Air quality management

Objective

To assist the protection and improvement of air quality.

Strategies

Ensure that land use planning and transport infrastructure provision contribute to improved air quality by:

- Integrating transport and land use planning to improve transport accessibility and connections.
- Locating key developments that generate high volumes of trips in the Central City, Metropolitan Activity Centres and Major Activity Centres.
- Providing infrastructure for public transport, walking and cycling.

Ensure, wherever possible, that there is suitable separation between land uses that reduce air amenity and sensitive land uses.

Policy documents

Consider as relevant:

- *State Environment Protection Policy (Air Quality Management)*
- *Recommended Buffer Distances for Industrial Residual Air Emissions* (Environment Protection Authority, 1990)
