the tree is to be removed, destroyed or lopped.
  - If provision is to be made to replace the tree elsewhere on the land.
  - If the tree is to be lopped, the extent of lopping proposed.
  - Any impacts on the significance of the area.
- A photograph of the tree to be removed, destroyed or lopped.

Decision guidelines
In assessing an application the responsible authority must consider as appropriate:

- The statement of significance and the objectives contained in the schedule to the overlay and whether the proposal will adversely affect that significance or the objectives.
- Whether the tree proposed to be removed, destroyed or lopped contributes to the significance of the area and whether the proposal will adversely affect that significance.
- Whether the removal or lopping of the tree is needed because of the health of the tree.
- Whether the lopping of the tree will adversely affect the health, appearance or significance of the tree.
- Whether the removal of the tree will contribute to soil erosion, slippage or salinisation.
- Whether the removal or lopping of the tree is needed to create a defendable space to reduce the risk of bushfire to life and property.
- If the tree is a native tree, its role in conserving flora and fauna and whether the proposal will adversely affect the conservation of flora and fauna of the area.
- Whether provision is made to plant a new tree elsewhere on the land.
- The reasons for removing the tree including the health of the tree to be removed.
- The cumulative impact of the number of trees that have been removed or been approved for removal in the past 3 years.
- Any relevant decision guideline specified in the overlay or the schedule to the overlay.
APPLICATIONS UNDER A HERITAGE OVERLAY

Information requirements

An application must be accompanied by the following information as appropriate:

- A copy of title for the subject land and a copy of any registered restrictive covenant.
- A plan, drawn to scale and fully dimensioned showing:
  - The location, shape and size of the site.
  - The location of any existing buildings, including fences and trees.
  - The location, height and design of the proposed building or works including details of proposed materials.
  - Any buildings to be demolished.
  - An elevation of the proposed building.
  - The size and design of any proposed sign, including details of the supporting structure and any proposed illumination.
  - The location, style, size, colour and materials of any proposed solar energy facility (that is visible from the street frontage or any nearby public park), including details of the supporting structure.
- A written description of the proposal including:
  - Any impacts on the significance of the heritage place.
  - How the proposal responds to any relevant local heritage policy set out in the scheme.
  - If lopping of a tree is proposed, the reason for the lopping, the extent of lopping and an arborist report.
- The proposed colour schedule and nature of any materials and finishes.
- A photograph of the area affected by the proposal including any building, outbuilding, fence or tree which may be affected by the proposal.
- A photograph of the subject site and adjoining properties along the street frontage.
- If subdivision is proposed, the location, shape and size of the proposed lots to be created.
- If a sign is proposed:
  - The location, size and design of the proposed sign on the site or building.
  - The location and size of existing signage on the site including details of any signs to be retained or removed.
- If a solar energy facility is proposed that is visible from the street frontage or any nearby public park:
  - Measures proposed to minimise the visibility of the facility and protect the structural integrity of heritage features.

Decision guidelines

In assessing an application the responsible authority must consider as appropriate:

General

- The significance of the heritage place and whether the proposal will adversely affect that significance.
• Any applicable statement of significance, heritage study and any applicable conservation policy.
• Whether the proposal will adversely affect the character or appearance of the building or heritage place.
• Whether the proposal meets any relevant local heritage policy set out in the scheme.

Demolition
• Whether the outbuilding to be demolished contributes to the significance, character or appearance of the building or heritage place.

Buildings and works
• Whether the location, bulk, form and appearance of the proposed building or works will adversely affect the significance of the building or heritage place.
• Whether the proposed building or works will affect the health or appearance of a tree which is the subject of a Heritage Overlay.

Alterations
• Whether the proposed alterations will restore or reconstruct original fabric which has been removed or damaged.
• Whether the proposed alterations will adversely affect the significance, character and appearance of the heritage place.

Fences
• Whether the fence proposed to be demolished contributes to the significance, character and appearance of the building or heritage place.
• Whether the proposed fence, including its style, height and materials, is appropriate to the building or heritage place.

Trees
• Whether the proposed lopping will adversely affect the health, appearance or significance of the tree.

Subdivision
• Whether the proposed subdivision retains the significant setting (landscapes, landscape features and views) of the heritage place.
• Whether the proposed subdivision respects the rhythm and spacing of buildings in the streetscape.
• Whether the proposed subdivision will result in a new boundary fence, wall or structure that adversely affects the setting of the heritage place.

Signage
• Whether the proposed sign will adversely affect the significance, character or appearance of the heritage place.
APPLICATIONS UNDER A SPECIAL BUILDING OVERLAY

Information requirements

An application must be accompanied by the following information as appropriate:

- A copy of title for the subject land and a copy of any registered restrictive covenant.
- A plan, drawn to scale and fully dimensioned showing:
  - The boundaries and dimensions of the site.
  - The layout, size and use of existing and proposed buildings and works, including floor plan layout and vehicle parking areas.
  - Setbacks between existing and proposed buildings and site boundaries.
  - Natural surface levels of the site to Australian Height Datum.
  - Floor and surface levels of any existing and proposed buildings and works to Australian Height Datum.
  - Cross sectional details of any basement entry ramps and other basement entries to Australian Height Datum, showing floor levels of entry and exit areas and drainage details.
  - If subdivision is proposed, the location, shape and size of the proposed lots to be created.
- If a referral to the floodplain management authority is required, written advice, including endorsed plans of the proposal and any conditions, from the relevant floodplain management authority demonstrating that the floodplain management authority has considered the proposal for which the application is made within the past three months and does not object to the granting of the permit for the proposal.

Decision guidelines

In assessing an application the responsible authority must consider as appropriate:

- Clauses 13.01 and 13.03 of the Planning Policy Framework.
- Whether the proposal is consistent with any local floodplain development plan for the area incorporated into this scheme.
- If a referral to the floodplain management authority is required, any comments from the relevant floodplain management authority.
- The existing use and development of the land.
- Whether the proposed use or development could be located on flood-free land or land with a lesser flood hazard outside this overlay.
- The susceptibility of the development to flooding and flood damage.
- The flood risk including:
  - The frequency, duration, extent, depth and velocity of flooding of the site and accessways.
  - The flood warning time available.
  - The danger to the occupants of the development, other floodplain residents and emergency personnel if the site or accessway is flooded.
- The effect of the development redirecting or obstructing floodwater, stormwater or drainage water and the effect of the development on reducing flood storage and increasing flood levels and flow velocities.
SIGNs

Information requirements

An application must be accompanied by the following information, as appropriate:

- A copy of title for the subject land and a copy of any registered restrictive covenant.

- A site context report, using a site plan, photographs or other methods to accurately describe:
  - The location of the proposed sign on the site or building and distance from property boundaries.
  - The location and size of existing signs on the site including details of any signs to be retained or removed.
  - The location and form of existing signs on adjoining properties and in the locality.
  - The location of closest traffic control signs.
  - Identification of any view lines or vistas that could be affected by the proposed sign.

- The dimensions, height above ground level and extent of projection of the proposed sign.

- The height, width and depth of the total sign structure including the method of support and any associated structures such as safety devices and service platforms.

- The colour, lettering style and materials of the proposed sign.

- The size of the proposed display (total display area including all sides of a multi-sided sign).

Decision guidelines

In assessing an application the responsible authority must consider as appropriate:

- Whether the proposal is consistent with any relevant local advertising policy set out in the scheme.

- Whether the proposal will impact the character of the area including:
  - Natural environment, heritage, waterway, open space and rural landscape values.
  - The desired future character of the area.
  - The cumulative impact of signs on the character of an area.
  - The need to avoid visual disorder or clutter of signs.

- Whether the proposal will impact views and vistas including:
  - Important views from the public realm.
  - Significant public views.
  - Views to existing signs.

- Whether the proportion, scale and form of the proposed sign relates to the site, building, streetscape, setting or landscape including:
  - The position of the proposed sign, including if it protrudes above existing buildings or landscape and natural elements.
  - Screening of unsightly elements.
  - The number, scale and location of existing signs.
  - The ability to rationalise or simplify the number of signs.
  - The ability to include landscaping to reduce the visual impact of the proposed sign structure.
- The extent to which the proposed sign requires the removal of vegetation.

- Whether the proposed sign is consistent with any outdoor advertising theme.

- Whether there is a need for identification and the opportunities for adequate identification on the site or locality.

- Whether the proposed sign will adversely impact road safety.
CAR PARKING

Information requirements
An application must be accompanied by the following information as appropriate:

- A copy of title for the subject land and a copy of any registered restrictive covenant.

- A plan, drawn to scale and fully dimensioned showing:
  - The boundaries and dimensions of the site.
  - The location of existing buildings.
  - All car parking spaces and access lanes.
  - Allocation of car parking spaces to different uses or tenancies, if applicable.
  - Landscaping and sensitive water design treatments.

- A written statement that describes:
  - The proposed use of the site, number of employees and patrons and hours of operation.
  - The previous use of the site.
  - The site and floor area to be occupied.
  - The number of car parking spaces required under Clause 52.06-5 or in a schedule to the Parking Overlay.
  - The total number of car parking spaces provided.
  - The likely impact of a reduction in car parking on the amenity of the area and on the area’s existing car parking.

Decision guidelines
In assessing an application the responsible authority must consider as appropriate:

- Whether the reduction of the car parking requirement is consistent with any relevant local planning policy or incorporated plan.

- The objectives contained in the schedule to the Parking Overlay.

- Whether there is availability of alternative car parking in the locality including:
  - Efficiencies gained from the consolidation of shared car parking spaces.
  - Public car parks intended to serve the land.
  - On street parking in non-residential zones.
  - Streets in residential zones specifically managed for non-residential parking.

- The practicality of providing car parking on the site, particularly for lots of less than 300 square metres.

- Whether there is any car parking deficiency associated with the existing use of the land.

- Whether there is any credit that should be allowed for car parking spaces provided on common land or by a Special Charge Scheme or cash-in-lieu payment.

- Whether fewer car parking spaces will impact local amenity, including pedestrian amenity and the amenity of nearby residential areas.

- Whether there is a need to create safe, functional and attractive parking areas.

- The availability of public transport in the locality of the land.
- The convenience of pedestrian and cyclist access to the land.

- The likelihood of multi-purpose trips within the locality which are likely to be combined with a trip to the land in connection with the use.

- The equity of reducing the car parking requirement having regard to any historic contributions by existing businesses.

- On street parking in residential zones in the locality of the land that is intended to be for residential use.

- The future growth and development of any nearby activity centre.

- Local traffic management in the locality of the land.

- Access to or provision of alternative transport modes to and from the land.

- Whether any car parking spaces to be provided meet the design standards of Clause 52.06.

- Any relevant decision guideline specified in a schedule to the Parking Overlay.
TWO LOT SUBDIVISION IN A RURAL ZONE

Information requirements
An application must be accompanied by the following information as appropriate:

- A copy of title for the subject land and a copy of any registered restrictive covenant.
- A layout plan, drawn to scale and fully dimensioned showing:
  - The location, shape and size of the site.
  - The location of any existing buildings and associated works.
  - The location, shape and size of the proposed lots to be created.
  - The location of any easements on the subject land.
  - The location of any significant vegetation, waterways and wetlands.
  - The location of the approved stormwater discharge point and effluent disposal areas.
  - Any abutting roads.
  - Existing and proposed vehicle access to the lots.

Decision guidelines
In assessing an application the responsible authority must consider as appropriate:

- The suitability of the subdivision including how the layout and dimensions of the subdivision:
  - Are consistent with the layout of existing buildings and associated works on the land.
  - Appropriately accommodate significant vegetation.
  - Appropriately accommodate existing or proposed easements on the lots.
  - Appropriately accommodate the provision of utility services to each lot.
  - Appropriately accommodate existing and proposed vehicle access to the lots.

- If the land is in an area where reticulated sewerage is not provided to each lot, whether the layout of the subdivision accommodates the effluent disposal area for each lot.

- The location and design of existing and proposed infrastructure including roads, gas, water, drainage, telecommunications and sewerage facilities.

- Any Regional Catchment Strategy applying to the land.

- If the land is in an overlay, statement of significance and the objectives contained in the schedule to the overlay and whether the subdivision will adversely affect that significance or the objectives.

- Whether any public open space contribution is required under Clause 53.01 of this scheme or under Section 18 of the Subdivision Act 1988.
BUILDINGS AND WORKS IN A RURAL ZONE

Information requirements
An application must be accompanied by the following information as appropriate:

- A copy of title for the subject land and a copy of any registered restrictive covenant.
- A description of the use of the land and the proposed buildings and works.
- A layout plan, drawn to scale and fully dimensioned showing:
  - The boundaries and dimensions of the site.
  - Adjoining roads.
  - The location of any waterway or wetlands.
  - The location and use of buildings and works on adjoining land.
  - Relevant ground levels.
  - The layout of existing and proposed buildings and works.
  - All existing and proposed driveways, car parking and loading areas.
  - Existing and proposed landscape areas.
  - All external storage and waste treatment areas.
- Elevation drawings to scale showing the height, colour and materials of all proposed buildings and works.
- A photograph of the building or area affected by the proposal.

Decision guidelines
In assessing an application the responsible authority must consider as appropriate:

- The impact of the siting, design, height, bulk, colours and materials to be used, on the natural environment, character and appearance of the area, landscape features, major roads, vistas and water features and the measures to be undertaken to minimise any adverse impacts.
- Whether the proposal will have an adverse impact on adjoining and nearby land uses.
- The need to protect amenity of existing residents.
- The need to locate buildings in one area to avoid any adverse impacts on surrounding agricultural uses.
- The likely environmental impact on the natural physical features and biodiversity of the area, including the need to retain vegetation and faunal habitat and the need to revegetate land including riparian buffers along waterways, gullies, ridgelines, property boundaries and saline discharge and recharge areas.
- The capability of the land to accommodate the proposed development.
- Whether the development will support and enhance agricultural production.
- The location of on-site effluent disposal areas to minimise the impact of nutrient loads on waterways and native vegetation.
- Any Regional Catchment Strategy and associated plan applying to the land.
- The impact of the proposal on any wetlands or waterways.
- Any integrated land management plan prepared for the site.
- Whether the development will require traffic management measures.
For buildings and works associated with a dwelling:

- Whether the dwelling will result in the loss or fragmentation of productive agricultural land.
- Whether the dwelling will be adversely affected by agricultural activities on adjacent and nearby land due to dust, nose, odour, use of chemicals and farm machinery, traffic and hours of operation.
- Whether the dwelling will adversely affect the operation and expansion of adjoining and nearby agricultural uses.
- The potential for the proposal to lead to a concentration or proliferation of dwellings in the area and the impact of this on the use of the land for agriculture.
EXTENSION TO ONE DWELLING ON A LOT IN A RESIDENTIAL ZONE

Information requirements

An application must be accompanied by the following information as appropriate:

- A copy of title for the subject land and a copy of any registered restrictive covenant.
- A site plan, drawn to scale and fully dimensioned showing:
  - Site shape, size, orientation and easements.
  - Levels of the site and the difference in levels between the site and surrounding properties.
  - Location of existing buildings on the site and on surrounding properties, including the location and height of walls built to the boundary of the site.
  - The use of surrounding buildings.
  - The location of secluded private open space and habitable room windows of surrounding properties which have an outlook to the site within 9 metres.
  - Solar access to the site and surrounding properties.
  - Location of significant trees existing on the site and any significant trees removed from the site in the 12 months prior to the application being made, where known.
  - Any contaminated soils and filled areas, where known.
  - Views to and from the site.
  - Street frontage features such as poles, street trees and kerb crossovers.
  - Any other notable features of the site.
  - In relation to the neighbourhood:
    - The built form, scale and character of surrounding development.
    - Architectural and roof styles.
    - Any other notable features or characteristics of the neighbourhood.
- A site and layout plan, drawn to scale and fully dimensioned showing:
  - Site shape, size, orientation, easements and site levels.
  - Adjoining roads.
  - The location and use of buildings and works on adjoining land.
  - The layout and use of existing buildings being retained and all proposed buildings, including finished floor levels.
  - All existing and proposed driveways and crossovers.
  - Existing and proposed landscape and open space areas.
  - All external storage, waste areas and services.
- An elevation plan, drawn to scale showing the height, colour and materials of the proposed extension.
- Photographs of the building or area affected by the proposal.
- A written statement, plan or diagram demonstrating how the proposal meets:
  - The garden area requirement specified in the zone.
  - The requirements in the following standards of Clause 54:
. A10 Side and rear setbacks.
. A11 Walls on boundaries.
. A12 Daylight to existing windows.
. A13 North-facing windows.
. A14 Overshadowing open space.
. A15 Overlooking.

- The objectives and requirements in the following standards of Clause 54:
  - Clause 54.02-1 Neighbourhood character objective and standard A1.
  - Clause 54.03-3 Site coverage objective and standard A5.
  - Clause 54.03-4 Permeability objectives and standard A6.
  - Clause 54.03-5 Energy efficiency protection objectives and standard A7.
  - Clause 54.03-6 Significant trees objectives and standard A8.
  - Clause 54.05-1 Daylight to new windows objective and standard A16.
  - Clause 54.05-2 Private open space objective and standard A17.
  - Clause 54.05-3 Solar access to open space objective and Standard A18.
  - Clause 54.06-1 Design detail objective and Standard A19.

If a schedule to the zone specifies a requirement of a standard different from a requirement set out in the Clause 54 standard, the requirement in the schedule to the zone applies.

**Decision guidelines**

In assessing an application the responsible authority must consider as appropriate:

- The following objectives, standards and decision guidelines of Clause 54:
  - Clause 54.02-1 Neighbourhood character objective and standard A1.
  - Clause 54.03-3 Site coverage objective and standard A5.
  - Clause 54.03-4 Permeability objective and standard A6.
  - Clause 54.03-5 Energy efficiency protection objective and standard A7.
  - Clause 54.03-6 Significant trees objective and standard A8.
  - Clause 54.05-1 Daylight to new windows objective and standard A16.
  - Clause 54.05-2 Private open space objective and standard A17.
  - Clause 54.05-3 Solar access to open space objective and Standard A18.
  - Clause 54.06-1 Design detail objective and Standard A19.

If a schedule to the zone specifies a requirement of a standard different from a requirement set out in the Clause 54 standard, the requirement in the schedule to the zone applies.
LOCAL VICSMART APPLICATIONS

The schedule to this clause may specify classes of application that are VicSmart applications to which Clause 71.06 applies. A class of application specified must not be a class of VicSmart application specified in another provision of this planning scheme.

The classes of VicSmart application are specified in three tables:

- Table 1 specifies classes VicSmart application under a zone.
- Table 2 specifies classes VicSmart application under an overlay.
- Table 3 specifies classes VicSmart application under a particular provision.

Each table in the schedule is divided into four columns:

- Column 1 specifies the name or class of zone or overlay or name of particular provision.
- Column 2 specifies the development.
- Column 3 specifies the provision of the planning scheme that contains the permit requirement applicable to the development.
- Column 4 specifies the information requirements and decision guidelines in Clauses 59.01 to 59.14 or the schedule to Clause 59.16 applicable to the class of VicSmart application.

Subject to Clause 71.06, an application under a provision specified in Column 3 for a use or development specified in Column 2 is a class of VicSmart application and must be assessed against the provision specified in Column 4.

INFORMATION REQUIREMENTS AND DECISION GUIDELINES FOR LOCAL VICSMART APPLICATIONS

A schedule to this clause may set out information requirements and decision guidelines for a class of VicSmart application specified in the Schedule to Clause 59.15.
SCHEDULE TO CLAUSE 59.16 INFORMATION REQUIREMENTS AND DECISION GUIDELINES FOR LOCAL VICSMART APPLICATIONS

1.0
Information requirements
None specified

2.0
Decision guidelines
None specified
GENERAL PROVISIONS

This section sets out provisions about existing uses, decision guidelines, referral of applications and other matters.
USES NOT REQUIRING A PERMIT

Any requirement in this scheme relating to the use of land, other than a requirement in the Public Conservation and Resource Zone, does not apply to:

- The use of land for a Road except within the Urban Floodway Zone and a Public Conservation and Resource Zone.
- The use of land for Natural systems.
- The use of land in a road if the use is associated with the use of adjoining land and is authorised by the Council under a local law.
- The use of land in a road to trade from a stall, stand, motor vehicle, trailer, barrow or other similar device.
- The use of land for wind measurement by an anemometer for three years or less.
- The use of land for earth and energy resources industry if the conditions of Clause 52.08 are met.
- The use of land for a carnival or circus if the requirements of A ‘Good Neighbour’ Code of Practice for a Circus or Carnival, October 1997 are met.
- The use of land for apiculture if the requirements of the Apiary Code of Practice, May 2011 are met.
- The use of land for temporary portable land sales office located on the land for sale.
- The use of land for a Telecommunications facility if the associated buildings and works meet the requirements of Clause 52.19.
- The use of land for a helicopter landing site if the use meets the requirements of Clause 52.15-1.
- The use of land for a minor utility installation.
- The use of land to display a sign.
**BUILDINGS AND WORKS**

Clauses 62.02-1 and 62.02-2 set out exemptions from permit requirements in this scheme relating to the construction of a building or the construction or carrying out of works. These exemptions do not apply to the removal, destruction or lopping of trees and the removal of vegetation. Exemptions for vegetation removal are set out in Clause 62.02-3.

**62.02-1**

**Buildings and works not requiring a permit**

Any requirement in this scheme relating to the construction of a building or the construction or carrying out of works, other than a requirement in the Public Conservation and Resource Zone, does not apply to:

- Buildings or works which provide for fire protection under relevant legislation.
- Emergency works undertaken by, or on behalf of, a municipality, public authority or utility service provider in the exercise of any power conferred on them under any Act.
- Buildings or works with an estimated cost of $1,000,000 or less carried out by or on behalf of a municipality.
- Maintenance works carried out by a municipality or public authority to prevent or alleviate flood damage.
- An anemometer located on a site for three years or less.
- Buildings and works associated with a use on adjoining land or street trading if authorised under a local law.
- Gardening.
- Buildings and works associated with a minor utility installation.
- Power lines and electrical sub-stations associated with an Energy generation facility or Geothermal energy extraction if a permit was issued for such use or development prior to the approval date of Amendment VC157.
- Buildings or works which are a modification necessary to comply with a direction under the *Dangerous Goods Act 1985* or the *Occupational Health and Safety Act 2004* or a Waste Discharge Licence, Works Approval or Pollution Abatement Notice under the *Environment Protection Act 1970*.
- Buildings and works associated with a telecommunications facility if the requirements of Clause 52.19 are met.
- Buildings and works associated with a dam if a licence is required to construct the dam or to take and use water from the dam under the *Water Act 1989*.
- Buildings and works associated with a carnival or circus if the requirements of A ‘Good Neighbour’ Code of Practice for a Circus or Carnival, October 1997 are met.
- Buildings and works associated with apiculture if the requirements of the Apiary Code of Practice, May 2011 are met.
- A temporary portable classroom associated with an education centre located on a site for three years or less.
- A temporary shed or temporary structure for construction purposes, or a temporary portable land sales office located on the land for sale.
- A children’s cubbyhouse.
- External lighting normal to a dwelling.
- The construction, alteration, removal or demolition of an observational bore where a licence has been issued for those works under Part 5 of the *Water Act 1989*. 
- Any works associated with the use of land for earth and energy resources industry if the conditions of Clause 52.08 are met.
- A crop support or protection structure associated with horticulture, including a trellis, cloche, net and shadecloth. It does not include a structure with a solid roof or solid wall such as a glass house or igloo.
- An annexe attached to a movable caravan located on land used for a camping and caravan park.
- Works associated with geotechnical testing or service proving.
- Buildings and works associated with the use of land in a road to trade from a stall, stand, motor vehicle, trailer, barrow or other similar device.
- The construction of or putting up for display a sign consistent with the requirements of Clause 52.05-10.

**Buildings and works not requiring a permit unless specifically required by the planning scheme**

Any requirement in this scheme relating to the construction of a building or the construction or carrying out of works, other than a requirement in the Public Conservation and Resource Zone, does not apply to:

- A fence.
- The construction of or putting up for display a sign (except for a sign consistent with the requirements of Clause 52.05-10 which is provided for in Clause 62.02-1).
- Roadworks.
- Street furniture including post boxes, telephone booths, fire hydrants, bus shelters, shade sails, traffic control devices and public toilets.
- Park furniture including seating, tables, shelters, rubbish bins, playground equipment, barbeques, shade sails, drinking fountains and public toilets.
- Furniture and works normally associated with an education centre including, but not limited to, outdoor furniture, playground equipment, art works, drinking fountains, rubbish bins and landscaping.
- Disability access and disability facilities associated with an education centre (not including a lift external to a building).
- Art work that is carried out by or on behalf of a public land manager.
- Oil pipelines.
- Buildings and works associated with a dependent person’s unit.
- The internal rearrangement of a building or works provided the gross floor area of the building, or the size of the works, is not increased and the number of dwellings is not increased.
- Repairs and routine maintenance to an existing building or works.
- Domestic services normal to a dwelling.
- A rainwater tank with a capacity of not more than 10,000 litres.
- Bicycle pathways and trails.
- A television antenna.
- A flagpole.
- A domestic swimming pool or spa and associated mechanical and safety equipment if associated with one dwelling on a lot.
- An open-sided pergola or verandah to a dwelling with a finished floor level not more than 800 mm above ground level and a maximum building height of three metres above ground level.
- A deck to a dwelling with a finished floor level not more than 800 mm above ground level.
- A disabled access ramp.
- Any works necessary to prevent soil erosion, or to ensure soil conservation or reclamation.
- A solar energy facility attached to a building that primarily services the land on which it is situated.
- Buildings and works associated with cat cages and runs, bird cages, dog houses, and other domestic animal enclosures associated with the use of the land as a dwelling.
- Services normal to a building other than a dwelling, including chimneys, flues, skylights, heating and cooling systems, hot water systems, security systems and cameras, downpipes, window shading devices, or similar.
- An electric vehicle charging station.

This does not apply if a permit is specifically required for any of these matters.

### Vegetation removal

Any requirement in this scheme relating to the construction or carrying out of works does not apply to the removal, destruction or lopping of trees and the removal of vegetation.

This does not apply if a permit is specifically required to remove, destroy or lop trees or to remove vegetation.
EVENTS ON PUBLIC LAND

Any requirement in this scheme relating to the use of land or the construction of a building or the construction or carrying out of works does not apply to:

- an event on public land; or
- temporary buildings or works required for the event;

where that event has been authorised by the public land manager or by the council under a local law.

An event includes land used to provide temporary cultural or community activities and entertainment such as a concert, festival or exhibition.

This does not apply to public land where a local provision of this scheme specifically regulates an event for a particular site.
SUBDIVISIONS NOT REQUIRING A PERMIT

Any requirement in this scheme relating to the subdivision of land does not apply to:

- A subdivision by an authority acquiring the land which does not create an additional lot.

- A subdivision by a public authority or utility service provider which does not create an additional lot other than for the sole purpose of a minor utility installation. This does not apply if a permit is required to subdivide land under any overlay.

- A subdivision by an authority acquiring the land which creates additional lots if the additional lots are severed parcels of land without legal access to an existing road and the additional lots are retained by the acquiring authority or sold to an abutting land owner on the condition that the lot be consolidated with abutting land.

- A subdivision which realigns the common boundary between two lots if all the land is in one urban zone and any of the following apply:
  - Any lot that is reduced in area meets the minimum lot area and minimum dimensions (if any) specified for the zone. This does not apply if the area of the smaller lot is limited by a provision of this scheme, or by a condition of a planning permit.
  - There is no minimum lot area specified for the zone, the area of the smaller lot is more than 230 square metres, and the area of either lot is reduced by less than 30 square metres.
  - There is no minimum lot area specified for the zone, the area of the smaller lot is 230 square metres or less, and the area of either lot is reduced by less than 5 percent or by less than 30 square metres, which ever is lesser.
  - The new boundary coincides with a boundary fence that is more than five years old. This does not apply if all the land is in one ownership.

- A subdivision which realigns the common boundary between two lots if all the land is in one non-urban zone, the re-subdivision does not allow the number of dwellings the whole of the land could be used for under this scheme to increase, and any of the following apply:
  - Any lot that is reduced in area meets the minimum lot area and minimum dimensions (if any) specified for the zone. This does not apply if the area of the smaller lot is limited by a provision of this scheme, or by a condition of a planning permit.
  - There is no minimum lot area specified for the zone, and no part of the boundary is moved more than 1 metre. This does not apply if the area of the smaller lot would be less than the area specified by a condition of a planning permit.
  - There is no minimum lot area specified for the zone, the new boundary coincides with the location of a fence that is more than 5 years old, and no part of the boundary is moved more than three metres.
DEMOLITION

A permit is not required for the demolition or removal of a building or works unless a permit is specifically required for demolition or removal.
EXTENT OF EXISTING USE RIGHTS

An existing use right is established in relation to use of land under this scheme if any of the following apply:

- The use was lawfully carried out immediately before the approval date.
- A permit for the use had been granted immediately before the approval date and the use commences before the permit expires.
- A permit for the use has been granted under Clause 63.08 and the use commences before the permit expires.
- Proof of continuous use for 15 years is established under Clause 63.11.
- The use is a lawful continuation by a utility service provider or other private body of a use previously carried on by a Minister, government department or public authority, even where the continuation of the use is no longer for a public purpose.
CHARACTERISATION OF USE

If a use of land is being characterised to assess the extent of any existing use right, the use is to be characterised by the purpose of the actual use at the relevant date, subject to any conditions or restrictions applying to the use at that date, and not by the classification in the table to Clause 73.03 or in Section 1, 2 or 3 of any zone.
EFFECT OF DEFINITIONS ON EXISTING USE RIGHTS

The definition of a term in this scheme, or the amendment of any definition, does not increase or restrict the extent of any existing use right established prior to the inclusion of the definition or amendment.
SECTION 1 USES

A use in Section 1 of a zone for which an existing use right is established may continue provided any condition or restriction to which the use was subject and which applies to the use in Section 1 of the zone continues to be met.
SECTIONS 2 AND 3 USES

A use in Section 2 or 3 of a zone for which an existing use right is established may continue provided:

- No building or works are constructed or carried out without a permit. A permit must not be granted unless the building or works complies with any other building or works requirement in this scheme.

- Any condition or restriction to which the use was subject continues to be met. This includes any implied restriction on the extent of the land subject to the existing use right or the extent of activities within the use.

- The amenity of the area is not damaged or further damaged by a change in the activities beyond the limited purpose of the use preserved by the existing use right.
EXPIRATION OF EXISTING USE RIGHTS

An existing use right expires if either:

- The use has stopped for a continuous period of 2 years, or has stopped for two or more periods which together total 2 years in any period of 3 years.

- In the case of a use which is seasonal in nature, the use does not take place for 2 years in succession.
COMPLIANCE WITH CODES OF PRACTICE

A use for which an existing use right is established must comply with any relevant code of practice incorporated in this scheme if either:

- The code of practice has been incorporated or adopted in accordance with Section 39 of the Conservation Forests and *Lands Act 1987*.
- The code of practice is approved or ratified by Parliament under an Act.
ALTERNATIVE USE

If land is used for a use in Section 3 of a zone for which an existing use right is established, a permit may be granted to use the land for an alternative use which does not comply with this scheme. The responsible authority must be satisfied that the use of the land for the alternative use will be less detrimental to the amenity of the locality.
SHOP CONDITIONS

A permit must not be granted to:

- Construct or carry out a building or works under Clause 63.05 for a shop with a leasable floor area exceeding 500 square metres.
- Use land under Clause 63.08 for a shop with a leasable floor area exceeding 500 square metres.
DAMAGED OR DESTROYED BUILDINGS OR WORKS

If at least 50 percent of the gross floor area of a building or at least 50 percent of the area of any works is damaged or destroyed so that the use cannot continue without the building or works being reconstructed, the land must be used in conformity with this scheme, unless a permit is granted to continue the use, and to construct or carry out buildings or works.
PROOF OF CONTINUOUS USE

If, in relation to an application or proceeding under the Act or this scheme, including an application for a certificate of compliance under Section 97N of the Act, the extent of any existing use right for a period in excess of 15 years is in question, it is sufficient proof of the establishment of the existing use right if the use has been carried out continuously for 15 years prior to the date of the application or proceeding.

An existing use right may be established under this clause even if the use did not comply with the scheme immediately prior to or during the 15 year period, unless either:

- At any time before or after commencement of the 15 year period the use has been held to be unlawful by a decision of a court or tribunal.
- During the 15 year period, the responsible authority has clearly and unambiguously given a written direction for the use to cease by reason of its non-compliance with the scheme.
DECISION GUIDELINES

Before deciding on an application under Clause 63.05, 63.08 or 63.10, in addition to the decision guidelines in Clause 65 and any other requirements of the Act, the responsible authority must consider the extent to which compliance can be achieved with all scheme requirements that can reasonably be met.
LAND USED FOR MORE THAN ONE USE

If land is used for more than one use and one is not ancillary to the other, each use must comply with this scheme.
LAND USED IN CONJUNCTION WITH ANOTHER USE

If a provision of this scheme provides that a use of land must be used ‘in conjunction with’ another use of the land:

- there must be an essential association between the two uses; and
- the use must have a genuine, close and continuing functional relationship in its operation with the other use.
SUBDIVISION OF LAND IN MORE THAN ONE ZONE

If a provision of this scheme provides that a permit is required to subdivide land and the land is in more than one zone a permit may be granted even if one of the lots does not comply with the minimum lot size requirements of a zone.

Permit Requirement

A permit may be granted to create one lot smaller than specified in the scheme if all of the following are met:

- The lot to be subdivided is in more than one zone and cannot comply with the minimum lot area specified in the scheme.
- The proposed subdivision does not create lots where any lot extends into more than one zone. This does not apply to any lots created for the following purposes:
  - To comply with the requirements of the Urban Floodway Zone.
  - To provide access to a road.
- The remainder of the proposed lots must comply with the minimum lot area specified in the scheme.
DECISION GUIDELINES

Because a permit can be granted does not imply that a permit should or will be granted. The responsible authority must decide whether the proposal will produce acceptable outcomes in terms of the decision guidelines of this clause.
APPROVAL OF AN APPLICATION OR PLAN

Before deciding on an application or approval of a plan, the responsible authority must consider, as appropriate:

- The matters set out in section 60 of the Act.
- The purpose of the zone, overlay or other provision.
- Any matter required to be considered in the zone, overlay or other provision.
- The orderly planning of the area.
- The effect on the amenity of the area.
- The proximity of the land to any public land.
- Factors likely to cause or contribute to land degradation, salinity or reduce water quality.
- Whether the proposed development is designed to maintain or improve the quality of stormwater within and exiting the site.
- The extent and character of native vegetation and the likelihood of its destruction.
- Whether native vegetation is to be or can be protected, planted or allowed to regenerate.
- The degree of flood, erosion or fire hazard associated with the location of the land and the use, development or management of the land so as to minimise any such hazard.
- The adequacy of loading and unloading facilities and any associated amenity, traffic flow and road safety impacts.

This clause does not apply to a VicSmart application.
APPROVAL OF AN APPLICATION TO SUBDIVIDE LAND

Before deciding on an application to subdivide land, the responsible authority must also consider, as appropriate:

- The suitability of the land for subdivision.
- The existing use and possible future development of the land and nearby land.
- The availability of subdivided land in the locality, and the need for the creation of further lots.
- The effect of development on the use or development of other land which has a common means of drainage.
- The subdivision pattern having regard to the physical characteristics of the land including existing vegetation.
- The density of the proposed development.
- The area and dimensions of each lot in the subdivision.
- The layout of roads having regard to their function and relationship to existing roads.
- The movement of pedestrians and vehicles throughout the subdivision and the ease of access to all lots.
- The provision and location of reserves for public open space and other community facilities.
- The staging of the subdivision.
- The design and siting of buildings having regard to safety and the risk of spread of fire.
- The provision of off-street parking.
- The provision and location of common property.
- The functions of any body corporate.
- The availability and provision of utility services, including water, sewerage, drainage, electricity and gas.
- If the land is not sewered and no provision has been made for the land to be sewered, the capacity of the land to treat and retain all sewage and sullage within the boundaries of each lot.
- Whether, in relation to subdivision plans, native vegetation can be protected through subdivision and siting of open space areas.

This clause does not apply to a VicSmart application.
REFERRAL AND NOTICE PROVISIONS

Scope

These provisions set out the types of applications which must be referred under Section 55 of the Act or for which notice must be given under Section 52(1)(c) of the Act. The provisions do not apply to the seeking of advice about an application or where a responsible authority may choose to give notice under another sub-section of Section 52(1) of the Act.

These provisions also specify when a plan must be referred under Section 8(1)(a) of the Subdivision Act 1988.

Referrals

Applications of the kind listed in Clauses 66.01, 66.02, 66.03 and 66.04 must be referred to the person or body specified as a referral authority in accordance with Section 55 of the Act.

Any requirement for referral under this or another clause does not apply if in the opinion of the responsible authority, the proposal satisfies requirements or conditions previously agreed in writing between the responsible authority and the referral authority, or the referral authority has considered the proposal for which the application is made within the past three months and has stated in writing that it does not object to the granting of the permit for the proposal.

Notice

Notice of an application of the kind listed below in Clauses 66.05 and 66.06 must be given in accordance with Section 52(1)(c) of the Act to the person or body specified as a person or body to be notified.

Any requirement for notice under this or another clause does not apply if, in the opinion of the responsible authority, the proposal satisfies requirements or conditions previously agreed in writing between the responsible authority and the person or body to be notified.
**SUBDIVISION REFERRALS**

An application of the kind listed in the table below must be referred to the person or body specified as the referral authority. The table below specifies whether the referral authority is a determining referral authority or a recommending referral authority.

<table>
<thead>
<tr>
<th>Kind of application</th>
<th>Referral authority</th>
<th>Type of referral authority</th>
</tr>
</thead>
<tbody>
<tr>
<td>To subdivide land other than:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>• A boundary realignment.</td>
<td>The relevant water, drainage or sewerage authority</td>
<td>Determining referral authority</td>
</tr>
<tr>
<td>• The subdivision of an existing building already connected to services.</td>
<td>The relevant electricity supply or distribution authority</td>
<td>Determining referral authority</td>
</tr>
<tr>
<td>• A two lot subdivision.</td>
<td>The relevant gas supply authority</td>
<td>Determining referral authority</td>
</tr>
<tr>
<td>• The subdivision of land into lots each containing an existing dwelling or car parking space.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>To subdivide land outside the metropolitan fire district which creates a road, where the requirements of Clause 56.09-3 are not met.</td>
<td>Country Fire Authority</td>
<td>Determining referral authority</td>
</tr>
<tr>
<td>To subdivide land if the only access to a lot is over Crown land which has not been reserved or proclaimed as a road.</td>
<td>Minister administering the Land Act 1958</td>
<td>Determining referral authority</td>
</tr>
<tr>
<td>To subdivide land crossed by a gas transmission pipeline or a gas transmission pipeline easement.</td>
<td>The relevant gas supply authority</td>
<td>Determining referral authority</td>
</tr>
<tr>
<td>To subdivide land within 60 metres of a major electricity transmission line (220 Kilovolts or more) or an electricity transmission easement.</td>
<td>The relevant electricity transmission authority</td>
<td>Determining referral authority</td>
</tr>
<tr>
<td>To subdivide a heritage place of which all or part is included in the Victorian Heritage Register.</td>
<td>The Executive Director specified in the Heritage Act 2017</td>
<td>Determining referral authority</td>
</tr>
</tbody>
</table>

Note: A subdivision which does not require referral under Clause 66.01 must be referred if it is listed as a requirement under any other provision of Clause 66.

**Mandatory conditions for subdivision permits**

A permit for subdivision must contain the following conditions:

The owner of the land must enter into an agreement with:

- a telecommunications network or service provider for the provision of telecommunication services to each lot shown on the endorsed plan in accordance with the provider’s requirements and relevant legislation at the time; and

- a suitably qualified person for the provision of fibre ready telecommunication facilities to each lot shown on the endorsed plan in accordance with any industry specifications or any standards set by the Australian Communications and Media Authority, unless the applicant can demonstrate that the land is in an area where the National Broadband Network will not be provided by optical fibre.

Before the issue of a Statement of Compliance for any stage of the subdivision under the Subdivision Act 1988, the owner of the land must provide written confirmation from:

- a telecommunications network or service provider that all lots are connected to or are ready for connection to telecommunications services in accordance with the provider’s requirements and relevant legislation at the time; and
a suitably qualified person that fibre ready telecommunication facilities have been provided in accordance with any industry specifications or any standards set by the Australian Communications and Media Authority, unless the applicant can demonstrate that the land is in an area where the National Broadband Network will not be provided by optical fibre.

This requirement does not apply to a permit granted to:

- Subdivide land in a rural zone, public land zone, Urban Floodway Zone or Special Use Zone if the responsible authority is satisfied that connection to telecommunication services is not warranted.

- Realign the common boundary between two lots (boundary realignment).

- Subdivide an existing building already connected to telecommunication services.

A permit granted to subdivide land in a manner that does not require referral under Clause 66.01 must contain the following conditions:

- The owner of the land must enter into agreements with the relevant authorities for the provision of water supply, drainage, sewerage facilities, electricity and gas services to each lot shown on the endorsed plan in accordance with the authority’s requirements and relevant legislation at the time.

- All existing and proposed easements and sites for existing or required utility services and roads on the land must be set aside in the plan of subdivision submitted for certification in favour of the relevant authority for which the easement or site is to be created.

- The plan of subdivision submitted for certification under the Subdivision Act 1988 must be referred to the relevant authority in accordance with Section 8 of that Act.

This requirement does not apply to a permit granted to subdivide land into lots each containing an existing dwelling or car parking space.

Referrals under the Subdivision Act – certification of plans

For the purpose of Section 8(1)(a) of the Subdivision Act 1988 referral of a plan is required if:

- A referral is required by a permit issued under this scheme. The plan must be referred to the relevant referral authority.

- A plan creates, varies or removes an easement or restriction likely to be of interest to a referral authority. The plan must be referred to the relevant referral authority.

- The only access to a lot on a plan is over Crown land and the Minister administering the Land Act 1958 has not consented or provision has not been made for a road to be reserved or proclaimed. The plan must be referred to that Minister.

- In the opinion of the Council the plan may affect existing sewerage, water, drainage or other works. The plan must be referred to the referral authority responsible for those works.
USE AND DEVELOPMENT REFERRALS

An application of the kind listed in the tables below must be referred to the person or body specified as the referral authority. The tables below specify whether the referral authority is a determining referral authority or a recommending referral authority.

### Works approval or licence

| Clause 44.06-6 (BMO) | An application to construct a building or carry out works associated with a dwelling. This does not apply to a non habitable outbuilding that meets the following requirements:  
- The outbuilding is ancillary to a dwelling,  
- 10 metres of defendable space is provided around the outbuilding in accordance with the vegetation management requirements at Table 6 of Clause 53.02,  
- The canopy of each tree within the defendable space is separated by at least 2 metres, and  
- Where the outbuilding is located less than 10 metres from a dwelling the outbuilding construction requirements at Table 7 of Clause 53.02 are met. | Relevant fire authority | Recommending referral authority |
<p>| An application to subdivide land. | Relevant fire authority | Recommending referral authority |
| An application under the overlay other than an application to construct a building or carry out works associated with a dwelling or an application to subdivide land. | Relevant fire authority | Determining referral authority |
| Clause 44.07-4 (SRO) | An application of the kind specified in a schedule to the overlay. | Referral authority specified in a schedule to the overlay | Determining referral authority |

REFERRAL OF PERMIT APPLICATIONS UNDER LOCAL PROVISIONS

In addition to the referral requirements of Clause 66.01, 66.02 and 66.03, an application of the kind listed in the schedule to this clause must be referred to the referral authority specified in the schedule. The table below specifies whether the referral authority is a determining referral authority or a recommending referral authority.

If a local provision of the scheme specifies a person or body as a referral authority for a kind of application or contains a referral requirement, and that specification or requirement is not included in the schedule to this clause, it is not a referral requirement under section 55 of the Act.

</table>
APPLICATIONS UNDER SECTION 96 OF THE ACT

This clause applies to an application for a permit which, except for the provisions of this clause, would be made to the Minister in accordance with Section 96 of the Act.
EXEMPTIONS FROM SECTION 96(1) AND 96(2) OF THE ACT

In accordance with Section 6(2)(ka) of the Act, the following classes of use and development are exempted from Section 96(1) and 96(2) of the Act:

**Class 1**

Use of land for -

Car park, camping and caravan park, community facility (including child care centre, maternal and infant welfare centre, neighbourhood house, place of assembly and toilet block), dwelling, stone extraction, hospital, industry, leisure and recreation, office, residential village, retail premises or service station.

**Class 2**

Development of land for -

A Class 1 use, demolition of a building or works, lighting and floodlighting of a recreation facility or building, sign or advertisement or subdivision.

**Class 3**

Any other use or development.
NOTICE REQUIREMENTS

In accordance with Section 52(1)(c) of the Act, notice must be given to:

- The owners and occupiers of adjoining land.
- The National Trust of Australia (Victoria), if the application relates to land on which there is a building classified by the Trust.

This does not apply to an application:

- For a sign or advertisement.
- To remove, destroy or lop native vegetation under Clause 52.17 of this scheme.
- If a permit is only required under any of the following overlays:
  - Salinity Management Overlay
  - Floodway Overlay
  - Land Subject to Inundation Overlay
  - Special Building Overlay
  - Bushfire Management Overlay
NOTICE REQUIREMENTS - NATIVE VEGETATION

In accordance with Section 52(1)(c) of the Act, notice of an application to remove, destroy or lop native vegetation under Clause 52.17 of this scheme must be given to the Secretary to the Department administering the Flora and Fauna Guarantee Act 1988.

This does not apply if the application is of a kind which must be referred to the Secretary under Section 55 of the Act.
NOTICE EXEMPTION

In accordance with Section 52(4) of the Act, an application for a sign or advertisement on land managed, occupied or owned by the responsible authority is exempt from the notice requirement of Clause 52(1)(a) of the Act.
OPERATIONAL PROVISIONS

This section sets out provisions about the operation, administration and enforcement of this planning scheme, the meaning of terms used in this planning scheme, and other matters.
OPERATION OF THE MUNICIPAL PLANNING STRATEGY

Municipal Planning Strategy

The Municipal Planning Strategy at Clause 02 sets out the vision for the future development of the municipality and sets the strategic directions about how the municipality is expected to change through the implementation of planning policy and the planning scheme.

A planning authority must take into account the Municipal Planning Strategy when it prepares an amendment to this planning scheme.

A responsible authority must take into account and give effect to the Municipal Planning Strategy when it makes a decision under this planning scheme.

Relationship to the Municipal Strategic Statement

For the purposes of section 12A(3) of the Act, the Municipal Strategic Statement is:

- A Municipal Strategic Statement at Clause 21.
- Where Clause 21 is not included in this scheme:
  - The Municipal Planning Strategy at Clause 02.
  - Local provisions in the Planning Policy Framework at Clauses 10 to 19.
  - A schedule to Clause 74.01.

Transitional

If this planning scheme includes a Municipal Strategic Statement at Clause 21, the provisions of Clauses 23.01 and 23.02 apply.
Purpose of the Planning Policy Framework

The Planning Policy Framework provides a context for spatial planning and decision making by planning and responsible authorities. The Planning Policy Framework is dynamic and will be built upon as planning policy is developed and refined, and changed as the needs of the community change.

The Planning Policy Framework seeks to ensure that the objectives of planning in Victoria (as set out in section 4 of the Act) are fostered through appropriate land use and development planning policies and practices that integrate relevant environmental, social and economic factors in the interests of net community benefit and sustainable development.

Operation

The Planning Policy Framework sets out the planning policies that form part of this planning scheme. It comprises Clauses 10 to 19.

A planning policy applies to all land subject to this planning scheme unless the policy specifies otherwise.

A planning policy provides guidance for decision making and can help the community to understand how the responsible authority will consider a proposal.

The consistent application of planning policy over time should achieve a desired outcome.

A planning authority must take into account the Planning Policy Framework when it prepares an amendment to this planning scheme.

A responsible authority must take into account and give effect to the Planning Policy Framework when it makes a decision under this planning scheme. This does not apply to policy guidelines and policy documents.

Policy guidelines

A planning policy may include policy guidelines. Policy guidelines indicate how objectives can be met and how strategies can be implemented.

A responsible authority must take a relevant policy guideline into account when it makes a decision under this planning scheme, but is not required to give effect to it. If the responsible authority is satisfied that an alternative approach meets the objective, the alternative may be considered.

Policy documents

A planning policy may include reference to a policy document. A policy document may be an incorporated, background and other document.

A background document listed in the table or the schedule to Clause 72.08 that applies to Clauses 10 to 19 is a policy document for applicable planning policies.

Integrated decision making

Society has various needs and expectations such as land for settlement, protection of the environment, economic wellbeing, various social needs, proper management of resources and infrastructure. Planning aims to meet these needs and expectations by addressing aspects of economic, environmental and social wellbeing affected by land use and development.

Planning and responsible authorities should endeavour to integrate the range of planning policies relevant to the issues to be determined and balance conflicting objectives in favour of net community benefit and sustainable development for the benefit of present and future generations. However, in bushfire affected areas, planning and responsible authorities must prioritise the protection of human life over all other policy considerations.
Planning authorities should identify the potential for regional impacts in their decision making and coordinate strategic planning with their neighbours and other public bodies to achieve sustainable development and effective and efficient use of resources.

**Transitional**

If this planning scheme includes a Municipal Strategic Statement at Clause 21 and local planning policies at Clause 22, the provisions of Clauses 23.01, 23.02 and 23.03 apply. To the extent of any inconsistency, Clauses 23.02 and 23.03 prevail over this clause.
OPERATION OF ZONES

In each zone and schedule to a zone which contains a table of uses, the controls over the use of land are divided into three sections.

Section 1 uses
A use in Section 1 does not require a permit. Any condition opposite the use must be met. If the condition is not met, the use is in Section 2 and requires a permit unless the use is specifically included in Section 3 as a use that does not meet the Section 1 condition.

Section 2 uses
A use in Section 2 requires a permit. Any condition opposite the use must be met. If the condition is not met, the use is prohibited.

Making decisions about Section 2 uses
Because a use is in Section 2 does not imply that a permit should or will be granted. The responsible authority must decide whether the proposal will produce acceptable outcomes in terms of the Municipal Planning Strategy, the Planning Policy Framework, the purpose and decision guidelines of the zone and any of the other decision guidelines in Clause 65.

Section 3 uses
A use in Section 3 is prohibited.
OPERATION OF OVERLAYS

If an overlay is shown on the planning scheme map, the provisions of the overlay apply in addition to the provisions of the zone and any other provision of this scheme.

Because a permit can be granted does not imply that a permit should or will be granted. The responsible authority must decide whether the proposal will produce acceptable outcomes in terms of the Municipal Planning Strategy, the Planning Policy Framework, the purpose and decision guidelines of the overlay and any of the other decision guidelines in Clause 65.
OPERATION OF PARTICULAR PROVISIONS

The requirements of particular provisions apply to the specified categories of use and development and other matters in addition to any provisions which apply due to any other provision of this planning scheme.
VicSmart applications

Any provision of this planning scheme may specify:

- Classes of application that are VicSmart applications to which Clause 71.06 applies.
- Information requirements for each class of VicSmart application.
- Decision guidelines for each class of VicSmart application.

An application is a VicSmart application if all of the following requirements are met:

- The application is in a class or classes specified in a provision of this planning scheme.
- A permit is required only under the provisions of this planning scheme that are specified as a VicSmart application, and not under any other provision of this planning scheme.
- Nothing authorised by the grant of a permit would result in a breach of a registered restrictive covenant.
- If the application requires referral to a referral authority under Clause 66, the referral requirements in Clause 71.06-2 are met.

VicSmart process

Despite any other provision of this planning scheme:

- A VicSmart application is exempt from the requirements of the Act and planning scheme specified in this clause.
- The responsible authority must assess a VicSmart application in accordance with the requirements of this clause.

If there is any inconsistency between the requirements of this clause and another provision of this planning scheme, this clause prevails.

Referral requirements

If an application requires referral to a referral authority under Clause 66:

- The application must have been considered by the referral authority within the past 3 months of the application being made to the responsible authority.
- The referral authority must have stated in writing that it does not object to the granting of the permit for the proposal.

Information requirements

A VicSmart application must be accompanied by the information requirements specified for the relevant class of application. The information requirements of the relevant zone, overlay or particular provision, other than those specified for VicSmart applications, do not apply unless the information requirements for the relevant class of application specify otherwise.

If in the opinion of the responsible authority an information requirement is not relevant to the evaluation of a VicSmart application, the responsible authority may waive or reduce the information requirement.

Exemption from notice and review

A VicSmart application is exempt from:

- The notice requirements of section 52(1)(a), (b), (c) and (d) of the Act.
- The decision requirements of section 64(1), (2) and (3) of the Act.
- The review rights of section 82(1) of the Act.
Matters to be considered

In deciding a VicSmart application, the responsible authority:

- Must only consider the decision guidelines specified for the relevant class of application.
- Is exempt from considering the following matters:
  - The requirements of section 60(1)(b), (c), (e) and (f) and (1A) (b) to (h) and (j) of the Act.
  - The Municipal Planning Strategy and Planning Policy Framework unless the decision guidelines for the relevant class of application specify otherwise.
  - The decision guidelines of the relevant zone, overlay or particular provision, other than those specified for VicSmart applications, unless the decision guidelines for the relevant class of application specify otherwise.
  - The decision guidelines in Clause 65.
- In deciding an application for review in relation to a VicSmart application, the Tribunal is exempt from the matters specified in section 84B(2)(b) to (g) and (i) to (ja) of the Act.

Decision guidelines

Before deciding a VicSmart application, the responsible authority must consider the decision guidelines specified for the relevant class of application unless in the opinion of the responsible authority a decision guideline is not relevant to the evaluation of the application.
RESPONSIBLE AUTHORITY FOR THIS PLANNING SCHEME

The responsible authority for the administration and enforcement of this planning scheme or a provision of this planning scheme is specified in this clause and the schedule to this clause.

The person nominated under section 198(1)(a) of the Act or the responsible authority under section 198(1)(b) of the Act, to whom a person may apply for a planning certificate, is specified in the schedule to this clause.

Minister is responsible authority

The Minister for Planning is the responsible authority for matters under Divisions 1, 1A, 2 and 3 of Part 4 of the Act, and matters required by a permit or the scheme to be endorsed, approved or done to the satisfaction of the responsible authority, in relation to the use and development of land for a:

- Wind energy facility
- Minor utility installation used to transmit or distribute electricity generated by a Wind energy facility
- Utility installation used to transmit or distribute electricity generated by a Wind energy facility with the exception of the following:
  - in relation to permits for the use and development of land for a Wind energy facility issued prior to 2 April 2015 under Division 1 of Part 4 of the Act, the Council is the responsible authority for matters under Divisions 1, 1A, 2 and 3 of Part 4 of the Act, and for matters required by the permit or the scheme to be endorsed, approved or done to the satisfaction of the responsible authority.
  - in relation to permits for the use and development of land for a Wind energy facility issued prior to 2 April 2015 under Division 6 of Part 4 of the Act, the Council is the responsible authority for matters required by the permit or the scheme to be endorsed, approved or done to the satisfaction of the responsible authority, subject to the operation of section 97H of the Act.
SCHEDULE TO CLAUSE 72.01 RESPONSIBLE AUTHORITY FOR THIS PLANNING SCHEME

1.0

Responsible authority for administering and enforcing this planning scheme:
The Swan Hill Rural City Council is the responsible authority for administering and enforcing the planning scheme, except for matters specified in Clause 72.01-1 and matters listed in this schedule.

2.0

Responsible authority for administering and enforcing a provision of this planning scheme:
None specified.

3.0

Person or responsible authority for issuing planning certificates:
Minister for Planning.

4.0

Responsible authority for VicSmart applications:
The Chief Executive Officer of Swan Hill Rural City Council is the responsible authority for considering and determining VicSmart applications to which Clause 71.06 applies, in accordance with Divisions 1, 1A, 2 and 3 of Part 4 of the Act.
WHAT AREA IS COVERED BY THIS PLANNING SCHEME?

This planning scheme applies to the municipal district or other area specified in the schedule to this clause.
SCHEDULE TO CLAUSE 72.02 WHAT AREA IS COVERED BY THIS PLANNING SCHEME?

1.0

Area covered by this planning scheme:

Rural City of Swan Hill.
WHAT DOES THIS PLANNING SCHEME CONSIST OF?

This planning scheme consists of this document, any maps specified in the schedule to this clause, and any document incorporated in the scheme in accordance with the Act. A document is not incorporated in this scheme by reason only that it is referred to in the scheme.

This document consists of State standard provisions and local provisions. Local provisions are:

- If included in this planning scheme:
  - Clause 02 (Municipal Planning Strategy).
  - Clause 21 (Municipal Strategic Statement).
  - Clause 22 (Local Planning Policies).

- All clauses in the Planning Policy Framework that include the letter ‘L’ in the clause number.

- All schedules to zones, overlays, particular provisions, general provisions and operational provisions.

All other provisions are State standard provisions.

Maps specified in the schedule to this clause show how land is zoned and whether land is affected by an overlay. This information is indicated by a letter and/or number code that is explained on each map.

**Note:** A clause numbered ‘11.01-1L’ would be an example of a local provision in the Planning Policy Framework. ‘C1Z’ is an example of a code on a map that may be specified in the schedule to this clause. It stands for ‘Commercial 1 Zone’.
SCHEDULE TO CLAUSE 72.03 WHAT DOES THIS PLANNING SCHEME CONSIST OF?

- 45, 45ESO, 45LSIO, 45VPO, 45BMO
- 46, 46VPO, 46BMO
- 47, 47VPO, 47BMO
**DOCSNENTS INCORPORATED IN THIS PLANNING SCHEME**

The documents listed in the table and the schedule to this clause are incorporated documents under section 6(2)(j) of the *Planning and Environment Act 1987*.

An incorporated document forms part of this planning scheme.

If a document is not listed in the table or the schedule, it is not an incorporated document.

A document is not incorporated in this planning scheme by reason only that it is referred to in the scheme.

*Note:* Clause 72.08 contains a list of background documents relevant to this planning scheme. A background document does not form part of the planning scheme.

WHEN DID THIS PLANNING SCHEME BEGIN?

This planning scheme began on the date specified in the schedule to this clause.
SCHEDULE TO CLAUSE 72.05 WHEN DID THIS PLANNING SCHEME BEGIN?

1.0

Date this planning scheme began:

9 September 1999
EFFECT OF THIS PLANNING SCHEME

Land may be used or developed only in accordance with this planning scheme.

Land must not be developed unless the land as developed can be used in accordance with this planning scheme.

If this planning scheme allows a particular use of land, it may be developed for that use provided all requirements of the scheme are met.
DETERMINATION OF BOUNDARIES

If a boundary in this planning scheme is not precisely shown on a planning scheme map or is not otherwise defined, the certificate issuing authority must determine the boundary if asked to do so and must notify the applicant within 60 days.
BACKGROUND DOCUMENTS

The documents listed in the table and the schedule to this clause are background documents.
The table and the schedule to this clause must specify the amendment that listed the background
document and may specify the clause of this planning scheme that the background document relates
to.

A background document may:

- Have informed the preparation of, or an amendment to, this planning scheme.
- Provide information to explain the context within which a provision has been framed.
- Assist the understanding of this planning scheme.

A background document does not form part of this planning scheme.

A background document may be referenced elsewhere in this planning scheme without being listed
in the table or schedule to this clause.

SWAN HILL PLANNING SCHEME
MEANING OF TERMS

A term used in this planning scheme has its ordinary meaning unless that term is defined:

- In this planning scheme; or

- In the Planning and Environment Act 1987 or the Interpretation of Legislation Act 1984, in which case the term has the meaning given to it in those Acts unless it is defined differently in this scheme.
**GENERAL TERMS**

The following table lists general terms which may be used in this planning scheme. A term listed in the first column, under the heading "General term", has the meaning set out beside that term in the second column, under the heading "Definition".

<table>
<thead>
<tr>
<th>General term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Act</td>
<td>The <em>Planning and Environment Act 1987</em>.</td>
</tr>
<tr>
<td>Agricultural production</td>
<td>Any form of primary production of renewable commodities. It does not include Stone extraction, Mineral extraction, or timber production from native forest.</td>
</tr>
<tr>
<td>Anemometer</td>
<td>A wind measuring device.</td>
</tr>
<tr>
<td>Apartment</td>
<td>A dwelling located above the ceiling level or below the floor level of another dwelling and is part of a building containing two or more dwellings.</td>
</tr>
<tr>
<td>Approval date</td>
<td>The date this scheme began, or the date of notice in the Victoria Government Gazette of approval of an amendment to this scheme.</td>
</tr>
<tr>
<td>Basement</td>
<td>A storey below ground level, or that projects no more than 1.2 metres above ground level.</td>
</tr>
<tr>
<td>Building height</td>
<td>The vertical distance from natural ground level to the roof or parapet at any point.</td>
</tr>
<tr>
<td>Building Regulations</td>
<td>The <em>Building Regulations 1994</em>.</td>
</tr>
<tr>
<td>Carriageway</td>
<td>The area of a street reserve which is provided for the movement or parking of vehicles. It is determined by the invert of a kerb and channel and the point adjacent to the pavement edge for kerb (only) and edge strips.</td>
</tr>
<tr>
<td>Central Highlands region</td>
<td>The area covered by the Ararat, Ballarat, Golden Plains, Hepburn, Moorabool and Pyrenees planning schemes.</td>
</tr>
<tr>
<td>Clear to the sky</td>
<td>An unroofed area or area roofed with material that transmits 90 per cent of light.</td>
</tr>
<tr>
<td>Defendable space</td>
<td>An area of land around a building where vegetation is modified and managed to reduce the effects of flame contact and radiant heat associated with bushfire.</td>
</tr>
<tr>
<td>Deflection angle</td>
<td>The angle between two tangent sections of a carriageway.</td>
</tr>
<tr>
<td>Design speed</td>
<td>The speed fixed for the design and correlation of the geometric features of a carriageway that influence vehicle operation. It is the speed which is not exceeded by 85 per cent of vehicles.</td>
</tr>
<tr>
<td>Domestic services normal to a dwelling</td>
<td>A domestic appliance or apparatus that is normal to and services a dwelling. It includes disabled access ramps and handrails, an air conditioner, cooling or heating system, a hot water service, security systems and cameras, shade sails, a barbeque, downpipes and flues, a skylight, security screens, and the like.</td>
</tr>
<tr>
<td>Earthworks</td>
<td>Land forming, laser grading, levee banks, raised access roads and tracks, building pads, storage embankments, channel banks and drain banks and associated structures.</td>
</tr>
<tr>
<td>Frontage</td>
<td>The road alignment at the front of a lot. If a lot abuts two or more roads, the one to which the building, or proposed building, faces.</td>
</tr>
<tr>
<td>Gaming</td>
<td>The playing of a gaming machine.</td>
</tr>
<tr>
<td>General term</td>
<td>Definition</td>
</tr>
<tr>
<td>-----------------------------------</td>
<td>--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td><strong>Gaming machine</strong></td>
<td>Has the same meaning as it has in the Gambling Regulation Act 2003.</td>
</tr>
</tbody>
</table>
| **Garden area**                   | Any area on a lot with a minimum dimension of 1 metre that does not include: a) a dwelling or residential building, except for:  
  - an eave, fascia or gutter that does not exceed a total width of 600mm;  
  - a pergola;  
  - unroofed terraces, patios, decks, steps or landings less than 800mm in height;  
  - a basement that does not project above ground level;  
  - any outbuilding that does not exceed a gross floor area of 10 square metres; and  
  - domestic services normal to a dwelling or residential building;  
  b) a driveway; or  
  c) an area set aside for car parking.                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| **Geelong G21 region**            | The area covered by the Colac Otway, Golden Plains, Greater Geelong, Queenscliffe and Surf Coast planning schemes.                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| **Gippsland region**              | The area covered by the Bass Coast, Baw Baw, East Gippsland, Latrobe, South Gippsland and Wellington planning schemes.                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| **Great South Coast region**      | The area covered by the Corangamite, Glenelg, Moyne, Southern Grampians and Warrnambool planning schemes                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| **Gross floor area**              | The total floor area of a building, measured from the outside of external walls or the centre of party walls, and includes all roofed areas.                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| **Ground level**                  | The natural level of a site at any point.                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| **Habitable room**                | Any room of a dwelling or residential building other than a bathroom, laundry, toilet, pantry, walk-in wardrobe, corridor, stair, lobby, photographic darkroom, clothes drying room and other space of a specialised nature occupied neither frequently nor for extended periods.                                                                                                                                                                                                                                                                                                                                                                         |
| **High quality productive agricultural land** | Land which is used for animal husbandry or crop raising, and is capable of continuing to sustain agricultural production, and:  
  a) is of prime, or very good, agricultural quality, having regard to soil type, growing season, and availability of infrastructure, and is of sufficient extent to support agricultural activities on an economically viable scale; or  
  b) has been identified through a regional, sub-regional, or local study as being of particularly good quality and strategic significance for agriculture in the regional or local context.                                                                                                                                                                                                                     |
<p>| <strong>Hume region</strong>                   | The area covered by the Alpine, Benalla, Greater Shepparton, Indigo, Mansfield, Mitchell, Moira, Murrindindi, Strathbogie, Towong, Wangaratta and Wodonga planning schemes.                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <strong>Land capability assessment</strong>    | The assessment of the physical ability of the land to sustain specific uses having regard to its management, and without long term on-site detriment to the environment.                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |</p>
<table>
<thead>
<tr>
<th>General term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Leasable floor area</td>
<td>That part of the net floor area able to be leased. It does not include public or common tenancy areas, such as malls, verandahs, or public conveniences.</td>
</tr>
<tr>
<td>Loddon Mallee North region</td>
<td>The area covered by the Buloke, Campaspe, Gannawarra, Mildura and Swan Hill planning schemes.</td>
</tr>
<tr>
<td>Loddon Mallee South region</td>
<td>The area covered by the Central Goldfields, Greater Bendigo, Loddon, Macedon Ranges and Mount Alexander planning schemes.</td>
</tr>
<tr>
<td>Lot</td>
<td>A part (consisting of one or more pieces) of any land (except a road, a reserve, or common property) shown on a plan, which can be disposed of separately and includes a unit or accessory unit on a registered plan of strata subdivision and a lot or accessory lot on a registered cluster plan.</td>
</tr>
<tr>
<td>Mean building height</td>
<td>The vertical distance between the mean ground level and the finished roof height at its highest point.</td>
</tr>
<tr>
<td>Mean ground level</td>
<td>One half the sum of the highest and lowest levels along ground level of the outer surface of all external building walls.</td>
</tr>
<tr>
<td>Metropolitan Melbourne</td>
<td>The area covered by the Banyule, Bayside, Boroondara, Brimbank, Cardinia, Casey, Darebin, Frankston, Glen Eira, Greater Dandenong, Hobsons Bay, Hume, Kingston, Knox, Manningham, Maribyrnong, Maroondah, Melbourne, Melton, Monash, Moonee Valley, Moreland, Mornington Peninsula, Nillumbik, Port of Melbourne, Port Phillip, Stonnington, Whitehorse, Whittlesea, Wyndham, Yarra and Yarra Ranges Planning Schemes and the area within the urban growth boundary in the Mitchell Planning Scheme.</td>
</tr>
<tr>
<td>Mineral</td>
<td>Any substance which occurs naturally as part of the earth's crust, including:</td>
</tr>
<tr>
<td></td>
<td>a) oil shale and coal; and</td>
</tr>
<tr>
<td></td>
<td>b) hydrocarbons and mineral oils contained in oil shale or coal, or extracted from oil shale or coal by chemical or industrial processes.</td>
</tr>
<tr>
<td></td>
<td>It does not include water, stone, or petroleum.</td>
</tr>
<tr>
<td>Movable building</td>
<td>A structure, other than a tent, caravan, or vehicle, which is designed to be moved from place to place on more than one occasion.</td>
</tr>
<tr>
<td>Native vegetation</td>
<td>Plants that are indigenous to Victoria, including trees, shrubs, herbs, and grasses.</td>
</tr>
<tr>
<td>Net floor area</td>
<td>The total floor area of all floors of all buildings on a site. It includes half the width of any party wall and the full width of all other walls. It does not include the area of stairs, loading bays, accessways, or car parking areas, or any area occupied by machinery required for air conditioning, heating, power supply, or lifts.</td>
</tr>
<tr>
<td>Plot ratio</td>
<td>The gross floor area of all buildings on a site, divided by the area of the site.</td>
</tr>
<tr>
<td>Private open space</td>
<td>An outdoor area of a dwelling or residential building or land for the exclusive use of the occupants.</td>
</tr>
<tr>
<td>Property vegetation plan</td>
<td>A plan which relates to the management of native vegetation within a property, and which is contained within an agreement made pursuant to section 69 of the Conservation, Forests and Lands Act 1987.</td>
</tr>
<tr>
<td>General term</td>
<td>Definition</td>
</tr>
<tr>
<td>----------------------</td>
<td>----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Prostitution</td>
<td>The provision by one person to or for another person (whether or not of a different sex) of sexual services in return for payment or reward.</td>
</tr>
<tr>
<td>Public land manager</td>
<td>The Minister, government department, public authority or municipal council having responsibility for the care or management of public land. In relation to Crown land reserved under an Act and managed or controlled by a committee of management, other than Parks Victoria or a municipal council, it means the Minister administering that Act and does not include the committee of management.</td>
</tr>
<tr>
<td>Radio mast</td>
<td>A mast, for radio transmission or reception in a dwelling, that is: a) with antenna, more than 14 metres above the ground; b) if attached to a building, with antenna, more than 5 metres above the roof line; c) including antenna, wider than 6 metres; or d) excluding antenna, wider than 50 centimetres at any point exceeding 3 metres above the ground.</td>
</tr>
<tr>
<td>Retail</td>
<td>The sale of goods or materials, in any quantity or manner, other than by wholesale.</td>
</tr>
<tr>
<td>Secluded private open space</td>
<td>That part of private open space primarily intended for outdoor living activities which enjoys a reasonable amount of privacy.</td>
</tr>
<tr>
<td>Setback</td>
<td>The minimum distance from any allotment boundary to a building.</td>
</tr>
<tr>
<td>Sexual services</td>
<td>Has the same meaning as it has in the Sex Work Act 1994.</td>
</tr>
<tr>
<td>Site coverage</td>
<td>The proportion of a site covered by buildings.</td>
</tr>
<tr>
<td>Stone</td>
<td>Basalt, freestone, granite, limestone, sandstone, or other building stone, or rock, ordinarily used for building, manufacturing, road making, or construction; or clay (not fine clay, bentonite, or kaolin), earth, gravel, quartz (not quartz crystals), sand, soil, slate, or other similar material.</td>
</tr>
<tr>
<td>Storey</td>
<td>That part of a building between floor levels. If there is no floor above, it is the part between the floor level and ceiling. It may include an attic, basement, built over car parking area, and mezzanine.</td>
</tr>
<tr>
<td>Stormwater</td>
<td>The net increase in run-off from urban development due to water not being able to seep into the ground because of impervious surfaces, such as roofs and roads.</td>
</tr>
<tr>
<td>Street leg length</td>
<td>The distance between street intersections or junctions, or points and locations where vehicles must slow down, usually to a maximum speed of 20 kilometres per hour.</td>
</tr>
<tr>
<td>Street reserve</td>
<td>Land set aside for a street pavement and verge.</td>
</tr>
<tr>
<td>Sustainable agriculture</td>
<td>The use of farming practices and systems which maintain or enhance: a) the economic viability of agricultural production; b) the natural resource base; and c) other ecosystems which are influenced by agricultural activities.</td>
</tr>
<tr>
<td>General term</td>
<td>Definition</td>
</tr>
<tr>
<td>-----------------------------------</td>
<td>------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td><strong>Telecommunications line</strong></td>
<td>A wire, cable, optic fibre, tube, conduit, waveguide or other physical medium used, or to be used, as a continuous artificial guide for or in connection with carrying communications by means of guided electromagnetic energy.</td>
</tr>
<tr>
<td><strong>Telecommunications network</strong></td>
<td>A system or series of systems that carries, or is capable of carrying, communications by means of guided and unguided electromagnetic energy.</td>
</tr>
<tr>
<td><strong>Telecommunications tower</strong></td>
<td>A tower, pole or mast used as part of a Telecommunications network.</td>
</tr>
<tr>
<td><strong>Tenement</strong></td>
<td>Land comprised in:</td>
</tr>
<tr>
<td></td>
<td>a) a lot which does not adjoin another lot in the same ownership; or</td>
</tr>
<tr>
<td></td>
<td>b) lots in the same ownership and which adjoin each other.</td>
</tr>
<tr>
<td></td>
<td>Lots are considered to adjoin each other if they are separated only by a stream, stream reserve, or unmade or unused government road or rail reserve.</td>
</tr>
<tr>
<td><strong>Utility service provider</strong></td>
<td>A person, other than a public authority or municipal council, having responsibility under an Act for the generation, transmission, distribution or supply of electricity, gas, power, telecommunications, water supply, drainage or sewerage services.</td>
</tr>
<tr>
<td><strong>Verge</strong></td>
<td>The part of the street reserve between the carriageway and the boundary of adjacent lots or other limit to the street reserve. It may accommodate public utilities, a footpath, indented parking, stormwater flows, street lighting poles and planting.</td>
</tr>
<tr>
<td><strong>Wall height</strong></td>
<td>The vertical distance between the top of the eaves at the wall line, parapet or flat roof (not including a chimney), whichever is the highest, and the natural ground level.</td>
</tr>
<tr>
<td><strong>Wholesale</strong></td>
<td>The sale of goods or materials, to be sold by others.</td>
</tr>
<tr>
<td><strong>Wimmera Southern Mallee region</strong></td>
<td>The area covered by the Hindmarsh, Horsham, Northern Grampians, West Wimmera and Yarriambiack planning schemes.</td>
</tr>
</tbody>
</table>
SIGN TERMS

The following table lists terms which may be used in this planning scheme in relation to signs. A term listed in the first column, under the heading "Sign term", has the meaning set out beside that term in the second column, under the heading "Definition".

<table>
<thead>
<tr>
<th>Sign term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Above-verandah sign</td>
<td>A sign above a verandah or, if no verandah, that is more than 3.7 metres above pavement level, and which projects more than 0.3 metre outside the site.</td>
</tr>
<tr>
<td>Display area</td>
<td>The area of that part of a sign used to display its content, including borders, surrounds and logo boxes. It does not include safety devices, platforms and lighting structures. If the sign does not move or rotate, the area is one side only.</td>
</tr>
<tr>
<td>Animated sign</td>
<td>A sign that can move, contains moving or scrolling parts, changes its message, flashes, or has a moving or flashing border.</td>
</tr>
<tr>
<td>Bed and breakfast sign</td>
<td>A sign at a dwelling that advertises bed and breakfast accommodation in the dwelling.</td>
</tr>
<tr>
<td>Bunting sign</td>
<td>An advertisement that consists of bunting, streamers, flags, windvanes, or the like.</td>
</tr>
<tr>
<td>Business identification sign</td>
<td>A sign that provides business identification information about a business or industry on the land where it is displayed. The information may include the name of the business or building, the street number of the business premises, the nature of the business, a business logo or other business identification information.</td>
</tr>
<tr>
<td>Direction sign</td>
<td>A sign not exceeding 0.3 square metre that directs vehicles or pedestrians. It does not include a sign that contains commercial information.</td>
</tr>
<tr>
<td>Electronic sign</td>
<td>A sign that can be updated electronically. It includes screens broadcasting still or moving images.</td>
</tr>
<tr>
<td>Floodlit sign</td>
<td>A sign illuminated by external lighting provided for that purpose.</td>
</tr>
<tr>
<td>High-wall sign</td>
<td>A sign on the wall of a building so that part of it is more than 10 metres above the ground.</td>
</tr>
<tr>
<td>Home based business sign</td>
<td>A sign at a dwelling that advertises a home based business carried on in the dwelling, or on the land around the dwelling.</td>
</tr>
<tr>
<td>Internally illuminated sign</td>
<td>A sign illuminated by internal lighting or which contains lights or illuminated tubes arranged as an advertisement.</td>
</tr>
<tr>
<td>Major promotion sign</td>
<td>A sign which is 18 square metres or greater that promotes goods, services, an event or any other matter, whether or not provided, undertaken or sold or for hire on the land or in the building on which the sign is sited.</td>
</tr>
<tr>
<td>Panel sign</td>
<td>A sign with an advertisement area exceeding 10 square metres.</td>
</tr>
<tr>
<td>Pole sign</td>
<td>A sign: a) on a pole or pylon that is not part of a building or another structure; b) that is no more than 7 metres above the ground;</td>
</tr>
</tbody>
</table>
### Sign term | Definition
--- | ---
c) with an advertisement area not exceeding 6 square metres; and
d) that has a clearance under it of at least 2.7 metres.

**Promotion sign**  
A sign of less than 18 square metres that promotes goods, services, an event or any other matter, whether or not provided, undertaken or sold or for hire on the land or in the building on which the sign is sited.

**Reflective sign**  
A sign finished with material specifically made to reflect external light.

**Sign**  
Includes a structure specifically built to support or illuminate a sign.

**Sky sign**  
A sign:
a) on or above the roof of a building, but not a verandah;
b) fixed to the wall of a building and which projects above the wall; or
c) fixed to a structure (not a building) so that part of it is more than 7 metres above the ground.
LAND USE TERMS

The table to this clause lists terms which may be used in this planning scheme in relation to the use of land. A term describing a use or activity in relation to land which is not listed in the table must not be characterised as a separate use of land if the term is obviously or commonly included within one or more of the terms listed in the table.

Meaning of terms

A term listed in the first column, under the heading "Land use term", has the meaning set out beside that term in the second column, under the heading "Definition".

No definition of listed term indicates ordinary meaning

A term listed in the first column, under the heading "Land use term", which does not have a meaning set out beside that term in the second column, under the heading "Definition", has its ordinary meaning.

Terms which specifically include other listed terms

A term listed in the first column, under the heading "Land use term", which has other terms listed beside it in the third column, under the heading "Includes", includes any term so listed in the third column and any term included within that term in the third column, but does not include any other term listed in the first column.

A term listed in the first column which has other terms listed beside it in the third column may also include other terms which are not listed in the first column.

All terms listed in the third column are also listed in the first column.

Terms which do not specifically include other listed terms

If a term listed in the first column, under the heading "Land use term", does not have any term listed beside it in the third column, under the heading "Includes", that term does not include any term listed in the first column.

However, a term listed in the first column which does not have any term listed beside it in the third column may include other terms which are not listed in the first column.

Terms which are included within other listed terms

A term listed in the first column, under the heading "Land use term", which has a term listed beside it in the fourth column, under the heading "Included in", is included within the term so listed in the fourth column and any term which includes that term in the fourth column.

All terms listed in the fourth column are also listed in the first column.

Terms which are not included within other listed terms

If a term listed in the first column, under the heading "Land use term", does not have a term listed beside it in the fourth column, under the heading "Included in", that term is not included within any other term listed in the first column.

</table>
NESTING DIAGRAMS

The information in the table to Clause 73.03 is set out in the following diagrams as a means of indicating the nesting of land use terms.

The table to Clause 73.03 prevails if there is any inconsistency between the table and the diagrams or list.

Land use terms that are not nested are listed at Clause 73.04-18.

Land use terms in bold font are defined in Clause 73.03.

---

Accommodation group

- Camping and caravan park
- Corrective institution
  - Dependent person's unit
    - Bed and breakfast
  - Dwelling
    - Caretaker's house
- Group accommodation
- Host farm
  - Residential aged care facility
  - Community care accommodation
  - Residential building
    - Residential hotel
    - Motel
  - Residential village
    - Rooming house
  - Retirement village
73.04-3  Agriculture group (sub-group of Animal production)

73.04-4  Child care centre group

73.04-5  Education centre group
Industry group

- Materials recycling
- Refuse disposal

- Industry
  - Research and development centre
    - Abattoir
    - Sawmill
      - Car wash
      - Dry cleaner
    - Service industry
      - Motor repairs
      - Panel beating

- Transfer station
Leisure and recreation group

- Major sports and recreation facility
- Race course
- Indoor recreation facility
- Dancing school
- Open sports ground
- Amusement park
- Golf course
- Outdoor recreation facility
- Golf driving range
- Paintball games facility
- Restricted recreation facility
- Zoo
- Motor racing track
Earth and Energy Resources Group

- Mineral exploration
- Mineral extraction
- Stone exploration
- Stone extraction
- Greenhouse gas sequestration exploration
- Greenhouse gas sequestration
- Geothermal energy exploration
- Geothermal energy extraction
- Petroleum exploration
- Petroleum extraction
73.04-10 Place of assembly group

- Amusement parlour
- Carnival
- Cinema
- Circus
- Drive-in theatre
- Art gallery
- Place of assembly
- Exhibition centre
- Museum
- Function centre
- Conference centre
- Hall
- Reception centre
- Library
- Nightclub
- Place of worship
- Restricted place of assembly
Recreational boat facility group

- Boat ramp
- Slipway
- Jetty
- Mooring pole
- Pier
- Pontoon
Retail premises group

- Convenience restaurant
- Hotel
- Restaurant
- Take away food premises
- Tavern
- Betting agency
- Gaming premises
- Garden supplies
- Plant nursery
- Manufacturing sales
- Market
- Motor vehicle, boat, or caravan sales
- Car sales
- Postal agency
- Primary produce sales
- Shop
  - See separate diagram for the sub-group of Shop
- Trade supplies
- Timber yard
Retail premises group (sub-group of Shop)

- Adult sex product shop
- Beauty salon
- Bottle shop
- Convenience shop
- Dry cleaning agent
- Department store
- Hairdresser
- Laundromat
- Restricted retail premises
  - Equestrian supplies
  - Party supplies
- Supermarket
73.04-14 Transport terminal group

21/09/2018
VC150

Transport terminal

- Airport
- Bus terminal
- Heliport
- Railway station
- Road freight terminal
- Wharf

73.04-15 Utility installation group

21/09/2018
VC150

Utility installation

- Minor utility installation
- Water retarding basin
- Reservoir
- Telecommunications facility
Land use terms that are not nested

Art and craft centre
Brothel
Car park
Cemetery
Cinema based entertainment facility
Crematorium
Display home
Emergency services facility
Freeway service centre
Funeral parlour
Helicopter landing site
Home based business
Hospital
Natural systems
Research centre
Saleyard
Service station
Sign
Tramway
Veterinary centre
Winery
APPLICATION OF ZONES, OVERLAYS AND PROVISIONS

The schedule to this clause must include a general explanation of the relationship between the Municipal Planning Strategy, the objectives and strategies in Clauses 10 to 19 and the controls on the use and development of land in this planning scheme.

A planning authority must take into account the schedule to this clause when it prepares an amendment to this planning scheme.

A responsible authority must not take into account the schedule to this clause when it makes a decision under this planning scheme.
The schedule to this clause may specify the planning authority’s approach to further strategic work. A planning authority may take into account the schedule to this clause when it prepares an amendment to this planning scheme. The responsible authority must not take into account the schedule to this clause when it makes a decision under this planning scheme.
