MANAGING GROWTH

Supply of urban land

Objective

To ensure a sufficient supply of land is available for residential, commercial, retail, industrial, recreational, institutional and other community uses.

Strategies

Ensure the ongoing provision of land and supporting infrastructure to support sustainable urban development.

Ensure that sufficient land is available to meet forecast demand.

Plan to accommodate projected population growth over at least a 15 year period and provide clear direction on locations where growth should occur. Residential land supply will be considered on a municipal basis, rather than a town-by-town basis.

Planning for urban growth should consider:

- Opportunities for the consolidation, redevelopment and intensification of existing urban areas.
- Neighbourhood character and landscape considerations.
- The limits of land capability and natural hazards and environmental quality.
- Service limitations and the costs of providing infrastructure.

Monitor development trends and land supply and demand for housing and industry.

Maintain access to productive natural resources and an adequate supply of well-located land for energy generation, infrastructure and industry.

Restrict rural residential development that would compromise future development at higher densities.

Policy guidelines

Consider as relevant:

- Victorian Government population projections and land supply estimates.

Structure planning

Objective

To facilitate the orderly development of urban areas.

Strategies

Ensure effective planning and management of the land use and development of an area through the preparation of relevant plans.

Undertake comprehensive planning for new areas as sustainable communities that offer high-quality, frequent and safe local and regional public transport and a range of local activities for living, working and recreation.

Facilitate the preparation of a hierarchy of structure plans or precinct structure plans that:

- Take into account the strategic and physical context of the location.
- Provide the broad planning framework for an area as well as the more detailed planning requirements for neighbourhoods and precincts, where appropriate.
- Provide for the development of sustainable and liveable urban areas in an integrated manner.

- Assist the development of walkable neighbourhoods.
- Facilitate the logical and efficient provision of infrastructure.
- Facilitate the use of existing infrastructure and services.

Sequencing of development

Objective

To manage the sequence of development in areas of growth so that services are available from early in the life of new communities.

Strategies

Define preferred development sequences in areas of growth to better coordinate infrastructure planning and funding.

Ensure that new land is released in areas of growth in a timely fashion to facilitate coordinated and cost-efficient provision of local and regional infrastructure.

Require new development to make a financial contribution to the provision of infrastructure such as community facilities, public transport and roads.

Improve the coordination and timing of infrastructure and service delivery in areas of growth.

Support opportunities to co-locate facilities.

Ensure that planning for water supply, sewerage and drainage works receives high priority in early planning for areas of growth.

Policy documents

Consider as relevant:

- Any applicable Growth Area Framework Plans (Department of Sustainability and Environment, 2006)
- *Precinct Structure Planning Guidelines* (Growth Areas Authority, 2009)
- *Ministerial Direction No. 12 – Urban Growth Areas*
- *The Victorian Transport Plan* (Victorian Government, 2008)
