- To maintain the predominant low scale nature of the area.
- To ensure development supports high levels of pedestrian amenity related to access to sunlight and sky views and a pedestrian friendly scale.

2.0 Buildings and works19/01/2006
VC37

An application must be accompanied by a site analysis and urban context report which demonstrates how the proposed building or works achieve each of the Design Objectives and Built Form Outcomes of this schedule, and any local planning policy requirements.

In calculating the building height based on storeys, the following floor to floor dimensions should apply:

- 3.5 metres for residential use,
- 4 metres for non-residential use.

Buildings or works should not exceed the Maximum Building Height specified in the table to this schedule.

An application to exceed the Maximum Building Height must demonstrate how the development will continue to achieve the Design Objectives and Built Form Outcomes of this schedule and any local planning policy requirements.

Building height is the vertical distance between the footpath or natural surface level at the centre of the site frontage and the highest point of the building, with the exception of architectural features and building services.
