The Area in the first column of the Table is the Charge Area as shown on the Charge Areas Plan attached to this schedule and shown in the DCP.

The Development Contribution for each demand unit must be adjusted as follows:

- In relation to the costs associated with all infrastructure items other than land, the cost must be adjusted and the contribution amounts recalculated according to the following method:
 - The capital costs of each infrastructure item must be adjusted by reference to the Producer Price Indexes Australia, General construction (41) Victoria (Table 15 – Selected Output of Division E Construction – Building Construction Victoria (for

buildings) and Roads and Bridges Victoria (for roads, intersections, trails, bridges, etc.), published by the Australian Bureau of Statistics - Catalogue No. 6427.0.

- The revised infrastructure costs and the adjustment of the contributions must be calculated as at 1 July in each year.
- In relation to the cost of land required under the DCP, the land value must be adjusted by adopting a revised land value for each parcel of land to be acquired based on the same valuation principles used for the original valuations.
- The revised land value and the adjustment of the contributions must be calculated as of 1 July in each year.
- Within 14 days of the adjustments being made, the Responsible Authority must publish a notice of the amended contributions in a newspaper circulating in the municipality.
