SANDSTONE ISLAND

This Clause provides local content to support all Clauses of the State Planning Policy Framework.

21.11-1

20/01/2011
C2

Overview

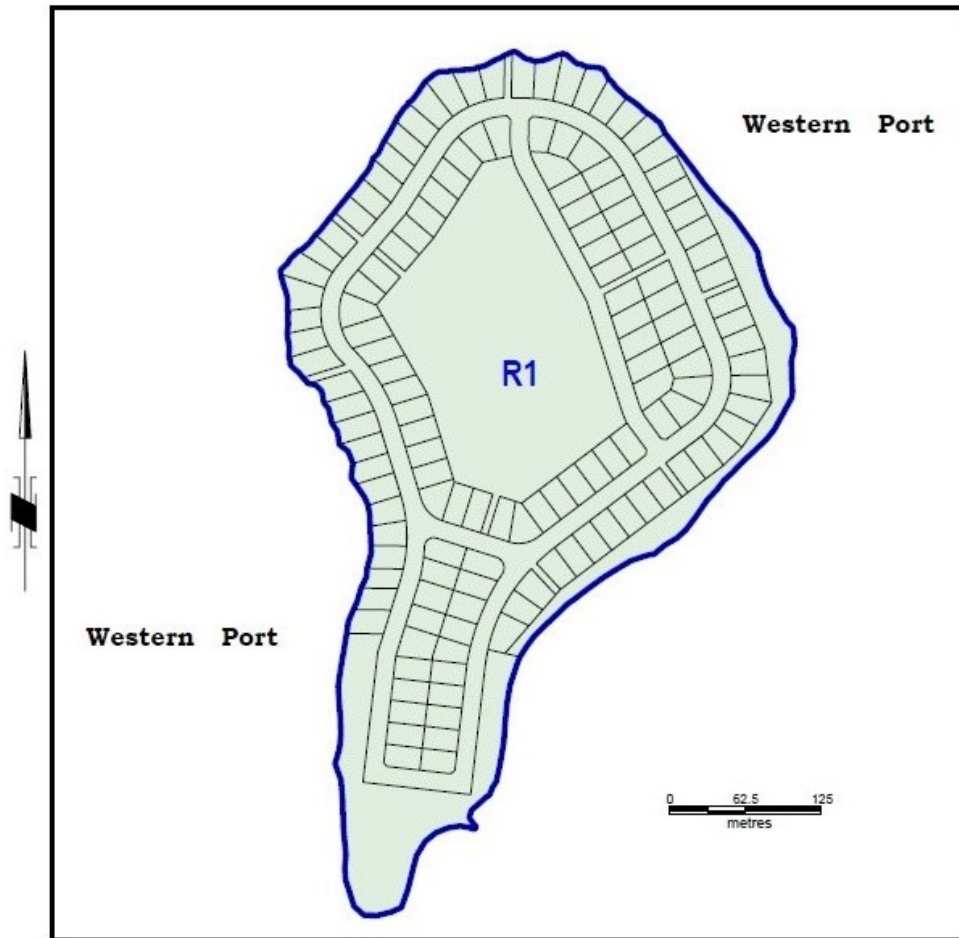

Sandstone Island is rural freehold land held in single ownership and is isolated and constrained by its geographical location and lack of infrastructure. The Island is bordered by steep, grassy coastal bluffs. The Island contains an existing dwelling and shed and there is no provision for tourism or commercial uses.

Key issues

- Responding to the effect of any change in land use or development on the Island’s environmental and coastal values.
- Managing constraints of access, isolation and infrastructure that impact directly on the capacity of the Island to accommodate use and development.
- Maintaining the contribution of the Island to the biodiversity of Western Port Bay.
- Retaining the Island in single ownership to limit the opportunity for future development.

Objective 1	To retain the Island’s contribution to the biodiversity values of Western Port Bay.
Strategy 1.1	Ensure that use or development does not adversely impact on the Island’s contribution to flora and fauna values of Western Port Bay.
Objective 2	To protect and enhance the environmental values of the Island.
Strategy 2.1	Strongly discourage applications for subdivision that may create potential for multiple ownerships.
Strategy 2.2	Restrict use and development in accordance with the Restructure Overlay. The Sandstone Restructure plan allows for one dwelling on a restructured lot in accordance with the environment and land capabilities, including infrastructure constraints.

**SANDSTONE ISLAND RESTRUCTURE PLAN
OCTOBER 1999**

Implementation

These strategies will be implemented by:

Zones and overlays

- Applying the Restructure Overlay to the old and inappropriate subdivision and to the environmentally sensitive and less accessible areas to ensure development occurs in accordance with the land's capability.
- Applying the Rural Conservation Zone to ensure that land use and development is sympathetic to the environmental and infrastructure constraints of the Island.
- Applying the Significant Landscape Overlay to areas with high scenic values and significant landscape areas.
