Decision guidelines

Before deciding on an application to use land the responsible authority must consider, as appropriate:

- The interface with adjoining zones, especially the relationship with residential zones.
- Whether the Accommodation use supports the tourist emphasis of the locality.
- The need to restrict land uses likely to generate high rates of vehicle movement to sites with direct frontage to main roads.

- The effect that existing uses may have on the proposed use.
- The drainage of land.

#### Decision guidelines

Before deciding on an application to subdivide land the responsible authority must consider, as appropriate:

- Clause 56.
- The suitability of the subdivision design to accommodate a range of land uses.
- The effect the subdivision will have on the potential of the area to achieve the purpose of this schedule to the zone.
- Provision for vehicles providing for supplies, waste removal and emergency services and public transport.

### Buildings and works

All buildings and works must be maintained in good order and appearance to the satisfaction of the responsible authority.

An application to construct a building or to construct and carry out works (except for minor buildings and works associated with an existing building) must be accompanied by a site analysis and design response demonstrating how the proposal addresses:

- The provisions of the zone and schedule.
- The constraints of the site and locality.
- The surrounding streetscape and vegetation character.
- The coastal town character of Anglesea.
- The Streetscape and Landscaping Policy (Clause 22).
- Clause 54 or 55.

**Decision guidelines**

Before deciding on an application to construct a building or to construct and carry out works the responsible authority must consider, as appropriate:

- Whether development demonstrates a high quality of design that respects and enhances the town character.
- The flexibility of the building design and floor plan to accommodate a range of uses over time.
- The objectives and standards of Clauses 54 or 55, as appropriate, should be used to assess amenity standards for all types of Accommodation.
- The integration of car parking and loading areas with the building design and layout so as to avoid excessive voids and potential vehicle-pedestrian conflict.
- Whether the buildings should incorporate noise attenuation measures into the design.
- All types of Accommodation must provide a high level of amenity for occupants and be designed according to principles of energy and water efficiency.
- The movement of pedestrians and cyclists, and vehicles providing for supplies, waste removal, emergency services and public transport.
- The provision of car parking.
- The streetscape, including the conservation of buildings, the design of verandahs, access from the street front, protecting active frontages to pedestrian areas, the treatment of the fronts and backs of buildings and their appurtenances, illumination of buildings or their immediate spaces and the landscaping of land adjoining a road.

- Whether advertising schemes incorporate graphics, symbols and colours that reflect themes of the beach, ocean and natural environment as well as being dominated by images and pictures rather than words and logos.
- The need to discourage above-verandah signs in Precinct T3, and in other precincts the need to ensure above-verandah signs do not project above the wall or parapet of the building to which they are attached.
- Whether the level of illumination of flood-lit and Internally-illuminated signs cause detriment to the amenity of nearby dwellings.
- The need to discourage pole signs and promotion signs.
